-Last week as we were putting our forms to press, the news of Edward Bennett's death was given us, and we had time only to make the briefest mention of the fact. Mr. Bennett was 12, 1829, and died in Tionesta, Pa., Oct. 31, 1888, aged nearly 60 years. At the age of 12 he moved to Canada with his parents, where he lived to manhood, learning the trade of wagon in the early days of the excitement, and worked at his trade. Over five

years ago he moved to this place and associated himself with Wm. F. Blum in the wagon making business. Mr. Bennett was a quiet, industrious and esteemed citizen, against whom no one ever had aught to say, but whom everyone liked who became acquainted with him. He was taken sick with typhoid fever about two months ago, and although he received excellent

and constant medical attendance, along with the best of nursing, his case seemwere conducted by Rev. C. C. Rumberger, took place on Thursday after-

noon at 4 o'clock, the remains being interred in Riverside Cemetery. Mr. Bennett was a member in good standing of Irwin Council, R. T. of T., in which order he carried an insurance of \$1,000 which will go to his heirs.

#### PENNSYLVANIA'S SCHOOLS. Superintendent Highee's Report for Last Year.

Advance sheets of the annual report of Dr. E. E. Higbee, Superintendent of Public instruction, are just out. From them the following facts are gleaned: The number of schools in the State is 21,342, an increase of 280 since last year's report. The average length of the school term is now in months, 7.17, a large increase over the record of last year, which was 6,71.

"This," says Dr. Higbee, "is one of the good results of the recent law, which made the minimum term six months. The number of teachers, exclusive of Philadelphia, is now 21,-168; males, 8,915; females, 12,253; a decrease of 313. At first glance this may seem to indicate a most crowded condition of our schools, inasmuch as the number of teachers has decreased and the number of pupils increased. But this decrease of teachers is owing to the fact that our two-term districts (where the winter school is taught by one teacher and the summer school by another) are rapidly passing away."

The average salary of teachers, exclusive of Philadelphia, is now, for males, \$37 12 and for females \$29 60. The amount of money paid to teachers for the year preceeding this report was \$4,673,324 50, an increase over the year preceeding of only \$90,950 15. The amount paid to teachers in this year was \$5,044,38515. an increase over the preceeding year of \$371,060 65. The number of pupils now enrolled in the schools, exclusive of Philadelphia, is 831,367, an increase

of 10,556 over last year's report. Dr. Higbee renews his recomendations regarding the passage of a law for the inspection of schools in the rural districts. He thinks such a law cannot fail to result in incalculable good. Superintendent Higbee also devotes considerable attention to the subject of manual training in the schools. He believes there will be some difficulty in establishing this branch of education in the country districts. Continuing he says :

#### F. M. Morgan's New Brick Block.

Another handsome, imposing business block has just been completed by our enterprising townsman, Mr. F. M. Morgan, located on Centre street, second door from the railroad crossing. The building is constructed of brick. and the dimensions are 60x22 feet and

three stories high. The room on the ground floor is the full size of the building and fitted up for mercantile purposes. Being located between the the upper polite world it is not considered postoffice and the opera house, it is one of the best business sites in the city, and anyone wishing to engage in the mercantile trade cannot find a bet- to boom this edict of pulpy-headed modter situation. The room is well finished and has abundance of light, while the handsome French plate glass front affords ample means of displaying any kind of merchandise. The second and third floors are reached by a wide and well arranged stairway, guarded by a substantial railing, beautifully finished in hard wood and so constructed as to

make access to the rooms easy. Oa the second floor there are five rooms and on the third there are six. These rooms are finished in the best possible the labor. #### THANKSGIVING.

The President has issued the follow ing proclamation :

Constant thanksgiving and gratitude are due from the American people to Almighty God for His goodness and mercy which have followed them since the day He made them a nation and vouchsafed to them a free government. With loving kindness He has constantly led us in the way of prosperity and greatness. He has not visited with swift punishment our shortcomings, but with gracious care He has warned us of our dependence upon His forbearance and has taught us that obedience to His holy law is the price of a continuance of His precious gifts.

In acknowledgment of all that God has done for us as a nation and to the end that on an appointed day the & Oil Liniment is an offensive prepaunited prayers and praise of a grate- ration. It will not stain clothing or ful country may reach the throne of the fairest skin. For sale at Boyard's,

#### HERE AND THERE.

The Bradford Star says: Venus is beginning to outshine the other evening stars: she may be seen in the enuthwestern sky at twilight. Jupiter is moving own toward her. They get a little nearer very evening. Venus seems coy, but she isn't. Behind Jupiter is Mars, as if watching the celestial flictation. The three planets are worth looking at in the hour

There is a society paragraph current, b the effect that "in fashionable society and good form to talk smart or say elever things or to refer to books, authors, foreign politics or any of the great affairs occupyog the world's attention." The attempt ledom will be a flat failure. No doubt the dude and the empty-headed trifler of both soxes would be glad to make inanity and insipldity the rule in society. But those who know good society, and are mainstays of it, are well aware that the brainless ultra-fashionable noodles taboo clever talk simply because they can't understand it and are incapable of taking part in it.

Franklin News. An exchange says : "Everybody in the wide world is hunting a soft snap. Boys grow up with a desire gaining strength in their expanding chests, for some position wherein the pay will not be regulated by goes far. There are no such snaps; if a person wants to be anything in the world, and another that a man can go through, the better are his chances in life. ## A Wonderful Cat-astrophe.

A correspondent at Marienville, this county, writing to the Derrick tells the following pretty good one:

The big sensation occurred on November 1. A man hurried to town from the country, aroused the Justice of the Peace from his peaceful slumbers, with the information that he had discovered the body of an infant tied in a sack and sunk by a piece of iron it up, examined enough to know what it was, and then hurried to make the proper report to the authorities of the find. The Justice of the Peace after some close questions, started the constable after the necessary six "good and true men" for a jury, and when \$1,500,000; estimated value of school all were ready the Justice of the Peace, constable, jury and two doctors started for Bowman's Siding. The Justice of arrived first, found the well and the

"Scarcely any difficulties have arisen in reference to the comparatively new study of physiology and hygiene, made obligatary by law." In conclusion he says ; "The favorable action of the last Legislature has already accomplished much. The advice of the minimum school term is helping teachers and pupils. In some counties it has advanced the amount paid for teaching \$10,000 and \$15,000, and has given the pupils the advantage of a longer continuous discipline under the same teacher. The increase of the State appropriation by the addition of \$500,000 is making itself felt in every part of the

Commonwealth. Already the total cost of tuition, building, fuel and contingencies, has reached the large sum of \$11,012,990, and the average rate of tax levied for school purposes is 7.64 mills and for building purposes 3.34 mills, far below the maximum allowed by law.33

From the statistics accompanying the report are taken these facts: School districts in the State, 2,298; number of schools, 21,342; number of pupils, 941,625; male teachers, 9,003; female teachers, 14,-678; average salary of male teachers per month, \$38 45; salary of female teachers per month, \$30 16; number of pupils, 941,625; cost of tuition, \$6,404,894 83; State appropriation, property, \$38,998,783 75.
