Speedy Boats Armed With Machine Guns and Torpedoes-Eriesson's

"Destroyer"-A Submarine Gun. The most noted torpedo-boat builders of the world are Messrs. Yarrow and Messrs. Thornyeroft, of London. Each of these great firms employs from 1,000 to 1,200 workmen, and can turn out at least one completed boat per week. The chief peculiarity of torpedo-boats is their almost phenomenal speed. They are built of steel, the different classes ranging in length from fifty-five feet, intended for harbor defence, to vessels of 166 feet, capable of making an extended cruise at The Falke, a boat recently built by the Messrs. Yarrow for the Austro-Hungarian Government, is 135 feet long, fourteen feet wide, draught of water five feet six inches, and attained on the trial trip a speed of twenty-five and one-half miles per hour. The armament consists of two Nordenfeldt machine-guns, carried on deck, and two bow-tubes for discharging Whitehead torpedoes.

The development of torpedo-boats is now so rapidly progressing that any description becomes almost out of date during the writing. A vessel just completed by the Messrs, Yarrow for the Japanese Government is the largest that has been yet built. It is 166 feet long, nineteen fect wide, is provided with twin screws, to give greater facility in turning, and maintains a speed of twenty-four miles per hour. The engines are protected by a steel deck one inch thick; and, in addition to two bow-tubes for discharging torpedoes directly ahead, two turn-tables are mounted on deck, from which tornedoes can be launched in any desired direction.

Very similar in their construction, and no less famous for speed and manœuvring qualities, are the boats built by the Messrs. Thornycroft.

In this country, the Messrs. Herreshoff, of Bristol, R. I., have built a number of very fast boats, designed to be used with torpedoes. One of these is the noted steam-yacht Stiletto, which may well be taken as a representative of the American type. The Stiletto is built of wood, with iron braces; length, ninety-four feet; width, eleven feet; draught of water, four feet six inches, and has attained a speed of twenty-five miles per hour.

A very formidable torpedo-vessel has been built in recent years by that greatest of living engineers, Captain John Ericsson. It has been appropriately named the Destroyer. Once, at a critical moment in the history of our country, as every American well knows, Captain Ericsson came to the rescue with a Monitor. Since then his genius, energy, and mechanical skill have been devoted to the problem of saving our great coast cities from destruction in the event of war with a foreign naval power, The result of these years of study and experimenting is the Destroyer, armed with a torpedo-gun which discharges under the water a projectile carrying a charge sufficient to sink the largest ironclad afloat. The submarine gun is mounted in the bow of the vessel, near the keel, and is thus nearly ten feet below the surface of the water. It consists of a cylinder of gun-metal, or steel, thirty feet long, additionally strengthened at the breech by broad steel rings. It is loaded at the breech, the muzzle being encased by the vessel's stem, and closed by a valve to exclude the water. This valve is opened by suitable levers just before the gun is to be discharged, and closes automatically as the projectile leaves the muzzle, The projectile is a steel torpedo, twentyfive feet long, sixteen inches in diameter, and carrying a charge of 300 pounds of gun-cotton. It has a range of 300 feet during the first three seconds of its flight. The form of the torpedo is cylindrical, with a conical point in which is placed the percussion-lock and firing-pin, and the explosion takes place upon impact,-Scribner's Magazine,

Big Doctor's Bills.

The public often marvels at the prices paid by rich persons for art objects, Greater surprise might be caused by the sums given to physicians for the preser vation of health. It has been said that Miss Wolfe, the hopeless invalid, owner of \$10,000,000, pays Dr. William Tod Helmuth \$6,000 a year to doctor her. She confirms those figures. Mrs. Alexander T. Stewart retained three doctors at an aggregate cost of at least \$40,000, and called in one of them nearly every day. She had what seemed like a system, by which she abided by the decision of two out of three in matters of diet and medi-Mrs. William Astor pays to Dr. Fordice Barker personally an average of \$20,000, always sending a check for double or treble the amount of each bill rendered. Her idea is that by rewarding his skill and vigilance liberally she will get the very best service of which he is capable. Mrs. Cornelius Vanderbilt's physician is Dr. W. S. Belden, and hough her health is excellent he is consulted often, prevention being preferable to cure, doubtless, and the belief is that annually .- New York Letter.

Where It Is Really Cold.

