A Chinese mandarin has forwarded the menu of a banquet given at Peking to the foreign diplomatists, the menu of which follows: First came four classic dishes-namely, swallow nests with pigeon eggs, shark fins with crabs, dogfish with wild duck, duck and cauliflower; then succeed deliencies served in cups placed before each guest; swallow nests, shark fins, plain morils, vegetables, mushrooms with duck feet, fried partridge, pigeon in slices; then there appeared four dishes namely, ham in oney, a puree of peas, vegetables and dogfish; four side dishes; haricot cheese with bamboo bads (a kind of asparagus), roots of bamboo, chicken, four hors d'ocuvers in duplicate, ham and chicken, fish and gizzard, pork tripe and vermicelli, duck and pork cutlets. Each guest had also placed before him plates of pistachio paste, pears and Finally, the following were almonds, the roast and boiled meats: Suckling pug, roast duck, boiled chicken, boiled pork. There was a profusion of European and Chinese wines. No opium was smoked, for official China is not yet reconciled to the drug which it owes to the East India Company .-Asiatic Quarterly.

CARE OF THE COLT'S FOOT. If a coit shows a tendency to walk on the heel or frog, rasp the sole towards the toe to take away the thickness. If the foot is worn at the toe and the heels have become too high, they should be lowered with the When the edges or rim of the hoof has grown leaving the frog and center hollow, the edges should be rasped. The more frequently the foot is put in proper shape the more likely it is to grow into that shape, -New York World.

CHARCOAL FOR FOWLS.

We have found charcoal a very excellent thing to furnish our poultry with. It may be given in a powdered state, mixed with the soft meal feed, and a little pulverized sulphur at the same time may be added with advan-But the very best way to supply this is to burn an ear or two of corn (upon the cob), charring it to forefathers were not able to philosoblackness and throwing it before them. They will devour every kernel, and so supply themselves with a grateful find out a great deal from nothing at and healthy substance that sweetens all but practical experience. One thing the crop, and serves as an admirable our strawberry amsteurs might do, tonic to the stomach.

At this season of the year the above cut off during the season and burn recommendation will be found a valuable hint to poultrymen. Hens about ready to lay will devour this prepared charcoal eagerly, and the increased freshness and redness of their combs afterward evince the efficacy of this allowance. For a month or six weeks in the early breeding season nothing is better than this for laying hens given them daily. - Poultry World.

RYE IN THE CORNFIELD.

There is one plan that, if generally adopted by the dairymen, would add tient driver. measurably to the pasturage of the farm and at the same time be a benefit to the soil itself, and this is the practice of sowing rye in the cornfield cither at the last working or as soon as the corn is cut up. In the spring, long before the pastures are "fit" for turning the stock upon them, the rye field is a wealth of fine feed and excellent. By this plan there is no winter washing of the land, which is, as a rule, equal in exhaustion to a growing crop, and by the middle of May this rye sod can be turned under for corn and is next to clover sod in value. For several years the writer has as nearly as possible carried out this plan and finds that, with what manure and clover sod comes in in rotation, his fields are getting better all the time. Two ways present themselves to put in the ryesowing broadcast and cultivating in with a light cultivator, setting teeth as taken to dry them thoroughly before shallow as good work will allow, so as storing away. to disturb th e corn roots as little as corn, having the shocks regular, and at their own gait. then sowing one and a-half bushels of with a harrow or disc, the loosening in the bringing up. up of the ground covering the seed effeetually without plowing. There is nothing equal to keeping the land at werk, filling the soil with a mass of venient labels for fruit trees. roots to decay and furnish food for the following crop, and if it can be done between crops, as this plan with rye offers, a great gain has been made not stock, but feeding the land as well. - branch than several weak ones. Practical Farmer.

BEST RESULTS FROM TOMATOES,

When pruned and staked tomato plants will bear much closer planting least for some years after planting out, in the field than if left to themselves. is essential to their vigorous growth. distance. As soon as set in the field the plants ought to be tied. Set strong stakes at each end of every row and brace carefully. Smaller stakes may be set at intervals of two rods along the rows. These stakes should be about three and a half feet high. Next stretch two wires of about the size have it filled. used in baling hay along the tops of the stakes in each row. Take the hand, aprouts and suckers while ordinary laths or small sticks of any young and tender than to wait till a kind, of the same length as lath and stick one just at the side of the place A few carriage bolts costing a few that each plant is to occupy. ince by weaving the wires around sizes and lengths in the tool box. the tops of the stakes or laths. This makes a neat and substantial trellie. chard that cannot be fed to the pigs or The plants are trained to single stems and tied to lath supports.

