A Tigress Spares a Dog. During Captain White's travels in Cochin China the then Viceroy gave him a magnificent tigress five feet

long and three feet high. On reaching Saigon, where he found dogs dirt cheap, he used to give his pet one of these animals every day. The dog was thrown alive into her She would play with it awhile as a cat plays with a mouse, then her eyes would begin to glisten and her tail to quiver; she seized her prey by the neck and in a minute or two it was all up with poor "how-wow."

One day, however, a puppy, seemingly in no way different from the common herd of puppies, instead of tamely submitting to his fate, showed fight. It snapped at the tigress's nose and bit it till the blood came. The tigress, far from resenting the attack, seemed to treat it as a joke, and when the spirited little dog grew tired of the fun the tigress patted it as if it had been a cub of her own. Then the two lay down and had a comfortable nap.

Thenceforth they were the best of friends, and to humor this queer friendship Captain White had a small hole cut in the tigress's cage, that the puppy might go and come as it pleased. It often took a trot abroad, but it always returned to its dog-devonring friend.

To test the extent of the tigress's affection a strange dog was offered to it one day at dinner time, and was then hastily snatched from its hungry jaws and the puppy friend thrown into the cage. But friendship triumphed over the pangs of hungerand not on this occasion only, but whenever the Captain's crew thought fit to repeat the experiment. -St. Louis Republic

#### Signs of Eighteen Nine ty-tour.

The old saying: "A green Christmas makes a fat gravevard" is often verified, and it further says, that the year will bring forth much sickness, wherein pains and aches, rheumatic complaints, soreness of joints and limbs will abound. In the olden times there were few preventives for pain, few cures for complaints. It is not so now. Even old Santa Claus has learned a thing or two. In many a Christmas stocking was found a bottle of St. Jacobs Oil, the best known, surest remedy for all such troubles. All years have their prophesies, and no year is without its record of surprising cures wrought by this wonderful medicine.

How's This !

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

#### TEMPERANCE.

My friend was a guest of the morning frain, And once, as a presperous town il nesred, He idly glameed through the window-pane, And this is the picture that appeared:

good-faced man in a flendish plight; His cheeks were bloated and stained with red: fe slept the day of a sin-cursed night, A pillow of stones beneath his head,

By him the midnight's reveiling storn Sent stains to the morning's balmy breath, And manhood's lowering, godike form Lay low in the temb of a drankard-death.

And close by his side a woman stood, And brooded this wreek of a man above. Her brow was a glimpse of all things good. Her eyes were symbols of home and love

Stood close by his side, and yet apart, A motionless gesture of despair, As if she would clasp him to her heart, If only the man himself were there.

the stood as maybe, if she had known.
What marks the one she had found there She had prayed to God with a bitter mean To keep her searching for evermore,

the stood like one who had felt the touch Of needless worry and senseless strife: Who early in years had learned how much Of death there is in a woman's life.

he stood like one who had set a goal Who ne'er by her God would be denied, ntil He had helped her lead that soul Safe up to the hill-tops by her side.

All this appeared in a moment's glance— This flash-light picture of grief and wrong The train made sudden and swift advance, But carried the husband and wife along.

For ever after, my friend confessed, Went with him that seene of crime and

pain; brough days of striving and nights of rest It hung in the halls of his heart and brain.

And other pictures are wont to throng Of sleeping children and waking wives— Wailing and waiting the whole night long For one they love as they love their lives

Of praying for him till night is o'ez: Of listening for his step in vain.

Then searching as it on fields of gore.

And finding him almost worsethau slain.

netimes these will vanish away And Faith is painting a promise bright That God, and Woman, and Home, som

day, Will draw Mankind to the hills of right. -Will Carleton, in Harper's Weekly.

PROBERTION IN INDIA. The Nawab of Junagad, India, has issued The Nawab of Junagad, India, has issued the following prohibition proclamation:

"Whereas it is opposed to the teness of the Mohammedan religion to derive any revenue whatsoever by letting our contracts for liquor, it is hereby proclaimed by His Higness the Nawab Sahib of Junagad, that the practice of farming out contracts for spirits shall be no longer permitted in His Highness sterritories from this day forward. It is further proclaimed that it is His Highness's wish that all existing Abkari contracts should forthwith be brought to a speedy termination by an amicable settlement of their claims.

PEARPUL TO CONTEMPLATE.

Archbishop Ireland says: "It is fearful to think of it, but in this Nation of the United States over \$1,000,000,000 annually are spent in the direct traffic in intoxicating liquous, bealdes its being the cause of the waste of much more money. Men are unable to work because of injury done to their appetites by drink. Time is absorbed in drinking; the country's resources are scattered to the wind. It would be much better if the money given to drink were taken and cast into the lake; at least, it would then leave behind it no harm."

DANGEROUS OCCUPATIONS.

