Mr. Bennett was boru at Cornwall, England, January 12, 1829, and died in Tionesta, Pa., Oct. 31, 1888, aged nearly 60 years. At the age of 12 he moved to Canada with his parents, where he lived to manhood, learning the trade of wagon making. He came to the oil country in the early days of the excitement, and worked at his trade. Over five years ago he moved to this place and associated himself with Wm. F. Blum in the wagon making business. Mr. Bennett was a quiet, industrious and esteemed citizen, against whom no one ever had aught to say, but whom everyone liked who became acquainted with him. He was taken sick with typhoid fever about two months ago. and although he received excellent and constant medical attendance, along with the best of nursing, his care seemed almost a hopeless one from the start. The funeral obsequies, which were conducted by Rev. C. C. Rumberger, took place on Thursday afternoon at 4 o'clock, the remains being placing of a few gates, signs, &c., but interred in Riverside Cemetery. Mr. Bennett was a member in good standing of Irwin Council, R. T. of T., in which order he carried an insurance of \$1,000 which will go to his heirs.

# A Wonderful Cat-astrophe.

A correspondent at Marienville, this nickel, which set in good ground will county, writing to the Derrick tells the following pretty good one:

The big sensation occurred on November 1. A man burried to town from the country, aroused the Justice of the Peace from his peaceful slumbers, with the information that he had discovered the body of an infant tied in a sack and sunk by a piece of iron to the bottom of a well. He had fished it up, examined enough to know what it was, and then hurried to make the proper report to the authorities of the find. The Justice of the Peace after some close questions, started the con Mr. Cobb purchased it, besides many stable after the necessary six "good and true men" for a jury, and when \$1,500,000; estimated value of school all were ready the Justice of the Peace, property, \$38,998,783 75. constable, jary and two doctors started for Bowman's Siding. ## PENNSYLVANIA'S SCHOOLS. Superintendent Highee's Report for Last Year,

Advance sheets of the annual report of Dr. E. E. Higbee, Superintendent of Public instruction, are just out. From them the following facts are gleaned: The number of schools in the State is 21,342, an increase of 280 since last year's report. The average length of the school term is now in months, 7.17, a large increase over the record of last year, which was 6.71.

"This," says Dr. Higbee, "is one of the good results of the recent law, which made the minimum term six months. The number of teachers. exclusive of Philadelphia, is now 21,-168; males, 8,915; females, 12,253; a decrease of 313. At first glance this may seem to indicate a most crowded condition of our schools, inasmuch as the number of teachers has decreased and the number of pupils increased. But this decrease of teachers is owing to the fact that our two-term districts (where the winter school is taught by one teacher and the summer school by another) are rapidly passing away."

The average salary of teachers, exclusive of Philadelphia, is now, for males, \$37 12 and for females \$29 60. The amount of money paid to teachers for the year preceeding this report was \$4,673,324 50, an increase over the year preceeding of only \$90,950 15. The amount paid to teachers in this year was \$5,044,385 15, an increase over the preceeding year of \$371,060 65. The number of pupils now enrolled in the schools, exclusive of Philadelphia, is 831,367, an increase

of 10,556 over last year's report. Dr. Higbee renews his recomendations regarding the passage of a law for the inspection of schools in the rural districts. He thinks such a law cannot fail to result in incalculable good. Superintendent Highee also devotes considerable attention to the subject of manual training in the schools. He believes there will be some difficulty in establishing this branch of education in the country districts. Continuing he says:

"Scarcely any difficulties have arisen in reference to the comparatively new study of physiology and hygiene, made obligatary by law." In conclusion he says; "The favorable action of the last Legislature has already accomplished much. The advice of the minimum school term is helping teachers and pupils. In some counties it has advanced the amount paid for teaching \$10,000 and \$15,000, and has given the pupils the advantage of a longer continuous discipline under the same teacher. The increase of the State appropriation by the addition of \$500,000 is making itself felt in every part of the Commonwealth. Already the total cost of tuition, building, fuel and contingencies, has reached the large sum of \$11,012,990, and the average rate of tax levied for school purposes is 7,64 mills and for building purposes 3.34 milis, far below the maximum allowed by law."

From the statistics accompanying the report are taken these facts: School districts in the State, 2,298; number of schools, 21,342; number of pupils, 941,625; male teachers, 9,003; female teachers, 14,-678; average salary of male teachers per month, \$38.45; salary of female teachers per month, \$30 16; number of pupils, 941,625; cost of tuition, \$6,404,894 83; State appropriation,

F. M. Morgan's New Brick Block

Another handsome, imposing busi-

ness block has just been completed by

our enterprising townsman, Mr. F. M.

Morgan, located on Centre street, second door from the railroad crossing. The building is constructed of brick, and the dimensions are 60x22 feet and three stories high. The room on the ground floor is the full size of the building and fitted up for mercantile one of the best business sites in the city, and anyone wishing to engage in ter situation. The room is well finished and has abundance of light, while the handsome French plate glass front affords ample means of displaying any kind of merchandise. The second and third floors are reached by a wide and substantial railing, beautifully finished in hard wood and so constructed as to make access to the rooms easy. On the second floor there are five rooms and on the third there are six. These rooms are fluished in the best possible manner and are well supplied with light and pure air. These rooms are nominal sum. In this building there is a large and well arranged skylight, which gives abundance of light and This block has been constructed upon the most modern improved style of pants. Every department is fitted up ability. A part of the rooms have already been rented yet there are a number left which can be had by applying to Mr. Morgan at his place of business .- Derrick.

### THANKSGIVING.

The President has issued the following proclamation:

Constant thanksgiving and gratitude are due from the American people to Almighty God for His goodness and mercy which have followed them since the day He made them a nation and vouchsafed to them a free government.