Of course, tying must be done at successive intervals as the plants increase in height until the top of the trellis is reached, after which nothing further need be done in the way of training. All side roots near the ground and enckers must be pinched oft, as the object to be gained in staking would be lost otherwise. None of the blossoms are to be removed, but the better of the Navajo Indian in trade. surplus shoots and tying the plants to difficult to photograph. supports exposes the fruit to the sen-light and favors early development to a marked degree. In almost all cases a new va-If this cannot be procured and ricty "runs out," as it is called, and as a rule, are even as good as they were in former times. It is thought that the old method of cultivation, which moderns have laughed at, might not have been such bad practice after all. The practice was to grow the strawberries in beds; as soon as the crop was gathered the leaves were mown off with the scythe and burnt, and a new crop of leaves came up before winter. With the progress of vegetable physiology this was thought to be very bad practice. The argument was that leaves make food, and the more leaves the better. This would be true if the leaves were healthy leaves; but diseased leaves are worse than no leaves at all. No one ever thought of the strawberry spot in those days; in fact a specimen of this disease was rarely seen. It is now believed that the practice of mowing and burning the leaves was advantageous in this, that it destoyed all attempts of this fungus to propagate itself and was therefore beneficial rather than otherwise. It is an illustration of a phize on their garden practices as closely as we may, they were able to which is not done now, and that is to

HOUSEHOLD AFFAIRS.

Wow-wow sauce is the attractive name of a preparation which makes an excellent relish with stewed or boiled mests. Chop some paraley leaves fine; divide two or three pickled cucum-bers or walnuts into small squares. Put into a saucepan a piece of butter the size of an egg. When it is melted stir into it a tablespoonful of fine flour and a half pint of beef broth. Add a tablespoonful of vinegar and a teaspoonful of made mustard. Simmer together until pretty thick. Add the parsley and cucumbers or walnuts

SALAD OF CAULIFLOWER. Put in a bowl two large cauliflowers which have been cut in pieces about an inch long, and one onion cut in very thin slices; add two tablespoonfuls of oil, two of vinegar and a pinch of salt and pepper. Mix all well together and serve. Or, if desired, a Mayonnaise sauce can be used with cold cauliflower, which can be made by this recipe: Put the yolks of two eggs in a bowl with salt, pepper and the juice of a lemon and half a tenspoonful of dry mustard. Stir with a wooden spoon, adding by degrees, in very small quantities, a tablespoonful of vinegar, then a few drops of good clive oil, beating rapidly all the time until the sauce thickens and half a pint of oil has been absorbed. - New York Re-

COLD POTATOES,

Cold potatoes are not particularly sppetizing as such, but they may be quickly converted into delicious breakst or luncheon dishes.

Potatoes au Gratin-Slice your cold potatoes and stew gently in milk or broth. Season with pepper and salt. Grate some cheese and some bread, and sprinkle over the potatoes. Brown

Potato Hash-Heat together a tablespoonful of butter and a cup of milk. Season with pepper and salt. Hash the cold potatoes, add to the milk, cover and simmer gently until the milk about absorbed.

Potato Provencal -Cut cold potatoes into balls with a vegetable scoop. Melt some butter, add a slice or two of onion to it and fry the balls. Mix hashed meat and hashed cold potatoes, moisten with milk for stock, season, roll and bake in a buttered dish in the oven. — New York World.

SICK-ROOM JELLIES.

Arrowroot Jelly-Wet two heaping teaspoonfuls of Bermuda arrowroot in a little cold water and rub smooth. Have on the stove boiling water and in a cup of it melt two teaspoonfuls of white sugar. Pour this boiling water on to the arrowroot. Boil until clear, stirring all the time. Add a teaspoonful of lemon juice and mould in cold cups. Serve cold with cream and sugar.

Tapioca Jelly—Soak a cup of tapioca in three cups of cold water for four hours. Set it in a saucepan of boiling water. Add a little lukewarm water to the tapioca and heat, stirring froquently. When it becomes clear, add a little sugar, a little grated lemon peel and the juice of a lemon. Pour into moulds and when cold eat with cream and sugar.

Chicken Jelly-Pound half a raw chicken, bones and meat, until it forms

Don't clean brass articles with acids. Use putty powder, with sweet oil. Wash off with soapsuds and dry. It will insure brightness.

Pink and blue ginghams of a wash-able make can be kept from fading by washing in a weak solution of vinegar and water. Rinse in the same way and dry in the shade.

Ink stains on white goods can be re moved by soaking in water and then covering spot with pounded salts of lemon. Bleach in sun for half hour, wash in suds, rinse and dry.

Chloroform is useful for taking paint stains from black silks. Persistent rubbing is necessary. Chloroform will also restore faded plush goods by sponging goods carefully.

Handsome, so-called "bearskin" rugs are easily obtained by dyeing skins of sheep. Farmers sell long wooled sheep-skins for very little Good dyes will transform these into serviceable, cheap and handsome ruge for cottage and city homes alike.

