The earliest of monumental painting in Rome relates to the decoration of the temples of Ceres, Liber and Libera by the Greek artists of lower Italy, Gorgasos and Damophilas, in 493 B. C.

Southey records in his "Commonplace Book" that a physician who has seen more than 40,000 cases of smallpox said he had never met with the disease in a person with red or light flaxen hair.

The luxury of strawberries and cream was not always known to the world. As an interesting fact of the season it may be mentioned that in 1509 Cardinal Wolsey first combined strawberries with cream, in an exalted moment of supreme

The bull ring was not put down in England by act of Parliament until 1835. In that year people were forbidden to keep any house, pit or other place for baiting or fighting any bull, bear, dog or other animal. This did away with a practice that had existed for seven cen-

The late King of Bavaria's favorite beverage was a mixture of white wine and champagne, prepared in a bowl with a thick layer of fresh, strong scented violets floating on the top. The violets gave a delicious perfumed flavor to the mixture, much to the King's taste, as Ludwig was so fond of scents that the air around him was generally redolent of perfume. This fancy cost him quite £10

A phil legist writes that ale as a name for mal or was probably first intro-duced into england by the Danes, as the name of is still the name for malt liquor among the Sandinavian nations. The Anglo-Saxons used the word beer until the irruption of the Danes, but the word was gradually disused, and the name ale was general until the introduction of hops from Germany in the reign of Henry VIII. With the hops came again into use the German or Saxon word bier or beer, which was at first applied only to the hopped liquor to distinguish it from ale -that which was hopped.

Adipose Tissue.

Fatness, or stoutness, is still loosely mentioned as evidence of health, although everybody acquainted with the laws of hygiene knows that it is nothing of the kind. "You're getting fat." is a common form of greeting intended to be complimentary: but if it be true, it is seldom so regarded. Stout persons, particularly women, are very sensitive on the point, and would be glad to forget it, not to be continually reminded of it. They are but too well aware of the inconvenienee, awkwardness and discomfort of the condition to be pleased by any reference thereto. Not only this, any excess of flesh is a sign of disease, if not disease itself. It is altogether preferable, on every account, to be thin rather than fat, to have too little rather than too much avoirdupois. Stoutness, although not so called, is unquestionably a misfortune. Everybody that is stout wishes to be otherwise, and many that are stout rying various ways to redu selves.

A man of ordinary height and build who weighs 200 pounds generally weighs more than he ought to, and is made conscious of it in divers ways. There are exceptions; but such is the rule. One of the extraordinary exceptions, as reported, was the noted Daniel Lambert. In youth he was very strong, excellent in athletic exercises, and gave no indications of cor-pulence. But, before twenty, he began to increase rapidly in size, which he ascribed to sedentary habits as keeper of the prison in Leicester. At twenty-three, when he weighed 448 pounds, he walked from Woolwich to London with little fatigue. He excited so much curiosity that he decided to exhibit itself, and he drew crowds in the chief cities of England. He was five feet eleven inches high, measured nine feet four inches about the body, more than three feet around the leg, and weighed at his death, which occurred at thirty-nine, 740 was due to some organic disease, which an autopsy would have disclosed. Pathology was not nearly so well understood seventy years ago as it is now. It is preposterous to suppose that any man of so extraordinary accumulation of flesh could have been in good health. If a very stout man were healthy, the fact of his stoutness would, after a while, be very likely to cause some physical disorder .-New York Commercial

A Chinese Superstition.

