There is many a city and town that will appreciate the following: One manufactory employing a hundred men will support an additional 500 people. Three hundred families will disburse annually, on the average, \$800, or \$75,000 in the aggregate. This money will be drawn into the town from the outside, where the manufactured goods are consumed, and the interest o' this \$75,000 at ten per cent, would be \$7. 500. Three hundred families, too, would require three hundred houses, thousands

of pounds of agricultural produce, and thousands of vards of cotton and woolen goods; thus giving health and impetus to every branch of industry. The smile of the average lady, like her walk, is more or less a failure. It is forced

and ungraceful, a form without a spirit to beautify it. An observing writer suggests this test: Let any woman stand before a mirror and attempt to produce an animated smile of welcome. She will be surprised at the witless grimace that will result. That is what smiling is with no soul behind it. Learn to smile with the eye and keep the tacial lines in repose.
