### ANTIDOTE FOR THE BLUES. rate he was not inclined to knock under,

# OF FUNNY STORIES.

# Buck Against Nature-Made no Difference-Clean Gone-Appearan-ces are Deceitful.

"I understand that Spokeland couldn't make a living down in the bottoms,' said a man meeting an acquaintance. "No; had to move away."

"Wasn't the land good?"

"First rate; but the trouble with him is laziness. He was too lazy to live in that country. That's no place for a lazy man, let me tell you. Why, sir, that fellow had a chill one day and was too lazy to shake. In that country it is necessary for a man to shake when he has a chill. It ain't right to buck against nature."-Arkansup Traveler.

### Made No Difference.

A traveler just from the South reports the following: On one of the Southern railroads there is a station called "Saw-Lately a newly-married couple boarded the train, and were very loving indeed. The brakeman noticed the gushing groom kiss the bride about two hundred times, but maintained a serene quiet. Finally the station in question was reached, and just after the whistle

"Sawyer! Sawyer!"

"What's that!" responded the groom looking over his shoulder at the brakeman

" Sawyer," replied the brakeman. "Well, I don't care if you did, she's my wife."-Merchant-Traveler.

# Clean Gone.

"Do you really love me, Beryll"

A pair of soft, lustrous eyes looked up inquiringly into the face of Harold Wyverne, and over the sweet, girlish face swept a wave of pallor, quickly followed by a sunny smile as she saw by the exession of Harold's face that the question had not been asked in seriousness.

"How you frighten me!" she said, nestling close beside him in the confiding, trustful way that is so characteristic of woman when she is about to lay pipe for ping to the other side of the conservatory, into which they had wandered after the last waltz, she gazed steadfastly out into the deepening gloom of a November night.

" Poor little birdling," said Harold to himself, "how madly she loves me! My words, even though spoken in jest, have affected her strangely, and she steals brought up out of the water of a pond. away for an instant to conceal the tears Indeed, there are several of these ponds, that cannot be restrained."

knowing too much. He was a young man of singularly pure life and tight - Chicago Tribune.

### Appearances are Deceitful.

Bijah's last prisoner out answered to

and be controlled despotically by a man that he imagined he could tie and whip. NO BEMEDY BETTER THAN & DOSE | He at length determined to give the gentleman a genteel thrashing some night on the college campus, pretending to mis-take him for some fellow student.

Shortly after, on a dark and rainy night, Jones met the doctor crossing the campus. Walking up to him abruptly : Hello, Smith, you rascal-is this you?

And with that he struck the old gentleman a blow on the side of the face that nearly felled him.

Ole Bolus said nothing, but squared himself, and at it they went. Jones' youth, weight and muscle made him an 'ugly customer," but after a minute or two the doctor's science began to tell, and in a short time he had knocked his beefy antagonist down and was astraddle his chest, with one hand on his throat, and the other dealing vigorous cuffs on the side of his head.

"Ah! stop! I beg pardon, doctor! Dr. Caldwell-a mistake-for heaven's sake, doctor!" groaned Jones, who thought he was about to be eaten up-"I-really thought it was Smith." The doctor replied with a word and a blow alternately:

"It makes no difference; for present purposes consider me Smith.'

And it is said that Old Bolus gave sounded the groom gave the bride a rousing smack on the lip and the brake-man opened the door and shouted: Jones such a pounding then and there, as probably prevented his ever making another mistake as to personal identity, at least on the college campus.

# Pitch Springs.

In different parts of the world we find the phenomenon of a kind of natural unctuous and inflammable substance oozing from the earth, which, under the various names of natural pitch, earth pitch, naphtha, petroleum (or rock oil), is very well known as to its general properties. The naphtha is the purest state of this substance, which by a certain exposure to the air somewhat changes its quality, and becomes petroleum; and finally, after still longer exposure, becomes what we call bitumen.