Bishop Clut, the Arctic regions mission ary, now in Montreal, furnishes the following interesting statistics of tempera-ture observed at Good Hope during the years 1885 and 1886: From October 1, 1885, to May 1, 1886, the thermometer was never above zero. In February, 1886, it weat down to fifty-two degrees below, and was as low as eighteen degrees on May 11 of the same year, while on October 24 preceding it was down to twenty-seven degrees. Fourteen years ago Bishop Clut left the ice on the Great Slave Lake on July 3, and afterward found ice again on the Mackenzie River, beyond the polar circle, avearly as September 17. — Montreal

succeeded in cultivating the curious Kermes oak which, when punctured by one of the cocens insects, produces the ancient, blood red dye supposed to have been used by Moses to tint the hangings of the tubernacle. The Kermes oak is a dwarf, bushy shrub, somewhat resembling a holly, and grows profusely in Spain .-Philadelphia Call.

THE WESTERN BOOM.

St. Joseph, Mo., Still Lending All Competitors in Real Estate Deals and the Acquisition of Substantial Enterprises.

The most noticeable real estate activity continues to prevail at St. Joseph, Mo., says a correspondent of an Eastern paper. Packing houses and other industrial enterprises, among them the Louisiana Tobacco Works, are going in at a lively rate; one of the chief evidences of the growth of the city being the granting of a franchise to a syndicate of Kansas City, capitalists for the construction of an extensive system of cable lines, to be commenced at once, and to cost \$300,000. The best evidence, however, is in the showing of actual transactions closed in one week recently; W. A. P. McDonald bought 99 lots in Eastern Extension for \$10,500. He sold 54 of them for \$10,700, and sold the balance at an advance of \$20 per foot in cost. Sam Nave and J. S. Britton bought a lot in Patee's addition for \$2,000 and sold for \$1,000 in four days. W. H. Constable bought lot 2, block 54, St. Joseph Extension, for \$300, and sold for \$550. J. S. Blackwilder, of Chicago, bought eighty feet, southeast corner of Third and Sylvanie, for \$14,000, and has been offered nearly double that for it and refused it. J. M. Hill paid \$7,000 for northeast corner of Second and Francis, and has since refused \$18,000. C. W. Brown bought two lots on St. Joseph avenue for \$1,900, and sold in six days for \$3,000. John Kelly bought two lots in Eastern Extension; he paid \$600; in thirty days he sold for \$000; it has since been resold for \$1,200. J. F. Tyler bought a lot in Eastern Extension for \$125 and sold to Hubbard for \$500, who has since been offered \$700. L. E. Carter bought a lot in January in Kemper's addition for \$700. In three days bought a lot in Patee's addition for \$000. Who has since been offered \$400. L.
E. Carter bought a lot in January in Kemper's addition for \$700. In three days after he was offered \$1,000, and since then \$2,000. He bought four lots in Robidoux addition for \$4,000; sold for \$6,000, and his purchaser sold for \$8,000. Mrs. N.
M. Brewster bought three lots for \$500 and sold for \$1,150 in three days, and in four days they were resold for \$1,400, D.
G. Griswold bought six lots in East St.
Joseph for \$300 and sold the next day for \$750; also three others ;for \$200 and resold in three weeks for \$1,000,
One of the publishers of Hoye's Directory, speaking of the Western cities and the prevailing boom, writes as follows of St.
Joseph, where he has just issued the Directory for 1887; "Not only has St. Joseph increased in population at a most satisfactory rate, there being an increase in one year of 5,846, while the total population in round numbers is shown to be 60,000; but she has undergone a spirited revival that

round funders is short from the has undergone a spirited revival that augurs the outstripping of all competition, Ten years ago the city had scarcely a dozen manufactories, whereas the year '87 finds manufactories, whereas the year '87 finds her with some 170 of all kinds, with thirteen railroads, the largest stockyards west of Chicago, some thirteen miles of streets, paved with asphaltum, and as many miles more under contract, with the electric motor soon to be in operation on two of the car lines, and the cable line an assured fact, and new enterprises springing up daily on every hand. The demand for real estate has been steady and active. For the past year St. Joseph has led almost continually the other cities of the United States in bank clearances, the per cent. of increase over 1886 reaching in one case 140.7, and up to 1886 reaching in one case 140.7, and up to date maintaining an average of almost 100, Down to Dec. 31, 1886, St. Joseph's jobbing houses did a business of \$110,539, 000, showing an increase in the business of 1886 over that of 1865 of \$23,111,028. A fair indication of the increasing business may be sought in the fact that St. Joseph now employs a force of commercial travelers numbering 1,013 men."

