# MAKING ICE BY MACHINERY they are filled with clear water, but in

## NOW WATER CAN BE FROZEN EVEN IN THE ROTTEST COUNTRIES.

Fish and Birds preserved in the Center of Transparent Cubes of Ice-Wonderful Ice Caverns.

"The latest tee scheme, "said a man interested in the ice business to a New York Sus reporter, "is to build a mil-road from the top of some of the mountains near the equator, such as the Andes, lor d the cars with blocks and shoot them flown into the valleys below. By an arrangement of break they could be sent into any town or village within a reasonable distance. I believe such a plan has been tried in some countries, and it is not impracticable. The ice machine, however, is the best thing for southern countries. You know the ice machine is not entirely a modern invention, for the wealthy Greeks, Romans and Indians had their ice manufactured in some way. But the late inventions have been an outgrowth of the demand for cheap ice in the south, and now nearly every tropical city of any size has artifical ice even under the blazing sun of the equator. It can also be manufactured aboard ships, or, in fact, anywhere, and it makes pos sible the transportation of a thousand articles that without it could not be carried from one part of the world to another.

"The first practical attempt to make ice in modern times was by Gorrie in 1849. This was followed by Kirk's machine in 1863, and Windhausen's in 1870, and a host of others. One exhibited at the late exhibition in Vienna made a ton and a half of ice in an hour, at a cost of thirty shillings. The two methods that find most favor among practical men are somewhat difficult to explain. One method utilizes the lowering of temperature that is the result of the rapid expansion of a compressed gas, while the other makes use of the similar thermal effect resulting from the volatilization of some liquid. In the first-mentioned machines atmospheric air is compressed to three or four atmospheres, and kept cool by water in circulation or by other means. It is then allowed to expand, and the heat absorbed during the expansion comes from the water to be frozen, or from a solution of brine which is not affected at the freezing point of water, and which then becomes, as it were, a vehicle for the cold

"Linde's ice-making machine, some twenty-two of which were in operation at the Dusseldorf exhibition of 1880, is the latest form of ammonia machine. The danger of explosion, one of the great disadvantages of ammonia, is obviated by carrying the liquefied gas through narrow iron tubes, and by employing only a small quantity of the substance at one time. Blocks of ice are formed between the spokes of a revolving drum, which, being cooled internally by the evaporating liquid, dips into a tank of water. Methylic ether is in some respects better than ammonia, having a higher boiling point, and requiring smaller pressures, without the necessity of heating. In Teller's machine, which is specially intended for use in ships, the methylic other evaporates in a closed metallic vessel, the sides of which are in immediate contact with the water to be frozen

"Many of these machines will have their greatest value in keeping articles cool instead of actually making ice. Such a machine will some time be made that will keep the rooms of a house cool without injury to the occupants.

"I visited an ice manufactory in New Orleans some time ago, and it was an increating sight. They had some curiou

