SHOT DEAD.

J. A. Mealy Instantly Killed by E. S. Walton.

The town of Marienville, this county, was thrown into a state of excitemont last night by a quarrel which ended in the killing of one of its intime there has been a disagreement between J. A. Mealy, better known as "Al" son of Samuel Mealy of Tionesta township, and Ed. S. Walton, son of James Walton of Jenks township. From the best information we can gather this morning, the two met nt T. J. Reyner's store in Marienville

last night. Mealy was outside and Walton inside, and evidently expected trouble having so expressed himself to the gentlemen in the store. He finally went out, when some words were exchanged. Mealy struck Walton knocking him down, when Walton drew a revolver and fired, the ball entering the body a trifle to the left of the center of the breast. Mealy sank back, exclaimed, "My God !" and expired immediately.

Walton gave himself up to Dr. Towler, Justice of the Peace, who committed him to jail. Early this morning Waltor arrived here in charge of A. K. Shipe and H. H. McClelhand, who delivered him into the hands of Sheriff Aguew, and he is now in

Mealy was a young man 22 years of age, and leaves a wife, having been married to Miss Anna E. Dodge just a week ago to day in this place by Rev. F. M. Small. Walton is a single man aged about 24 years, of medium size and good build.

Dr. Towler impaneled a jury and held an inquest. He also sent for Dr. Morrow of this place to come and assist in holding a post mortem examination of the body of Mealy.

The case is not likely to be tried at the coming court as it will require an oyer and terminer court.

Two Legs Lost.

An accident occurred last Friday morning between President and Eagle Rock, on the B., N. Y. & P. R., by which Charles Lawson, section foreman, lost the use of both legs. He was walking down the track about 10 o'clock and was overtaken by a freight train at a sharp curve in the road; when he discovered his danger he at tempted to escape, but in jumping off the track he evidently slipped and fell with both legs across the rail. When

seen by the engineer the train was too

THE FIRE !

Last Wednesday afternoon about half past three o'clock the cry of 'Fire!" caught us just finishing up the press-work on our paper. The scene was Judge Proper's store building, at one time occupied by M. Einstein, but of late converted into a billiard ball run by Charlie Carlson. The front of the ware-room addition has for some weeks been occupied by Andrew Carr as a meat market, in which the fire broke out. Andy had fixed his fire and gone to the depot on some errand, and in his absence the fire broke out, the room being entirely enveloped in flames when discovered. The alarm by the rapid tapping of the church bell by Jim Fones soon awoke the town and brought out the Chemical engine and the four small Babcocks. Owing to the freezing weather the machine was not kept charged, and before it could be got in readiness to throw a stream the building was past saving, although very little time was consumed in getting it ready.

The attention of all was then directed toward the saving of the fine residences of Daniel Walters and Judge Reck. A favorable wind, the almost superhuman efforts of the citizens and the small machines did much toward saving these buildings, but had it not been for the large machine

Judge Reck's house would have surely

burned and doubtless Mr. Walters' also; the latter was considerably scorched, and the former was ablaze all along the cornice and side, and every effort to arrest its progress proved futile until the large stream struck it, which knocked it instantly. Had the

Judge's house burned, doubtless his store building next to it would have gone, in which event it would have been almost impossible to have saved Smearbaugh & Co's store, in which is located the REPUBLICAN office. Thus it may be counted that the "Champion" was the means of saving \$10,-

000 to \$15,000 worth of property. The losses will aggregate, about \$1,800, divided as follows: Judge Proper, building, \$1,000, no- insurance ; Charles Carlson, billiard tables and fixtures, \$500, covered by insurance : Geo. Carr, meat and fixtures, \$50, no insurance; G. W. Bovard, barbed wire and salt stored in build ing, \$150, no insurance ; Judge Reck, damage to residence, \$150, no insurance : Daniel Walters, damage to residence, \$50, no insurance.

A FEW SPARKS.

The "soda fountain" paid for itself several times, and is voted a success. The engine is now in better trim Cullough and Coaners of Oil City and than ever. A hard coal stove is kept Morrow of this place were summoned in the room and a fire burning night and day.

Whig Hill Wonders.

[Our space is so limited at present that we are obliged to condense the following, as well as other communications this week. Sorry, but it can't be helped .- ED.]

Our community is having a rushing business boom.

The educational meeting here Saturday evening was a success.

Prof. Hillard was with us on Satur-

R. Z Gillespie returned to his school at Holeman Flats yesterday. We hope he arrived without any mishaps. Mr Joseph Swab and his excellent lady stopped at Mr. C. F. Gillespie's over Sabbath. Come again and wel-

himself there were present at the meeting General Negley, General Osborn, congressman-at-large from the state; Mr. Jackson, of the Twenty-fourth district ; Mr. White, of the Twenty-fifth, and Mr. Fleeger, of the Twenty-sixth. Then there was the

association, consisting of Mrs. J. J. Saint, Mrs. J. R. Darrah, Mrs. Joseph Scott, Mrs. W, A. Shaw, Miss May Kerley, Miss Julia Hickey, Messrs. W. C. Scott, J. A. Barnes and Geo, M. Harton. The ladies took a lively interest in the proceedings, but did not make speeches.

The association had a comprehensive plan for the improvement of all the rivers in Western Pennsylvania, including the Ohio, Allegheny, Monongabela, Youghio-gheny, Clarion and Tionesta. They advised appropriations to commence the work at oneo, and presented diagrams showing which should be made slackwat-er and which could be made of service by dredging and other means of channel im provement

Gen. Negley, who made the reply for the congressmen, assured them of the in-terest of the delegation in the whole matter of the improvement of the streams, but suggested that the better plan to pur-sue was to advise the completion of the work already under way, and then to commence such new work as would be most valuable and could be speedily com-pleted. He thought the force of the dele-gation should be exerted in favor of free navigation on the Monongahela construction of a dam on the Allegheny which would extend the benefits of navi gable water above the points affected by the Davis Island dam.

H. O. Davis has the thanks of the firemen for the donation of a stove. Mr. Davis is never idle at a fire.

The fire laddies worked like beavers, and so did everybody else, not excepting the ladies.

Dr. Coburn got on the safe side by removing his goods from Judge Reck's house, but it was happily not necessary. Judge Reck and Daniel Walters have concluded to insure their residences.

Had the large machine been charged when it arrived on the spot, it is believed the fire could have been stopped. The chemical engine was manufactured by the fire Extinguisher Manufacturing Co., of Chicago, Ill., and purchased from Martin Williams, State agent for Pa.
