

THE FOREST REPUBLICAN.

J. E. WENK, EDITOR & PROPRIETOR.

WEDNESDAY, MAY 23, 1894.

REPUBLICAN TICKET.

COUNTY. Congress, A. W. COOK. (Subject to action of Dist. Conference.) Assembly, J. E. WENK. Associate Judge, J. A. NASH. District Attorney, P. M. CLARK. Coroner, J. W. MORROW.

THE Democratic County Committee met last evening and set Saturday, June 9th as the day for holding their primaries.

JUDGE HARRY WHITE was nominated for President Judge of Indiana county, at the recent Republican primaries held in that county.

GOVERNOR MCKINLEY will stump West Virginia for the Republican ticket. West Virginia is just about ready to tumble over on the Republican side, and McKinley will give things a vigorous push.

MANY thanks to our brother editors outside the "destrick" for their kindly allusions to the nomination of the editor of the REPUBLICAN for Assembly. We might reproduce some of these friendly "testimonials" but modesty forbids.

AS THE situation appears to the Detroit Journal, congress should understand by this time that a series of connipion-fits, enacted into a law, will not be accepted by the intelligent people of this country as a proper substitute for the McKinley Tariff.

A 40 per cent. ad valorem Tariff upon the \$121,550,000 worth of raw sugar that we consume would amount to \$48,620,000, which is equivalent to a special tax of 7 1/2 cents upon every man, woman and child in the country upon a basis of a 68,000,000 population.—American Economist.

THE Senate is not only going to investigate the stories that Senators were offered bribes to vote against the Wilson bill, but it is also going to inquire into the campaign contributions to Cleveland by the Sugar Trust and the speculation in sugar certificates indulged in by certain Senators. Unless the meetings are held behind closed doors there will be some rich, juicy facts developed, if all reports be true.

SHEEP are being shipped out of this state at a rapid rate. A few years of free wool will strip Ohio of sheep, and the wool industry will be destroyed. Then the British colonies, for whose industry the Democrats are working, will control our wool market and then the price of wool will go up, but the Ohio farmer will not receive any benefit, for his sheep will all be gone and he will have no wool to sell.—The Marion, Ohio, Independent, May 1, 1894.

A MUGWUMP PAPER reports the President, that he is far away from the White House and from Congress, as not only in a happy frame of mind, but as facetious withal. Coming ashore at Hatteras Inlet the President is reported as turning to Mr. Gresham and saying, as he pointed at an object in the sound at some distance from the shore, "Mr. Secretary, what is the difference between that thing out there and Mrs. Shaw." When the Secretary "gave it up" Mr. Cleveland added, "Mrs. Shaw is a whistling girl and it is a whistling buoy." It must be conceded, however, that the Presidents conundrum is not as good a joke as Mr. Gresham's foreign policy.—Phila. Inquirer.

At the Republican convention Tuesday of last week a resolution was unanimously adopted permitting Mr. A. W. Cook to select his own conferees to the Convention of this district. We don't know that any time has yet been suggested for holding the conference, but when it takes place we trust there will be no hindrance to Mr. Cook's nomination in the district. We doubt whether a better selection could be made, and with him in the field there are the best of reasons for believing that the district can be carried at the fall election. Mr. Cook is one of the representative men of the country, just in the prime of life, well and favorably known to the business men in all parts of the district, and in every way fitted for the place. It is to be hoped that the selection will fall to Mr. Cook. The conference would make no mistake.

The tin plate fabricator who says that tin plate cannot be made in this country will perhaps be interested in the following statement from Ellwood City, in the western part of Pennsylvania: "Experiments have been made during the past few days at the Ellwood tin plate mill, the result of which will surprise the mechanical and industrial world. Superintendent Richards has been prosecuting this series of experiments with the assistance of several skilled workmen. They have succeeded in rolling out several large sheets of tin to the thickness of 200-1,000 of an inch. When it is considered that the difficulty of rolling gold plate to the 150-1,000 of an inch makes the process so very expensive the feat of rolling tin plate to the 50-1,000 of an inch thinner is manifestly a remarkable achievement. It is so wonderful that specimens of this plate, besides which the ariest tissue is like boiler plate, will be exhibited as a marvel of mechanical achievement in the leading cities of this country. The new improved rolls in the tin plate mill are the first to be used in this part of the country."

Bradford Brick Industry. The Clay Record, published at Chicago, says: The future great industry of Bradford is the manufacture of brick. Without doubt the alumina shales in the hills that surround the city are of the best brick material the world has ever known. All the desirable qualities are combined in the clay that is making Bradford brick such an enviable reputation all over the country. Few people of Bradford realize the value of the clay that is so abundant, and few realize the demand that exists for such a grade of brick. The alumina shale has a beautiful finish when made into brick. It fuses so nicely that the whole mass of the brick is run together outside and inside. The mass is solidly united, and as a result the resistance to crushing or breaking is wonderful. A higher wall can be built of Bradford brick without crushing the bottom courses than of any brick made. They take a handsomer face than any other ordinary brick, so that the two main qualities of strength and beauty are most prominent. As the whole country is entering an era of building beside which the building of days past is only play, the brick-maker is to be a prominent person henceforth. The man who has superior clay is the man who leads the procession. That is to say, there is a demand and always will be for good brick. There will always be a demand for the brick that Bradford is capable of making. As they get better know to the building world the firms that are in existence will find themselves taxed to supply their high grade trade. The business is in its infancy. Two or three years will see a great difference, and a few years at the most will make Bradford known to the world as a brick centre instead of as an oil centre as in the past. There is no other agency that promises so much to restore this valley to its old time activity as the discovery of the alumina shale, and its manufacture into brick. Same day Bradford will stand for brick just as Akron does for sewer pipe or Pittsburg for iron.

Coming from the source it does, this is a valuable endorsement. There is no questioning the superiority of the Bradford brick over anything now being made, but the Bradford people themselves admit that the Tionesta shale makes even a better brick than theirs.

MEMORIAL DAY PROGRAM. May 30, 1894. Capt. Geo. Stow Post, No. 274, G. A. R. The Post will meet on Memorial Day at Evangelical Church (Zuendels) at 10 a. m. memorial exercises as per Post Ritual. All soldiers whether members of posts, or not are invited to join in the exercises of the day. Citizens and Sabbath School children are respectfully invited to participate. Sabbath school children are appointed a committee to procure flowers and sing appropriate songs after memorial services. Proceed to Mt. Zion Church and there exorate. Thence to Tionesta.
