Marshal Ney, of France, was not onl shot as a traitor, but his statue has not to be shot out of the way to make roor for a prosaic railway, which will pas over the very spot where he fell an where for so many years his statue ha been a pride to the Parisians of the Latin quarter.

Africa is 234 times as large as th State of New York.

Mr. Clarence O. Bigelow
Prescription Druggist,
102 6th Ave., N. Y. City, says

The People's Confidence
Has been won by
HOOD'S
Sarsaparilla
In a Manner Never Equalled.

"I am, on general principles, averse to expressing my views, pro or con, in respect to any proprietary article, but in the light of Hood's Sarsaparilla being the product of a brother apothecary, will say, Hood's Sarsaparilla has secured **a place in the public confidence** never attained by any proprietary medicine that I have handled during an experience of more than twenty years in the drug trade. It

Must Possess True Merit
as a remedial agent to retain its increasing popularity as a household remedy. The sale of Hood's Sarsaparilla exceeds that of all similar preparations combined, of which I keep in stock some fifteen or twenty. its

Praises are Proclaimed
daily at my counter by those who have been benefited by it, many of whom are personal acquaintances." CLARENCE O. BIGELOW, Apothecary.

Hood's Pill's cure liver ills, constipation, billousness, jaundice, sick headache.

JOHNSON'S
Anodyne Liniment.
UNLIKE ANY OTHER.
ORIGINATED IN 1810.
THINK OF IT! ALMOST A CENTURY.
Every traveler, every family should keep it at hand, for the common ills of life liable to occur to any one. It is Soothing, Healing and Penetrating. Once used always wanted. Sold everywhere. Price 25c., six $1. Full particulars free. I. S. JOHNSON & CO., BOSTON, MASS.

"German Syrup"
I am a farmer at Edom, Texas. I have used German Syrup for six years successfully for Sore Throat, Coughs, Colds, Hoarseness, Pains in Chest and Lungs and Spitting-up of Blood. I have tried many kinds of Cough Syrups in my time, but let me say to anyone wanting such a medicine—German Syrup is the best. We are subject to so many sudden changes from cold to hot, damp weather here, but in families where German Syrup is used there is little trouble from colds. John F. Jones.

A SICK LIVER
is the cause of most of the depressing, painful and unpleasant sensations and sufferings with which we are afflicted; and these sufferings will continue so long as the Liver is allowed to remain in this sick or sluggish condition.
To stimulate the Liver and other digestive organs to a normal condition and healthy activity, there is no better medicine than

RADWAY'S PILLS

The most perfect, safe and reliable Cathartic that has ever been compounded — PURELY VEGETABLE, positively containing no Mercury or other deleterious substances; having all the beneficial properties that Mercury is possessed of as a cathartic without the danger of any of its evil consequences, they have superseded Mercury, and have become the Pill of Modern Science. Elegantly coated and without taste, there is no difficulty in swallowing **RADWAY'S PILLS**; mild and gentle or thorough in their operations, according to the dose, they are the favorites of the present time.

They cure all disorders of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous Diseases, Loss of Appetite, Headache, Costiveness, Indigestion, Dyspepsia, Biliousness, Fever, Inflammation of the Bowels, Piles, and all the derangements of the Internal Viscera. 25 cents a box.—sold by druggists. DR. RADWAY & CO., 32 Warren Street, N. Y. City.

DR. KILMER'S
SWAMP-ROOT
Kidney, Liver and Bladder Cure.
Rheumatism,
Lumbago, pain in joints or back, brick dust in urine, frequent calls, irritation, inflamation, gravel, ulceration or catarrh of bladder.
Disordered Liver,
Impaired digestion, gout, billious-headache. **SWAMP-ROOT** cures kidney difficulties, *La Grippe*, urinary trouble, bright's disease.
Impure Blood,
Scrofula, malaria, gen'l weakness or debility.
Guarantee—Use contents of One Bottle, if no benefit, Druggists will refund to you the price paid.
At Druggists, 50c. Size, $1.00 Size.
"Invalids' Guide to Health" free—Consultation free.
DR. KILMER & CO., BINGHAMTON, N. Y.