These phenomena are found in various parts of the world, but that which we briefly mention is in one of the islands of the Ionian Confederation. This natural exudation is found in the southern part a new bonnet. "If you had been in of Zante, near the coast, and has been earnest, Harold, I believe your words described by several modern travelers. described by several modern travelers. would have broken my heart "-and step- It is always a matter of curiosity to determine how long such natural phenomena have been in operation, and in this instance we know that the pitch springs of Zante were as productive 2,300 years ago as they are now. Herodotus, in his travels, visited this spot, of which he gives the following account in his fourth book : "In Zacynthus I saw pitch but the largest of them is about seventy Harold had never been arrested for feet square, and twelve feet deep. The mode of procuring the pitch is the fol-lowing: They take a pole, and push it pants, and never once had there swept | into the water with a myrtle branch at across the unflecked horizon of his lawn-tennis and cigarette existence the cold, the pitch adhering to it, which in smell stolid fact that after whirling in the is like asphaltus, but of a better quality dreamy measures of a waltz even the best than the common pine pitch. They colof women love to steal a while away and lect this pitch in a kind of vat or receptastand unostentatiously on the side of cle which they have dug near the pond, their feet in order that their corns may and when the quantity is considerable throb untrammelled in all the buoyant they put it in large jars or barrels. If gladness of a temporarily removed slipper. any pitch drops from the branch into the pond, it goes under the ground and ap pears again in the sea, which is about half a mile from the pond."

This pitch rises naturally to the surthe name of Scott, and he was such a face, being specifically lighter than wabenevolent looking bald-headed old chap ter. Herodotus appears merely to be that everybody expected his arrest would describing the mode of procuring it in Many great works of human skill and turn out to be a mistake. He smiled and greater quantities by bringing it un rubbed his hands together, and bowed from the bottom, where it possibly might ponds are described as being now of smaller dimensions than those which Herodotus states, and also nearer the sea. In an island so subject to the disturbances of earthquakes, it is possible that many physical changes may have taken place since the Greek traveler saw the pitch fished up from the ponds of Zante.

# WISE WOEDS.

All that is best in the great poets of all countries is not what is national but what is universal.

There is no dispute managed without passion, and yet there is scarce a dispute worth a passion.

The actions of men are like an index of a book; they point out what is most remarkable in them.

We should often have reason to be ashamed of our most brilliant actions if the world could see the motives from. which they spring.

Every man's experiences of to-day is that he was a fool yesterday and the day before yesterday. To morrow he will most likely be of exactly the same. opinion.

Honest good humor is the oil and wine of a merry meeting, and there is no jovial companionship equal to that where the jokes are rather small and the laughter a bundant.

The world deals good-naturedly with good-natured people; and I never knew a sulky misanthropist who quarreled with it, but it was he, and not it, that was in the wrong.

If, in instructing a child, you are vexed with it for want of adroitness, try, if you have never tried it before, to write with your left hand, and then remember that a child is all left hand.

The difficulties of education lie deeper down than the curriculum. It is not so much finding out what to teach that is. needful; the all-important thing is how to develop the mental and moral energies.

Speaking truth is like writing fair, and comes only by practice; it is bess a matter of will than of habit; and I doubt if any occasion can be trivial which permits the practice and formation of such a habit.

Enthusiasm is the glow of the soul; enthusiasm is the lever by which men are raised above the average level and enterprise, and become capable of a goodness and benevolence which, but for it, would be quite impossible.

# HEALTH HINTS.

Dr. Felix Oswald prescribes fasting for rheumatism.

Hot soda biscuit is one of the most injurious kinds of food.

Never pick a blister with a pin. needle is the only suitable thing.

Lime juice and milk is one of the best remedies for dyspepsia or indigestion.

A good gargie for a sore throat is made vinegar and a little red pepper mixed of with water.

