The Petrified Forests of Arizona.

In one of the meetings of the American Forestry Association held in Brooklyn latoly Dr. Horace C. Hovey, of Newburyport, Mass., showed by specimens and by views the petrified forests of Arizona. This great tract of agatized wood, at least 2000 acres extent, is near the station, of Corrizo and Adamannas on the Atlantic and Pacific Railroad, in Arizona, and resembles an immense logging camp with huge trunks thrown about. The largest are ton feet in diameter, many of them severed as evenly as though cut up by a cross-cut saw, and the sections vary from disks like cartwheels to logs thirty and more feet long. Many of the petrified logs have been broken into glittering fragments by action of the weather and by Indiana and tourists, and at every footfall the travelor steps upon a mosaie or carnelian, agate, jasper, topan, onyx and ame-thyst. A petrified trank 150 feet long spans a canon, and is known as the igate Bridge. The name Chalcedony Park has been given to the tract. Cariosity hunters, manufacturers and speculators are rapidly destroying its beauties, and recently a company proceeded to pulverize the chips and logs, the powder to be used in place of em-Car loads of the petrified wood erv. are being shipped away for this use, and Dr. Hovey advocates the saving and protection of these dead forests in a public reservation by the Government .- Scientific American.

Missouri has 528,295 families; Illinois, 778,015; Kansas, 297,358; Iowa, 388,517.

HOUSEHOLD MATTERS.

TOR CHEST MANAGEMENT. Food that has little odor itself, and

ood that absorbs odors readily should placed at the bottom of the refrigerator. All foods with a strong odor should be kept on the top shelves, Sour milk or cream should not be kept in the refrigerators. Salad dressings, tartar sauce and celery should be covered closely so they will flavor everything that is shut up with them. Pineapples, strawberries and raspberries, should not be shut into a common ice chest with milk or cream.

In the refrigerators where there is a circulation of dry air, butter, milk, cream and other delicate foods may be kept in the lower part of the refrigerator, and the fruits, vegetables, etc., with stronger flavors and odors, may

be kept on the top shelves. If ar-ranged in this way there will be little danger that one kind of food will absorb the flavor or odor of another .-New York Telegram.

HOW TO THIM & LAMP.

There is such a vast difference between the quality and quantity of light given by a kerosene lamp proporly trimmed and that given by the same lamp unskillfully trimmed that it is surprising any person of average observation will endure the light given by a badly trimmed lamp for even a single hour. But few people can trim a kerosene lamp properly, and not many people who read or sew

by kerosene lamp seem to mind it. Many implements for trimming lamps have been invented, but few of them are of any signal value. The best instrument for trimming a lamp wick is the human forefinger. It is much superior to a pair of seissors. Whether the wick be cylindrical or straight, turn it up until the part that is thoroughly charred is exposed, hold the wick firmly in place with the screw and rub off the charred portion. A little practice will enable one to make a perfectly straight, smooth edge to a wick this way, and a single wipe on a piece of paper or cloth will cleanse the finger.

Lastly, be careful not to let any of the charred refuse from the wick stick on the burner, where it will obstruct the draught of the lamp. Brush it off or blow it off, and keep the draught clear, -New York Mail and Express

THE ART IN GOOD SOUP.

In the art of cooking there are unfold details to be learned, and among them the most important in that great art-the making of soup. A noted traveler once remarked, "Oh, the bad soups I have eaten at people's houses !" The old-fashioned soup of fifty years ago was a thick glutinous mass which was a dinner in itself. When the soup was done the soup meat from which the soup was mode was served and considered an excelient dish. But nowadays the soup has become a separate institution, the commencement of the dinner after the half dozen oysters are served.

In this age the French soup is the delicate liquid that is usually given. It requires a genius of a home woman to accomplish this desirable end, for it is only one in a hundred of ordinary families, whose cooks are not up to the mark in all dishes, that really can make a good pot of soup. For the breakfast a la fourchette, the soup, if one is to be part of the menu, should be light and delicate, and for dinner the same should be served.

Meat for soup should always be lean. and that from the shank is excellent. It is muscular and full of nutriment. For every quart of soup allow one pound of meat without fat. It should be washed, then placed in a kettle with one quart and a pint of cold water and a teaspoonful of salt. After boiling slowly for five hours there will be only one quart of the liquid, the extra pint having been lost by evaporation .- New York Recorder.

TEMPERANCE.

