## FARM AND GARDEN.

#### Savor in Dairy Salting.

A Wisconsin dairyman lately told me he milked seventeen cows the past sea. son and early in the summer ran out of A simpler plan, in which any portion salt, and having read in an agr cultural or all of a hog's carcass can be cured, is paper that cows do just as well without alt he neglected to get another barrel. ught a carload of millstuff and began feeding, but still received only 220 pounds of milk a day, and several of the cows would hold up their milk once or twice a week. Then he began to salt regularly every day, and the cows im- advances in favor. proved at once and the increase was steady until on the same feed they were producing 370 pounds of milk a day, and, astend of being kept at a loss, yielded a and will keep them poor. fair profit. The farmer needs to be wideawake and careful. A well-balanced ration fed at regular hours and in regular quantities, with attention to water, salt, beilding, and all the points which go to make the animals comfortable, will save money, part cularly in a season when feed is h gh-priced, I never found a work hand to whom I could afford to trust the winter feeding of my stock. — Wa do F. Brown, in Tri-says it will increase the yield of milk

#### Horses' Feet.

There is too much neglect of the feet of horses. When they are unshod, the feet will generally take care of themselves and keep from getting foul; but, when they are shod, they must be fre quently cleaned out, or the earth and shoes that the bottom of the feet w ll get Never give it in excess. sore, and about the frog inflammation will set in, and the result will be a disease and provokingly feminine, and thinks known as thrush. This may be cured by that in no place does politeness pay washing the creases along the frog with better than in the cow stable. a dilution of carbolic acid, or with brine Large profits do not always depend and then pac ing dry sait in the spaces. upon large crops. One may grow an ex-The packing of the earth will often make | traordinarily large crop, but the expense a horse lame, and it is sure to do so if a of so doing may ba ance the receipts. gravel or small stone is pressed into the ole of the foot and kept there. Sometimes the gravel will force its way through the sole and only come out at the top of the foot. When this is the case the horse is very lame and it takes a month or two for it to get over the pain-The feet of a horse should ful trouble always be cleaned out after a drive in the mud, and when they are pac ed with snow. The bottom of the foot and the an experiment with peas showed that it frog should be let alone both by owner required thirty-five pounds more of and blac-smith and not be cut down. A cooked than uncooked to make 100 horse wants all its frog to reduce the lar pounds of pork, live weight. of travel and to protect the bottom of the hoof. It will wear away as fast as it is by investigations that the much praised necessary. Every few weeks, when orchard and other early ripening grasses cured in any other way, underdrain. was very apparent.

## Curing Meat.

The season of the year in which meats may te cured on the farms with best success is from December 15th to February 13th, the interval between these dates affording two indispenable con-ditions, viz., cool weather and im-munity from insets and pests. Pock must be cut to suit the demands of the different markets in which it is to be sold, but never lose sight of the fa t that it ought to be in such form as will pack snugly. I emember too, the im-portance of having the meat thoroughly relieved of animal heat previous to packing d wn.

The two processes, salting with and without brine, are both popular and effective when carefully performed.

When it is desired to use brine the meat may be packed in layers. F. D. Coburn, excellent authority, advises salt at the rife of 8 pounds to each 100 pounds of pork. Sprinkle the salt evenly over and around each layer unt I the cask is full; then clear rain water or other pure water is poured in until all the interstices are filled. Many prefer to to prepare the brine by adding to the sait some sugar, saltpetre, etc.,

dissolving them in water and pouring the pickle over the meat. A recipe recom-mended by Coburn is as follows: For 100 pounds of pork, 4 ounces saltpetre, 3 pints common molasses or 2 outs de the teat. A man standing with pounds brown sugar, and 7 pounds salt. a little boy in the crowd near by cried When dissolved, pour over the meat, Some hol the pickle, skim it of im-purities, let it get entirely cold and then pour it over the meat. In any case, be sure the meat is always covered with the hand of a bystander, and Dan did the brine.

The length of time hams and shoulders the showman, "and I'll soon convince ould be kept in pickle depends on you. their thick uses -from one to two months, antly: "look in that corner at the beauti-For curing the abo e without brine the ful Num'd an lion." #### A Great Stock Farm.

