As most of these, if not all, have business relations with the mooneyed fraternity, it is barely probable that they would ever consent to act as complainants against their friends. The small game and especially the "brace" game can be easily suppressed. It simply is a means of robbing hundreds of newly arrived clerks and laundrymen.

Arsenic in Hosiery.

"Wearing colored hosiery develops some peculiar facts," said a dealer on Broadway to a New York Meil and Express reporter. "What are they ?"

"Well, it would seem cheap colored stockings would be more liable to have poison in their color than the higher priced ones, but the fact is just the reverse. You never hear of poor people being poisoned by wearing cheap colored hosiery. It is only those who wear the best material. It would scarcely pay to put arsenic in a cheap article. A gentle-man bought a pair of colored silk socks. He wore them once and afterward complained of an irritation and soreness in his limbs. An investigation revealed the fact that he had been poisoned by is started by the dealer putting on the the color in the fine silk socks he wore. table a double handful of round, flat They contained arsenic. Kidney Diseases.

Few people are awars of the alarming prevalence of kidney diseases, especially among those who have arrived at, or are past, middle age. It is declared on good authority that fully one-half the deaths in this country are either directly or indirectly the result of kidney disease of some sort.
A great majority of men above forty years of age.

are afflicted with some sort of affection of the kid-neys or bladder and these diseases are on the tecrease. Persons are often seriously affected before they knew of it themselves, and thus these insidious disorders get a good footbold before anything is done to dislodge them. Dropsy, Gravel, Diabetes, Bright's Disease, Incon-tinence, Debility, Catarrh of the Bladder, Albumenu-

ria, etc., are among the many forms of these diseases. Most of these are very difficult to cure, defying the powers oftentimes of the best physicians obtainable. and are pronounced by many to be incurable.

Physicians state that many forms of Ridney Disase are very difficult to detect, as, in diseases of

this form, eftentimes there are no symptoms of a marked nature. This is one of the reasons why they are so difficult to cure.