Do not drink strong coffee just before retiring, or in the evening at all. It is apt to cause sleeplessness

Oatmeal porridge is one of the best things to begin the day with. Those who dislike it should take it as a medicine.

Coffee or tea should never he given to children at night. They disturb the nerve system and make children cross and peevish.

Hall's Journal of Health says the worst cold may be eured if the patient will, soon after taking it, keep warm in bed and eat nothing for a day or two.

### Too Big.

Big things are not often useful or profitable. Bulky, unwieldly property that a person can do nothing with, is very forcibly characterized by the phrase, "He has an elephant on his hands. poldness, however, that are too big to be profitable, are not too big to be useful, and the following pertinent remarks of the Railway Age are rather suggestive than otherwise:

# A THRELLING EPISODE.

<text>

"I can't fell why. I only know I fell some-thing was wrong." "Do you have these feelings often when upon the road?" continued the writer. "No, very seldom, although for the past twenty years I have been in a condition to feel apprenhension at almost anything." "How is that?" "Why, I have been a victim of one of the worst cases of dynamic ever known. I have

"Why, I have been a victim of one of the worst cases of dyspepsia ever known. I have not been confined to my bed, as like thousands of others, I am compelled to work whether able or not. Indeed, when it first began I had only a loss of appetite, a faint feeling that would not go away and a bad taste in the mouth, but I finally got those terrible craving and gnawing feelings that make life so un-bearable and are known as general debility." "What did you do?"

"What did you do?" "I tried physicians until I became discour-aged. I gave eight different ones fair tests, but none of them benefited me. I then tried proprietary medicines, but they failed, like-wise. It looked pretty dark for me so far' as any more poace or enjoyment in this world were concerned and I became terribly discour-aged." nged."

aged." "You certainly do not look that way now." "On, no, indexed, I am in perfect health now," was the reply, "and I propose to continue so. My nervousness is entirely gone; I can sleep nights; the aching numbness has disappeared; the pale, sickly appearance has given place to the color of health, and I have readily put on flesh. This is what has been accomplished by means of Warner's ' pecanoe. If I can be cured after a chronic ilness of nearly a quar-ter of a century I believe all suffering in a similar manner can be restored by using the same great romedy."

same great ramedy." Such is the testimony of a man who could detect and remove unseen danger on the road, but could not remove the dangers from within his own system until brought face to face with the great preparation above-named which did the great preparation above-named which did so much for him and can do as much for all these who require it.

The Louisiana rice crop aggregates 250,000 barrels this year.

# The Oldest Druggist.

Being one of the oldest druggists in this city (although having retired from business), I wish to say a good word about Hunt's Remedy. A number of years ago I was troubled with my kidneys. The idea of a druggist, however, resorting to the use of a "patent medicine" was a little humiliating, but when I came to consider how many peo-le had been benefited by the use of Hunt's Remedy, I unhesitatingly began using it; and after having fully tested its virtues I can say, as many of my customers have said to me, "It is the best medicine for kidney and liver conclusion

complaint ever compounded." I have yet to learn of a single instance where it has failed to benefit and give satis-faction, in fact it is the best I ever sold. I would say to all who are troubled with

I would say to all who are transed who kidney and liver complaint, give Hunt's Remedy a trial and you will say as I do, it is the best known remedy, and the best is the cheapest every time. Yours truly, Environment Art we EDWARD ALLEN.

Hartford, Conn., May 19, 1883.

# "The Reliable Medicine"

We do not olaim that Hood's Samaparilla is "the only " medicine which descrees the confidence of the public; but we do claim that the universal voice of ap-proval which comes from the thousands who have used It; the great curative preservition is has over scrotnia, dyspepsis, billowness and all diseases caused by im-pure state or low condition of the blood; and the great skill, experience and exre used in its preparation, make it worthy the full confidence of the public and entitled to be called " The Reliable Modicine,"

# Hood's Sarsaparilla

"Hood's Sarsaparilla beats all others, and is worth its weight in gold."-I. BARBINGTON, 130 Bank street, New York City.

