REPUBLICAN TICKET.

NATIONAL.

President, BENJAMIN HARRISON, of Indiana, Vice President, WHITELAW REID, of New York. STATE.

Judge of the Supreme Court, JUDGE JOHN DEAN, of Blair County. ALEXANDER MCDOWELL, WILLIAM LILLY, of Carbon County,

COUNTY. CHARLES E. ANDREWS, Assembly, J. J. HARGHT, of Howe Township. QUINTAIN JAMIESON, f fionesta Township Surveyor, J. F. PROPER, Tionesta Borough

AND now the dence is to pay! It is learned that the new ballot, as decided upon by Secretary Harrity, will be tion among the voters four feet four inch long, by twenty-State large enough to print the ballots, And as more than four hundred tens which cannot be found in the State, we are all in a fearful state. And so the deuce's to pay It will require three million regular and three million spec imen ballots to supply the demand in this State, and some of the countries will have a big bill of expense on their hands, for it's no 2 for 5 job to print, pertorate, number, gum and bind these blanket sheets, and some places will quite likely get left. Many printers who had figured on prioting them have withdrawn their bids since Mr. Harri ty added so much to the dready cumbersome ballot. Forest county's Commissioners have given the contract for the supply needed to this county, and if they hadn't they couldn't let the contract now for three times what it will cost them. On, she's a whale, and we'll be luckey if we get a vote at all in November.

ONLY four weeks of the campaign main, but that time is sufficient for cal work, and it is hoped that ery R-publican voter in the coun will consider it has duty to not on make provisions for his attendance thing that he needs to know. t the place of election and casting his lot, but also to see that his neigh lagging from this on, and in order get out the whole vote each indiidual Republican must consider himself a committee of one to assist in the work. Let no grass grow under your . Every vote must be polled. There a particle of dissention in our

see and to get out the full vote is t will win the victory.

en thousand dollars is the sum Cleveland is credited with contriing to the Democratic campaign. ain a select and separate little pot ballot. be expended only for purposes that hall "not offend the eye or the ear of the most fastidious?" - Times.

trade camp has created the greatest consternation, and the free traders are wondering what this bad boy will do next. He now gives the number of people that the McKinley law has senefited in New York and the number of those wages were at once rais ed under the law. It is a showing calculated to make the free traders writhe in agony.

In view of the largeness of the com ing hallet wouldn't be well to com getting out the vote.

THE New York Democracy is very badly scared, judging from the stories Sheehan says he has proof that the clared its preference for another candidate he flung himself into a movement to diswicked Republicans are importing colored voters from Pennsylvania and the Southern States into the smaller cities in New York with a view to registering and voting them. Or course there is not a word of truth in Mr Sheehan's statement, and it is made either to cover up some Democratic rascality or to excuse before hand the defeat that is sure to come lightning calculating at the Jersey City for New York Democracy. They are managers of that state who have been frightened at the defectious of many manufacturers from their ranks, and they cannot hope to carry the State for Cieveland on the free trade plat form. New York will be all right in

THE name given Cleveland by Whitelaw Reid is "Big man-afraid of his platform" Graver certainly does keep as far away from the Chicago will soon lead the world in the manufackeep as far away from the Chicago crazy quilt as possible.

VOTING SCHOOLS

General Reeder Wants One What the Framer of the in Every Election Precinct.

He Issues Text Books and Sample Ballots Under the New Law.

The Republican State Chairman Points Out the Necessity of Immediate Instruction in the New System of Balloting, and Comments on Mistakes That Have Been and That Are Likely to Occur.

(Special Correspondence.) PHILADELPHIA, Oct. 5. Complications over the introduction of the new ballot law continue to arise. Every mail brings to General Reeder some query calling for explanation in reply. The chairman is kept busy answering communications of this character, in addition to looking after the usual duties of his position. Thousands of copies of the book of instructions to voters and explanation of the new system of balloting, prepared under Chairman Reeder's direction, are being sent out from the state committee headquarters to the chairmen of the Republican county committees for distribu-

Bailots and Text Books, Sample ballots are also being distribtwo inches wide. If this be the case uted throughout the state by the Repubthere are not twenty presses in the lican committee, independent of the department of the secretary of the comm wealth. These ballots are to be used in educating Republicans how to vote for of paper will be required, and of a size their party's nominees. They are very carefully labeled with simple and explicit directions how to mark the ticket to insure the counting of the vote for every Republican candidate on the ballot. Chairman Reeder has determined to make an effort to have schools of instruc-

tion in the new system of voting opened in every county. He would have one in every voting precinct in the state if possible To Establish Voting Schools. "No one," said Chairman Reeder today, "who has not had an opportunity to see the mistakes that are made by many who

claim to be familiar with the law, can ap-preciate the importance of general and thorough instruction on this subject. I want to see a voting school established in every precinct in the state. There cannot be too much attention given to this matter. The law is itself poorly put together, and there have been many different constructions of its provisions.

