NEWS AND NOTES FOR WOMEN. TALK WITH A TELEGRAPHER

QUEER EXPERIENCES OF TELE. GAAPH OPERATORS.

Systems of Signalling that Preceded Telegraphy Drams Used to Spread News in Savage Lands.

"Telegraph operators have queer experiences," said a veteran in the employ of the Western Union company. "Many strange things and a good deal of private information come to their knowledge." "They profit by information sent be-

tween brokers and dealers, do they not?

"Very seldom. You see, such messages are usually in cipher, and the ope-rator is ignorant of their meaning. I remember a young man who was at Oil City during the Pennsylvania oil excitement. By studying the ciphers of certain heavy speculators he was at last able to translate them. gave the information to a He friend, who used it to their joint profit. He was finally detected and discharged, but not until he had made quite a for tune, which was afterward increased until he became very wealthy. This man is still alive, and has served more than one term in the Pennsylvania legislature. I know of another case some-what different. I was one of the first operators on the Morse instrument sent to Philadelphia when the telegraph reached there. The instrument marked the characters on a slip of paper. Of course the instrument ticked, but this was long before there was any thought of taking by ear. Among the visitors were brokers and members of the exchange, and they were much interested in what had already become very valua-ble to them. One of them, "Bull" ble to them. One of them, Bridges, spent so much time in the office that we gave him a great deal of information and explained the workings of the instruments, About this time we began to receive complaints that the contents of messages sent from New York to Philadelphia, were known to outside persons. In the office we began to look upon each other with suspicion, and I finally determined to do some detective work. 1 kept watch of our visitors and finally discovered that complaints only reached us while our friend "Bull" was in the office. I therefore determined to have all visitors excluded and an order way posted to that effect. Our trouble ceased at once, and my suspicions were confirmed.

"I knew Bridges had not seen any messages, and I wondered how he could have known their contents. When I accused him he burst out laughing and admitted the whole thing. He had the 'tick' of the recorder down so fine that ae could take a message by ear and he was the first man that ever did it. Not long afterward the sounder was introduced, and since then almost all telegraphing in this country has been taken by car.'

"Was there any system of rapid com-munication before the invention of the electric telegraph?"

"Yes, indeed, quite a number. The system most generally used was the invention of the Chappe brothers, two French boys, who first utilized it in 1794 at school, where they saw each other at a distance. They used a pivoted beam, which, being placed in different posi-tions, indicated different characters. Afterward the French government adopted this system, and one of the inventors was made telegraphic engineer and placed in charge. Lines were established all along the coast from Paris to the frontier."

"How were these signals seen ?" "By the use of powerful glasses. The

miles apart, were onl bout ter

Woolen mantels have dolman sleeves; the backs are quite short.

"A pretty woman has ruined more than one church," says Sam Jones. In Butte, Montana, maids and kitchen

girls are in demand at \$20 a week. Long and straight effects still prevail

on many of the trimmed dress skirts. "Onyx, set with diamonds," says the weler, "is being worn by ladies of Jeweler,

quiet taste." Miss St. Pierre, of Georgia, manages

and owns business interests valued at a million and a half.

A popular article with both sexes is represented in silver handles for umbrellas, canes, parasols and whips.

The Macon Telegraph claims that Georgia chartered, built and conducted the first female college in the world.

The president of the New Orleans Woman's club is Mrs. Maria Jefferson Swayze, a niece of Thomas Jefferson.

The English walking hat, to match in hue the walking suit, is in demand this fall. All trimming on these hats is massed high in front.

There are no old maids in Turkey. The system of taking wives on faith, without seeing them, is responsible for this happy state of Turkish society.

Pennsylvania at her recent State fair offered several prizes in "a dressmaking contest." In all there were eight prizes, seven of which were won by young Indies.

Plush and velvet are favorite materials for covering bats and bonnets, though there are many models with crowns of novelty fabrics or tinseled cloth and brims of velvet.

Wool dress goods, for which there is a great demand, all exhibit rough surfaces, the loopyarn cloths, boucle goods and cloths with fraise effects being among the leading styles.

Mourning dress fabric include the rough surface novelty cloths so popular in colors. These are made up in combination with plain cloths; and are fashioned much after the models worn out of mourning.

A California girl shoots wild geese and sends their teathers to market, and in this way she has laid by \$800 to give the man who marries her. It is thought the men all seem to be waiting for her to make it \$1,000.

In 1840 Harriet Martineau found seven vocations open to women in the State of Massachusetts; now there are 284 occupations in which 251,158 of the female sex earn their own living, receiving from \$150 to \$3,000 per annum.

The increasing masculinity of English girls is a topic for many London essay-ists. In dress, talk and manners it is the fashion with daughters of wealth and refinement to be as much like their brothers as decorum will allow.

Mrs. Langtry, not satisfied with the natural color of her hair, which was beautiful, and of which she took incessant care, has painted it a kind of reddish color, which, it appears, is becoming the fashion in Paris, and has much injured her appearance.

