CURIOUS SIGHTS WHICH MEET A STRANGER'S EYE.

A Garcia (Mexico) correspondent of the Philadelphia Times writes : Many things strike with a pleasing sense of novelty on the eye and ear of one who, coming straight from the busy haunts of more civilized man, finds himself of the smaller Mexican towns. The houses, to begin with, are unlike anything he has left behind him. Flatroofed, one-storied edifices, they are, for the most part, built of "adobe," or sun-dried mud bricks. The poorer pleasantly with the flerce glare outside. The better class ones are plastered and whitewashed or painted dull pink or purple or yellow, or ornamented with designs much resembling wall-paper, and giving the house the appearance of having been turned inside out. All windows have projecting frames heavily barred with wood space above doors and windows is in raised plaster, and the great wooden gates which close the entrance to the patio," or inner court, round which all better-class houses are built, are often quaintly and richly carved.

Very quiet and strangely free from all appearance of hurry and harsh noises are the streets. Carts are very few and far between, and those that do make their appearance, at long intervals, are heavy two-wheeled wooden vehicles, drawn by one or more yoke of oxen, and their gentle rumbling, as they are slowly dragged along, can hardly be termed a noise, certainly not a harsh one. The streets are sandy, for the most part, and the foot passengers lightly shod, many of them in sandals and the younger ones bar ot-

ed, and all these make little or no make as they pass quietly to and fro. Neither can the church bells ringing for matins and even-song be strictly called a noise.

No one seems in a hurry in these places. And why should they be? The necessaries of life are few and very cheap, and the extra dollars needed for the Sunday cock-fight or the weekly game of "monte" of the men, and the fan or comb or silver shawl-pin of the women, easily earned, and so the good man is not obliged to walk fast on off days when he is in town an I goes round to the " matanza," or butcher's shop, to buy a piece of meat for dinner, and there is not the least reacon why he should not stop for twenty minutes on the sidewalk and talk to Juan or Jose, whom he has eacountered on the way, or spend half an hour in at the "tendajo" hanging over the counter and discussing a glass of mescal and the crops with Tomas or Telesforo. The good wife, too, rises early, and the day is still young by the time she has fetched water from the river and swept the earthen floor of the one living room and the "patio" outside and given the good man his breakfast and dispatched him to the fields, and she has ample time to don her black head-shawl and trot off to morning service, and by no means hurries herself, as she walks home again and drops Donnas Juana and Maria and Victoriana at their respective doors, stopping awhile to exchange a few

day meal. eating dinner and taking the subsequent "siesta") is the quietest and laziest time of all. Then, indeed, does the little town seem like a city of the dead.

Between 3 and 4 o'clock the town begins to wake up slowly. At 4, or thereabouts, comes "merienda," a sort of afternoon tea, consisting of coffee and cakes. At 5 the women dress and go out visiting. At 7 the bells sound for "oracion," or evening service; at 8 comes supper, and by 9 all is still as the grave, except on Sunday nights, when the band plays in the little "plaza," or moonlight nights, when the rich notes of the mocking bird fill the silence and make the exiled Englishman think of nightingales and home. Of the animal life in the streets, the dogs, by their number and infinite variety of size and shape, deserve mention. Many of them have an evident and strong admixture of coyote blood in their veins. The large, pricked-up ears, the bushy, drooping tail, the slinking gait, all are there, and the resemblance in some cases is most striking. The novelty to the stranger in this line is the pelon, or hairless dog. Sharpnosed, short-legged, long-bodied, in size equal to a small fox-terrier, bis blue-black body is as innocent of hair as the palm of one's hand, save and except on the top of his head and the extreme tip of his tail, where he has tufts of dirty yellow bristles which give the finishing touch to his generally disgusting appearance. This interesting animal is said by the Mexicans to be good for the rheumatism. The elderly Mexican female a flicted in that way, when she feels the premonitory twinges, takes to her bed in company with her "pelon." When she gets up again she has got rid of her troubles and the dog is laid up. How he in turn gets rid of the complaint is not generally known.