Those annoyed and wearled by insomanis on hot nights can relieve their sufferings by following a few simple instructions. First of all, go to bed clean. No dirty face, hands or feet. Wet the top of the head with cold water; wet the wrists, bathe the feet in warm or tepid water, in which some saft has been mixed. Dampen a handkerchief or small piece of linen, fold lengthwise and place over eyes when reposing. Don't think of business or household cares; leave thoughts of notes, mortgages, soups, puddings, etc., on the outside of the mosquito net, and sleep will come without any wooing. Try it and be convinced.

In the world's mints from 1850 to 1890 there were coined 9194 tons of gold and 81,235 tons of silver.

TEMPERANCE.

THE "APPRECIAL. No temperance homily would I indite.

And yet, from what I've seen, that man, methinks,

Who drinks to help along his appetite
But helps along his appetite for drinks.

—John Ludlow.

ALCOHOL'S TERRIBLE REPROTS. One illustration of the terrible effects of alcohol is the case of a drayman who went it the hospital with heart disease. The madded and the next day the body was a swelled with gas that the doctors, to fin what the gas meant, punctured several holes in the skin and tested it. It was found to be a form of hydrogen and so they lighted it and thus had iffeen or sixteen small gas lights, which burned antil the gas was con-

THE WORLD'S GREATEST ROBBER.

There is a robber that takes not only men's homes, their farms, their bank accounts, their reputation and their friends, but their manhood as well; which roles women not only of all the beauties and comforts of life, but of their womanhood as well, and which robs innocent little children of their childhood before they are out of their first awal-diling clothes. Who is that robber? There is bardly any reason to name him, Describe him, and the civilized world recognizes him at once as the drink traffic—the Greatest Robber on Earth. There isn't a woe that all the other robbers can inflict that this chiefest of robbers is not inflicting to day upon the unnumbered thousands; and in addition he is inflicting far worse wors than any of the other robbers can inflict.—Volce, THE WORLD'S GREATEST ROBBER.

It is but a small part of our indictment against drink that it is the chief cause of crime. It is also the chief cause of multiform disease and misery. Sir W. Gull said, before the Committee of the House of Lords, that "a very large number of people in society are dying day by day, poisoned by alcohol, but not supposed to be poisoned by it." Sir H. Thompson said that "there was no greater cause of evil, moral and physical, to the inhabitants of this country. Mr. Mulhall, in his statistics, attributes to drick forty-eight percent, of the idlocy in England. Sir James Hannen said that seventy-five out of every hundred divorce cases are brought about by it. In the organ of the National Society for the Prevention of Crucity to Children we are told that out of eighteen selected cases of typical flendishness, thirteen were directly connected with drink. The more competent the witnesses the more intal and overwhelming does the case against drink become. FROM THE MEDICAL STANDSOLVE

TEMPERANCE TALE.

The following "short talks" from the Ram's Horn contains many thoughts worth

Ram's Horn centains many thoughts worth treasuring up

A moderate drinker is worth more to the devil than a drunkard.

A thirst has often been started with a teaspoon that barrels could not quench.

The man who has temperance principles should not keep them in the dark.

The man who is not against the saloon is not against the devil.

Every drunkard used to boast that he could drink or let it alone.

The man who forms good habits helps God.

God.
You can sometimes tell where a man stands by his breath.

Nine drunkards out of ten are so to-day because they did not resolve in youth to lead a sober life.

The man who is not against the liquor traffic with all his weight, is in favor of giving the devil a license to do business on each.

There are people who claim not to believe in a hell who live in plain sight of a drunkard's home. Putting screens in the saleon doors is the devil's way of saying that he is ashamed of himself

himself.

Whenever you see a drunken man it ought to remind you that every boy in the world is in danger.

When somebody appears to prove that there is no hell, whisky men are the first to throw up their hats.

When a man takes a drink of whisky he bids God good-bye.

Chicken Jelly—Pound half a raw chicken, bones and meat, until it forms a pulp; cover with cold water; simmer gently in a covered vessel until the meat is in shreds and the liquid reduced about one-half. Strain and press through a collander; then strain through a coarse bag; salt and add a very little pepper; return to the fire, simmer for about five minutes; cool and skim; keep on ice. Serve with unleavened wafers, or, in the convalescent stage, between thin slices of bread,

Leeland Moss Jelly—Wash a handful of either Leeland or Irish moss in ALCOHOL'S PLACE IN NATURE, Iceland Moss Jelly—Wash a handful of either Iceland or Irish moss in several waters and soak for an hour. Stir it into a quart of boiling water and allow it to simmer until dissolved. Sweeten, flavor with the juice of two lemons, a half teaspoonful of cinnamon. Strain into moulds.