Mr. J. N. Ketchum, of Barre, VL., says that his boy had several very ugly scrofulous sores on his log. Hood's Sersaparilis oured him,

'Rood's Saraaparilla in the best blood purifier."--E. S. PHELPS, Wordsster, Mass. Mr. J. V. A. Proudfoot, of Ublesgo, says his little

ooy had a discharge from his sars, after scarlet ferce, Hood's Sarasparilla greatly benefited him.

Hood's Samaparilla is sold by druggists. #1; #5. Made by C. I. HOOD & CO., Lowell, Mass.

**MODERN SURGERY** 

Amputation Within Three Inches of the Hip Jointl-Recovery Due to the Use of Dr. Kennedy's Favorite Remedy (Rondout, N. Y.).

Money is the universal necessity and none " out a cynic or fool will a Teet to despise it. Mr. Abram Ellsworth, of Port Ewen, Ulster County, N. Y., had realized this truth. His

disease involved the whole of his thigh bone and the suffering man looked forward, not without apparent reason, to death as his only deliverer. His family physician refused to amputate the limb-asserting that the operation would kill the patient on the spot. DER. DAVID KLNAEDY, of Rondout, N. Y., who was consulted, he'd a different opinion and amputated the limb. The doctor th n administered fracty his great Blood medicins FAVORITE REMEDY, to afford toneand strength to the system, to prevent the return of the disease, and Mr. Ellsworth remains to this day in the bloom of health. This gentleman's disease was the offspring of foul blood, and DR. DAVID KENNEDY'S FAVOR-TTE REFILEDY purited to blood and re-stored to him the power onne more to enjoy his life. Are you suffering from any disease traceable to the ame cause. Try FAVOR-TTE REFILEDY, Your drug at has it, One dollar a bot 1s. Fear in mind the proprietor's name an i rd iress: DH, DA. KENNEDY, Rondont, New York. DR. DAVID

and nodded and finally remarked that it collect for sometime before it rises. The was a fine morning.

The sound of his voice acted like magic. Four different persons came forward from the audience as plaintiffs and witnesses, and they shot off their voices as follows:

"He is the man who broke me head !" "He's the feller as give me this black eye!" "He's a terror!"

"He pulled me hair until me scalp is loose!

"Judge," whispered the prisoner, in a voice full of new maple sugar, "there's a mistake here somewhere. I am the most harmless individual in Detroit. I have so little courage that a boy ten years old could chase me all over town.'

"He's the man !" yelled the four plaintiffs in chorus.

"Officer, did you arrest this man?" "Y-yes, I think so."

"Don't you know you did?"

"I'm not exactly sure, sir. I brought

in a chap for cleaning out a saloon, but he didn't look like this man."

"Prisoner, what wers you arrested for#

"For praying on the streets, sir," was the solemn reply.

No officer could be found who had made any such arrest, and his honor was about to discharge Mr. Scott when Bijah disappeared into the corridor for a minute and returned with a handful of whiskers. Mr. Scott had cut of his dezvous, but the Seigneur's lady hospita-Burnsides to disguise himself, and on the bench in his cell was found a set of false teeth for his upper jaw. His sandy eye-brows had been blackened with coal, and the facial disguise was almost complete.

"I shall give you three months, sir!" said his honor, as the truth was revealed, and Mr. Scott's benevolent expression vanished like a streak of lightning as he was led away .- Detroit Fred Press.

### The Student's Mistake.

There was a very good story in the papers of the day of a joke which was played by old Dr. Caldwell, formerly of the university of North Carolina.

The old doctor was a small man, and lean, but as hard and angular as the most irregular of pine knots.