Children are numerous, especially around the poorer houses. They are of all complexions, from brownish- square miles. black, with jet-black hair and eyes, to fair-skinned, fair-haired and blue-eyed. olive complexioned oval faces, dark | source of supply.

LIFE AMONG THE MEXICANS. | melting eyes and graceful forms bring to one's mind the "angeli sunt" of Pope

Of the elder folk the most picturesque are the "vaqueros" and teamsters in their shirts of leather or dingy Adobe Huts.—The People and Their Habits linen, with yellow leggings and great —What the Wemen Wear. felt or straw sombreros. Of the younger women many are pretty, with fine eyes and hair. Their complexions, however, are not good and they seem to fade and grow old early. All the women wear over their heads light shawls, either of dull biue cotton stuff or black, and for the first time in the streets of one these they drape about heal, shoulders and chest in a most effectively picturesque way. The rest of their garments are of cotton or some thin-textured black material, and seem to dispose themselves always more or less gracefully on the persons ones have no opening except the one of their wearers. If the Mexican door leading from the street, and the women only knew it, they look better cool gloom of their interiors contrasts in black than any other color. Unfortunately they don't know it and some of them will launch out into colors with most disastrous results as far as appearance goes.

Finally the coloring of the background which frames in all these pictures is, to American or European eyes, strange and not without its charm to some of them. The dull white of or protected by iron gratings. The the dusty streets, and the gray of the adobe walls, and the dull red, dull blue often tastefully decorated with designs and white of the plastered houses harmonize well with the pale blue of the sky and the darker blue and gray of the stony, barren hills all round. Against these the dark green masses of the "palmas" and pecan trees stand out in bold relief, and the whole is lighted up by the bright red of some Mexican's blanket, the little crimson flag at the end of a long reed which projects from the window of some butcher's shop or the scarlet of the pomegranate blossoms which hang in clusters over the garden walls.

#### The Paradise Fish.

The paradise fish have very large fins, less developed in the female. The brownish color of the upper side changes into a greenish gray on the lower side; the markings consists of changeable yellowish green or blue and red cross lines. Their length is from eight to nine-centimeters.

Very little is known of these fish in their free life. They are universally kept in captivity in China, and treate1 as our gold-fish, but are more easily propagated in a limited space.

They are better adapted for household pets than other fish of this class, as they can live in a much less quantity of water, and can remain out of the water for twenty minutes and more without injury. Giraud brought 100 of these fish from China, and although during the tedious journey he was not able to give them sufficient room or the necessary care and nourishment,

twenty-two of them lived. Benecke says that in May of the year 1878 he obtained a pair of paradise fish. They were placed in a basin containing about forty liters of water. They immediately went to work to devour the small crawlish and larve of insects which had been placed in the vessel. After these were consumed two crawfish, water fleas and mussels were put in. They mussels they had not received before, and evidently had never eaten them, for at first they only ook hold of the little anima's and then released them with a shake of the it is more brilliant than the day. head, but after a day or two they only ate the mussels, leaving the water fleas placed in the basin unmolested. One day no mussels could be obtained, and they ate greedily not only small but very large angle-worms, from five to parting remarks with each; ample time eight centimeters long and two millihas she, too, to prepare the inevitable meters thick. They always rejected the intestines of the worms. When tortillas, beans and coffee for the midthe worms were put in the basin as From noonday till between 3 and 4 they were taken from the ground they o'clock in the afternoon (during which | would shake them two or three times, hours the inhabitants are all indoors then let them go, then throw them around in the water, in order to shake off the dirt before eating them. If the worm struggled, they would sling it against the water plants or the sides of the basin.

## Not a Native.

A man called on the secretary of state, and, drawing the high official aside, said:

"I heard somebody say that er man what was born in a fureign country could not be gov'ner of the Newnited States; is thar any truth in what I

"No one who was born in a foreign country can be President of the United States," replied the secretary.

