"It is a very simple matter for the theorists to tell the workman what to do, but let the theorist turn workingman and see then how he would look at things."

Some of the sapient free trade jour-

nals have discovered that it is not free trade in general, but free trade in raw materials that the country is pining for. They tell us that if our manufacturers are supplied with free raw material they can export their manufactured goods to the markets of the world. The Philadelphia Times is particularly struck with this idea, which it copies from the Chicago Tribune with loud applause. If an English manufacturer and an American manufacturer each have the same facilities for obtaining free raw material, the same facilities for manufacturing it, and the same facilities for shipping and selling it, will the Times explain how the American can sell as cheap as the loom or the anvil. NORTHWESTERN LUMBERMAI

PUBLISHED WEEKLY AT DEARBORN ST., CHICAGO, BY B. JUDSON. TERMS, ONE YES \$1; SIX MONTHS, \$2, IN ADVANCE

THE LUMBERMAN is published in the interest of its subscribers; consequently it is a curiosity in modern trade journalism. No advertiser can buy a line it is editorial or news pages. That is who makes it the best advertising medium is the world. A journal in which every other paragraph is a paid "write up," or il lustrated puff, is absolutely worthless to the reader; it is worse than useless, because it is misleading. The Lumberman has information to sell at the rate of \$4.00 per year for 18 or 20 pages per week, gives more pages of reading matter, outside of its advertising—the full number running from 40 to 48 pages each week than any other journal published at the same price in the world. They contains substantially all the lumber news, and the weekly reviews of the markets south and west, north and south, are indispensable to any lumberman who cares to keep posted on current events. Its advertising pages contain more valuable information than is given in all the pages of man jumber journals, so-called. As a matter of fact, its advertising pages are of the ulmost value to all users of wood-working machinery, as they form a complete catalogue of the latest and best of all the modern devices used in lumber manufacturing.
