—W. G. Wyman has about finished up the Oldtown tract, and will shortly move his mill to a tract over in the edge of Venango county, owned by James Vanderlin. He will be engaged there a couple of months.

—Charlie Bonner returned Saturday to his home in Chicago, after a three weeks' visit with Tionesta friends, much benefited by his outing and rest from business cares. Mrs. Bonner will remain a week or two longer.

—Rev. McAninch returned last Thursday from his protracted stay in Kansas, occasioned by the illness and death of his father. He was with his people last Sabbath and was greeted by large congregations both morning and evening.

—Snake stories are abundant from all localities except this. We have heard fewer snake yarns from this immediate vicinity this season than for many years back. In fact the snake crop hereabouts seems to be in the general list of failures this year.

—Farmers are telling us that the springs are fast drying up, and that a number are failing which have never done like before. Water wells in the borough are getting down to the giving-out point, also. In fact there is a very formidable drought now on.

—Speaker Thompson was down from Warren one day last week and shook hands with a large number of old and new acquaintances. His fences all over the State are in apple pie order, and that he'll be the next State Treasurer there is no room for doubt.

—A party of Tionesta "wheelmen" started for the spirit lands of Cassadaga last Saturday morning, but before reaching Irvineton the drizzling rain had dampened their spirits to such an extent that they concluded to ride back home in the evening, which they did—on the 7:53 train.

—Wm. McCann of Newmansville, was over with his new traction steam thrasher last week doing some work for the farmers of this section. The little engine traveled right along, up hill and down, with very little effort, and pulled the large separator with perfect ease up the steepest pitches.

—Messrs. John G. Hunter and James R. Morgan have bought Harry Marks' cigar store, billiard room and barber shop attachment, at the Raab building. They have made great improvements, already, in the appearance of things about there, and expect to add still more to the attractions of their business.

—Cholera bulletins from the New York quarantine station are again among the daily items of news. Why is immigration from the infected countries not prohibited? Or has the administration to much to do in pulling itself out of the big financial middle to give any attention to the life and health of the people?

—There will be a meeting on Thursday evening at the Keeley League Room for the purpose of organizing an athletic association, with the view of renting a suitable ground for all kinds of athletic sports, such as bicycle and driving tracks; base ball and lawn tennis grounds, &c. All interested are cordially invited to be present.

—We had a short but exceedingly pleasant call last Thursday from our old friend, Rev. Harry S. Bates. It was his first visit to town for many years, and his friends were sorry he could not remain longer. He is now one of the brightest young ministers in the Erie Conference, and is pleasantly located at Kinzua, where he has a nice congregation.

—The residence of Fred Mock, of Warren, was entered by burglars on Saturday evening about 9 o'clock, when no one was at home but a young lady nurse and the children, who had just gone to bed. The house was ransacked and about \$600 worth of property taken, after which the burglars took the baby, which was asleep in a crib, and carried it out on the lawn. The burglars threatened the girl's life if she made any outcry. There has been considerable thievery going on all around us of late, and perhaps it may be well to have an "eye to windward" about these times.

—If Weather Prophet Hicks means the vicinity of the North Pole when he refers to the northern regions, his predictions for this month may pass; otherwise they're a trifle off. In his August forecast he said: "The storm period from the 8th to the 12th promises the most active and dangerous storms of the month. The temperature," he says, "is likely to fall almost or quite to the frost line in northern regions, say from the 11th to 14th."—Blizzard. If we are to judge by the atmospheric conditions on Sunday night and Monday morning, the 13th and 14th, we should say that Mr. Hicks was right "in it." If the weather didn't approach "dangerously near the frost line" it's a very funny thing. Besides we read in the press dispatches of severe western storms and "cloud-bursts" right in the very period embraced in the dates given by Prophet Hicks, who seems always to know just "where he is at."

—Miss Carter, Miss Fleming and Mrs. Day attended the Free Methodist Camp meeting at Youngsville over Sunday.

—The Ball game between the Stars and the Kids on Saturday was won by the former club. Score 7 to 9. There will be another game between the same clubs on next Saturday, which promises to be quite interesting.