"Wall, that strikes me purty hard, fur I ain't got nigh sich encouragement ter go to the night school what I jined some time ago. I don't say that I ever woulder been President, still I'd feel a heap better of I thought that the thing was in reach. Wall, sir, since I first heered that it bothered me powerful, an' my wife is so pestered that she's fallen away to a mere skeleton." "Where were you born?" asked the

"Down here in Saline county." "Saline county is not foreign," replied the secretary, with a smile. "You are a a native of the United States,

and are legible, so far as birth is con-

cerned, to the highest office in the land.

"Gimme your hand, pardner. You've lifted a load as heavy as a horse-block offen my shoulders. I'll go right home an' tell my wife, an' then buy her a head of cabbage, 'case she ain't eat nothin' since we heered the distractin' news. It'll be wuth a dollar to see that woman cat."-Arkansaw Traveler.

An electric light about the size of a small bean has been constructed and used successfully in illuminating interior portions of the human body.

One letter out of every 300 sent is unclaimed in the office to which it goes. One letter in 283 sent turns up at the dead letter office. One letter out of 3,100 sent is held for postage at the office of mailing, and this amounts to nearly 300,000.

The natives of Northern India have found light woolen clothing to be far more healthy and comfortable than the cotton which has been worn from time immemorial. In consequence, the manutacture of light, cheap woolen goods has greatly increased there.

A curious custom prevails along the seacoast of Massachusetts in regard to selling pools on fishermen-to see which one of them will catch the first fish while out on an excursion. In a number of the seaport towns regular exchanges are established, where this pool-selling goes on, and each man in every fishing excursion that goes out is bought up by the adventurous gamblers in the same manner that horses entered for a race are bought. These pools often run up as high as five or six hundred dollars each, according to the number of fishermen, and the first man that catches a fish is declared the winner, and his backer takes the pot; the man who gets second place, however, takes some share.

### WISE WORDS.

Be silent and safe; silence never betrays you.

Adliction, like the iron smith shapes as it strikes.

It is a crime to consider any wickedness a sign of ability. If you boast of a contempt for the world, avoid getting into debt. It is

giving to gnats the fangs of vipers. The temperate are the most truly luxurious. By abstaining from most things, it is surprising how many things we enjoy.

A loving act does more good than a flery exhortation. What mankind needs is not more good talkers, but more good Samaritans.

Old age is the night of life, as night is the old age of the day. Still, night is full of magnificence, and for many,

Aim high. You may not touch the mark, but by a high aim you will come nearer to it than by not trying at all. Then by making the effort many persons have come nearer to it than at first anticipated.

## A Chance for Inventors.

In the heavy thunderstorms which occurred in various parts of the country, says a New York Sun editorial, the lightning manifested its well-known adinity for petroleum. Three large oil tanks were struck. One of them was near Olean, in this State, another at Muncy Station, Penn, and the third in the yard of the Standard Oil company at Communipaw, N. J. This last one had very little oil in it, and was not consumed, but the others, with their contents, were burned.

The altractive influence exerted by petroleum, or its vapor, which renders these great oil tanks so liable to destruction by thunderbolts, does not seem to be very well understood. If The attractive influence exerted by seem to be very well understood. If it was, we should hardly be without any edicient means of guarding such structures against lightning. The subject is well worthy of attention and study on the part of men of science, At present the safeguards are so ina lequate that an o'l tank is not only very likely to be destroyed by any thunderstorm, but to act also as a firebrand to every building anywhere near

The inventor who devises a method which shall afford to oil tanks absolute protection against lightning, ought to be able to make a million of dollars by the invention.

What becomes of journalists?-Progress. They usually retire from the profession just as soon as they get rich, and live quietly but luxuriously until they die. Then they go to heaven. -Philadelphia News.

Our Progress.

As stages are quickly abandoned with the completion of railroads, so the huge, drastic, cathartic pills, composed of crude and bulky medicines, are quickly abandoned with the introduction of Dr. Pierce's "Pleasant Pur-cative Pellets," which are sugar-conted, and little larger than mustard seeds, but com-posed of highly concentrated vegetable exposed of highly concetracts. By druggists.

A VETERAN BENEFACTOR.

His Past Life, Present Pians, and What He Has to Say Upon a Subject That Astenished Him.