I saw a Chinaman burning paper in his doorway recently when I chanced to be passing his house late at night, in a back street in Brooklyn, and I had the curiosity the next day to ask an explanation from an intelligent Christianized Mongolian. He said that devout Celestials, particularly those who have just arrived from China, always burn paper in each doorway of the house before retiring at night. They believe that the progenitors of the present Chinese dynasty were dissatistied with the Chinese customs which grew up at the close of their dynasty, of permitting aliens to enter the Flowery Eingdon, and attribute the success of the Tertars to that custom. Kingdom, and attribute the To mark their displeasure they placed in the sky a star of death-dealing influence. which, if it should shine into their doors or upon the floors ten nights in succession, would cause the death of all who hours he gave out, but the fish was as inhabit the house. Red, which to the game as ever. Mr. Woods' friend, Aninhabit the house, ked, which to the Chinese mind typifies all that is good and righteous, is the antidote; hence the red curtains hung before every Chinese but at the end of nine hours more the salhouse and laundry. Fire, which produces a red light, expels the demona, hence the custom of burning paper in doorways. - New York News,

The piles of old London bridge, put down in the year 100, are still sound, the United States maintain more secret and water and the blue mud of the Thames benevolent societies than any other peohaving preserved them.

FOR VICTIMS OF ALCOHOL.

THE METHODS USED IN A PRIVATE HOSPITAL FOR WOMEN.

Drunkenness Classified as a Disease -How Patients are Treated-A Striking Peculiarity.

"The patients here are all women," said the manager of a quiet, unobtrusive building nothing could be seen to indicate the character of the occupants, and it could easily have been taken for the home of a business man of means.

"What are the special features of the institution?" continued the manager. "There is only one disease treated here, and that is drunkenness. Drunkenness a disease? Undoubtedly, the same as any other disordered condition of the Alcohol is a poison and people who take it habitually suffer from chronic poisoning just as the man does who works in a white lead factory for any length of time. The patients are all wealthy here, and, confidentially, this place is nothing more than a high-toned nebriate asylum. It would never do to call it so as it would ruin the business entirely. It is a peculiar thing about many of our patients, that is, those who come willingly, that if there were anything said about this being a retreat for drunkards they would never come here. They are sensitive on this point, although they know what is the difficulty with them. The hospital is always full, and in fact, patients have to be turned away

every day, and I understand that places similar to this have been started further downtown, to take care of the increase in the business. I can't say that drunkenness among wealthy women is on the increase, but there is no doubt that the number of people seeking treatment is

to tell. The object of the treatment is to break the habit. Patients have been sent home seemingly strong and all of the United States, 300 feet; in the right, who after a time come back worse in the plan of treatment, and no substitute for the alcohol. Medicine to take away the appetite for alcohol is nonsense, for by giving something for this purpose another habit will usually be formed Whatever tends to equally as bad. strengthen the body is used, and no patient is safe to discharge until the infammation of the stomach caused by alcohol has been removed. Fresh air, baths, exercise, light food and agreeable mental occupation do the work if a cure | The small beeruns rapidly from one to the is possible. There is a class of patients who do not want to stop drinking. They spend a few weeks with us, get patched up somewhat and go back to their excesses with the vigor of youthful indulgence. All the patients are benefited by treatment, unless there is too great an organic derangement of the kidneys and liver. I know of some absolute follow them. cures but they are but a comparatively small percentage of those treated. The trouble is that when they leave here, as soon as there is a reaction, however slight, from the cessation of tonic, they from the Black Hills of Dakota at Chifeel depressed and take a little stimulant any amount of money to have the

This is the real secret of a radical cure. "The patients cannot as a rule be trusted. The will lie about their condition, make themselves appear to be pounds. No doubt his immense bulk the advice of a physician. Then there a band of iron, and the mental torture induced by the effort to keep straight and the lack of confidence in the ability to do so is something horrible at times, and can only be appreciated by those who have seen cases frequently or undergone the agony themselves.

cure a person who did not have a stronger

desire to stop drinking than to drink.

"There is one striking peculiarity about alcoholic patients. They will agree with every statement made concerning the injurious effects of alcohol, and will acknowledge that drunkenness is the worst habit that could be formed. They will deliver temperance lectures to each other by the hour, and weep freely as they recount their misery and suffer ings. Give the most earnest protestor among them a chance to get a bottle of whisky, and she will seize it eagerly. The thought of whisky starts the machinery of desire going so strongly that nothing can resist it, and usually, until patient's stomach is healed, she will drink whisky, if she can get it, until insensibility is produced."-New York Tri

A Game Salmon.