HOUSEHOLD HINTS.

Wilted roses can be restored by placing the stems in hot water for a minute.

Coffee stains on white goods should be washed in warm water before placing in suds.

A dish or plate of water set in the oven when baking cake will prevent seorched edges.

Boil or roast a lemon, fill with sugar while hot and eat hot. It will often check your cold.

Don't clean brass articles with acids. shown that the energy thus liberated is used to aid the performance of a normal function. It is not enough that chemical potential energy is transformed into kinetic energy, the transformation must occur at the right time, in the right place, and in definite parts of the tissues, which themselves are not so constituted that they can be fed with any and every combustible material.—Westminster Review.

TEMPERANCE NEWS AND NOTES. It is stated that 172 member of the British Iouse of Lords own 1539 liquor shops. The W. C. T. U., of Harriman, Tenn., has creefed a Temperance Temple at a cost of \$3000.

The seniors of Brown University voted to exclude all intoxicants from their cle quet this year. Brattleboro, Vt., has no saloons, and dur-

ing the entire year of 1892 had but twelve ar-rests for all causes. The British Medical Temperance Association has now 418 members, and eighty-six student associates.

Government detectives in some of the "moonshine" districts carry kodaks with them to source evidence.

In Lockhart's cocoa-rooms, of which there are sixty-eight in London, 3675 pledges were voluntarily taken last year.

There were forty-four counties in Kansas last winter owning poorhouses, in which there was not a single inmate. The New York Sun declares, after making search into police, hospital and inebriate asylum records, that drinking habits are inreasing among women of station in this A Book Island Ballroad engineer, arraigned

A hook beand fairroad engineer, arraigned for violating the rule of the company in the matter of drinking, denied the charge, but was confronted with a photograph of himself in the act of drinking a glass of beer, which the kodak had caught.

The report of the Commissioner of Internal Rovenue for the fiscal year ending June 80, 1892, shows that the amount of beer produced in the United States was fifteen gallons per capita in 1892 squinst three gallons twenty-four years ago; and whisky holds its own. The number of acrests for drunkenness in New York Cay for 1830 were 31,584; in Philadelphia, 24,661; in Boston, 1839, 24,000; in Chicago, 31,164. Over 500,000 persons are annually arrested for drunkenness in this country is the estimate of the census department. A Wonderful Cloak,

Among the articles disposed of at the recent sale of the curiosities collected by the Earl of Dunmore during his explorations in Chinese Turkestan. the Pamirs and Central Asia, was a cloak formed of the skins of 741 Chinese wild duck's throats. It was made by a native of Chinese Tartary, who was occupied for twelve years in the collection of the skins. - Philadelphia Record.

Ceylon has cinnamon plantations overing 36,000 scress.

American pioneers were God fearing and Bible loving. They staked out town lots in twenty-two Goshens, twenty-one Shilohs, eleven Carmels, eighteen Tabors and Mount Tabors, twenty-two Zions and Mount Zions, twenty-six Edens, thirty Lebanons, twenty-six Hebrews and thirty-six Sharons.

Missionary work in Siam is now chiefly in the hands of the Presbyterian Board, which commenced its work there in 1840. Twenty years of labor were expended before a single convert was wen from Buddhism to Christianity.

The New Bread

As endorsed and recommended by the New-York Health Authorities.

Royal Unfermented Bread is peptic, palatable, most healthful, and may be eaten warm and fresh without discomfort even by those of delicate digestion, which is not true of bread made in any other way.

To make One Loaf of Royal Unfermented Bread: ı quart flour, ı teaspoonful salt, half a teaspoonful sugar, 2 heaping teaspoonfuls Royal Baking Powder, cold boiled potato about the size of large hen's egg, and water. potato about the size of large hen b egg, and water.

Sift together thoroughly flour, salt, sugar, and baking powder; rub in the
potato; add sufficient water to mix smoothly and rapidly into a stiff batter,
about as soft as for pound-cake; about a pint of water to a quart of flour will about as soil as for pound-case; about a pint of water to a quart of flour will be required—more or less, according to the brand and quality of the flour used. Do not make a stiff dough, like yeast bread. Pour the batter into a greased pan, 415 by 8 inches, and 4 inches deep, filling about half full. The loaf will rise to fill the pan when baked. Bake in very hot oven 45 minutes, placing paper over first 35 minutes' baking, to prevent crusting too soon on top. Bake immediately after mixing. Do not mix with milk.

* Perfect success can be had only with the Royal Baking Powder, because it is the ente pouder in which the ingredients are prepared to at to give that continuous action necessary to raise the larger bread loaf.

The best baking powder made is, as shown by analysis, the "Royal." Its leavening strength has been found superior to other baking powders, and, as far as I know, it is the only powder which will raise large bread perfectly.