St. Joseph, more than any other West-

St. Joseph, more than any other West-ern town, offers the best inducements to men of small capital to commence a manu-facturing business, and to mechanics and laborers to find employment and build de-

SELECT SIFTINGS.

During the reign of Augustus Cæsar, Rome, it is calculated, had a population of about 2,500,000.

Toads are an article of merchandise in Paris, being kept in tubs and sold at the rate of two francs a dozen.

The 50,000 French who lived in Lower Canada, when the English conquered it, have increased to 1,289,929,

The Roman soldiers used to be trained to use the left hand as well as the right, so that if the latter were disabled he could

take his sword in the other.

It is believed by many that for magnetic or electric reasons the head of a sleeping person should point in the direction of the magnetic needle-to the north. The theory lacks scientific indorsement as yet.

An old remedy for cancer has been resorted to with success in Augusta, Ga. It consists of the application of a common sea crab. The remedy was used in Germany half a century ago, but has long been abandoned.

The honor of originating Arbor day belongs to ex-Governor J. Stering Morton of Nebraska. The first proclamation for the observance of such a day was made at his suggestion, and it is said that 12,-000,000 trees were planted on the day thus designated.

There is in Lincoln, Cal., a young man whose eyes are very like an owl's. He can see but little in daylight, scarcely at all in the sunlight, but at night his vision is perfect. His wonderful sight has been tested by many, and as a guide at night he has no equal.

The New Year is celebrated at six different times in Persia. At Teheran the Jews have one day, the Armenians another, the Russians a third, the Roman Catholics and Protestants a fourth, and the Sheahs or Persian Mohammedans a the prevention costs not less than \$10,000 | fifth, and the regular Mohammedans still a sixth.

Formerly the court language of Europe was the French, and it is probable that in a general conference of all the powers of Europe the French would be the language which would be used, but the English language is taking the place of the French and is spoken in every court of

A Clever Canine.

Farmer Davidson, of Newcastle, Penn., has on his premises a bell hung at the top of a twelve-foot post, and rung by a rope which hangs nearly to the ground. He also has a dog which used to sleep out of doors. The other night the family was awakened by a loud peal from the bell. Mr. Davidson looked out and saw no one. He went to bed again, and again the bell The Curious Kermes Oak.

The Botanical Cardens, London, have the dog, which was at the door, did not seem excited, except when his master would not let him in. After being dis turbed by the bell several times, Mr. Davidson watched from the window, and the mystery was explained. The dog would ring the bell and then run to the door to go in when it was opened. He was permitted to sleep in the house that

Do Stove-Pipe Hats Make Bald Heads?

The habit of wearing warm coverings on the head is not of recent date; the armies of Europe, for instance, no incon-siderable number of men, with heads close cropped, have worn for a long period warmer and heavier head-gear than the modern dwellers in cities, without the same tendency to baldness. are the heavy fur coverings of northern races incompatible with luxuriant hair. It is also difficult to understand what injury can result from close cutting, per se The growth is in the hair-folliele, and in it alone; there is no vital connection between the hair outside the scalp and within; it is usually cut closest at the back of the head and neck, where baldness never occurs. Would not close cutting rather stimulate the growth by exposure of the scalp? Such at least is the popular belief. So, too, with indoor life; women, who ought to show it most, whether in the home or in the factory, are never bald as men are; on the contrary, it is most common with men in good circumstances, as Mr. Eaton's statistics show, men who spend a larger proportion of their daytime in the open air than the indoor worker.

I believe the common form of baldness is due entirely to the kind of hat that is worn, principally to the high hat and the hard felt hat, but also to any other headcovering that constricts the blood-vessels which nourish the hair-bulbs. To have a clearer understanding of this, we must remember that the scalp is supplied with blood by arteries at the back, sides, and front of, and lying close to, the skull, which diminish in size by frequent branching as they converge toward the top of the head. They are in a most favorable position to be compressed, lying on unyielding bone and covered by thin tissue. Consider what effect must be produced by a close-fitting, heavy, and rigid hat; its pressure must lessen to a certain extent the flow of arterial blood, and obstruct to a greater extent the return of the venous; the result being a sluggish circulation in the capillaries around the hair follicles and bulbs, a consequent impairment of nutrition, and final atrophy. This pressure is not trivial or imaginary, as any one will ad-mit who has noticed the red band of congestion on the forehead when a hard hat is removed after moderate exercise,-Popular Science Monthly.