## A Senator's Curious Faculty.

"Talking about peculiarities of men's minds, I heard United States Senator Beck, of Kentucky, tell a queer story, said & gentleman to some friends, the other night. "We were all discussing the same subject that is up now, when Senator Beck remarked that he thought a peculiarity of his brain had done him a great deal of harm in his life. 'I first noticed it,' said the Senator, 'when I va: a boy going to school in Scotland. I had a strict old preacher for a tutor, and, with a number of other boys, went to the parsonage to be educated. One night I was very kleepy, and still had a long Latin lesson to get off. I tried hard to learn it; but almost before I was aware I would be dozing. At length I read the exercise through in a half-dreaming condition, and with the Latin all a jumble in my head, I went to sleep. I awoke the next morning with my brain thoroughly clear, and, strange to say, all the ambiguities of my difficult lesson were made plain, and I read the Latin without a balk. The same thing happened a second time, and I again found that when I went to sleep with a confused idea of my lesson, learning it while half dozing, I awoke with all the knotted points unraveled. It became my custom after that to read my task over just before going to bed, and I never failed to have them in the morning. My strict old tutor saw that I never studied, and thought one of the other boys was helping me. At length he gave me a page of Livy to translate, and told me if I did not have it for him the next morning he would flog me. Then he forbid any of the boys to come near me and watched my actions. I read the lines as usual before going to sleep, and sure enough the next day I had them pat as you please. He never troubled me after that. Well, the year passed by, and I began to put too much faith in it, and depended almost entirely upon my mysterious helper. Some time ago a phrenologist came to examine my family's heads, and they all went wild over him. I paid no attention to their talk, though my wife urged me to give the man a trial, One day, however, he met me, and was so persistent that I at length sat down to him. He said that he would examine my head for \$3, and give me a chart for \$5. I told him \$3 was all I would throw away, and he began to name my characteristics. At length he said : "You have one faculty that is fully developed. It is spirituality. You have that faculty developed to a marked degree. You would have made a fine medium. Your mind is capable of working separate from your body-that is, it can perform mental labor while the body is at rest and knows nothing of it. You sometimes solve difficult problems while you are asleep, and wake up in the morning without knowing that you have been at work." "Here is five dollars,' said I; "a man who knows as much as you do deserves it." "My strange faculty," continued Senator Beck, "whether it is spirituality or not, is growing weaker. I can hardly explain the action of my mind during these abnormal spells. see the lines and words before my mind's eye, and, without knowing the process, or indeed, being aware of any process, I work on the problem."- Courier-Journal.

common to the whole realm, is of ten days' duration, and begins by devotional rites in the temple. Everybody visits the temple in his robes of ceremony, prays there, and makes the usual offering, which is on a scale commensurate with their means, and always includes a cup of saki, which is the national beverage, something like ginger ale. The image of the god is then taken upon the shoulders of stout men, and, with all his (the god's) possessions, such as offerings, etc., is placed on a pedestal in the public square, where all can pay devotional visits. the procession may be seen all imaginable shapes and things; in the lead a number of two-sworded gentry, who carry light poles, to the top of which are affixed large brass rings, and the poles being struck upon the ground at every pace, a most confused jangle is the result. Next comes a giant-statured fel-low, whose flowing robes are covered with all kinds of emblematic devices, such as birds or beasts that are favorites, some renowned man or celebrated woman, the instruments of a particular trade, or someparticular trade, or something alluding to the prosperity of the country, or sometimes of a locality, or that recalls the fame or the simplicity of the early Japanese. Next come the musicians, blowing horns and reed pipes, and beating tom-toms, drums and gongs, and in general creating a most deafening uproar, whereat the populace shout and dance for glee. The Ottona, or mayor, comes next, leading a train of children in mimic representation of one of the mikado's grand campaigns, and each little one is clad and armed in the exact costume of the time of the battle, and is an exact counterpart of the heroes of old. Next in order is a miniature representation of the Japanese court by children dressed to ape the manners of the sovereign and his courtiers, and the truth to life which these children put into their parts is very amusing to their There are two religious fesparents. tivals in all parts of the empire in every month, the grandest of which, however, is the festival of the New Year. This festival is preceded by the payment of all debts contracted in the past year, and in that feature is worthy of imitation among more civilized people. No Japanese, however poor, but will make sacrifices in order to meet the New Year demand. One of the most touching ceremonies is the putting afloat upon the bay a myriadlighted and highly-colored lantern, which represents the souls of the friends who have departed this life, and the engerness with which the career of each individual lamp is watched as it tosses upon the billows of the open bay, now lost to sight, again up brightly burning, while the trustful heart watching it is strung to a fearful tension till it finally drifts beyond the aching vision, a sure proof that the departed one has met his reward in the Japanese heaven.

Being entirely vegetable, no particular care is required while using Dr. Pierce's "Ficasaht Purgative Fellets." They operate without disturbance to the constitution, diet or occupation. For sick headache, constipation, impure blood, disziness, soar eructations from the stomach, had taste in mouth, billious at-tacks, pain in region of kidney, internal fever, biosted feeling about stomach, rush of blood to boad, take Dr. Pierce's "pellets." By druggists.