"That there can be no excuse for mistake on the part of Republicans, we have issued from the state committee headquarters a pamphlet which should be taken as the text book for the schools of instruction. It contains all necessary directions how to vote, prepared in a compact and simple form. These books are being distributed by thousands to the Republican county chairmen, who will see that they get into the hands of voters. In addition to this, we are sending out thousands of sample ballots, which are to be used in explaining the system of marking the ticket.

Must Not Confuse Voters. "We propose to follow this up by a thor-ough digest of the new law, which will give the duties of election officers. It will not be necessary for the voter to study this, as the book for voters covers every-

"Of course, no one can know too much about the act, but care should be taken not to needlessly confuse voters. There are and acquaintances are awake to bas already been too much done in that the importance of the election and all direction. Many citizens who took pains e importance of the eleption and al direction. Many citizens who took pains to study the form of ballot first sent out by the state department will have to go the whole athlest nonin as the of ticket has been entirely changed.

A Mistake on the Bailot. Attention has been called to the fact that even the jatest form of ballot sent out by the state department is not correctly and properly printed. This ticket has this no-tice printed at the top of the ballot:

A cross (X) marked in the square at the right of a GROUP OF CANDIDATES indicates a vote for all the candidates in such group. Now, what should have been printed

A cross (X) mark placed in the square at the right of the panty name at the head or top of each group indicates a vote for all the can-

didates in such groups.

An infallible rule for Republicans to follow, in voting the straight ticket, is to ll it be put to "the base uses" of blace a cross (X) mark in the square to the right of the word "Republican," where ever that word appears on the official

A Great Problem to Meet, The printing of the tickets is going to give the party leaders and the county comnissioners great annoyance. Few counties in the state have printing houses suffi-PECK's latest bombshell in the free forate the ballots. The time in which the work is to be done is very short. It is feared that great confusion will follow, unless the size of the ballot is not at once determined upon so that the paper may be

ordered for the printers. The grouping of the candidates must also be carefully looked after. It is so easy to make a mistake. This fact can be ap-preciated when it is known that a prominent candidate for the legislature, who is a newspaper owner and publisher, printed feneral Reeder's instructions on one page of his paper and on another page gave his swn views of the law, which, if followed, would have resulted in the printing of an

Ungrateful to New York Democrats. Grover Cleveland hates and despises the Democracy of New York state. Yet to that Democracy he owes what fortune he has won and what distinction he has achieved. It made him sheriff, mayor, governor, and it presented him twice to the Democracy of the nation as its choice eredit, disgrace and disrupt it. Cleveland isn't the owner of even ordinary gratitude, and no Democrat will fracture his con-science by giving him a dose of the same medicine he has given the New York Democracy that made him.

Democratic Ballot Box Stuffers.

The fact that some thirty "active workers" of the Democratic party of Hudson county, New Jersey, are now making shoes in the state prison at Trenton for hallot box stuffing, false counting and heretofore relying upon this class of gen-try for their majorities. It is a singular fact that the New Jersey Democracy re-fused to nominate the peerless Judge Lip-pincott for governor because he had sen-tenced these active workers to the work

President Rogers, of the Welsh Tin Plate Makers' association, states that the ture of tin plate, as in the manufacture of turnely upon Cie pig iron and steel rails.—Chicago Tribune. and the renegade.

MAJOR M'KINLEY

Great Tariff Law Says.

And What Others Have to Say of the Author and the Act.

The Republican Party Boldly and Confidently Waging the Presidential Campaign with Protection Inscribed Upon Its Banners and Its Special Champion in the Thick of the Fight.