Tutt's Tiny Pills
A single dose produces beneficial results, giving cheerfulness of mind and buoyancy of body to which you were before a stranger. They enjoy a popularity unparalleled. Price, 25cts.

FARM AND GARDEN

CLOVER HAY FOR SHEEP.

Many sheep-fatteners give their sheep clover hay, and it is a good food for them. But it ought to be remembered it contains a large percentage of nitrogenous food matter. We do not say this to prevent them using the clover hay, but to remind them that when they increase the quantity they increase the quantity of nitrogen supplied, and an allowance for this should be made when arranging the amount of corn or cake. Except for this, clover hay is one of the best rectifiers as well as best foods that can be given to sheep. As a means of lowering the quality of the blood, Epsom salts are a mild aperient.—New York World.

VEGETABLES AND FRUIT FOR HOMES.

Too many farmers neglect to supply their own tables with any suitable variety of vegetables and fruit. By a small outlay of money and labor every farmer can keep his table supplied with a succession of fresh vegetables through the whole season. Spinach planted as soon as the weather is suitable will furnish the finest greens before other vegetables come on, but if it had been planted in the fall it would have come into its use this month, under ordinary conditions. Then radishes, lettuce, cucumbers, tomatoes, peas, beans, sweet corn, summer squashes, beets, melons and turban squashes will furnish a welcome and wholesome addition to the farmer's fare throughout the season. If, in addition to these there are a few roots of rhubarb, a bed of asparagus, a bed of strawberries and a small collection of small fruits, a farmer may live in luxury and health, such as his occupation ought to afford, instead of the tiresome monotomy and scarcity of the good things of the farm that many farmers put up with from sheer carelessness, thoughtlessness or laziness.—American Farmer.

FRESH MEAT FOR FARMERS.

Some of the advantages of old-fashioned farmers' lives are not so common among farmers of to-day as they once were. One of these is having a taste of fresh meat when desired, by killing a sheep and perhaps changing with a neighbor so as to use the mutton while it is fresh. If circumstances do not favor keeping sheep, the supply of fresh meat may be easily obtained by killing young poultry once a week or oftener, and sometimes varying it by killing a young pig. Some farmers may object to this last as wasteful. After all, counting the speculative value of the pig after it has grown into a hog, its meat does not cost any more than the city resident pays for much poorer cuts from the butcher's shop. And on the farm the owner of the pig can afford to take it for his own use at what it has cost him, taking his profit in the extra enjoyment he will get from eating fresh young pig rather than salted pork from the barrel. It is by indulging in occasional luxuries of this kind that farmers show to others the advantages of their position, and induce their children and others to appreciate the possibilities of a farmer's life.—Boston Cultivator.

DOUBLE CROPPING OF CABBAGES.

One of my neighbors by manuring liberally and omitting the cabbages on every third row of his cabbage piece, and planting this to squash at the proper time, succeeded in raising two excellent crops the same season. To succeed in this arrangement the cabbage must be one of the very earliest sorts, such as Early Wakefield, so that the ground may be entirely cleared at an early day, and the soil between the squash rows be cultivated until it is thoroughly light and fine. The market gardeners close by large cities on their thousand-dollar-an-acre land must and do raise from two to four crops annually, by aid of hotbeds to start their stuff, and the stimulus of a near and large market in which they can dispose of products on a large scale, which would be worthless if raised on an ordinary farm; still, farmers at large can do with profit more than they now think possible in this direction. Squashes and peas can be raised profitably on the same land. I grew over 200 bushels of green peas and five tons of squashes on the same piece three years ago. Beets, cabbages, rye, barley and Hungarian are all crops which the farmer can grow as second crops. But when we attempt to double-crop our land there is one essential we must never forget—we must manure accordingly, for no one ever succeeded in cheating his land out of a crop.—Massachusetts Ploughman.

CABBAGE WITHOUT TRANSPLANTING.