A new variety of that favorite flower, forget me-not, has been raised in Germany and is introduced to the trade by M. Faurobert, of Berlin. It is named "Eliza Faurobert," and is remarkable for its deep blue flowers of large size, which are borne in clusters, and for its extended flowering season.

Old as the saying is, there is one thing that the average woman will not doconfess her age. A Western lecturer recently advertised a lecture for ladies over twenty-five years of age. The lecturer was promptly on hand, but the audience consisted of only one personthe lecturer's aged grandmother. The Turkish fashion of wearing jewworked from the top of the old Custom | eled buttons is seen here on some imported evening costumes. They are in turquoise, garnet or some of the pretty letters on them, and could telegraph at apine quartz crystals. In Turkey, where the rate of about one hundred letters in they are sometimes composed of more live minutes between stations ten miles | costly jewels, they are a part of the brid's dower, and are often heirlooms of great antiquity. Simplicity in bridal altire is more a foreign than an American fashion, but it must be allowed it is far more appropriate. If one wishes to preserve any sentiment with the bridal dress one does not care to use it as a ball dress afterward. Heavy satins and brocades tempt one to wear the dress instead of storing it away as an heirloom. Trimmed hats and bonnets seen at recent New York openings are for the most part exaggerations of the shapes worn the past season. The crowns to the round hats are talter and more conical, the brims are narrower and more eccentrie, while the trimmings on both hats and bonnets are higher and more pyramidal and more arbitrarily massed on the front of the crown of hats and on the tops of bonnets than ever.

Queer Jewelry.

A San Francisco paper says that a modeler of statuary has a set of cuff and shirt studs made of (hinese finger nails, set in gold. He points with pride at his exclusive possessions, which are made of a Chinaman's finger-nail, which was four inches long when cut. The nail in the studs presents a shiny appearance, and s susceptible to changes in the weather. Their owner claims that they were successfully used by him as a weather ba-rometer when he first got them, but their usefulness in this direction had been lost through age. The question of whether Chinese finger-nails will come into general use as articles of jewelry is one which interests shell and precious stone dealers. The Chinese judge their gentlemen as Americans do their idlers-by their long tinger-nails. A reporter has seen among the heirlooms of a heavyweight merchant in Chinatown a nail which attained the great length of thir-teen inches, and the Chinaman's grand-Free from Oplates, Emetics father was reported by the merchant to have raised one eighteen inches long on the index finger of his left hand. The merchant at that time said there was nothing wonderful about that, as he knew a Chinese priest who had a nail on the little finger of his left hand which was sixteen feet and some inches in length, and the priest was then but sixty-eight years of age.

Politics Too Much For Him.

Pellites Teo Much For Him. A lady on Fifth Avenue, New York, quickly summoned a doctor: "Oh, doctor, my husband is nearly dead. He attended a caucus last night. He made four speeches and promised to be with his fellow citizens again to-day. But oh, doctor, he looks nearly dead." "Has he been in politics long?" "Na only hast year. He worked hard for

"No, only last year. He worked hard for "James McCaulay's election." "He will get well, madam! He has a stomach for any disease, if he worked for him!

him!" Political life, off short or long duration, is very exhausting, as is evident from the great mortality which prevails among public men. Ex. U. S. Senator B. K. Bruce, who has been long in public life, says: "The other day, when stepping into a car at a crossing, I found Dr. — within, who eyed me up and down in a surprised way, remarking:

A Scotchman is suffering from a pain-ful disease of the hand and wrist,

A COMPLICATION OF DISEASES is the decision of incompetent physicians when a patient has been "killed by dru s." Yes; a complication, indeed, originating in indigestion, dyspepsia, kidney or liver complaint, all of which yield as readily to VINEGAR BITTERS as does the autumn leaf to the gentle breeze. Complications are quickly solved by the Brr-TERS.

to \$8 per month, while common laborers receive no more than \$1.50 for the same

by purifying the blood and also tones up the system and greatly improves the general health of those

Catarrh in the Head

Originates in serofulous taint in the the proper method by which to cure catarrh is to purify the blood. Its many disagreeable aymptoms, and the danger of developing into bronchilis or that terribly fatal disease, consumption, are entirely re-moved by Hood's Sarasparilla, which cures catarrh

pari by catarrh and humors. Hood's Sarsaparilla proved just the thing needed. I derived in im-mense amount of benefit."-H. E. MILLETT, Boston.

number when, I had the estarth in my head. It con sisted of an excessive flow from my ness, ringing and burnting noises in my ears, and pains on the top of my head. The hawking and spitting were most excessive in the morning, when the back part of my tongue would be thick with a white fur, and there would be a had taste in my month. My hearing was affected in my left ear. Five years ago I began to "I had been troubled by general debility, caused in use Hood's Sarsaparilis. I was helped right away

Catarrh Cured by Hood's Sarsaparilla

tem is improving. My case is of such long standing that I did not expect to be cured in an instant."-