(New York Times)

Nearly forty years ago a young man, of amusual endowments, began to mold public opinion upon a subject of vital importance, Lake all pioneers, his early efforts were unsuccessful, but his ability and the value of his work soon won public confidence, and to-day there is not a village or hamlet in the country that has not been influenced by Dr. Dio Lewis. When, therefore, it was learned yesterday that he contemplated the establishment of a large magazine in this city, the fact was deemed so important that a representative of this paper was commissioned to see him and ascertain the truth of the rumor. Dr. Dio Lewis is a gentleman of sixty years Dr. Dio Lewis is a gentleman of sixty years and two hundred pounds, with snow-white hair and beard, but probably the most perfect picture of health and vigor in the metropolis. He is a living exponent of his teachings, and notwithstanding the amount of work he has already done, promises still greater activity for years to come. He re-ceived the interviewer most courteously, and

in reply to a question said:

"It is true I have come to New York to establish a menthly magazine. I have come there for the same reason that I went to Beston twenty-five years ago. Then Boston was the

twenty-five years ago. Then Boston was the best platform in the country from which to speak of education. New York has now become most hospitable to progressive thoughts and especially so to movements on behalf of physical training.

"I have reason to know the great and abiding interest of the American people in this subject. They have come to realize that the future of our country pivots upon our physical vitality, and especially upon the vigor of our women. My new magazine will bear the title 'Dio Lewis' Monthly,' and be devoted to Sanitary and Social Science. I hope through its pages to inaugurate a new ope through its pages to inaugurate a new eparture in hygiene."

'Have you not written several books on

"Yes, nine volumes, and some of them like 'Our Girls,' published by the Harpers, have had an enormous circulation, but the best work of my life I shall give the world in the new magazine. Forty years of skirmishing ought to conclude with ten years of organized warfare."

warfare."

"Doctor, what is the occasion of this new interest in health questions?"

"It has come through suffering, which seems the only road to self knowledge. The stomach, heart, kidneys or liver fall into trouble, happiness is gone, and then people give attention to their health."

"Which of the second state of the secon

"Which of these organs is most frequently the victim of our errors?" asked the reporter.

"Within the last few years diseases of the kidneys have greatly multiplied. When I was engaged in practice, thirty-five and forty years ago, serious disease of the kidneys was rare; but now distressingly frequent and fatal."

"To what do you attribute this great increase of kidney troubles?"
"To the u-e of stimulating drinks, adulterated food and irregular habits of life." "Doctor, have you any confidence in the remedy of which we hear so much nowadays, Warner's Safe Cure?"

"I believe in the ounce of prevention, rather than in a ton of cure."

"But have you noticed the remarkable testimonials of Warner's remedy?"
"I have, and confess that they have puzzled and astonished me. The commendations of proprietary medicines usually come from of proprietary medicines usually come from unknown persons residing in back counties. But I see in our most reputable newspapers the warmest praise of Warner's Safe Corofrom College Professors, respectable physicians, and other persons of high intelligence and character. To thrust such testimony aside may be professional, but it is unmanly. No physician can forget that valuable additions to our Materia Medica have sprung from just such sources. I was so impressed with this cloud of witnesses that I purchased some tottles of Warner's Safe Core at a neighboring drug store, and analyzed one of them to see if it contained anything poisonom. Then I took three of the prescribed doses at once, and found there was nothing injurious in it. and found there was nothing injurious in it. I do not hesitate to say that if I found my kidneys in serious trouble, I should use this remely, because of the hopelessness of all ordinary treatment, and because when a hundred intelligent reputable persons unite in the statement that a certain remedy has cured them of a grave malady, I choose to

believe that they speak the truth.