Of all the crops raised on the farm none depends so much on naturally rich land as cabbage. The best soil is a deep, black, loose loam, well drained, such as is found in the valleys of the smaller streams. It is plowed in the fall, eight or ten inches deep, in narrow lands. The first ten days of April is our time for sowing the seed. The ground is harrowed only to level it, as the action of frost during winter has reduced it to the fineness of ashes. It is then marked off three feet each way with a corn marker. With a hoe enough soil is drawn up at each crossmark to make a small, flat hill, a little above the general level. A dozen seeds are dropped on each and pressed down by the foot to bring the seed in close contact with the soil, no covering being necessary. A day or two before the plants appear above ground we press twice through the rows with a small tooth cultivator as close as possible without throwing any soil on the hills. This can be easily done as the tracks of the marker serve as a guide.

The second cultivation is given when the plants are an inch high, and should be crosswise of the first plowing, once in a row. The field should be thoroughly cleaned of weeds by the time the plants are two inches high. Discretion must be exercised in thinning the plants. If cut worms are numerous the hills should not be thinned to one in a place until the plants are four or five inches high, but at no time should they be allowed to crowd one another in the hill. Some hills will be wholly missing. These should be reset from the thinnings, selecting the stockiest plants that come up with good roots. The oftener cabbage is cultivated the better will be the crop. The ground should be kept loose and mellow to a depth of four or five inches. Twenty times is not too often to cultivate cabbage for the best results. Two or three hoeings only are necessary, and the first is the only one that will take much time if thoroughly done and the cultivator is used as it should be. Breaking off the lower leaves is no detriment, and their being in the way should not deter the plowman from running the shallow-cutting shovels of a horse-hoe close up to the plants. Cultivation should cease before the heads begin to get solid.

I am aware that but few cabbage growers recommend to sow the seed where the plants are to remain. But most of the writers on cabbage live where the crop is not so often affected by hot, dry weather in midsummer as it is here. The cabbage plant has a long tap root, so long that the plant cannot be removed without breaking it, and when once broken it will never penetrate the soil so deeply as before. In 1885 I had two and a half acres of Late Flat Dutch cabbage, grown without transplanting, that yielded 16,000 marketable heads. Another acre of just as good land was planted with the best plants thinned out on a large field. The returns from this acre were not over six hundred good heads, and the results have been with more or less variations, the same through succeeding years Of course this plan is advisable for late cabbage only, as the early kinds are transplanted, and have usually headed before dry weather commences.—American Agriculturist.

FARM AND GARDEN NOTES.

Dig around the rhubarb plants.

Be on the lookout for early farrowing sows.

Make a second planting of early garden crops.

Milk and grass are the best feeds for young pigs.

Trees should be set out before they start to grow.

No hog is quite so ravenous as a sow that is suckling pigs.

At first give a sow bran and milk, and and then add corn meal.

Keep all colonies strong. This is the secret of keeping bees for profit.

Gladialusus come true when propagated from the small bulblets.

There is no special advantage in setting out strawberry plants early.

Any of the leading breeds of hogs are good if they are given proper treatment.

The only safe plan of being sure of saving all of the pigs is to be ready for them.

The Dawson rose, it is claimed, is a valuable addition to the list of hardy roses.

Seeds of hardy flowers ought to be sown as early as the ground can be put in order.

Good pasturage of any kind will help the brood sows materially to give a good flow of milk.

The flat cover is the best for all bee hives. It costs less than the gable cover and is more convenient.

Do not take the winter packing out of the second story of the bee hive till time to put in section boxes.

The best remedy for the cut worm is to put a piece of tin or stiff cardboard around each plant when it is set out.

When stock are first turned out to grass care should be taken that they have access to all of the salt and water they want.

Sheep may be rid of ticks very satisfactorily by feeding sulphur, which should be given in small quantities and not too often.

If the acreage in meadow is not sufficient to furnish a full supply of hay for winter feeding it will pay to sow millet or Hungarian for hay.

