Women students in Denmark have adopted a new and distinct student's cap. It consists of a smart little round black hat with a black ribbon upon it, on the front of which the the student's emblem is placed.

Boston boasts of a woman cabinetmaker, who has a studio in the Pierce Building, on Copley square, and plies hammer, saw and chinei for Back Bay patrons. She has also several classes of fashionable girl pupils.

Princess dresses are much worn again, and it certainly is a comfort when a woman can put on her gown all in one piece. For evening wear these gowns are made with peasant waists, or what are now called "corslet bodices."

whates in the South Pacific.

Steam whaling vessels have never yet been employed in the South Pacific. It now begins to be noised about that whales in that region are not so nearly extinct as they were reported to be, and that there is room for the profitable employment of steam whalers. A whaling bark which left Taspania on August 17 captured in two days two large black whales, which yielded ambergris valued at \$20,000.

Pifty English sparrows were taken to Australia in 1830. They have multiplied multiplied and they now number countless millions.

TEMPERANCE.

Alone in his bar-room counting his gold, A drink-dealer sat hard-hearted and bold, His day's work was done, still he lingered late,

late,
When a goblin came like a thing of fate:
Dark demon of bygone days was he,
With a soul as black as the midnight sea.
And these were the words from his lips that

"I gather them in to a drunkard's hell," etc.

"I gather them in, both men and boys, While year after year my work destroys Men's bodies and souls the world around, Bright homes where joys and love abound. Fair daughters and mothers, father and son, Their idols I shatter them one by one. License to kill: It is known full well I gather them in to a drunkard's hell. Husbands are dying with shricks and

While wives are praying with pleading Dear children are begging bread out in the

cold,
Still as King I rule, and my sceptre hold,
My victims are many, hell claims them all:
They come from hovels, from palace and
hall, By night and day my records tell, I gather them in to a drunkard's hell,

"I gather them in where they find no peace, While the pangs of the deathless soul increase."

The goblin paused, when a mighty train of sin-wrecked ghouls all racked with pain, With ghastly greams came forth and told, While gnashing their teeth, how the dealer bold

Led them on through drink their souls to And gathered them in to a drunkard's hell, -B, M, Lawrence, M. D., in Advocate,

BEER DRINKING AND HEART DISEASE. It is said that disease of the heart is very prevalent in Munich, where the consumption of beer amounts, on the average, to 565 litres per head annually; and in the same place the duration of life among the browing trade is shorter than that of the general population. Whereas the average age attained among the latter is 53.5 years, that of alchouse keepers is 31.35 years and of brewers \$2.33 years. The same note adds that for the whole of Germany the annual consumption of beer per head amounts to 88 litres, but for Bavaria it is 208 litres.—London Lancet. valent in Munich, where the cons

THE LIQUOR HABIT A VICE. The Christian at Work, commenting upon the question, "Is Drupkenness Carable?" as recently discussed in the North American

recently discussed in the North American Review, says:

"The liquor habit must be regarded, first of all, as a vice, and not a disease, and treated accordingly. Some are led into the drinking habit, no doubt, largely through the influence of an inherited appetite, but, in the vast majority of cases, men form the liquor habit just as they form any other had habit—just as they learn to swear, to gamile and to steal, because their evil tendencies lead them that way. In other words, most men get drunk because they want to get drunk. An attempt to cure intemperance in general by the use of medicines would be very much like trying to cure profamity in the same way."

BOTH A SIN AND A DISRASM.

Drunkenness is both a sin and a disease. It is a sin, to commence with, and after having passed through its first stages and fastened itself eccurely upon its victim, it becomes both a sin and a disease. Alcohol is a distinct and certain poison, so declared by many leading physicians and scientists. When taken sinto the system regularly as a beverage it in numberless cases results in drunkenness. Drunkenness comes from drinking, and the drunkern excommences as a moderate drinker. Drunkenness is to be treated both as a sin and as a disease. The grace of God can save any drunkard from his sin, even to the "uttermost," and multitudes have thus been saved. Medical treatment has done much to save drunkmultitudes have thus been saved. Medical treatment has done much to save drunkards, and every effort in that direction should be joytully hailed by every truefriend of temperance, and due credit given for all good accomplished. At the same time, all moral and social means possible should be put forward for the saivation of the inebriate.—National Temperance Advocate.

"WINE IS A MOCKER."

The drink habit is often quickly and easily formed. How insidiously it grows upon men. It steals in upon men as slyly as the fox, and when it gets a man in its full power how it tosses him about like a strong lion. We once read of a young rabbit that slipped into a garden of cabbages. The garden was inclosed with a wire fence. The young rabbit had a good and joily time in that garden as he feasted daily on the luscious cabbage. He had heard of the danger of traps and wire fences, but he did not seem to see any immediate danger around him, so he concluded to remain all summer in that delightful place. The more he ate of the cabbages the larger has grew. He never dreamed that he might grow too large to get out through the hole he he came in at. But that was just precisely the danger that was soon to overtake him. He fattened daily upon the delicious food. He soon became as large as a grown rabbit, but the only hole of escape didn't grow a bit larger. One day he heard the foot fall of a man coming into his garden, and he concluded he would slip out and disappear in the bushy swamp. So he ran to the hole he came in at, and lo! and behold, his body had grown entirely too large to squeeze out through it. Now what? Ah, he is so surrounsed by the wire net as to fall an easy pray to the owner of the garden. He was caught and killed.