THE BULN OF GOOD WORKNESS. A business man writes to the Temperanes Cause: "During the last forty-two years of my experience in sliops and manufactories, I will say that the improper use of infoxi-cating liquors has been the ruin of more floo mechanics and good workmen, and has given me more trouble in the mangement of busi-pess, than any other cause."

A PATHETIC APPEAL.

A pathetic appeal has been made to Mass achusetts by Prince Moraolu Massaquai, the future King of Vel, Liberia, to not send any future King of Vel, Liberia, to not send any more run to his country. Ho made the long journey for this purpose, and be it said to the disgrace of the United States, he returns feeling his object has failed, for the run-traters' power at Boston provel stronger than the philanthropists. — Pacific Eusign.

RILLS MAN'S BEST QUALITIES.

EILLS MAN'S HERT QUALTIES. The Churchman says: "The fount of love, pily and teadorness which springs in the heart of most buman beings, is, accord-ing to M. Lo Rour, utterly wanting in the generation of shifters who are springing up in the homes of drink and drunkcaness. He makes this remark as the result of long and careful induction, and after deep and patient study of the classes from among whom these abnormal creatures come."

ALCOHOL AND DIGESTION.

ALCOROL ASD DIGESTION. When one tolls you to put toads, light.b, snakes, etc., in bothes filled with alcohol so as to preserve the field from dissolving an I keep it frish for a term of years, another tells you to put alcohol in your stomash where a gool deal of flesh meat has gone, for the purpose of dissolving it and "alding digestion." The man who takes alcohol to help digest his food must first throw off the alcohol before his stomach can commende the operation. the operation.

A TOTAL ABSTAINER'S RECORD.

A TOTAL ABSTAINER'S RECORD. Ashby-ds-la-Zouch has a centensrian ab-stainer in the person of Mr. William Peplow, who has recently been, celebrating his 100th birthday. He has been a total abstainer for no less than forty-seven years. Since he signed the pledge he has always carried a pledge book in his pocket, and has obtained over 1000 pledges to total abstineed. He rave up smoking in 1814. He has had a family of thirteen children, and has now some great-great-grandchildren. CANNEL IN TWENTY YEARS.

Twenty years ago it was often true that a young man who drank beer or whe, or even whisky in mo leration might be advanced to places of greater trust and responsibility. It is now scarcely possible. The habit is simply fatal to success. I do not believe there is a single reputable business hence in Chicaso where an employe who deints in color, and I kept it up until it had assumed about every hue of the rain bow."-St. Louis Globe-Democrat. there is a single reputable basiness house in Chicago where an employe who defaults is-toxicants of any kind has anything like a chance for promotion. The taking of a single glass of becor may, and often does, mean losing the ohance of a lifetime. Brainy boys and young men, testotalers from principle, are pleanty enough to fill all the places in the line of promotion.—Interior,

AN AWFUL OURSE.

AN AWFUL CUBRE. At a recent meeting of the Charity Organi-mation Bodiety of New York, Colonel J. Mo-Cook said: "The hast year has been an ex-tremely hard one on the poor, but it is a great question, in my mind if it would have been so had it not been that many a poor man, many a man who had a family of starving little ones at home, went out when he got his small wages at the end of the week and speat half of them in drink. Workmen who cherwise would be honest, self-respecting men, have been driven to theft by this awful curse. Our simshouses are crowded with men and women, who, were it not for liquer would to-day be eara-ing an honest living, and at hight, lasteed of sitting down to a meal bought for them by the city, would be surrounded by happy families, and enjoying the fruits of their own labor." labor."

A MUTE WITNESS.

A MUTE WITNESS. A Lowiston man, who was a policeman in Portland, Me, when General Neal Dow was Mayor of the eity, in 1854, tells of a man whom he brought before Mayor Dow for abusing his wife while drunk. The Mayor ordered that the culprit be brought before him with his whisky bottle. He put the bot-tle on the table in the court room, and the prisoner fixed bis eyes on it and admitted that he had drank out of it. When the man was sent up to jail Mayor Dow took the bot-tle optime of fault requested the turnkey to place the fault arcquested the turnkey to place the fault sust of the when the bot-bottle broken or removed. Once, when the bottle broken or removed. Once, when the bottle broken or removed. Once, when the door was opened, he made a dash with his foot to break it, but did not succeed. When that man was released he hated the sight of a whisky bottle, and nover tasted a drop of liquor afterward. WHAT IS AREAD OF THE MODERATE DRINKES. The moderate drinker would do well to read the article on "inspring" by Dr. E. Armold in the North American Review. Hu does not hesitate to call the modorate drink-er a drunkard. He says that the immediate word of moderate amount of alcohol is a er a drunkard. He says that the immediate effect of a moderate amount of alcohol is a feeling of increased vigor. Ideas are in-creased in quickness, but loss in concentra-tion. The system soon domands the silmu-lants more frequently. Abstituence is fol-lowed by suffering. The hand loss its steadiness, the brain its clearness. Insom-ria adds to the drain on the nervous forces, and the patient instinctively resorts, for re-illef, to the poison which is the direct cause of his condition. In time these symptoms become intensified and evidences of chronic degeneration manifest themseives. Scarcely an organ in the body is exempt. It strikes at the root of the vital function , retarding the work of the stomach and the 'ver. The patient is liable to catarrh, and a candidate partiest is liable to estarth, and a candidate for Bright's discase, and finally spoplexy. Here is a faithful history of the moderate drinker put in the cold language of medi-cal science ; but it will be confirmed by every