He looked as if he might be tough, but ne did not seem strong. Neverthe-less, he was, among the knowing ones, reputed to be as agile as "a cat," and, in addition, was by no means deficient in mowledge of the 'noble science of selfdefense." Beside, he was cool as a cucumber. Well, in the freshman class of we read of a deaf man who stumbled, a certain year was a burly mountaineer struck his head on the door-sill, received of eighteen or nineteen. This genius a bad bruise, and was relieved of his conceived a great contempt for old Bolus' deafness; and of a notable case occurphysical dimensions, and his soul was ring on Long Island, where an old genhorrified that one so deficient in muscle tleman was beaten about the head by should be so potential in his rule.

## **Kissing** in England.

Kissing in England was certainly known and practiced in the sixteenth and seventeenth centuries and practiced with an easy familiarity which shows that the custom was general. Indeed, so general was the use of the kiss that it Was as usual as the bow. A gentleman taking a lady to her seat from the dance invariably kissed her, and if he had not would have been voted a very badly bred fellow. How much older English kisses were

is not very clear. Suffice it to say that the custom has outlived to our day, though fashionable and general games, in which kissing formed a prominent part, are now becoming rarer than they were a quarter of a century ago.

The literature of kisses is curious.

There is a story retailed in the "Broad Stone of Honor" of an English knight riding through France to the Field of the Cloth of Gold. His horse cast a shoe at a certain village, and the Seigneur whereof had departed to the same renbly entertained the traveler. She came out of her castle attended by twelve damsels fair to see; "and," said the dame, "forasmuch as ye have in England such a custom as that a man may kiss a woman, therefore I will that ye kiss me, and ye shall also kiss all these my maidens,' which thing the knight straightway did and rejoiced greatly thereat.

The quaintness of the last phrase undoubtedly indicates the young man's feelings at the salute with considerable exactitude.

In Africa and other parts of the world outside the circle of civilization kissing is as yet an unknown art.

An African traveler once offered a kiss under favorable circumstances to a young lady of king Mumbo Jumbo's court, but she recoiled in great alarm, observing that she was "not yet worthy to be

### Curious Recoveries.

We have heard of idiots and insane persons whose minds have been restored by sudden blows on the head, and lately tramps and thereupon recovered his eye-

Whether the great bridge between New York and Brooklyn will pay even a low rate of interest on its cost, beside the large sum which will be required each year for repairs, is not at all certain. It seems as if there was a limit in size for structures of all kinds, which is not profitable to over-pass.

The Great Eastern steamship, while it was in many respects a mechanical success, was, on the whole, a great failure.

Locomotives beyond a certain weight are not profitable. The wide gange for railways has been abandoned, because the narrower one was found to be best adapted to all the conditions involved. The use of driving wheels of very large diameter on passenger locomotives was continued for only a comparatively short time

Nature herself, while she may produce the immense, does not obtain from it her effective uses. The vast proportions of the London dray-horse can be profitably employed only in a narrow range of conditions.

The giant grenadiers, whom Frederick I. ransacked all Europe to obtain, were not effective soldiers in the field. It is the man of average size who is enduring, alert, adapted to all the varied demands of practical life.

In the case of both machines and men the gigantic is not, all things considered, the most serviceable.

# Rough ou the Cat.

Some animals, as a class, are noted for special vices, and some individuals, no matter of what class, have individual and private vices of their own. Dogs, as a class, are quarrelsome, peacocks are proud, mules are reckless, hogs are gluttonous, foxes are tricky, opossums lie, crows steal, cats are cruel and selfish, never doing anything out of love for their masters. When they catch mice, or play, even, they do it not as a benefit to us, but for their own appetite or amusement. They do not, like the dog, make sacrifices for men, and have neither faithfulness nor gratitude. While a dog watching a piece of meat will starve rather than eat it, a cat will steal or lick it when not hungry. Like the tiger, which it resembles, it cannot be tamed or humanitarianized, whereas a dog, like a lion, his prototype can be. The cat, as a class, is about the meanest or morally most wicked of animals, without one redeeming feature except cleanliness .---Modern Age.
