News comes down from Salmon Creek that Prothontary Shawkey is the father of a bouncing new boy. Well, we generally smoke on such occasions; don't forget it, friend S.

If you stop at a hotel and use one of their envelopes always mark out the name and insert your own if you want your letter again if it fails to reach the person addressed.

Mr. H. M. Range, of Hickory township, departs next Friday for Iowa, where he will make his future home, and where he has a sister living. He takes with him his mother whom he has taken care of for several years past. Mr. Range is an industrious, steady-going man, and in his departure our county loses a good citizen who bears with him the good wishes of all his old neighbors. His post office address will be Postville, Alamakee Co. Iowa.

Postmaster General Gresham knows a thing or two. He issued an order awhile ago forbidding postmasters leaving their businesses without his consent. He thinks when a man holds an office he should discharge its duties. Later he issues another order forbidding postal clerks from reading other people's papers. Won't that be a little rough on the average country postmaster who don't take his county paper? What will he do now?—Warren Mail.

The base ballists who went to Pleasantville last Saturday to play with a nine of that place got badly scooped, the score standing 24 to 9 in favor of the "other fellows." The game was virtually lost on the second inning, when our boys allowed their opponents to score 13 runs. After that the playing was about equal on both sides. The boys from here claim that the Pleasantvillians run in some foreign players on them, hence their severe defeat. A return game was arranged to take place here a week from next Saturday.

Charles H. Stephens, a prominent Philadelphia artist, arrived in town last week to prepare the illustrations for an article dealing with the picturesque features of rafting on the Allegheny river, now being written by William Willard Howard, of the editorial staff of the Philadelphia Times. The article will be the leading feature of the October issue of The Manhattan illustrated magazine of New York.—Warren Mail. Why didn't you send the artistic gentleman down here where they could get some idea of the rafting business?

The new school house is a "go," the voters of Tionesta borough having so decided last Saturday by a vote of 40 to 13 in favor of the erection of it. This verdict is so decisive that it leaves no room for doubt as to the sentiments of the people on the subject. The vote was not a large one, yet from all the information we can gather the majority of those who failed to get to the polls would have voted in the affirmative and thus made the matter even more decisive. As it is the directors are relieved of much responsibility in the premises, and the people have indicated their wishes in no uncertain way; the board can therefore proceed, feeling that the people are with it. We believe the election must be confirmed by the Court before any definite action can be taken, and as that can not be done before the last of September it is not likely that much will be accomplished in the way of building before next spring.

Our minister has gone off on his annual vacation and the church going people are taking a rest.

Tom Machesney has taken a position as salesman for a Fredonia company. We do not wish to head-head an advertisement for the concern just here, but let us remark that the business is strictly moral. The article for which Tom will devise tales and endue cuffs and stand collar is one of necessity, morality, gallantry, and the great civilizer of humanity.

OIL NOTES.

The most important well that has come in during the past week is Porcupine No. 9. Since Porcupine No. 8, on 3194, was opened the oil trade has been anxiously awaiting the result of the next venture to the north of it, which is No. 9. Porcupine No. 8 being a larger well than was expected from its location there has been a great interest manifested in its result, as determining whether there was an important addition to the Balltown field to the north of present developments. Its location is 400 feet north of No. 8, so that the distance was hardly sufficient to make the well a good test, unless it had proven to be much larger or smaller than No. 8. The No. 9 was opened unexpectedly to the trade Friday, and its showing is similar to its neighbor on the next location, and would not seem to indicate a very close approach to the edge of the belt in that direction as yet. The first hour it made thirty-six barrels, the second hour thirty-five barrels, and the next hour about the same. Porky eight made over forty barrels the first hour, and put 800 barrels in

ING.

the tank the first twenty-four. It is now doing 330 barrels. No. 9 held up strongly for the first three hours. It will be remembered that Porky eight is 400 feet north of No. 6, a light producer, and No. 9 is 400 feet north of No. 8, so that the developments of these two wells makes a belt over 1000 feet from No. 6, allowing some for the extension beyond No. 9.

A later report from Porcupine No. 9 puts its production at 500 barrels the first seventeen hours.

Porcupine Oil Co. is building a rig for No. 10 at which the drill will be started to-day. It is located 400 feet north of No. 9. They are also locating a rig along the north line of the tract 800 feet north of No. 4; another 400 feet west of the latter, and still another 400 feet west of that. These are for the purpose of finding where the belt runs across the end of the lot.

Grandin No. 3 which was torpedoed last week, made 525 barrels the second twenty-four hours. Thursday afternoon it was making eighteen barrels an hour. This is undoubtedly the best well in the field, and one of the best ever struck in the oil regions. Since it was first opened it has produced nearly if not quite 100,000 barrels of oil.

A late gauge of the Cooper tract put the production of that district at 3,200 barrels a day, from 101 wells.

We notice that George Hunter or some one else is fixing up the old rig below depot, opposite town, for the purpose, we presume, of drilling the well deeper.

THE LATEST.

Balltown No. 6, which is located opposite Porky No. 8, and is the next location north of Balltown No. 3, was opened last evening after the market closed. At three feet in the sand it was showing light, but improved with deeper drilling and began flowing strong. The first hour it made fifty-four barrels and one hundred and four barrels the first two hours.

McCalmont No. 5, in the Cooper district, struck the second sand yesterday and began flowing strong. The first hour it made fifty-two barrels. It is located in the southern part of division 12 of the Henry lands, just north of the Syndicate property, and directly south of the producing well on 440.

A Case That Puzzled the Whole Faculty. Mrs. Milo Ingram gave the names of some of the most reputable physicians in the two cities Pittsburgh and Allegheny, to whom she had paid large sums of money for treatment, but she rapidly grew worse. She was then taken to the most reputable physician and surgeons in New York, but with no better success. They had all pronounced it cancer and declared she must die. The flesh of her breast was eaten away down to the ribs; the breast bone was laid bare and the disease made its way upwards, causing the breast to become detached from the wall of the chest in hanging loose from above. See page 25 of Dr. Hartman's "Wills of Life," how Patena cured her. They are given away by Drug-gists [gratis].
