TIONESTA, PA., WEDNESDAY, OCT. 31, 1894.

\$1.00 PER ANNUM.

The army worm has cost this country more than the Revolutionary War.

The great cannod goods center of industry of the world is Baltimore,

Ballington Booth says that the Salvation Army has grown in twentyeight years from two persons to over

The islet of Massowa, in the Red Sea, where Italy is sending its Anarchists, is one of the hottest places in the world, and escape from it in that sterile region would be very diffi-

The only school in the United States for the teaching of the art of letterwriting is said to be at Chantauqua, N. Y. The instructress, Miss Frances B. Calloway, has pupils ranging from the Texas cowboy to the aristocratic society woman, and in age from fourteen to seventy.

The British postoffice has recently introduced a new system of notation for its date stamps. The letters from A'to M are used to represent the hours and also of twelve intervals of five minutes sach; thus A A means 1.05, A B 1.10, and so on. A. m. and p. m. are expressed by A and P after an asterisk; thus M CoA means 12,15 a. m.

Edward Atkinson, the statistician, testified before the Royal British Commission on Agriculture that one client of his in this country had received one single order for 25,000 steam plows for the Argentine Republic. He said that there were enough good wheat lands on the Paraguay and Parana Rivers to feed the whole world.

The war between China and Japan, though not of vital interest to Americans, will yet be watched with keen interest by all our military leaders, remarks the New York Times. There has been no great war since the introduction of what we believe to be improvements in the mode of warfare, and it remains to be tested whether the greater advance has been made in wenpons of attack, such as guns, smokeless powder and torpedoes, or in means of defense, such as armor plates, new turrets, and possibly bullet-proof coats for soldiers, and this war may teach us many things,

It appears that England is the greatost railway-traveling country on earth. In 1880, the extent of lines in England being then about 18,033 miles; the number of passengers was nearly 604,000,000. In 1890, by which time the railway lines had increased by about 4375 miles, the number of travelers had grown to nearly 818,000,000. No other country in the world comes near these figures. Even the railroads in the United States, which measure the enormous length of 158,750 miles, carried in 1890, only rather more than 520,000,000 passengers. In Gormany, in 1880, 215,000,000 persons traveled on 20,756 miles of railway; in 1890 the number of passengers was over 426,-

Edward Bellamy shudders whenever he hears the name of 'Looking Backward." If you wish to make a friend of Francis Brot Harte don't mention "The Heathen Chinee." Will Carleton wonders how people can read "Over the Hills to the Poor House," which he considers one of the poorest poems he ever wrote. Mrs. F. Hodgson Burnett does not wish to hear "Little Lord Fauntleroy" praised in her immediate vicinity. Charles Heber Clarke has taken a very strong aversion to his once famous nom do plume of "Max Adler." But no one recognizes him as anyone else. "The Opening of a Chestant Burr," by E. P. Roe, was considered by him to be

Our pestiferous friend, the bicycle, continues to grow in favor, and it is being put to very practical uses, notes the Chicago Record. In the German army estimates for the present year the sum of \$25,000 is included for the supply of bicycles to the infantry. Two wheels are assigned to each battalion and an instruction has been issued dealing with the bicycle service. These machines are to be used for communications between columns on the march and for communications between advanced guards. When troops are in quarters bioyelists are to fulfill the functions of orderlies, especially where mounted orderlies are wanting; they will also relieve tho eavalry from relay and intelligence duties. In great fortresses all the duties hitherto devolving on cavalry as message-bearers are to be transferred to bicyclists. In the military service of our own country the bicycle has already begun to figure conapiouously with admirable results.

WHAT DOES IT MATTER,

It matters little where I gyas born, Or if my parents were rich or poor; Whether they shrank at the cold world's

Or walked in the pride of wealth secure. But whother I live an honest man. And holds my integrity firm in my clutch, I tell you, brother, plain as I am, It matters much!

It matters little how long I stay In a world of sorrow, sin, and care; Whether in youth I am called away, Or live till my bones and pate are bare. But whether I do the best I can To soften the weight of adversity's touch On the faded cheek of my fellow man,

It matters little where be my grave, Or on the land or on the sea, By purling brook or 'neath stormy wave; It matters little or naught to me. But whether the Angel of Death comes down And marks my brow with his loving touch, As one that shall wear the victor's crown, It matters much ! -From the Swedish,

DOCTOR BARTON'S PATIENT

BY HELEN FORREST GRAVES.