Evening Funeral Services.

Evening funeral services are becoming very frequent. It is urged in favor of the growing custom that it affords gentleman opportunities for attendance that they can hardly take during business hours. Besides this great convenience distressing scenes of parting with the dead loved are kept from the gaze of the curious and unsympathetic. Upon the score of economy, too, it is to be commended. The remains are kept over night and the next morning they are unostentatiously removed to the place of burial, followed by only a few carriages with the nearest relatives and family intimates. And carriage hire is a prominent item in an undertaker's bill. From Harlem to Greenwood the price for a coach is \$10. - New York Times.

1880, R. T. Leonard, Hamburg, Pa., wrote: Had severe inflammatory rheamatism for weeks; a few applications of St. Jacobs Oil cured me." Oct. 19, 1886, he writes; "Confirm my statement; was entirely cured," Price fifty cents. Sold by Druggists.

Juno, the huge dromedary which for a number of years in the Weodward Gardens in San Francisco has been the chief attraction to the children, who rode her in throngs, is dead. She was sixty-one years old, and left an interesting infant nearly a year old.

Mark A. Miller, Traveling Agent, Eric R.R., writes: "Suffered with pleuro-pneumonia; one bottle Red Star Cough Cure ensured my recovery," At druggists.

The sole surviving representative of the revolutionary war is Abigail S. Tilton, of North Woodbridge N. H. Mrs. Tilton is now a trifle more than 100 years old. Her husband Benjamin Stevens, participated in the battle of Bennington.

The Most Remarkable Business in the Country.

Our citizens have observed notices in the leading papers, from time to time, of a little harmless food blant called Moxie, found in South America last year. Its fine taste as a baverage, and ability to restore nervous, weakly women, in a few days and nelp overworked people of both sexes to do two days' work in one with less fa igne, have made the demand so immense that 5,000,000 bottles have been sold in 17 months—what will the sale in five years be at this rate.

A CHARMING village named La Tour, in the department of Ardeche, in France, has become uninhabitable, owing to the number of crimes, and the people have migrated in a body to more peaceful regions.

This stannard preparation has by its pecul merit and its wonderful cures won the confidence of the people and is to-day the most popular N. B. blood purifier and spring medicine.

SPARKS FROM THE RAILS. What the Employees of the Central-Hud-

son Railroad have to Say about Dr. Pardee's Remedy.

Rochester, May 28, 1886. Pardee Medicine Co:

GENTS:-I desire to express to you some thing of my feelings of gratitude for what your remedy has done for me. For fifteen years I have suffered greatly with neuralgia. At times the pain has been so intense that death would have been a welcome relief. It affected my eyes to such an extent that for a time I was totally blind and gave up all hope of recovery, no treatment I could procure affording me even temporary relief. I have used Dr. Pardee's Rheumatic Remedy for several months and to-day I am as well and as free from all neuralgic pains as when a boy.

Dr. Pardee's Rheumatic Remedy has cured me and I am positive it will cure any case of neuralgia or rheumatism, and I shall recommend it to all.

I would not again suffer what I have for five thousand dollars,

Yours respectfully, D. W. MILLER, Engineer, N. Y. C. & H. R. R. R.

Mr. Horton Knight, a baggageman on the N. Y. C. & H. R. R. R., who resides at No. 9 Riverdale street, this city, says:

MORE WORDS OF PRAISE.

"I have been troubled with rheumatism for several years. This spring I had a very severe attack of inflammatory rheumatism and was compelled to leave my train. I suffered intense pain. My arm and hand were badly swollen and inflamed. I took various kinds of medicine, but obtained no relief. I was urged to try Dr. Pardee's Remedy, but it was with great reluctance that I did so, as I had no faith whatever in it. But I am fully convinced from personal experience that it is a vinced from personal experience that it is a positive cure for this dreaded disease, and I can recommend it as a remedy worthy the confidence of all. Am feeling better than I have for ten years, and attribute it all to Dr. Pardee's Rheumatic Remedy."