"I suffered three years with estarrh, and my gen-eral health was poor in consequence. When I took Hood's Sarsaparilla I found i had the right remedy. The estarrh is yielding, as Hood's Sarsaparilla is cleansing my blood, and the general tone of my sys-discrete the second starsaparilla, and I find it one of the best re-edited for a sarsaparilla, and I find it one of the best re-edited for a sarsaparilla in the second starsaparilla in the second starsaparilla and I find it one of the best re-edited for a sarsaparilla in the second starsaparilla in the s Martin Shields, a successful marketman of Chicago. have been troubled with that distressing complaint, catarrh, and I want to say that I have been using Hood's Saraparilla, and I find it one of the best ram-edies I have ever taken. My trouble has lasted ten years, and never before could I get any relief, never, until I commenced to use Hood's Sarsaparilla. I would recommend its use to all suffering with that

complaint. It is traly an excellent medicine."

There is any other medicine in the world.
No person can take the Brarnes according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.
Billous, Remittent, Intermittent and Malarial Fevers, are prevalent throughout the United States, particularly in the valleys of our great rivers and their vast tributaries during the Summer and Autumn, especially during acanons of numbual heat and dryness.
These Fevers are invariably accompanied by extensive derangements of the stomach, liver and bowels. In their treatment, a purgative, exerting a powerful influence upon these organs, is absolutely necessary.
There is no cathertic for the purpose equal to Dr. J. WARKE's VIETOAR BUTTERS, as is will speadily remove the dark-colored viscid matter with which the bowels are loaded, at the arms time stimulating the secretions of the liver.

unequaled efficiency in cleansing the blo It of unequiated encicery in cleaning, the boost of all impurities, imparting new life and vigor to the frame, and carrying off without the aid of Calomel, or other mineral medicine, every par-ticle of poisonous matter from the system. **Dyspepsia or Endigestion**, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizkiness, Sour Stomach, Bad Taste in the Mouth, fillious Attacks. Falpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symp-toms, are the offsprings of Dyspepata. Scorofula, or Kiner's Kvill, White Swell-Inflamination of the Lungs. Pain in the region of the Kidneys, and a hundred other painful symp-toms, are the offsprings of Dyspepala. Scrofula, or King's Kvil, White Swell-ing, Users, Eryspelas, Swelled Neck, Goltre, Scrofulous of Indoient Inflammations, Mercurial Affectiona Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Diseases, WALKES'S VINKAAR BITTERS has shown their great curative powers in the most obsil-nate and intractable cases. For Inflammatory and Chronic Rheuma-tism, Gout, Ellious, Remittent and Intermiltent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, the Bitters have no equal. Such Dis-cases are caused by Villated Blood. Methanistant Allisers, and Minersh, as they ad-vance in life, are subject to paralysis of the Bowls. To guard against this take a dose of WALKE'S VINCAR BITTERS. For Skin Diseases, Fruptions, Tetter, Sait Rheum, Blotches, Spon, Finglies, Pusities, Boils, Carbuncies, Ring worms, Scald-head, Sore Eyes, Eryspelas, Itch, Scurfs, Disciorations, Humors and diseases of the Skin of whatever and or nature, are literally dug up and carried out of the system of so many thousands, are effect.

"After I came to New York I lived in a quiet street, which is now a noisy thoroughfare. I spent most of my time when away from the office in my room. One evening, while sitting at my window, I happened to look across to the opposite house, where I saw a preity girl at one of the windows. She was leaning against the casement tapping on the glass with a pencil. After this I saw her at the same place many times. We had got as far as a nodding acquaintance, but I and no opportunity of speaking to her. Due afternoon, having come home somewhat early, I was at my window thinking of my pretty friend opposite. I almost anconsciously tapped a salute to her on the window pane with my pencil, using the telegraphic signs. I was very much surprised when a raply came from her in the same way. After that we had long talks across the street, and, as our interest in each other deepened into a warmer feeling, many a tender message was sent oy the air line. You may not believe it, but we were engaged to be married before we had ever exchange a word or before either had heard the other speak a word. Afterward I was introduced property, and married the young lady the following Christmas, and that is what 1 zall getting a wife 'on tick." "-- New York Sun.

France has agricultural schools for girls. One of the chief is near Roues, and has 200 girls from six to eighteen years of age. The farm contains over 100 acres.

Blowing Up a Dog.

William Russell, a farmer of Liberty township, Ind., recently conceived the idea of killing a dog with dynamite. Russell procured a half-pound stick of the explosive, lured the dog into a field, and, attaching a fase to the dynamite, tied it beneath the neck of the animal, and ran toward the fence. To his dismay the dog, trightened by the hissing of the fuse, followed him, and Russeil barely reached the top rail, with the dog only a few feet in his rear, when the explosion occurred. Russell was somewhat injured by the concussion, and was completely covered with the remains of the deceased cur.-New York Sun.