ND you don't even know her name!' said Mrs. Renwick. "My dear Kenneth, there never was any-The captain of

comfortable position on the sofa, and looked longingly at a box of cigars which was placed just beyond his Nylesburg.

"Of course I know her name," said he; "and a very pretty one it is. Perry-Miss Perry." "But who is it you are talking

about?" said pretty Joyce, who had been preparing a mustard-paste for her brother's chest. Captain Renwick answered prompt-

"My sweetheart!"

"Kenneth, don't be ridiculous!" said his mother, somewhat tartly. "The sweetest, prottiest blossom in all the Adrondack wildernesses!" pursued Kenneth. "The fairest of— Catnip tea! I declare, Joyce, I won't drink it! What do you take me for?" "It's the best thing in the world for a cold on the chest," said Mrs. Renwick, wringing her hands, "Oh,

if you had only kept away from that camping party. "I mistook her for the bostman's daughter the first time," said Captain

"She-" "Kenneth, don't talk-please don't the captain was master of the situation. talk!" urged his mother. "It's the If he choose to set the doctor and his worst thing you could possibly do, with your lungs all congested, and—" done? sounds in the earth for the express purpose of compelling man to find them out.

According to the Celestial idea, the "But I must talk !" said the captain.

"Consider, mother, Joyce hasn't was a slight rustle down stairs.
heard a word about it. She only came "The doctor has come!" cried heard a word about it. She only came 'The doctor has come!" cried Joyce, last night. Fancy, Joyce, my being excitedly, "with such a pretty little skins of animals, in certain earths and fool enough to mistake her for a boat-

man's daughter !" as nice and ladylike as any one?" said glimpse of him. Joyce, readjusting her apron ribbons. "Oh, but this boatman lives in a perpetual state of shirt-sleeves!" said his business."

Renwick; "and he is a living fountain of tobacco juice, and talks abominable in her head at this juncture. grammar through his nose. And his wife is a low class of Meg Merrilies, who takes too much bad whisky whenever she has the opportunity. How noth I ever made such a blunder I can't left, imagine. But Jenkins sent me up to the water-lilies, I jumped at once to the conclusion that this was the boat flat morocco case in her hand.

"And she?" said Joyce. "Rowed me up, of course. I wish this is Miss Perry." you could have seen the way in which she handled the oars. But it was posedly around her. Dolph, the tobacco-soaked old boatwho called for me at sunset. 'Why didn't you send your daughjer?' says L 'It warn't my darter, says he; 'it was Miss Perry.' then I met her at the picnic. We waltzed together half the evening. She is as beautiful as she is graceful. and as intelligent as she is beautiful.

"Did you apologize?" asked Joyce. "Of course I apologized," said Cap-tain Kenneth. "And we had a good In water colors. I am to have one pulse and temperature. when they are finished. Joyce, you and sings like Patti, and-"

"Nonsonse!" said Joyce. "A farmer's daughter, seen through the big end of the opera glass! You were al-'My dear Joyce, I assure you-

"Children, children!" remonstra ted Mrs. Renwick, piteously, "do have a little common sense. Kenneth, you know you ought not to talk. Joyce, don't you hear how hoarse your brother is?" If pneumonia should set | ate! in after this exposure-"

Captain Renwick made an expressive grimace. Joyce looked a litle and made some abstruse hieroglyphics

"Mamma," said she, "you always were a pessimist. It's only a cold that ails Kennth."

But it is settling on his lungs, my world. dear," said Mrs. Renwick, plaintively. "And out here in the wilderness there isn't even a drug store short of fifteen miles. Oh, dear! oh, dear! why did I ever allow myself to be persuaded to headway." come to the Adirondacks?"