In nearly all cases it will pay to harrow the potatoes thoroughly before the plants make their appearance above ground; it will help kill out the weeds.

The fat in the milk is the most potent factor in determining the yield and quality of cheese, and the quality of cheese is largely affected by the amount of fat contained in it.

Let the bees alone as much as possible. Decide upon some method and adhere to it. The double hive method is the best, and will give the best results, if properly carried out, if there be any honey in the fields.

When cattle are turned in on clover it will be best to turn in for one or two hours the first day, two or three the second, so that they may be somewhat accustomed to it. In this way the risk of bloat may be greatly reduced.

A Rochester commission merchant, addressing the Western New York Horticultural Association on "Points in Shipping," said that if growers would sort each one hundred barrels down to seventy-five, they would receive just as much money, and save the extra barrels and freight.

A valuable grain to feed chickens during the first three weeks of their lives is Golden Millet. Very small chicks need very small seeds. They constantly search for the seeds of grass or any small seeds. Nature is the best teacher. Small whole seeds are the best thing in the grain line that can be fed to very young chickens.

The farmer who has a bit of marshy land near his house where the grass is not of much value for cattle feeding may do well to enclose it with a fence and put geese there. They like such feed, and are profitable poultry when rightly managed. A small yard to themselves, and feed carried to them is better than allowing them to roam.

The results of trials at the Maynard agricultural experiment station for two years indicate that for fall or winter pigs, which are to be killed when about one year old, it is more profitable to let them run in pasture or woodland during the warm months, and shift for themselves until within eight or ten weeks of killing time, than it is to feed them in confinement during the summer.

TEMPERANCE.

TO THE RESCUE.

Dark is the sky of midnight,
Calmly night's hours have sped;
But, lo! mad shouts are ringing,
And flames burst forth o'erhead;
There's a tramp of gathering thousands,
And hot and stifling air,
And ghastly are the faces
That gleam amid the glare.

O grief to see the spoilage
The Fire Fiend strives to take,
But deeper now the wailing,
For human life's at stake;
Yet still the sturdy fireman
Seeks peril not to shun,
Again he's sought the conflict,
And fought with death, and won.

Reformers to the Rescue!
Oh, hear that cry so dire,
"Intemperance is raging
A wild consuming fire."
Oh, hear the shrieks of victims;
Haste at that anguish cry;
For wrecks of love and virtue,
In ashes soon may lie.

Reformers to the Rescue,
And shall the rallying cry
Ring vainly through our army,
Nor temperance men reply?
O band, ye are not weary?
Nor plighted lips grow dumb;
For a thousand lives re-echo,
"In God's great name we come."

Then on, ye rescuing army,
True blows each sword must smite;
Till, earth one field of triumph,
No foe is left to fight;
Then, when o'er each endeavor
Success complete we see,
Blessed in the land forever,
Our righteous cause shall be.
—Harriet Glazebrook, in Advocate.

GREAT BRITAIN'S DRINK BILL.

Great Britain's drink bill for 1891 is estimated at $706,504,000, or $15.45 per head. This is a large increase over preceding years, and is supposed to indicate prosperous times. It appears that Scotland and Ireland, in comparison with their population, consume more spirits than England and Wales; but when it comes to beer, England is infinitely the greater swiller of the three. In the twelve months she swallowed very nearly $400,000,000 worth of it, a sum which would very nearly pay for the army, the navy and the civil service twice over.—Pittsburg Post.

THE INFAMOUS TRAFFIC.

The New York Evangelist, under the heading, "The Infamous Traffic," says:

"Very suggestive is the recent protest received from Gungunyana, King of Gazzaland, in South Africa, against the forcing of strong drink upon his unhappy country by Christian nations! This is a strange reversal of positions. England and America send missionaries to Africa that the poor, ignorant natives might be enlightened by the Gospel, and yet at the very same time these Christian (?) nations send shiploads of rum that excites every evil passion and makes the poor benighted savages more of a brute than before, and destroys his soul and body in hell! Was there ever a more gigantic piece of hypocrisy? If this infamous traffic is allowed to go on, destroying whole tribes and races, it will be a question whether the recent discoveries in Africa, with the opening of the Dark Continent to 'civilization,' have not proved a curse rather than a blessing."