But as you may know, my great interest in life lies in prevention. For forty years I have labored in this field. One of the phases I my work in New England was the estab lishment of the Ladies' Seminary at Lexington, Mass. My aim was to illustrate the possibilities in the physical training of girls during their school life. This institution became, before I left it, the largest and most became, before I left it, the largest and most successful seminary for young women owned and managed by one person in our country. I sat down to dinner every day with a family of two hundred persons. The remarkable results of this muscle training among girls were given in my paper published in the North American Review of December, 1882. Besides I stablished the Normal Institute for Physical Training in Boston, and for two for Physical Training in Boston, and for ten for Physical Training in Boston, and for ten years was its President and Manager. Dr. Walter Channing, Dr. Thomas Hoskins, Pro-fessor Leonard and others were among its teachers, and more than four hundred percons took its diploma and went out into all parts of the land to teach the new school of gymnastics. And now the years left to me I propose to devote to the magazine which I have come here to establish. It will be the largest periodical ever devoted to this field o interature, and will present the hundred and one questions of hygiene with the simplicity of a child's talk. To this end all so-called learning will be subordinated. The magazine will be more or less illustrated, and will

important. It is gratifying to know that the lifelong experiences of a gentleman who stands without a peer in successfully demonstands without a peer in successfully demonstrating the principles of hygiene; whose heart has always been in sympathy with the afflicted, and whose brain has ever been active in planning for their relief, are to be given to the public through the pages of a magazine. And it is specially significant and proof positive of rare merit that a proprietary medicine, even with such high standing as Warner's Safe Cure is known to have, should be indersed and recommended by a man so able, so reputable and of such national renown as Dr. Dio Lewis.

A Wemun's Experience.

Mrs. WILLIAM DOWNER, of Unbridge, Mass., writes in March 15, 1850, as follows: "During the past three years I have been a great "During the past three years I have been a great sufferer from a complication of diseases which builded the skill of the most experienced doctors, as I could not obtain permanent relief by their treatment and prescriptions; and I have also tried many so-called curve in the medicine line, but could get no relief. The pains, achies and weakinss increased so rapidly and constantly that I was so reduced in strength as to be unable to leave the bed, and the doctors informed me that there was no hope of a recovery. In this exhausted and discouraged condition a dear friend persuaded me to use Hunt's Remedy, and after taking it only three days I commenced to get better, and to my great joy and delight I have continued to improve constantly by its delight I have continued to improve constantly by its use, until now, after having taken the remedy only a few weeks, I am able to be about my house again, and less weeks, I am able to be about my house again, and am now doing my housework. My lame back is cured, the severe pains have disappeared, and I am now in better health than for many years, and beg this privilege of gladly recommending Hunt's Remedy to all who are affected with any disease of the kidners or liver, and I also highly recommend it for the attacks of sick headsche. My husband also has experienced a very great benefit to his health by the use of this most valuable medicine. Hunt's Remedy."

"Our Fing is Still There." Mr. S. B. Longrettow, Augusta, Me., east side fiver, writes us under date of April 15, 1983: "To whom it may concern: This may certify that two years ago I was very badly afflicted with kidney and urinary difficulties, which extended through the system and laid me up for weeks, so that I could do no work. I and laid me up for wooks, so that I could do no work. I had the most skillful physician in town, who gave me no assistance. Hearing of Hunt's Remedy, I got a bottle, not half of it cared me entirely, so that I have been well over since. The other half I gave to a neighbor who was afflicted much as I was, and it restored him to health. I can truly say Hunt's Remedy has been of great and incurrenced in worth to me."

Fa'd She: "Dr. Ballon mays it is the best of all famoy medicines, for the following good reasons:

Recause it is a remody that acts on the Liver. Fowels and Kidneys at the same time, making seat estimate in ading astire to three of disease. Because it is a wonderful tonic and renovator. It expels the poisonous turnors of the blood, cleanses the fiver, regulator the bosonic restores the kidneys to healthy action, and drives out the despondency and glosm of disheath.

Recause it has been tried and proved. Its enormous sale is not caused by extravigant advertising and the perishent pushing of its name before the public on every rock, fence and bridge, but the domaid has been created by its own virtues and the thousands of remarkable curse it has performed.

If no have trouble with your Kidneys, Liver or Bowels you will find it the remedy you need."

SAID HE, a week later.

"Mary, You Are an Angel
For urging me to get that Kidney-Wort, it has fixed mass mixely that I believe all they dram, every one should use it as ASPRING CLEANSER." YES, I WILL GET IT AT ONCE."