The Chameleon Spider.

There are said to be only four sur-vivors of Napoleon's Grand Army, the oldest of them being Jean Sabatier, "It has always been a hobby of mine," said T. L. Grimshaw, of Raleigh, N. C., "to collect strange bugs and insects during my travels, and I think I have succeeded in get-

ting together a pretty choice collec-tion. Of the whole assortment I think the chameleon spider, which I got last three, has been a Justice of the Penco summer on the coast of Africa, is the continuously for the past fifty years. most valuable. The capture of this insect was highly interesting to me. One afternoon, while tramping along a dusty road, I noticed in the bushes which grew along the side what ap-peared to be a singula -looking white flower, with a blue centre. Stopping to examine it I found, to my astonish ment, that it was not a flower at all, but a spider's web, and that the supposed light blue heart of the flower was the spider itself, lying in wait for its prey. The mottled brown legs the spider were extended in such The mottled brown legs of way as to resemble the divisions be

tween the petals of a flower. "The web itself, very delicately woven into a rosette pattern, was white, and the threads that suspended it from the bushes were so fine as to be almost invisible. The whole thing had the appearance of being suspend ed in the air upon a stem concealed beneath. Upon knocking the spider from his perch into the white gauze net which I carried, my surprise was greatly increased by seeing my cap-tive instantly turn in color from blue to white. I shook the net, and again the spider changed color, this time its body becoming a dull greenish brown. As often as I would shake the net just so often would the spider change its

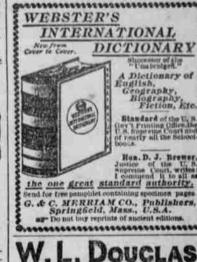

ing with esses to the fact that, in all its early stages, consump-tion is a curable disease. Not a large percentage of (ase, and we believe, fully of per cent. are cured by Dr. Pierce's Golden Medical Dis-covery, even after the disease has pro-pressed so far as to induce repeated bleed-ings from the lungs, severe lingering cough with copious expectoration (including the bercular matter), great loss of flesh and ex-treme emaciation and weaknes. Do you doubt that hundreds of such cases reported to us as cured by "Golden Med-ical Discovery "were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in mis-representing them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this strain mailedy, all other medicines with which they are acquainted. Nasty cod-liver oil and its fifth "emulsions" and mixtures, had been tried in nearly at these cases and had either utterly failed to bene-fa short time. Extract of mail, whiskey, and various preparations of the hypo-phosphites had also been faithfailly tried in vario.

ing results in their practice.

Scott's Emulsion of cod-liver oil with Hypophosphites can be administered when plain oil is out of the question. It is almost as palatable as milk-easier to digest than milk.

We Lee Dougras Schold Made, Heennes, we are the ingreat maintacturers of this gradeed shoes in the world, and guaranses their value by stampting the same and price on the bottom, which project you against high prices and the middleman's profile. Our shoer equal custom work in style, excy fitting and wearing qualities a short time. Ratract of malt, whiskey, and various preparations of the hypo-phosphites had also been faithfully tried in valu.

(Vegetable) What They Are For

Biliousness	indigestion	sallow skin
dyspepsia	bad taste in the mouth	pimples
sick headache	foul breath	torpid liver
bilious headache	less of appetite	depression of

when these conditions are caused by constipation ; and constipation is the most frequent cause of all of them.

One of the most important things for everybody to learn is that constipation causes more than half the sickness in the world; and it can all be prevented. Go by the book.

Write to B. F. Allen Company, 365 Canal street, New York, for the little book on CONSTIPATION (its causes con sequences and correction); sent free. If you are not within reach of a druggist, the pills will be sent by mail. 25 cents.
