-The storm of Tuesday of last week was quite destructive to timber in some localities of this county. Sheriff Osgood and D. W. Clark of this place were taking shelter in the Salmon creek mill when it came up, and seeing their danger ran to the lower portion of the mill. When the wind had subsided its track was plainly visible in a swath of fallen timber four or five rods wide and several miles in extent, having the appearance of being mown down with a reaper. The funnel shaped tornado had missed the mill but two or three rods, and had it struck the building there would scarcely have been a vistage left of it. Two barns at Kellettville were uproofed, as was also a

portion of Wm. Shellhouse's barn on German Hill. -Memerial Day received a very fitting observance in Tionesta yesterday, the program adopted having been faithfully carried out as published. Cometeries at East Hickory, Church

Hill, German Hill, and other points were visited by details from Stow Post in the forenoon, and at 2:30 o'clock the ceremonies at "Riverside" were begun and carried to completion in accordance with the beautiful ritual of the Grand Army. Past Commander Jonathan Albaugh delivered the oration of the day in his usually eloquent style, and the ceremonies, interspersed with appropriate music, were of an impressive and dignified character. The cemetery never looked more beautiful than on this occasion, every grave baving been trimmed up for the occasion, and lovely flowers were everywhere visible in great profusion. The weather was all that could be wished, and altogether the day was one long to be remem-

NEWSY NOTES.

An unknown man, about 55 years of age, was killed by a train on the Nypano track near Reno on Tuesday of last week. He was 5 feet 8 inches high, and weighed about 175 pounds. His identity has not yet been discovered.

The United Prosbyterian General Assembly, now in session at Monmouth, Ill., Rev. Dr. James Bruce, moderator, represents a total of 62 presbyteries with 800 ministers, 985 congregations, 111,119 communicants. The contributions for all purposes the past year amounted to \$1,400,090, an average of

\$14.07 per member. All the tanneries in the State of Pennvivania have been nurchased by three orporations known as Eik Tanning Company, Penn Tanning Company and Union Tanning Company, and the head offices of all these great companies, representing forty millions of capital, are even now established right here in Ridgway. This is as good for the town as a new factory, for they will employ office help of from fifteen to twenty persons. Verily, Ridgway is right "in it."-Advo-

There is rough land on almost all our farms, says an exchange, where it would

pay better to plant nuts, both for timber and for the nuts to market than anything else. A large farm with these trees set on the roadside, perhaps thirty feet from the center of the road and twenty-five feet apart, would sell enough nuts every year to pay the taxes and leave a surplus for each picker sufficient to pay for the picking. Just why farmers should neglect to properly care for such trees and

suffer loss thereby is strange. The Clarion Republican of last week

mentions the following as among the losers by the late flood Pittsburg. Neely Bros., in. Turkey Run, who lost two boats, Col. standing these plain provisions of the law, it appears from the evidence produced on behalf of the County itself that land, the real value of which is \$123,000, is valued for taxation at \$44,000. Another tract valued by the witnesses at \$147,000. is assessed at \$23,333. The evidence, as well in behalf of the County as that taken by the appellants, shows that timbered lands are assessed at from one third to one-sixth of their real value. We are not advised of the average his duties last Friday night, dying assessment of farms and other improved from his injuries within 36 hours. property, but the Associate Judges, both subject, believe that it approaches much more nearly the real value, and if this is doubt receive a handsome sum. The true, it is manifest that the owners of improved property are bearing much more than their proper share of the burden of taxation. This is especially so in a county wherein the heaviest and most destructive use of roads and bridges is in connection with the lumbering business, and where so large a part of the taxable prop-

erty consists of timber. It is proper to note, however, that the state of facts upon which we have been commenting has only been brought to light by the actual examinations of the lands and estimates of the standing timber made by experts for use on these appeals. The facts now before the Court were not before the County Commissioners at the time of the hearings before them, and it is not probable that the assessors had any adequate knowledge of on Friday night, making themselves the actual value of the tracts assessed by offensive. Crawford ordered them them respectively. We cannot forbear, however, placing the stamp of our disapproval upon the practice of to meet the night express, Mock under-valuation apparently prevailing in this county. It cannot be but some assessors will at least honestly attempt to comply with their oaths of office, and if they do, the failure of others to do so results in inequality. But what is more Crawford's death. Mock claims that important, the wilful violation of a public duty, enjoined by a solemn oath, is so gross a misfeasance in office as to call for News. the discipline of the Criminal Courts. It should be corrected thouroughly, and at once, and in this work not the assessors and Commissioners alone, but all good citizens should co-operate. With the exception of one, or perhaps two, tracts, the valuations appealed from do not appear excessive ; in many cases they are far below the actual values as shown by the testimony of the experts who examined for the county. If other lands in the county were assessed at anything like their real value these appeals might be dismissed. The law requires the court to have regard to the assessed valuation of other lands in the county, which we understand to mean that we are to apply to the cases before us the same standard of valuation which we find to prevail in the valuation of other lands in the county. We are not to fix

So widely spread has this notion become that Dr. Marsden, chairman of the medical committee of the Cancer hospital, London, has thought it advisable to give

it official contradiction. He says that his committee has been inundated with letters on this subject, and he begs publi tion for the following statement, w we we hope will settle the matter at for all. It is the opinion of the com tee "that tomatoes neither predispos nor excite cancer formation, and they are not injurious to those suffe from this disease, but, on the contr this standard from the highest, nor from are a very wholesome article of dict, ticularly so if cooked."-Chaml