The application to the dram drinker is easy. Every dram he drinks is putting up the wire fence of the confirmed habit of drunkenness. His appetite is growing insensibly. Like the rabbit, he has a joily time for awhile and sees no signs of danger. After a while something occurs which alarms him about his safety. He resolves to get out of his wire fence of dram drinking, but lo! he finds that his liquor appetite has grown from a babe to a giant, holding him firmly in the grasp. This simple parable tells the story of thousands who are to-day passive slaves to the wine cup. "Wine is a mocker" and a cunning deceiver.

TEMPERANCE NEWS AND NOTES. The New South Wales Union now num bers 1400 members.

The Ohio W. C. T. U. reports 600 unionseighty-five new ones this year. The Indiana W. C. T. U. reports a gain of

forty-two unions over last year. M. Joshephine Nicho's was elected President. China now has a National W. C. T. U., with the necessary equipment of general of-ficers, fifteen vice-presidents, and nine super-intendents of departments.

While in Cairo, Mrs. Leavitt addressed a large meeting of English soldiers. At the close nearly every one not already a total abstainer, signed the pledge.

It is not often that Tire Tipings indulges in a puff of any business enterprise, but in this instance we are induced to say a few words in reference to the great growth of the Dr. Kilmer Medicine Company at Binghamton, N. Y. From a small beginning a dozen years ago the Dr. Kilmer Company have grown to immeuse proportions already Having only just completed a large fivestory addition to their factory the rapid growth of their business demands still more room, until another large addition is now being contemplated to their enormous establishment. In addition to the special practice of Dr. Kulmer himself, ex-tending into several States, his several proprietory remedies have large sales and enjoy great popularity all over the coun-The justly celebrated kidney remedy, known throughout the land as SWAMP-ROOT, has already reached the SWAMP-ROOT, has already reached the largest sales of any kidney remedy in the world. And what is more this remedy has acquired its popularity and enormous sales, not by great advertising, but mainly through the reputation of the cures which it has wrought. Testimonials as to its morits and the cures it has made have been received by hundreds from every State in the Union. Where a remedy accomplishes such cures as SWAMP-ROOT has done in cases where they were even regarded as hopeless it is a pleasure to refer to such facts in our columns.—Buffalo Saturday Tidings.

Corious Effects of an Earthquake. The recent carthquake in central and northern California occasioned phenome nal results in Sonoma County. On the Polpula Rancho of J. E. Poppe the ground was cracked and seamed in various places. From these narrow openings in the earth large quantities of water of various temperatures have been gushing forth ever since. In some places the water is ice cold, while in others it is warm, reaching a temperature of 100 degrees. The Polpula Rancho has always been noted for its many springs, but the recent earthquake has opened up many new ones, some hot and some cold, and caused the old ones to gush forth ten times the amount of their previous flow. In town the flow of General Vallejo's artesian well has been increased about 100.000 gallons per twenty four hours. On the Rhine farm of Jacob Grundlach is an artesian well which has always given but a meager supply of water. It was Grundlach's intention to resume boring operations on this next week, but the shake has caused the well to send forth a large supply of artesian water, and the idea of having it sunk Jeeper has been abandoned. On Captain Joye's farm, a short distance from the town, the flow of gas from his natural gas-well has been increased to a great extent, and a spring that has hitherto been cold has been converted into a basin of hot water. -Boston Transcript.

Captain Lee, who died suddenly at the Hoffman House in Philadelphia the other day, was one of the most intrepid of He once ordered the King and cabinet of Corea off their own parade ground because they tried to dictate to him concerning the handling of the native troops. Captain Lee was employed by the Corean Government as military instructor of the army four years ago, and he knew his business in every phase. With two other American officers, who were employed with him in similar especities, he had charge of the army and gave it thorough instruction, elevating it beyond the standard of even the Japanese troops, the best drilled in

Lee and his fellow-officers didn't get along together very well. The troops liked him exceedingly, but on the day he ordered the King and cabinet off the parade grounds because they got in the way there came near being a revolt among them. Lee was inexorable, if polite, and the King and the cabinet left without a word of protest. They always respected Lee for his action and treated him with great courtesy after-ward .- Chicago Herald.

Ten years ago, Leroy Payne, a Chicago liveryman, leased some property on Michigan avenue for ninety-nine years at an annual rental of \$2100. Now he has an offer of \$24,000 a year for an eightynine years' lease of the same property.