DRINK AND HEREDITY.

From a recent address of G. C. Smith, A. M., M. D., President of the Indiana State Medical Society, we clip the following quotations:

"That the abuse of alcohol has grown to be one of the most gigantic evils of the age no longer can be denied. The damaging influence on future generations is more far-reaching and deleterious than we have heretofore been willing to concede. To arrest this evil, or to reduce it to a minimum, even, will require a most heroic effort—the combined labor, in fact, of all good people.

"We cannot escape individual responsibility when the public health, the general welfare, and the future happiness of our race are at stake. We cannot fold our own clean hands about us and say that as for me and mine we have no responsibility. The individual who can do this and shirk the responsibilities of life, who is not willing to lend a helping hand to sinking humanity, and labor for it so that the world may be better for his having lived in it, is a misanthrope and had better never have been born. But there is probably no man so far debased that he does not love his own flesh and blood, if he have no interest in humanity in general, his single aim in life being to provide for his own descendants and make them happy. But he cannot accomplish this with certainty, for his neighbor may be an inebriate whose descendants may marry his children and his grandchildren may be epileptic or insane, his great-grandchildren criminals or paupers and die upon the scaffold, be inmates of the penitentiary or almshouse, and finally be buried in the potter's field. Truly, he that does not provide for his own household is worse than an infidel.

"The time has come when this question must meet its solution. With the knowledge which the medical profession possesses upon the subject under discussion, we cannot occupy a neutral position. We cannot do so and discharge our duty to ourselves, our immediate descendants or humanity in general. Our voices must be heard in the land, giving forth no uncertain sound. We know that the improper use or abuse of alcohol is a frequent and fruitful source of insanity. We know that inebriety, epilepsy, crime and pauperism, and a host of other diseases too numerous to mention individually, can be traced directly or indirectly to its door. We know that all these conditions when once acquired are transmitted by heredity to future generations. We know that when a man is simply drunk he is temporarily insane, and that it may be dangerous to the community for him to be at large. We know that when the State furnishes the means which makes this individual crazy; or, what is practically the same thing, makes it legally practicable for him to obtain it, she makes herself particeps criminis, and is an accessory before the fact in any crime which may be committed, and when she punishes the criminal, she is punishing a part of herself for her own crime, and is occupying a position so absurd that it cannot be explained by any process of logic known to the present generation."

TEMPERANCE NEWS AND NOTES.

There are 32,000 families homeless in London through intemperance.

Forty-one out of the seventy-four counties in the State of Mississippi are under prohibition.

Five hundred children under ten years of age were arrested in London last year for drunkenness.

The saloon-keepers of St. Joseph, Mo., have formed an organization for the promotion of temperance.

The juvenile branches of the Church of England Temperance Society number 3469, with 416,283 members.

It is computed that no less a sum than £15,000,000 is annually spent on Sunday drinking alone in the United Kingdom.

Twenty-eight of the large breweries of Chicago, representing a capital of $20,000,000, have combined against the English breweries' syndicate.

One of the most active and best-informed Glasgow ministers has given it as his solid conviction that some thirty thousand men and women go to bed drunk in Glasgow every Saturday night.

The quiet little town of Hennepin, Ill., has had an awakening in the temperance cause. James M. Dunn, of Milwaukee, has been holding meetings crowded to overflowing. More than three hundred men and women signed the pledge.

The Central Woman's Christian Temperance Union of Minneapolis has just opened a lunch room in the midst of a nest of saloons. It keeps open from 12 to 12 o'clock, and its coffee cart furnishes coffee free. So the liquor traffic has its own weapons turned against it.

The two causes which are credited with awakening the German people to the necessity of the temperance reform are, first, the conviction that beer drinking is weakening the moral and physical qualities of the Nation, and, second, the necessity of turning the beer material into bread. Statistics show that Germany devotes about a quarter of her productive energy to the liquor traffic and that the "demand for bread can only be met by the denial of beer."