Doctor Abbott says, in the Independent, that those businesses whose memoers die youngest are just those which offerthe greatset temptations to the use of intoxicating liquors. The death rate among barkeepers and workmen in breweries is frightfully high. If a man wants to live long he must avoid such a business. If is more damperous to one health to tend a bar than it is to breath the sharp, metalle dust to which one is ex-posed who grinds cutlery. Whisky is more poisonous and dangerous than the white lead with which painters stain their lands. Putting the mortality of dergymen at 100, the mortality of those who attend a bar runs up to 307, nearly four times as many deaths, and no amount of sanitary conditions can make their business healthy.

A PATHETIC WIM...
The Reading Times calls attention to the The Reading Times calls attention to the fact that the will of the great brewer, Henry Clausen, of New York, just filed, has a pathetic censure of a dissipated son, to whom he leaves the interest of \$20,000, with a similar bequest to his son's wife. The clause in the will relating to the son, after referring to the testator's repeated failures to reclaim him from mabits of dissipation, says: "I doesn't wise to limit my provision for him and his family to the beauests hereto reclaim him from matters of dissipation, says: "If deem it wise to limit my provision for him and his family to the bequests herein made for him and his wife, to the end that they may be secured from absolute want, but I have been convinced of the futility of making any other or further provision for him by his persistent refusal to adopt such methods of living as would indicate any ability for the useful application of any greater income than I have herein provided."

It is nathetic, and yet it might be re-

It is pathetic, and yet it might be remarked, which is even more pathetic, that but for the similar dissipation and rain of thousands of sons of other parents, Brewer Clauson would possibly not have had the immense fortune to distribute of which the handsome "provision" of the interest of \$40,000 to his son and wife, is considered auch a "limited" bequest.

The dead brewer's foresight in trying to esp his dissipated son from "absolute want," is commendable for the fatherly feeling and interest which it shows, but it appleasantly calls attention to the other side of the pleture. It is pathetic, and yet it might be re

Brewer Clausen grew fat and flourished a dissipated sons, and the woe of broken-carried parents, and neither in commercial a my other sense did be give an equivalent in his fortune.—Trenton (N. J.) True

TEMPERANCE EWS AND NOTES. General Herbert has banished the "can-teen" from the militia department of Canada.

The National Temperance Hospital has reated twenty-four free patients during the ear lately closed. The revenue statistics show that less than ne-fourth as much liquor is used in Maine is is the average in our country.

The quantity of fermented liquor con-camed last year in this country equals near-y one-half barrel for each man, woman and hald of our population.

In forty-four States and Territories 18,000,

600 children now receive scientific instruction on the physical and mental effects of the use of alcoholic liquors. All hall to the W. C. F. J., for this consummation.

By a very moderate estimate it is shown that the cost of caring for the paupers, criminals and insune caused by the drink traffic amounts to an average of twelve do-lars a year for every family in the United

loyment altogether to less than half a mil-ion men; if this same amount of money vere expended in other lines of business if ould give employment to nearly two mil-on men at two deliars a day.

Hon, G. W. Ross, Minister of Education of Unitario, regards it essential that the cientilis aspect of the temperance question should be placed in the ferefront in it public schools, and a definite place given or the subject on the school time-table.

The Y. W. C. T. U., of Providence, B. I., ustains a ten room, which is largely pat-onized, has a library of seven hundred volines; a summer rest cottage for working this completed and well jurnished; and an ce water foundin ready for use on the great oridge next summer.

DR. WYETH SAYS THE RATTLER IS A NOBLE ANIMAL.

Popular Misinformation-Harmless Reptiles With Bad Reputations-

Degrees of Venom. much about snakes as Dr. John A. Wyeth there will not be such a general dread of them, particularly of rattle-

"The rattlesnake," said the Doctor to a Sun reporter who asked him to tons. tell something about snakes, and Th assured him, in answer to the Doctor's question, that it was snakes out of boots, not in them, he was after, "the rattlesnake is the king of reptiles. He is as brave as he is never attacks without provocation, and then never without a warning. I should never kill one unless I wanted it to dissect or unless,' and here it was the father, not the scientist, who spoke, "I found one near where my children happened to be playing.

The Doctor's opinion of the rattlesnake is based entirely upon his observations of its personal courage and fairness in battle; he does not seek to deprive it of any of its reputation as a particularly venomous serpent. Its trait of Charles I, composed of minute venom is the most poisonous of any letters. The head and ruff contain the American reptile, and is second only so far as is known, to the cobra. The order of "toxicity" in serpent venom —that is, the comparative deadli-

ness-is cobra, rattlesnake, American copperhead, moccasin, and spreading adder. The chemists have been experimenting with the venom of rattlesnakes until they are able to talk about it like an expert witness in a poison murder trial. Dr. Wyeth, in the second edition of his work on surgery, in considering the subject poison, quotes Dr. Weir Mitchell as saying that rattlesnake venom is from greenish to a strawtint in color, and there have been chemically isolated from it three proteidsvenom peptone, venom globuline and venom albumen. It is the globuline that is intensely poisonous, and its toxic properties are destroyed by bromine, iodine, sodium and potasvest pocket. Dr. Wyeth gives the equal weight of his authority in pronouncing whisky (or alcohol in some other form) as the best physiological antidote.