Colin Woods hooked a salmon in the North Esk, Scotland. It was a large and obstinate fish. After Mr. Woods had played with it for ten and a-half drew Brower, took the rod, and it was thought that the fish must yield surely, mon made a vigorous run, and the hook came out of his mouth with a piece of the fish attached. Mr. Woods thinks the fish weighed sixty pounds.

It is said that the colored people of the ple on the face of the earth.

Didn't Have a Fair Chance.

If he'd had a fair chance and a fair oppor-tunity he said he'd have startled the entire community; and the great name of John Alexander McCrary would have echoed o'er valley and hillside and prairie, and from Timbuctoo to old Tip-perary his name would flaunt wide on the banners of fame'

he hadn't been rubbed out by fate's merciless friction, he'd have shown 'em a man like they read of in fiction, a man of un-questioned superb intuition, an Amalek-giant of great erudition, and fitted to fill any earthly position and startle man-kind with the noise of his name.

If he hadn't been so cornered by bad circumstances he'd have shown 'em a man like they see in romances; for the bulwarks of fats could never resist him, for the muses had bent o'er his cradle and kissed him, and genius exuded like sap form his syslike the dew of the night in a tropi

For he felt latent forces within him propelr he felt latent forces within him propel-ling, and geysers of power forever up-swelling, he'd gifts, like the purse of old Fortunatus, and his soul was possessed by a lurid afflatus, and an engine of thought was his brain apparatus which could thunder and puff through the de-pots of time.

th, to many like him 'tis a great consolation for the hard knocks of life a serene com-pensation, to brag of supreme and super-nal transactions they would have per-form had not fate's exactions held them back from these hypothetical actions to whose lofty level they surely could grow:

For had they come into the world unencum-bered their acts had been grand, and unique and unnumbered; they'd have startled the glooms in the Temple of Glory, and built up a name to grow an-cient and hoary; on the head roll of fame they'd have written their story and run the whole earth if they'd had a fair show.

-Lynn Union.

How to Tell a Good Melon.

A good water-melon may be known by pressing the thumb on the rind near the center. If the melon yields a little to the pressure and the indent made by that pressure disappears after it is removed the melon is ripe and healthy. If no indent can be made the fruit is not. ripe; if the indent is easily made and remains after the thumb is lifted from the melon it is over-ripe and unfit to be eaten. When the water-melon is thoroughly ripe and of good quality the in-terior of the rind should be greenish white and the meat reddish pink in color. The rind of a water-melon generally comes hard and the pulp brittle. If left. on the vine until properly matured the part in contact with the ground will be changed from a white to a pale yellow, and upon close examination numerous waterproof, and makes an excellent small pimples somewhat like the measles will be not ced on the surface, particularly on the outer edge. With these signs, if the melon be gently pressed and it cracks inside it may be regarded as ripe. The top side of a ripe water-melon is of a dull, lifeless brown color. A good musk-melon is known by its

color and odor. The rind is generally divided into nine ridges. The ridges are rough, but the spaces separating them are parrow strips of smooth skin. When the melon is ripe the rough skin is of a brownish-grey color and smooth skin of a greenish yellow. If the smooth skin separating the rough ridges is green the fruit is not ripe. If the melon is yellow all over, or nearly so, it is overrive and in a state of decomposition. The quality of the musk-melon is known by its odor. It should be smelled at the end opposite the one to which it was attached to the stalk-"the far end" fruiterers call it. The quality of the melon. will depend upon the strength of its odor. If there is no odor, the melon is coarse and only fit for cattle. If it has a sweet smell, the fruit is good. The stronger the musk odor, the better and finer the fruit. The meat of a muskmelon when it is of fine quality is of a rich mellow, yellow color; in some varieties it has a greenish tinge, in others it approaches orange -New Fork News.