Pleasures of Memory.

What a blessed thing is memory! How it brings up the pleasures of the past and hides its unpleasantness! You recall your childhood days, do you not, and wish they would return? You remember the pleasant associations, while the unpleasant ones are forgotten. Perhaps to your mind comes the face of some friend. It was once a pale, sad face. It showed marks of pain, lines of care. It seemed to be looking into the hereafter, the unknown future. And then you recall how it brightened, how it recovered its rosy hue, how it became a picture of happiness and joy. Do you remember these things? Many people do, and gladly tell how the health returned, how happiness came back, how the world seemed bright. They tell how they were once weak, nerveless, perhaps in pain, certainly unhappy. They tell of sleepless nights, restless days, untouched food, unstrung nerves. And then they tell how they became happy, healthy and strong once more. You have heard it often in the past have you not? You have heard people describe how they were cured and kept in health? You certainly can remember what it is that has helped people in America. If not, listen to what Mrs. Annie Jenness Miller, who is known universally as the great dress reformer, says: "Six years ago, when suffering from mental care and overwork, I received the most pronounced benefit from the use of that great medicine, Warner's Safe Cure." Ah, now you remember. Now you recall how many people you have heard say this same thing. Now you recollect how much you have heard of this great Cure. Now you are ready to admit that memory is usually pleasing, that the highest pleasure comes from perfect health, and that this great remedy has done more to produce and prolong health than any other discovery ever known in the entire history of the whole world.

The Stiletto Industry.

"The Italian never buys a stiletto," remarked a local police official last Saturday, "but manufactures it at home out of any material that he can lay his hands upon.

"There are two distinct brands of the article, the city and the suburban, the first being made by the gentlemanly member of the Mafia, who resides in town, and the second by his brother, who toils far from the madding crowd. I have about sixty of these pleasing weapons in my collection, and I find that those which were taken at the city police stations are made of old table knives, as a rule, that have been sharpened and ground down to half of their original size.

"The blades are sunk into handles of soft pine, which are wrapped in turn with fine brass wire.

"When the suburban Italian sets out to build one of these pleasing weapons he quietly breaks off the prong of a hay fork, polishes up the point until it would penetrate anything but a coal dealer's soul, and wraps the blunt end of it with wire. One lunge from this delightful tool is more than enough for the plain, ordinary man."—New York Commercial Advertiser.

Beware of Ointments for Catarrh That Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, and acts directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co.

Sold by Druggists, price 75c. per bottle.

A Brilliant Discovery in Dermatology.

It is said that superfluous hair can be permanently removed without pain. An interesting and valuable discovery has recently been made by John H. Woodbury, of 125 West 42d street, New York City. It is a remedy for the permanent removal of superfluous hair, consisting of a fluid which is applied to the hair follicle by means of an electric needle. It is designed to be used by patients at their homes, and is said to be fully as effectual as electricity. Full particulars in reference to this valuable remedy are found in a little book of 128 pages, which is sent to any address for 10 cents on application to the discoverer.

The demands of society often induce ladies to use quack stimulants when feeling badly. They are dangerous! Lydia E. Pinkham's Vegetable Compound is adapted to such cases.

Under all circumstances, under all conditions, under all influences, Bradycrotine will promptly cure all headaches. All druggists, fifty cents.

SYRUP of FIGS

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known.

Syrup of Figs is for sale in 50c and $1 bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Do not accept any substitute.

CALIFORNIA FIG SYRUP CO.
SAN FRANCISCO, CAL.
LOUISVILLE, KY. NEW YORK, N.Y.

The old saying that "consumption can be cured if taken in time" was poor comfort. It seemed to invite a trial, but to anticipate failure. The other one, not so old, "consumption can be cured," is considered by many false.

Both are true and not true; the first is prudent—one cannot begin too early.

The means is careful living. Scott's Emulsion of cod-liver oil is sometimes an important part of that.

