# The New Ballot Law.

This week we present to those of our readers who are most likely to be interested in the same, the full text of the new ballot law, in the form of a order to exist. supplement. It will be found a difficult matter to "run the machine" in accordance with the new order of things, but as it does not go into effect until next year, voters will have plenty of time to study it up. And it would Harrisburg:

indulging in it they should be prepared for a "call," or even a "raise." Seriously though, this talk of European retaliation against us because we have enacted a tariff law that is building up our own country and injuring European countries, and extending our commerce to countries where trade has long been monopolized by European nations is all bosh. The sontiment of Europe has always been antagonistic to American commerce in any shape, but sentiment does not control business. Our cereals and our meats have been purchased by Europe solely because they were better and cheaper than any other country could furnish, and for the same reason they will continue to be purchased over there, and America need have no fear of losing these markets until India and Russia can furnish a sufficient supply of those arti cles at a lesser price than we can and there is little probability that such a state of affairs will ever exist. The United States has no reason to be afraid of retaliation from any quarter, and least of all from Central Uurope,

for the same position, it might as well be understood that the balance of the State is not at all interested in the petty two-cent fight.

WHY does the metropolitan press give the prize fighters so much free advertising? The advertising which this brutal calling gets is what causes it to appear to be popular with the people. If all the newspapers in our large cities would for one year agree not to print a word concerning the slugging fraternity there would be no such fraternity, and the country would be that much better off.

HERE'S a mighty interestin' piece of news that has just been flashed across the big pond from London, and is somewhat of a squelcher on the Democratic howl against the McKinley tariff on tin plate, if it is possible to squelch a free trade howler by facts or figures: The Times to-day, referring to the fact that 60 delegates from the tin plate working districts of Wales are going to the United States in order to inquire into the prospects of profit-able employment there, and to the to inquire into the prospects of profit-able employment there, and to the statement that American agents in London are buying the latest improve-ments in the tin plate machines, as well as offering double wages to tin plate workers says: "Should the dele-rates report favorably more the profit of the statement that the statement tha gates report favorably upon the prospects of tin plate workers in the United States, it is not unlikely that there will be so large an exodus to America as to lead to a great portion of the trade hitherto monopolized by Wales being transferred to America. Hitherto, the idea has been that it was impossible to manufacture tin plate in America, owing to atmospheric conditions, but tin plate makers who accompanied the iron and steel institute delegates to America reported that there was nothing except the want of skilled labor to prevent the successful manufacture of tin plate in America."

Our European friends who are engineering that alleged retaliatory movement which is to include Germany, Austria, Hungary, Italy and Switzerland, should not forget that "bluffing" forms a very important