A Pretty Tough Snake Yarn.

A recent communication from Louis ville, Ky., says: Uncle Ephraim Smith was a very important personage in the motley audience present at the unloading of a car of "rat:lesnake" melons from Georgia at the C., O. and S. W. freight station, at Twelfth and Rowan streets, yesterday afternoon. As the beautiful cucurbitaceous fruit was tossed from hand to hand, Uncle Ephraim's mouth watered. Finally a huge melon was tound with a small hole in one end. Uncle Eph had managed to get into the good graces of the Italian receiving clerk by sundry learned remarks on melon culture, and the fine prospects for the market, and the melon was accordingly handed over to Eph in exchange for five cents which he had managed to borrow. Last night a select number of guests assembled at Eph's residence, at Fourteenth and Congress alley, and after due preliminaries the old man's pazor crushed through the luscious fruit, and as it opened a huge diamond-backed rattle-nake reared its head from the heart of the melon and prepared to strike. As it coiled for a leap Uncle Eph disappeared under the table and the rest beat a hasty retreat. A philosophic member of the company, aware of the fact that a "rattler" can only strike one-third its length, finally persuaded two of the men to return with him, and the reptile was killed. It was five feet two inches in length and about the thickness of a man's wrist. The snake is of the venomous kind known as the dismond back, and is found only in the swamps of Georgia and the palmettos of Southern Florida. Uncle Eph takes pleasure in exhibiting the body of the reptile.

Care of the Eyes.

SINCE 1700 Pennsylvania has had sixteen Governors, eight of whom were Germans. We Appeal to Experience.

For a long time we steadily refused to publish testimonials, believing that, in the opinion of the public generally, the great majority were manufactured to order by unprincipled parties as a means of disposing of their worthless preparations.

That this view of the case is to a certain extent true, there can be no doubt.

At last, several years ago, we came to the conclusion that every intelligent person can readily discriminate between spurious and bona fide testimonials, and determined to use as advertisements a few of the many hundreds of unsolicited certificates in our posses-sion.

In doing this we published them as nearly a In doing this we published them as nearly as possible in the exact language used by our correspondents, only changing the phraseology, in some cases, so as to compress them into a smaller space than they would otherwise occupy, but without in the least eraggerating or destroying the meaning of the writers.

We are glad to say that our final conclusion was a correct one—that a letter recommending an article having true merit finds favor with the people.

was a correct, one—that a letter recommending an article having true merit finds favor with the people.

The original of every testimonial published by us is on file in our office, an inspection of which wift prove to the most skeptical that our asser son made above, that only the facts are giver, as they appear therein, is true.

But as it would be very inconvenient, if not impossible, for all of our friends to call on us for that purpose, we invite those who doubt iff there be such, to correspond with any of the parties whose names are signed to our testimon als, and ask them if we have made anymisst atements, so far as their knowledge exetends, in this article. In other words, if whave not published their letters as nearly verbation as possible.

have not published their letters as nearly verbati m as possible.

Very respectfully.

E. T. HAZELTINE,

'Proprietor Piso's Care for Consumption
and Piso's Remedy for Catarrh. We append a recent letter, which came to as entirely unsolicited, with permission to publish it:

Publish it:

Dayton, Ohio, Jan. 12, 1886.
You may add my testimony as to the merits of Piso's Cure for Consumption. I took a severe cold last February, which settled on my lungs. They became ulcerated and were so painful that I had no rest for two days and nights. I got a bottle of Piso's Cure for Consumption, and was relieved by the time I had taken haif of it. Since that time I have kept Piso's Cure in the house, and use it as a preventive, both for lung troubles and croup, for which I can recommend it as the best medicine I ever used: and that is saying a great deal, for I have used at least twenty others, besides about as many physicians prescriptions. Piso's Cure for Consumption has never failed to give relief in my family.

A. J. GRUBB.