Let us send you a book on CAREFUL LIVING—free.

SCOTT & BOWNE, Chemists, 132 South 5th Avenue, New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. $1.

Why the "Red Sea."

Many persons have puzzled their brains wondering why the "Red" Sea should be so called. The name was originally applied to it because portions of it are covered with patches from a few yards to some miles square, composed of microscopic vegetable animalculae which dye the waters a blood red. When not affected by these organisms the "Red" Sea is intensely blue, the shoal waters showing some shades of green.

National Base Ball Schedule.

A very neat pocket schedule of the National League Ball games for 1892 has been issued by the proprietors of Johnson's Anodyne Liniment as one of their "Pleasure Series." The schedule is arranged after the plan of the New England League Schedule, published last year by the same firm, for which they own the copyright. It shows at a glance where each game for any day in the season is to be played. The price of this schedule is ten cents, and ought to be obtainable of any news dealer. If not, by courtesy of the publishers, I. S. Johnson & Co., 22 Custom House St., Boston, Mass., the readers of this paper can obtain a copy by enclosing five cents in stamps with their address in an envelope, directed to Johnson's Anodyne Liniment, Boston, Mass. Everybody will want one for daily reference.

If you will be truly happy keep your blood pure, your liver free from growing torpid by using Beecham's Pills. 25 cents a box.

Ladies often compare notes on health, and while they may differ on many point, they always agree that Lydia E. Pinkham's Vegetable Compound is the standard female medicine.

The worst cases of female weakness readily yield to Dr. Swan's Pastiles. Samples free. Dr. Swan, Beaver Dam, Wis.

Doesn't "look" as she ought
—the weak, nervous and ailing woman. As long as she suffers from the aches, pains, and derangements peculiar to her sex, she can't expect to.

But there's only herself to blame. With Dr. Pierce's Favorite Prescription, she's a different woman. And it's a change that can be seen as well as felt. The system is invigorated, the blood enriched, digestion improved, melancholy and nervousness dispelled.

With the "Favorite Prescription," all the proper functions are restored to healthy action. Periodical pains, weak back, bearing-down sensations, nervous prostration, all "female complaints" are cured by it. It's the only medicine for woman's weaknesses and ailments that's *guaranteed* to do what is claimed for it. If it doesn't give satisfaction, in every case for which it's recommended, the money is returned.

Can something else offered by the dealer, though it may pay *him* better, be "just as good"?

"PROMPT AND PERMANENT!"

THE PECULIAR EFFECTS OF
ST. JACOBS OIL
Are Its Prompt and Permanent Cures.

RHEUMATISM.—Jan. 17, 1883, GEORGE C. OSGOOD & CO., Druggists, Lowell, Mass., wrote: "MR. LEWIS DENNIS, 136 Moody St., desires to say that ORRIN ROBINSON, a boy of Graniteville, Mass., came to his house in 1881, walking on crutches; his leg was bent at the knee for two months. Mr. Dennis gave him St. Jacobs Oil to rub it. In six days he had no use for his crutches and went home cured without them."

Lowell, Mass., July 9, '87: "The cripple boy ORRIN ROBINSON, cured by St. Jacobs Oil in 1881, has remained cured. The young man has been and is now at work every day at manual labor." DR. GEORGE C. OSGOOD.

LAMEBACK.—Aberdeen, S. Dak., Sept. 26, 1888: "Suffered several years with chronic stitch in the back; was given up by doctors. Two bottles of St. Jacobs Oil cured me."

W. BAKER & CO.'S
Breakfast Cocoa

from which the excess of oil has been removed,
Is absolutely pure and it is soluble.
No Chemicals
are used in its preparation. It has *more than three times the strength* of Cocoa mixed with Starch, Arrowroot or Sugar, and is therefore far more economical, *costing less than one cent a cup.* It is delicious, nourishing, strengthening, EASILY DIGESTED, and admirably adapted for invalids as well as for persons in health.
Sold by Grocers everywhere.
