A STARTLING QUESTION.

A STARTLING QUESTION. Everybody knows that a large proportion of crime (statisticians claim three-fourths) is the direct result of alcoholism. But now comes a scientific writer in an esteemed con-temporary and asks the startling question : "Will our descendants be criminals" If shows that the pathological conditions con-ducive of crime are produced or asgravated by the habitual use of liquors. Druking degenerates nerve tissue, and in particular of the delicate structure of the brain. Hence the delicate structure of the brain. Hence the delicate structure of the brain the sci weed drinking and epileps, and in branity, and morbid nervous conditions generally-which are hereditary. The amout be said that crime is the expres-

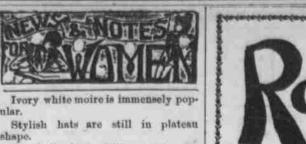

which are hereditary. It cannot be said that crime is the expres-ion of disease that would destroy moral re-ponsibility. But it is certainly true that morbid nervous conditions intensify the difficulty of self-control, and re-enforce temptation.—St. Louis Republic.

A DISGUSTED DRUNEARD.

A DISOUSTED DRUNKARD. One woman determined that her husband should know how he looked when he was drunk. She knew how he looked well enough, and needed not that any man should tell her. Her childred also knew by sad ex-perfect idea of the state of the case. So once when he came home and fell into a mathin siumber she sent for the photog-rapher to come forthwith; and on his arrival she set him to work. She ordered the pho-tographer to photograph her husband as he sat in his chair. The photographer did his work and did it well; and when the photo-graph was finished and laid beside the hus-cands plate at breaktast it was a revelation, and the sobered centered a photograph was finished and laid beside the hus-and the sobered centered and the sobered and her sobered source and the sobered source and the sobered source and source and the sole and source and source and the sole and source and source and the sole and source and source and source and the sole and source and so and the solvered gentleman experienced a decidedly new sensation. There was no need of explanation; the thing explained itself. There was no chance for contradiction; the sun tells no lies. There was no reom for argument. There was only one thing to do, and that was to quit : and it is very fortunate that the man had courage and sense enough

WOMEN INEBBIATES.

Doctor Hugh Richard Ker, who at one time kept a retreat for women insbriates, also told the Committee that the curative process with women is especially difficult. They are very inventive and resourceful in their determin-

The bell skirt still maintains its vogue.

Hard times have notably affected the attendance at Vassar College.

Epaulettes appear to be quite as much a feature of fashion as ever. Lady Isabel Morgesson has devised woman's pocket that, she says, cannot be picked.

The English Queen's Scoth jour-neys cost her \$25,000 a year for traveling expenses Five men and a woman recently ran

a foot race of 200 yards in Henderson County, North Carolina. The woman won easily

Edward Terry, an English musical editor, says that women compose some of the finest dance music and some of the best songs.

The number of unmarried women in England and Wales exceeds the number of unmarried men by the majority of nearly 200,000.

At Ferneliffe, Mrs. John Jacob As-tor's place at Rhinobeck, N. Y., the fair chatelaine is often seen riding about her grounds on a tricycle.

When Queen Elizabeth of Austria entered Paris in 1751 she dragged after her a train seventy feet in length. It was borne by thirty-five pages.

It was after Miss Martha Lumpkin, now Mrs. Campton, that Atlanta, Ga., was first named "Marthasville," in 1843. Her father was Governor of the State

Birds of paradise will be worn on the most costly and fashionable hats, and ostrich plumes will still be regarded as one of the most effective trimmings.

Velvet is to be much used as a trimming for hats. Black jetted wings will also be popular. In combination with black, sapphire and peacock-blue will be seen.

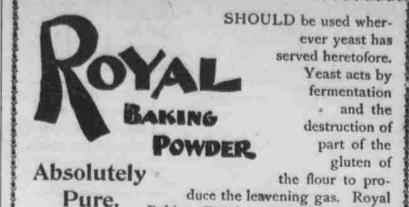

Queen Victoria is a skilful and indefatigable knitter. She and her ladies in waiting bave knitted many quilts for the use of soldiers in the hospitals.

For autumn hats and bonnets the prevailing colors will be black and white. Eminence shading from the darkest to the palest shade of lavender will also be proper,

The new winter coats are thirtythree inches long, made with a very tight waist, and tremendous sleeves. Nearly all have cape effects about the collar and shoulders.