—Mr. L. Pierson of Whipoorwill ridge, threshed his oats last Friday. The yield was the largest that he has raised for years.

—On Saturday there were 8 "ponies" brought to town and soon after the boys were in high gear. One or two little skirmishes was all the difficulty we note that was due to their arrival. Aside from a dark optic or two no other changes are noticed.

—Berry pickers are getting quite numerous as are also the berries.

—Mr. A. A. Graham is making preparations to begin house keeping in town ere long.

—Halsey Graham is laying quite low at his father's farm on Whig Hill with an abrasion of the side. He was taken sick at Fox Creek, where he has been working for a short time, and was brought home one day last week.

TRIED TO CUT OUT.

Almost Successful Attempt of Two Prisoners to Break Jail.

Last Wednesday evening during the temporary absence of Sheriff Osgood, his boarders, J. W. Henderson and Link Herrington had arranged themselves well under way to change their boarding place. James R. Clark, who some times looks after the jail tenants in the Sheriff's absence, was on his way home about 10 o'clock in the evening. His nearest route is to go over the hill past the court house, and near the old jail yard. As he was passing the corner of the yard he heard a slight noise inside, and becoming suspicious went to the door of the Sheriff's house and apprised Mrs. Osgood of what he mistrusted, and immediately began an investigation.

Going into the corridor of the jail he found the men in their cell as if nothing was wrong. Further search revealed the fact, however, that in 15 or 20 minutes more they would have made good their escape.

It has been the Sheriff's custom to allow these prisoners the freedom of the corridor during the day, locking them in a cell together early in the evening, arranging with his nearest neighbor, Mr. Clark, usually, to perform this duty when he does not expect to be at home early. On this particular evening he was detained in his business longer than he expected to be when he departed from home in the morning, and left no word with Mrs. Osgood to have the prisoners locked up at the usual time. They had in some way managed to get an impression of the padlock which secures the corridor door leading to the jail yard, which for several years has not been in use, and had made a key with which they could let themselves out into the yard. Here they had with a large jack knife, cut a hole through the finest board of the wall, the wall being built of matched ceiling boards only—and had already commenced on the outer wall, which is simply of lap siding, and would have required only a few slashes of the knife to have so weakened it that a good push would have made a hole large enough to have allowed their escape.

Sheriff Osgood's search of the prisoners and their cell only rewarded him in finding a piece of flat iron which was partly worked into a key, and he has not been able as yet to find the key with which they unlocked the door. The escape had evidently been planned some time ago as each had saved his cookies for several days past, which they had stowed in their coat pockets, intending not to starve when they got into the woods. They had used the Sheriff's good 25-cent butter to grease the floor and hinges of the door to avoid the squeak which it has acquired from long disuse.

They now occupy separate cells, and will be obliged to exercise their limbs inside if they want to do any walking, while the Sheriff is not in the best of humor over the treachery shown toward him. Henderson is awaiting trial for complicity in the larceny of some cattle in Jenks township, while Harrington will be tried for stabbing a man.

Kellefville.

Wesley Waterman had the two middle fingers of his left hand crushed by getting them caught between the rollers in the dry house at the tannery. The wound was dressed by Dr. Barber. It will be some time before he can go to work again.

Mrs. M. Andrews is having her store building improved somewhat by putting in new siding and painting.

There will be a festival given at the Andrews home, on Thursday evening for the benefit of Rev. Albert Bean of Whig Hill. Supper will be served by the Shaw families at 30 cents per couple. With fair weather a large number of folks is expected to be present.

Miss Carter, Miss Fleming and Mrs. Day attended the Free Methodist Camp meeting at Youngsville over Sunday.

The Ball game between the Stars and the Kids on Saturday was won by the former club. Score 7 to 9. There will be another game between the same clubs on next Saturday, which promises to be quite interesting.

A Corry man who recently visited Bradford says times are so hard over there that the bees have crossed with the lightning bugs in order that they may work nights.—Corry Leader.

"Uncle Sam" Ridgway, of Hydetown, has been quite seriously ill for some time and considerable uneasiness prevails among his friends who hope he will speedily recover his usual health.

As soon as the river and Harbor Committee of the present Congress is appointed a system of locks and dams in the Allegheny, near Tarentum, will be recommended by the War Department.