Dr. Wyeth is an Alabamian and lived in his native State for many

"There it was," he said to the Sun reporter, "that I learned to know and respect the many virtues of the rattlesnake. I also observed many physical traits of that and other snakes which disprove many popular beliefs concerning them. The belief seems quite general, for example, that the rattlesnake coils itself in preparing to spring. Now the facts happen to be that it neither coils before delivering the ground entirely, in its delivery.

When a rattler has made up its mind that it is time to strike it raises the forward half of its body, the pos terior half, or about that proportion.

and quite unpleasant odor. but I doubt the suicidal intent."

Dr. Wyeth is inclined to discount much of the belief in the dead-

liness of reptile poisoning. though I have made personal inquiry ous attributes of the god represented. of numorous physicians practicing in the South and West. Once in North Carolina I was out surveying, and in ing stump of a tree, and was bitten on convenience, whatever, resulted from

He had not, however, overlooked the effect which had been produced upon the susceptible jury. He rose slowly from his seat and took a pinch of snuff with great deliberation. He looked at the bench and then glanced sharply in the direc tion of the jury. Then he remarked with a strong nasal twang:

"Gentlemen of the jury, you might as well understand from the very beginning that I am not boring for

There was an instant's pause, and then the audience was convulsed with merriment. A single dry sentence from the shrewd old prosecutor sufficed to overwhelm with ridicule the eloquent pleadings of his ambitious opponent, who had no case, yet had nearly suc ceeded by his eloquence and pathos in securing the acquittal of the prisoner. Then, taking a second pinch of snuff, and paying no further attention to the argument for the defense, the prose cutor summed up the evidence in plain, business-like way, and compelled the jury, by sheer force of reason and common sense, to convict the mur-

To Toll Around the World, The travels of the Columbian Liberty Bell will be far more extensive than have hitherto been mentioned. Not only did it leave the Grand Central Palace in New York to go to Nashville, New Orleans, Mexico and the Mid-winter Fair at San Francisco, but J. D. Prince, under whose manage ment its extended tour will be made, announces that the bell will be taken to the continent of Europe for a stay of at least a year.

First it will go to England, to be rung on the historic meadow of Runnymede on June 15, 1894, in a celebration by the English-speaking world of the anniversary of the signing of the Magna Charta. After that it will be taken to France to participate in anniversaries connected with political freedom, and to Germany for the same purpose, its next destination being St. Petersburg, where it will be rung on the anniversary of the emancipation of the serfs.

Next it will go to Italy and thence to Constantinople, Jerusalem, Cairo and thence through Australia, India, China and Japan, back to the Pacific coast, making virtually a circuit of the world. G. S. Knapp, custodian for the Liberty Bell Committee of the Sons and Daughters of the American Revolution, accompanied by his wife and son, George M. Knapp, assistant custodian, will go along with the noteworthy relie of the Chicago Exposition. - Washington Star.

an abundance of nourishment for the child.

Mrs. Dona A. Gutteriz, of Onkley, Overton Co., Tenn., writes: "When I began taking your 'Favorite Prescription,' I was not able to stand on my feet without suffering almost death. Now I do all my housework, washing, cooking, sewings and everything for my family of eight. I am stouter now than I have been in six years. Your 'Favorite Freacription 'is the best to take before confinement, or at least it proved so with me. I never suffered as little with any of my children as I did with my last, and she is the healthlest we've sot. Have induced several to try 'Favorite Prescription,' and it has proved good for them."

WISS LOZENGES, for curing Cough Throat Houseness, Ashima Catarri, Broa R. Price, Sc. a lox. By mail. H. Edward let, S. E. Cor. 3d & George Sts., Philadelphia,

Creatures That Tumble Upward,

It is only reasonable to suppose siderable distance above the floor of the ocean, the gases of their swimming bladder become considerably exman, gruff in manner, and with a shrill, panded and their specific gravity very

teract the tendency to float upward and enable the fish to regain its proper sphere of life at the bottom; but beyond that limit the muscles are not strong enough to drive the body downward, and the fish, becoming more and more distended as it goes, is gradually killed on its long and involuntary journey to the surface of the sea. The deep-sea fish, then, are exposed to a danger that no other animals in this world are subject tonamely, that of tumbling upward. That such accidents do occasionally occur is evidenced by the fact that some fish, which are now known to be true deep-ses forms, were discovered dead and floating on the surface of the ocean long before our modern investigations were commenced .-- Popular science Monthly.