The most beautiful silk which has appeared to tempt womankind this ason is of heavy satin, with a Bayadere stripe in velvet. The combina-tions of colors are simply exquisite. Soft, rich tartans of all wool, finished with a corded silk blouse-waist, completed by bretelles, sleeve-puffs, and collar of velvet, are among the pretty dresses designed for misses' best wear. The autumn tints in dress take their hues from the dying woods. Browns, rods and yellows, with modifications of sea greens, are the tints of fall. Such are seen in the gowns, such in the hats.

An old-time-looking dress has the skirt finished with seven ruffles, the lower one about five inches deep, and each one growing narrower, the upper very slightly over-lapping the lower

Baking Powder, through the action of its ingredients upon each other in the loaf while baking, itself produces the necessary gas and leaves the wholesome properties of the flour unimpaired.

It is not possible with any other leavening agent to make such wholesome and delicious bread, biscuit, rolls, cake, pastry, griddle-cakes, doughnuts, etc.

Hypnotism for Nose-Bleed.

"A few weeks ago," says a corres-condent in the Philadelphia Record, I saw a crowd collected around a carringe in front of a doctor's office. Pushng my way into the crowd I sawa very pale young man in the carriage suffering from nose-bleed, holding out the forefingers of each hand to a gentleman, evidently the physician, who was engaged in tying them together with a string placed around the last joint of each finger. I asked him if that would cure the nose-bleed, and he answered curtly, 'Yes.' I waited a few minutes and saw the cure effected. A few days later I tried the remedy on my office oy, who had a severe case of nose

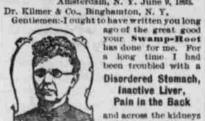

bleed, and it cured him almost im-mediately. I asked a regular physician about it and he replied gruffly : 'Hypnotism.' This I did not quite understand, but it set me thinking. Last Thursday evening a couple of young ladies, the daughters of my next-door neighbor, who had been attending a hurch entertainment, returned home in a state of laughing hysteria-the giggler' in Mrs. Jarley's wax works had been too much for them. called in as a friend to see what could be done for them. It was no laughing

matter, for they were having spells of fainting. I tied up their finger joints with strings, telling them that .t would cure them, and it did."

I took SWAMP-ROOT and am now able to de most of the work as usual and feel like a different person. Dr. Kilmer's

Toothache Robbed of Its Terrors.

Toothache is no longer a serious thing to treat, and can now be stopped in the course of two or three minutes at the outside, and often in half a minute. The method is very simple Thoroughly clean out the eavity, take a small piece of cotton, twist it into a small roll so that it will enter the cavity, dampen the small end and place upon that three or four granules of cocaine, about the size of a small pin head, press these with the cotton into the hole up against the nerve and the effect will be instantaneous. Every throb will cease, and the suffer will think in a few moments he never had the toothache.

The Americans are generally agreed to have surpassed all other Nations in the invention and use of rapid-firing

are hardy, easily raised and require egg-producing food. less expensive food than other poul-try. To this may be added the fact that in nearly all cases they are that in nearly all cases they are healthier, being less subject to disease and free from lice. An additional source of income is their feathers. They lay eggs, hatch young fowls, and yield a good quantity of feathers, and can, with good treatment, be much

with good treatment, be made over the black is that they are much profitable. Of course with either it is easier to handle, being much gentler. always best to have the larger, better breeds. Embden geese and Pckin ducks cost ng more to raise than the other kinds, while they return a much In most localities the use of honey

is nothing like so great as it would be Ducks, if provided with comfortable quarters where they can rest at night and are reasonably well fed, will often commence laying the latter part of if those who keep bees would put up January or the first of February, and lay very regularly until warm weather

Foundation is an indispensable sets in. Geese begin to lay early in March and will lay fourteen to eighteen eggs; these should nearly alarticle in the apiary, and every keeper of bees should have a good supply of it on hand. With it we can have nice, ways be set under hens, as it is often straight combs, and save the beeaconthe case that the mother will not besiderable work, as well as consumption come broody until late. With ducks of honey.

it is usually best not to attempt to Look for a market for your small hatch out the first laying of eggs unfruit near home. Long shipments selless it is done in an incubator. They are less trouble to raise in a brooder dom pay the smaller growers, as the commission on small shipments are than either turkeys or chickens, and high, and it is only the larger growers' with good feeding can be made to grow very rapidly, much faster than chickens, so that when three months old they readily and the months

context is not that when three months old they readily weigh four or five pounds apiece, while chickens will average about two. Both ducks and geese require less grain and more bulky feed than tarkeys or chickens, and it is hert, and consciently context to understand the machine and to give to understand the machine and to give and it is best, and especially so with proper care in order to obtain the best grosse, to sell the younger fowls and gesults. Now is a good time to buy keep the older ones for laying and breeding. After they are reasonably well matured, the feathers can be Tractise on Bloost and Skin Diseases mailed well matured, the feathers can be managing it beau see, Swirz Bracino Co., Atlanta, Ga. | picked regularly several times during fill for hatching.

