Farmer.

CARE OF HORSES' FRET. One of the mistakes often made by ever possible, so horseradish is genfarmers is that of keeping their horses shod that do work in the field during ever possible, so horseradan is gen-erally made a second crop, though planted at nearly the same time as the first crop. The crops usually selected as the first crop are early cabbages, cauliflowers or beets. As soon as the first crop is planted the horseradish is the trat selected above a portion of the year at least. Of course this sometimes becomes necessary, but in the great majority of cases it is not only uncalled for but it is actually a hindrance to the best sets are put out, as described above, midway betwen the other two rows, service the horse is capable of giving. Everybody knows that when a horse is once shod the necessity of keeping shoes upon his feet grows upon him. It is also recognized that a horse can so as to stand two or two and a half feet one way by sixteen or eighteen inches the other.

The sets are put in deep enough so the upper or slanting end will be about three inches below the surface do all sorts of farm work just as well without shoes on as with them, and a critical observer of horses soon disof the ground. This will give the first covers that farm horses are kept wearcrop time enough to grow and be gotten out of the way before the horseing shoes merely from a fancied and mistaken kindness toward them rather radish gets much above ground. than from any sound and logical rea-While cultivating the first crop no notice is taken of the horseradish unson. If people were in the habit of giving a little personal attention to their horses' feet upon frequent occaderneath. If a stray shoot comes up sions, instead of leaving it all to the

POTATO STEW,

Boil a square of pickled pork in two quarts of water; when done take out, score and brown in the oven. Add to the liquor ten sliced raw potatoes, two small onions sliced; boil half an hour; add a teacupful of milk and a beaten egg.-St. Louis Star-Savings.

SABDINE PRITTERS.

Drain from the fish as much of the oil in which they were preserved as you can; carefully remove the skinand backbone; if large divide in two, otherwise replace the halves after taking out the bone, sprinkle a little emon juice and cayenne over them, and dip into a light frying batter -allow a small descrispoonful for each fish; fry in boiling fat, drain on blotting paper, and serve at once with a garnish of parsley. -- New York Telegram.

FRUIT FIR SEASON,

A well-beaten egg, rubbed with a bit of cloth over the lower crust of pies, will prevent the juice from soaking through it.

The juice of fruit pies, if thickened with a level teaspoonful of cornstarch to a pie, will not boil over. The under crust should be a little

the thickest.

If it is a fruit pie, dust a little flour on the bottom before putting your fruit in, and in making pies of fresh fruits put your sugar in the bottom. — New York Journal.

GERMAN PEACH AND APPLE CANE.

The "apple" and the "peach cake' of our German bakeshops is made with a thin layer of reised bisenit dough, rolled out till it is not over half an inch thick. The cake is rabbed with butter, and sometimes, by the Germans, with lard to prevent a hard crust forming on top. It is put in a baking pan, and even slices of apples or peaches are laid on it in symmetrical rows, covering the entire top of the cake, and then the whole is dradged with sugar. The pan is covered with a tin or iron slide, and the cake is baked for from twenty-five to thirty minutes. By this means the apples are cooked through delicately without losing their form and without drying up, as they would if they were not covered up, and the raised biscuit dough underneath is throughly cooked through.

TEMPTINO MEAT PIES,

Miss Beecher, a graduate of the Philadelphia Cooking School, is the inventor of a new and tempting way of serving in little meat pies left-over beef and mutton. Chop the meat as for hash, and to every half pint add a half teaspoonful of onion juice, a tablespoonful of butter, a half tenspoonful of salt and a dash of red pepper, four teaspoonfuls of milk and two beaten eggs. Heat this mixture two beaten eggs. Heat this mixture over the fire, but do not cook it, and have ready about a pint of boiled rice Butter (one cupful before cooking). Butter individual earthen molds and line them with the rice, fill in with the meat mixture and cover the top with rice. Stand in a pan of boiling water and bake a quarter of an hour. Serve in the molds, placed on plates with a sprig of paraley on each, or turn on plates and serve with brown sauce. The pies make a nice dinner or luncheon dish.-New York Sun.

A Frog as Big as a Brick,

As C. C. Bettes, the druggist, was walking home Monday night he saw omething on the sidewalk which he took for a brick. Mr. Bettes is a cyclist, and he was thoughtful enough to endeavor to remove the obstruction, which might cause some wheelman to come to grief, so he stopped and attempted to shove the brick off the walk with his foot.

The "brick" moved. In fact, it moved about twenty feet straight to-ward the middle of the street. Mr.

could not remember taking more than a half dozen cococolas, and that beverage had never before caused him to see bricks leap off the sidewalk. He started after that brick, but just as he was almost over it and stooped down to examine it closely, sway it went again, landing on the opposite sidewalk. He then saw what it was,

A tremendous bullfrog, that could outjump the Nassau Railroad ring at the county convention when the ring-sters saw the regular Democrats were going to sit down on them.

Bettes was not going to let that frog get the best of him, and, after chasing several blocks, finally got it cornered, and now has it on exhibition in the show window of the Carieton pharmacy, -Jacksonville (Fla.) Times-Union.