The platform of the Democratic party is a declaration of retrogression, says Major McKinley. It insists upon being backward; it sees nothing good in front of it; it is a standing protest against the progress and prosperity of the country. It is heedless of the most stupendous facts, and will not recognize those which, to any fair minded man, are indisputable. It insists that we cannot make tin plate; it made that declaration when the new law was being considered in congress; made it immediately afterward, and still insists that tin plate cannot be made in this country, and is not made in this country, when the official statement of the government shows that we have twenty-seven factories in practical operation today and seventeen more in process of construction which very soon will be in operation. They said we could not make steel; they said we could not make steel rails; they said we could not make watches, and pottery, china and glass and plate glass, but undainted by their predictions we are now making them as good as they are anywhere in the world; and so it is with tin plate. The American people can make anything they want, and with the adequate protection which we propose to give them they will make everything they want.

A False Democratic Cry. After the great outcry of the Democracy over the new tariff it was assumed two years ago that prices of ready made cloth-ing would be advanced in consequence of the passage of the McKinley act, and also the passage of the McKinley act, and also that the wages of the workmen in that trade would be reduced accordingly by manufacturers as an offset to the in-creased cost of material. Reports from Philadelphia, New York, Rochester and other large manufacturing cities show that neither of these results has followed. Ready made clothing is as cheap as it was two years are, and the workmen are maletwo years ago, and the workmen are mak ing as good wages, with the marked advantage of steadier employment. The price lists and wage schedules of the manufac turers demonstrate the falsity of the pre dictions made two years ago in both respects.

It was one of the chief objects of the Mc-Kinley act to secure the production in the United States of a large variety of the finer manufactures of both woolen and cotton goods. This result has already been partially accomplished. Enlargements and improvements in woolen mills have been made and many new factories have been built. Not only is every woolen mill in the running on full time, but there is also a marked improvement in the qualities of manufactured goods. The greatest activity prevails in this branch of business, and the number of competitors for supplying the home market with materials for cloth-ing is rapidly increasing. If the McKin-ley law remains in operation a few years longer the effect of largely increased competition will be fully produced, and great reductions to consumers will inevitably follow. Meanwhile there is no increased burden to consumers and no decline in wages, and the volume of business in man-ufacturing woolens and clothing is ex-

American Woollens. One of the objects of the McKinley tariff was the introduction of higher grades of woollen goods of domestic manufacture. Our correspondence from Rockville, Conn., shows how successful has been the opera tion of the act in this respect. The mills in that flourishing city are now producing the highest qualities of woollens, and many of the free trade doctrinaires are many of the free trade doctrinaires are wearing them without knowing it. The prosperity of this industry is the direct re-sult of the McKinly tariff. The produc-tion has largely increased; employment is constant for the best classes of skilled la bor; wages are a long way in advance of the English scale, and the city is flourishing as at no other period in its history. The contrast between the condition of this town in President Cleveland's time and under President Harrison's administra-

tion is a most instructive one.

As one notes the signs of business improvement, the prosperity of the working people and their surplus earnings in the savings banks, much patience is required in order to deal with tolerance and good nature with free trade arguments. The passage of the revenue tariff favored by Mr. Cleveland is so evidently a movement in the interest of England's industries that the wonder is that any American leader can be found who is willing to advocate it. A low tariff will menace prosperous com-munities like Bockville, with the ruin of its industries and the degradation of its Why should Americans be deliberately plotting against these home indus tries and the comfort and happiness of the working people employed in them?-New

Our Growing Tin Industries. The press of England offers striking proofs of our brilliant prospects and of the depression of British industries. In the London Times, July 26, occurs this note "All the operatives at the Mellyn Tin plate works, in the Swansea district, have struck work in consequence of wages dispute with the masters. Tin plate works in Great Britain are now being closed owing to the great depression of trade and diminution of prices. The demand for block plate for America is large and growing daily, showing that the tinning process is making great strides in America. In a few months more the tin houses in Wales will have to

The Democratic party is now making the greatest political battle ever waged by a party to cut down the wages of the workmen of this country.

Not Liked by Straight Democrats. Many people are at a loss to understand why David Bennett Hill should be an immensely more popular in New York than Grover Cleveland. One of the reasons is that Cleveland when president attempted to build up a non-partisan party upon the framework of the party that had made him all that he was, and to consider as disrep-utable anything that was urged upon the theory that it was Democratic. He created the impression that it was a crime for a Democrat to ask for an office, and he prac-tically gave the Republicans "a clean bill of health" and admitted their superior comtency and honesty by retaining them in petency and honesty by relating them in office. This gave rise to great offense in New York, and while this feeling prevailed Dave Hill appeared at a mass meeting in Brooklyn and gave expression to the new famous phrase, "I am a Democrat," in which he intended to cast contumely upon Cleveland, the mugwump