Never judge by appearances, a contemporary exclaims. A shabby old coat may contain a newspaper publisher, while the man wearing a high-toned plug hat and sporting a dude came may be a delinquent subscriber.

The large tannery firms of M. Berliner and Berliner & Co., of Sparta, Pa., have fallen last week. Executions were issued amounting to \$75,000. The total liabilities are stated to be \$125,000, with assets that should be sufficient to cover that amount.

With cholera in New York, yellow fever in Florida, Congress in Washington, Atgeld and Waite in the West and a general financial stringency all around, this country is certainly afflicted in a manner that no other under the sun could successfully stand.—Blizzard.

The nineteenth century will not end until midnight Monday, December 31st, 1900, although the old year will probably again be renewed as to what constitutes a century when it winds up, and thousands will insist on a premature burial of the old century at midnight on December 31, 1899.—Ridgway Democrat.

Erie Democrats are howling mad because Internal Revenue Collector Kearns has appointed a Populist, J. J. Roemer, as stamp agent. They signed his papers but secretly worked for another man, an Irish Democrat. Now that they are beaten in their double game they should keep mum and look pleasant.—Warren Mail.

Last fall the Democrats pulled the wool over the farmers' eyes, but it was not until recently that it was discovered to be 15 cent wool. An old farmer from up the river came to town last week and inquired the price of wool and when told he said: Gosh! that's what the Republicans told us last fall and I thought they were fooling, but I guess it means business.—Belmont Dispatch.

Unofficial report says that United States District Attorney Harry Atvan Hall has appointed Samuel B. Griffith, Esq., of Mercer, as one of his two assistants and that within a few days Mr. Griffith will be officially notified of his appointment. Mr. Griffith is about 40 years old, is an alumnus of Harvard University, and is an attorney of extensive practice.

Here is something for the ladies to try their skill on: Take a leaf of a tree or shrub, place over it a small piece of white linen soaked in spirits of nitre, and insert between the leaves of a heavy book with a sheet of paper to receive the impression. Lay the book aside for a few days, and then examine. The leaf will be found devoid of color, which will have been transferred to the paper in all the original beauty of tint and outline of the specimen.

Here is what Peter Cooper, who died worth many millions, said of a newspaper: In all towns where a newspaper is published every man should advertise in it, if not for more than a cord stating his name and the business he is in. It does not only pay to advertise, but it lets the people at a distance know that the town in which you reside is a prosperous community of business men. As the seed is sown so the seed recompenses. Never pull down your sign while you expect to do business.

The grape crop never looked finer at Dunkirk than it does this year. The weather has favored it and the vines hang full; the bunches are large and the berries are generally of a size unusual at this time of the year. Vineyards are in good condition, as grape growers have learned the necessity of keeping out the weeds and of frequent cultivation. It is said that experienced growers estimate a yield of 4,000 car-loads if nothing comes to blight the present prospects. The outlook is thought to be good for prices.

July 31 half of the World's Fair period ended. With the first half of the exposition the officials are satisfied, except with the attendance. For various reasons, people have not come to the fair as expected, and, unless there is a wonderful increase in the attendance during the remaining three months, the show will be troubled to pay its debts.

The affairs of the Economists at Economy have reached a crisis and it seems probable that only a short time will elapse before the famous old society will have passed entirely away. During services Sunday, Trustee Duss notified the employes that the society would be unable to pay wages any more to its servants, but if they wished to remain they might work a month longer for their board. The society has been unable to realize on its real estate owing to the present financial straits.

Every part of postage stamp making is done by hand. The designs are engraved on steel, 200 stamps on a single plate. These plates are linked by a girl and man, and then are printed by a girl and a man on a large hand press. They are dried as fast as printed, and then gummed with a starch paste made from potatoes. This paste is dried by placing the sheets in a steam fanning machine and then the stamps are subjected to a pressure of 2000 tons in a hydraulic press. Next the sheets are cut so that each one contains 100 stamps, after which the paper between the stamps is perforated, and after being pressed, the sheets are filed away. If a single stamp is injured the whole sheet is burned.—Ex.