### CANADA has twenty-one cotton factories.

festival, however, which they have al-ways kept for ages out of mind, and is a A Fortune. may be made by hard work, but can neither be made nor enjoyed without health. To those leading sedentary lives Dr. R. V. Pierce's "Golden Medicai Discovery" is a real friend. It stimulates the liver, purifies the blood, and is the best remedy for con-sumption, which is acrofulous discase of the hunce. This festi-val, which is the more brilliant from its chancing to coincide in point of time with one of the annual religious festivals lungs. By all druggists.

IDLENESS is only the refuge of weak minds and the holiday of fools.

Dr. Pierce's "Favorite Prescription." always becomes the favorite remedy of those who try it. It is a specific for all female "weakinesses" and derangements, bringing strength to the limbs and back, and color to the face. Of all druggists.

Ir is said that England has 1,000 female medical practitioners.

"I have taken one bottle of Dr. Graves Heart Regulator for heart disease, and find it all I could desire."—A. A. Holbrook, Worces-ter, Mass.

Ar the Crystal palace exhibition in Londov are two \$50,000 cats.

Years add to the faith of these cured of heart disease by use of Dr. Graves' Heart Reg-ulator. For thirty years it has proved itself a specific. \$1.

HE who cultivates a taste for reading in his youth plants good seed.

## A Remedy for Lang Diseases.

Dr. Robert Newton, late president of the Eclectic college, of the city of New York, and formerly of Cincinnati, Ohio, usel Dr. Wm. Hall's Balan very extensively in his practice, as many of his patients, now living, and restored to health by the use of t'us invaluable medicine, can amply testify, He always raid that so good a remedy ought to be prescribed freely by every physician as a sovereign remedy in all cases of lung discases. It cures consumption, and has no equal for all pectoral complaints.

Wheely Adopted by Datrymen. The adoption, by most of the prominen-dairymen and farmers of the United State, of the Improved Butter Color made by Wells, of the improved Butter Color indee by Weis, Richardson & Co., Burlington, Vt., is a proof of their wisdom in a business point of view. Nearly all winter butter is colored in or ler to make it marketable, and this color is the best, in regard to purity, strength, permanence and perfection of tint.

A cure at last for Catarrh. The evidence is A cure at last for Catarrh. The evidence is overwhelming that Ely's Cream Bahn gots more directly than any other to the seat of the disease, and has resulted in more cures than all other remedies.—*Wilkesburre* (*Pa.*) Union *Leader*. (Not a liquid or snuff, see adv't.) I have been a sufferer for years with Ca-tarrh, and under a physic an's treatment for over a year. Ely's Cream Bahn gave me im no-diate rolief. I be leve I am entirely cured.— G. S. DAVIS, First Nat. Bank, Elizabeta, N.J.

Time is Money. Time and money will be saved by keeping Kidney-Wort in the house. It is an inval-uable remedy for all disorders of the Kil-neys, Liver and Bowels and for all diseases arising from obstructions of these organs It has cured many obstinate cases after hum-dreds of dollars had been paid to physician-dreds of dollars had been paid to physician-without obtaining relief. It cures Constinu-tion, Piles, Billousness and all kindred dis-orders. Keep it by you.

Walnut Leaf Hair Restarer. It is entirely different from all others. It is as clear as water, and as its name indicates is a perfect Vegetable Hair Restorer. It will immediately free the head from all dandruff, immediately free the head from all dandruff, restore gray hair to its natural color, and pro-duce a new growth where it has falled off. It does not in any manner affect the health, which sulphur, sugar of lead and nitrate of silver preparations have done. It will change light or faded hair in a few days to a beauti-ful glossy brown. Ask your druggist for it. Each bottle is warranted. Surra, KLINE & CO., Wholesale Agents, Phila leiphia. Pa., and C. N. CRITTENTON, New York. PUREST AND BEST COD-LIVER OIL, from selected livers, on the seashore, by Caswell, Hazard & Co., N.Y. Absolutely pure and sweet. Patients who have once taken it prefer it to all others. Physicians declare it superior to all other oils.