Inventive and resourceful in their determin-ntion to get something to drink. Doctor Ker is responsible for the illustrative story of the curling tongs. The women in his retreat first got their curling tongs. Then, as curl-ing tongs must be made hot, they got some methylated spirit for the lamp. Next, by various devices, hot water, sugar and lemon julce were obtained from one of the mads. And so out of curling tongs came grog and a state of intoxication shocking and startling to the proprietor of the retreat.

And so out of ourling tongs came grog and a state of intoxication shocking and startling to the proprietor of the retreat. Here a member of the Committee resol-beeted that a dortor had told the members of Parliament who inquired into this subject in 1872 of a woman patient who drank blacking because there was alcohol in it rather than not have something alcoholic. "I quite be-lieve it," and Doctor Ker, but surely some one will say that there is too much blacking in this story of women drankards. Another Doctor Kerr Doctor Norman Kerr-referred to ensee in him practice of ladies well weaned from alcoholism, and did not argue for the detention of women longer than men. Doc-tor Street, who has also had experience of women in retreats, accounts for the in-equality of men and women in regard to the drinking habit by the fast that the women are screened for a longer time and have be-come very had before their cases are brought to the notice of a physician while their caro is more difficult because they have fewer oc-cupations to divert their thoughts than men. This harmonizes with Sir Androw Clark's view that occupation is a part of the curative process, as the want of it is very often the reason of the disease.--London News.

THE GREEDY BOTTLE.

THE GENERAT BOTTLE. A poor, under-sized boy named Tim, sit-ing by a bottle, and looking in, said, "I" wonder if there can be a pair of shoes in It?" He wanted to go to a Sunday-school plenic, out he had no shoes. His mother had mended his clothes, but said his shoes were so bad he must go barefoot. Then he took a prick and broke the bottle, but there were no shoes in it, and he was fright-uned, for it was his father's bottle. Tim sait down again and sobled so hard that he did out hear a step beside him, until a voice said : "Well ! what's all this?"

He sprang up in great alarm ; it was his

ather. "Who broke my bottle?" he asked. "I did," said Tim, catching his breath, half in terror and half between his sobs.

"Why did you?" Tim looked up. The voice did not sound to territhe as he had expected. The truth was his father had been touched at the sight of the forlorn figure, so very small and so forrowful, which had bent over the broken sottle

"Why," he said, "I was looking for a pair of new shoes; I want a pair of shoes awful had to wear to the picule—all the other chaps

bad to wear to the picule—all the other chaps war shoes."
"How came you to think you'd fird shoes in a bottle?" the father naked.
"Why mother said so: I asked her for some new shoes and she said they had gone into the black bottle, and that lots of other things had gone to the the the to the tots, and bread and meats and things; and I thought If I broke it I'd find em all, and there ain's a thing in it?" And Tim said down amin and eried barder than ever. His father seated himself on a box in the disorderly yard and remained quiet for so long a time that Tim at last looked cautiously up.
"I'm real sorry I broke your bottle, father : I'l mever do it again."
"No, I guess you won't, "he said, laying a band on the rough little head as he went away, leaving Tim overcame with astonishment that father had not been angry with him. Two days afterward, on the rowy evening before the picule, he handed Tim a parcel, telling him to open it."
"No, ny boy, there isn't going to be a new

inter, intry on get a new inter going to be a new intry in it?" "No, my boy, there isn't going to be a new bottle. Your mother sea right-the things all went into the bottle, tout you see getting them out a fine carsy matter; so, God helping them out is no ersy matter; so, God helping them out a fine carsy matter; so, and helping them out a fine carsy matter; so, and helping them out a fine carsy matter; so, and helping them out a fine carsy matter; so, and helping the source of the so 1 me, I am going to keep them out after this.