"You people in the East know noth-ing about stock farms," said John Mac-key, the California horseman, in the St. James Hotel the other evening. "There's ex-tiov. Stanford's farm in San Mateo County as an example. He had Bis no longer heeded the hunt-man's bugle, tro ters and thoroughbreds on his farm when I left, and of the lot 285 were manner. A few days since some children, trotting-bred brood mares. He runs to trotters and has been wonderfully suc-nose a pair of spectacles which contained cessful at it. New Yorkers think of the a powerful lens. He at once began thoroughbred horse as the great animal romp around as he did in the days of his of the stock farm, but the trotter is in reality the fellow who brings to the before his eyes and on the following day, the handsomest returns after when the other dogs were called for the all." Horses who can trot in 2.25 out chase, he joined, and was in the lead there, says this excellent authority, are when his glasses were pulled off by the p'enty as three-minute horses in this city, briers. He immediately carried them to and the price asked for the former there his master and evinced clearly that he about the same as can be readily ob- wanted them replaced. When they are tained for the latter here. A 3 or 4 year-old that cannot show better than 2:30 on the road isn't worth owning in the opinion of these California horsemen, and can casily be had from \$200 to \$300 .--New York Times.

## A Showman Entrapped.

sidered most stylish this season, and a well defined and orderly bang is pre-ferred to the fluffy brush of unkempt looking hair, which was the fashion a short time since.

The prettiest of all the pretty jackets worn with house dresses is the Eton, and when in velvet it is particularly natty. Sometimes a beaded embroidery is used to make them still more attractive and a trimming of pendants around the edge.

Biscuit colored suits are stylish and the underskirt is invariably in color, green of a dark shade being most stylish. next black and in that case the trimmings for the jacket and the sides of the over dress are in black braiding or of black astrakhan.

There are many new shades of vellow this season, the faintest and most delicate being lettuce heart, which is almost green, and as seen in some exquisite moires. It is a charming tint. Then there is burnt orange for the brunettes, so well suited to dark, rich complex ons The red crape bonnets, which a pro-

fessional beauty has made popular, are still being wo n for receptions and the theatre by fashionable young women. No flowers or ribbons are used on these simple yet effecti e bonnets, simple pulls of the crape being the sole trim-

eight years of age are braided with black soutache in cur ed rows. These are made with a round, hi h waist which is lapped from the right shoulder to the left side at the waist-line, curving slightly. The skirt is plain and simply hemmed, and gathered fully to the waist.

summers, whose parents live on Pool's Slough, Yaquina, dre., saw a deer dash by the house and jump into the slough the other day, whereupon she procured her father's Wine ester and shot the ani mal dead. She then umoored a boat tied to the bank, rowe i out to where the buck lay floating in the water, pulled the car-cass into the heat and brought it ashore before any of the men folks arrived. The deer weighed 200 pounds,

#### A Chinese Restaurant.

The pagan restaurant where we cheered but did not inebriate our elves was daintily clean and handsomely decorated with gold work and flowers. Ees des our tea we had nuts, citron, birds nest pudding, and some other preparations mys terious and awful. There was one dish of ea h kind, out of which all partool harmoniously with little two-pronged brass forks. We, of course, bought the dishes from which we ate, and caused great deal of gayety among the heather by refusing to take new ones in place of them. We also have each the autograph of mine host Yum-Hum-Rum-I de

believe I can quite re all it, but anything will do, for I don't believe he can remember such an outlandish name him-self. They could not understand much of what we said, but I can't look down on the pagars on that account, for it was just that much more that we made out from them, - Overland.

plexions would never, under any circumstances, wash the face in soap, as it was said to roughen and coarsen the skin. Now, that Ivory Soap has been invented, this idea is exploded, and a well-known physician in the metropolitan profession recommends his women patients to use it freely every day, lathering the skin well. He states that none but the most beneficial results will be effected by this method of improving the skin.

He holds-with considerable plausibility-that the pores of the face become as much clogged by grease and dirt as the hands or any other portion of the body. And if soap is considered a necessary purifier in the bath, its needs must be felt equally on the face. " By an abundant and regular lathering the facial pores, he claims, are kept open, clean, free from the clogging matter that produces unsightly blackheads, acne, pimples, and a pure, healthy, fresh and brighter complexion is the resultant. Not mincing matters, he says that the trouble with most women who have sallow, pasty skins is, that from year's end to year's end they never have a really clean face." -Brechiyn Engle.

### A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'lvory'; they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.