## "Speak Well of the Bridge Gast Darries Us Safely Over," Is an old adage, and as these words seem id

Safely Over," Is an old adage, and as these words seem 10 apply to my case I use them. For several years I have been terribly troubled with my kidneys and liver. I had intense pains in my loins, back and hips. I could not lie down, or sit down at times as the pains were more than I could bear. I was treated by physicians here in Syracuse that did me no good, and I also tried several medicines that gave me no relief. I finally went to one of our druggists here in Syracuse, and was recommended to use Hunt's Remedy. I purphased a bottle, as I found it had been itsed with wonderful success here by others, and I had not used hunt's Remedy. I purphase a bottle, as I found it had been itsed with wonderful success here by others, and I had not used ne bottle before I had been unable to obtain the pains in my limbs and back were all gone, and it cer-tainly has done all that was claimed for it in my case. In fact, Hunt's Remedy has made a complete cure, and I most heartily recom-mend it to the public for kidney troubles in general. You are at liberty to use my name for the benefit of others that may be in doubt as its the great mark of Hunt's Rem-edy. Gratefully yours. A. Woonsury. With the Dry Goods house of D. McCarthy & Co. Syracuse, N. Y., June II, 1983.

samples on exhibition, blocks of ice a foot square, as clear as crystal, and having in the interior a bonquet of flowers, a fish, a quail, or a woodcock, showing how game can be sent and preserved indefinitely. Other cakes were of ornamental shape, and hollowed to hold claret punch or lemonade.

"In many countres ice is obtained from natural ice houses, wherein, while the ordinary temperature outside is eighty degrees, ice is continually forming. Such a ravine or cavern has been found in New Jersey, and near Lincoln, Vermont, there is a glen in which snow and ice lie all the year round. One of the most remarkable of these ice caverns is that of Dobschan, in Hungary. It is quite near the town, and is approached through a narrow, winding limestone valley, called 'Stracenaer Thal.' It is in the interior of a mountain, having a general direction east and west. The entrance is near the top, and extremely narrow, and was only discovered by accident. Once inside, a remarkable scene is beheld, the ice, which seems formed in many layers, having assumed peculiar shapes that characterize the limestone caves of our own country. The total rock and ice surface in the cave is about 24,800 square feet, the ice alone occupying about 21,000 square feet.

"The cave is divided into two parts, upper and lower. In the upper part the roof is of limestone and the floor of solid ice, and it is divided into two great halls of wondrous beauty. The roof of the largest hall is supported by three enormous pillars of clear ice, one of which is hollow, and through which flows a stream from above, producing strange echoes and reverberations. All about are fantastic forms of ice, resembling human beings, pulpits, monuments, and so on, giving to the cave a most grotesque appearance. In one end the ice forms an exact representation of a large cascade, as if a rushing stream with its spray had suddenly been trozen solid. Descending to the lower room the passage is 600 feet in length, and by following down through the ice you come to the natural outlet of the water.

"In all countries such caves have been found. So extensive is the ice cavern on the peak of Teneriffe that it affords a permanent source of supply, and even vessels are loaded with its ice. This ice is columnar in shape and does not melt easily, and so can be transported without great loss. Near the village of Stelitze, in the Carpathian mountains, there is one of the largest ice caverns in the world and, curiously enough, it freezes in the summer and melts in the winter. For instance, in minisummer the roof is entirely covered with ictcles, but in winter they disappear, and by Christmas time the cuvern is dry and warm compared to the outside world. Ice begins to form as

formed in the gypsum, and in the winter species.

"That match you are lighting your igar with is a very small thing, isn't it?" said a passenger who had shared my seat for a few miles. "A small thing, but you wouldn't believe the American people paid out \$27,000,000 for matches last year, would you? It looks big, but it is a fact. Now, take a pencil and figure it out. Fifty millions of people in this country: they use on an average five matches each per day; that is 250,000,-000 matches daily, or 2,500,000 boxes of 100 matches in a box, every day. Last year these boxes retailed at an average of three cents each, making \$75,000 a day for matches, or \$27,875,000 a year. And then to think that three-fourths of all these matches were supplied by one company! If they didn't make \$8,000,000 clear profit out of it they didn't make a cent." They own thousands of acres of timber land in Michigan, and their lumber is cut by their own men and shipped on their own boats. And then they have contracted for nearly all the world's supply of phosphorus years ahead, and the new manufacturers starting into the business find themselves overmatched in many ways by the old company, which can still control the trade and make a fair profit on its investments. They con-

Matches.

trol twenty-two factories and one of them has a capacity of 72,000,000 of matches daily. - Chicago Herald.

### A Reminiscence of Guitean.

According to the Washington Post, Colonel Crook, who signs land patents for the President, was so struck with the antics of Guiteau that he made a little sketch of his head in his note-book upon the 18th of May preceeding the assassi-nation. Colonel Crook says that Guiteau came up to his desk on that day and borrowed two or three sheets of paper. He was very impudent and was very indignant because Colonel Crook gave him plain paper instead of the offichal paper. Colonel Crook said very shortly: "You can take that or none." Then Guiteau said with a thump upon his breast: "Perhaps you don't knew who I am." Dashing down his card he continued: "I am one of the men who made General Garfield President." The colonel was so struck with the appearance and pretensions of this tramp that he then and there made a little sketch of his face. He wrote under the sketch, " Charles Guiteau, of Illinois, one of the men who made General Garfield Presi-dent." By the side of this sketch he wrote: "This fellow put on more airs than is usual for a man who is begging for office." When Garfield was abot. Colonel Crook turned to his book and found that the assassin and his impudent caller were the same.

soon as spring opens. In some deep Lester Wallack, the New York actor, mines ice forms at certain periods. This is said to have one of the finest collecis the case in some of the salt mines of tions of dogs in the country. He pothe Ural Mountains. Great cavities are seeses twenty-one canines of different Perry's "Singing Birds."

In a Washington letter we find this story: Perry was a rich planter in the Patuxent valley, with a broad vein of humor. The broad, deep Patuxent afforded an excellent cruising ground to the British fleet after it had landed the British troops. One day, while the British ships were lying in the river, Perry got a well-filled hornet's nest, plugged up its openings, put on his working clothes and rowed up to the flagship. In the uncouth local dialect he offered the gray ball to the young officers as a nest full of rare singing birds of remarkable voice, of unusual intelligence and warm attachments. The officers clubbed together and offered a guinea for his birds. This he grate-fully accepted, and then handed the nest to the unsuspecting young man. He suggested to them that it would be well not to open the nest till he got to shore, inasmuch as the affectionate little things might follow their old friend. This was an excellent suggestion. To make sure the officers took the nest into the cabin and shut the doors, leaving a marine on deck to catch Perry's signal. As soon as Perry felt sure of his retreat on the shore he gave the marine the signal. At the word the officers opened the nest, and, without any unnecessary delay, the cabin door also. With somewhat undignified haste, officers, marines and seamen swarmed to the bulwarks, and then over the side, in comical confusion, closely followed by Perry's affec-tionate little singing birds. Perry laughed till he cried, as one by one the Britishers sought the cool shelter of the placid Patuxent.

Uncle Sam's Navy. In a communication published in the Army and Navy Journal, Commander J. B. Coghlan, U. S. N., states that the consultations of eminent naval and other surgeons, respecting his rheumatic attrack, failed to afford him the slightest relief. By advice of Dr. Hoyle he used St. Jacobs Oil, which wrought a complete and, as he says, wonderful cure. John Carr Moody, Esq., lawyer at Vallejo, Cal., was likewise cured of a severe joint trouble.

Typhold fever is cured by from thirty to 200 cold baths.