"The scenery, mamma!" said Joyce, oothingly.
\*But one can't eat and drink tain that I shall get well. soothingly. scenery. And this woman knows

and French coffee, and she never broiled a beefsteak in her life until I showed her how. As for her soups, they are simply uneatable. And the beds are as hard as the neither millstone, and the mosquitees are unen-

"All those are trivial annoyances," mid Captain Renwick, skillfully contriving to tip over the catnip-tea on the current number of a popular magazine, in his reach after the cigar box. "To me, the Adirondacks are the gar-den of the world! I shall never be willing to go anywhere else in the summer. And she says it is even finer here in winter, with the triffing exception of a little solitude."
"Kenneth," cried his mother, in

But Captain Renwick's eyes were breathing was alternately hurried and gaged man, laborious.

It was undoubtedly the fact that he says, "Doctor Barton will be phy-had taken a severe cold during the camping out expedition from which Saturday Night."— It was undoubtedly the fact that he he had just returned, and that this cold had been proof, so far, at least, against all the remedies Mrs. Renwick had used.

"Oh, dear! oh, dear!" sighed the mother. "Why don't the doctor come? Joyce, look out of the windew! See if there are any signs of "The doctor?" ejaculated Captain

Renwick, raising himself on one elbow artillery shifted among his pillows. "You don't say his feet to a more you have sent for a doctor?" "Why, of course I have!" said Mrs. Renwick-"for Doctor Barton, from

"A snuff-taking old flend, who will doese me with calomel, and experiment on me with every one of the hundred-year-old drugs in his saddlebags!" cried the captain. "I won't

"Bear Kenneth!" pleated Joyce.
"My son!" sobbed Mrs. Renwick. ejaculated Kenneth. "I'll be hanged if I do! I despise doctors, anyway! And what sort of a medical man do you imagine would perch him-self up here on the boughs of these everlasting pines?"

"Kenneth, you must see him!" said Mrs. Renwick "Mother, I won't," stoutly declared the robel.

"But what will he think?" "What he pleases. It will matter little to you or me what he thinks," said Kennoth. "All I know is, that

he shan't cross this threshold. Give him his fee and tell him to be gone!" Mrs. Renwick and Joyce looked despairingly at each other. Undoubtedly

All that moment, however, there horse and phaeton. Oh, Ken. I'm sure in the air itself. "Why, aren't boatmen's daughters Oh, I'm so sorry I didn't catch a

"And after the first of November,"

A Much Traveled Cat.

"I have got a pet kitten at home," said W. L. Slocum, of Manchester, N. H., last night, "which, I think, has traveled about as rapidly and as far in one day as any other animal in the world. One morning, about a month ago, the kitten strayed into my factory a short time before the machinery was started up. It got playing around the floor, and soon took up its position in the big fly wheel, where, without being noticed, it nestled down and went to sleep. Soon the machin-ery was put in motion, the wheel moving so rapidly that the poor kitten could not escape. Indeed, it is probable that puss was soon unconscious from dizziness. A little computation shows the distance the cat traveled. The wheel moves at the rate of 250 revolutions a minute, and at every turn pussy went seventeen feet. As the wheel was kept in motion 890 minutes without stopping, the kitten must have travelled during that time a little over 300 miles. When the wheel was stopped the kitten was discovered and taken out, more dead than alive, but it shortly recovered, and, although it has remained about factory ever since, it is observed that it always gives the fly wheel a wide berth."-St. Louis Globe-Democrat.

### Chinese and Music,

The Chinese have some extraordinary superstitions relating to music. According to their queer notions, the Creator of the universe hid eight sounds in the earth for the express

eight primitive sounds are hidden in stones, silks, woods of various kinds, the bambeo plant, pumpkins, in the he isn't old, and he don't take snuff. ever had the pleasure of seeing and listening to a Chinese orchestra will remember that the musical instruments were made of all these materials efforts of the other seven seemed better calculated to drive the ethereal sound away than to coax it from the air, which is really the object of all Chinese musical efforts.

"Tell him—" hoarsely shouted Kenneth, flinging the pillows right and left.

But I for a state of the people, both old and young, hears in the thuds of the gongs and the whistling of the pipes the tones of the eternal sounds of ture that were originally deposited in the various animate and inanimate obects by the all-wise Father. - Phila-

## Rescue of a Sand Hill Crane,

"The devotion of birds to their young is one of the most beautiful sights of nature," said William P. Buxton, of Dubuque, last evening. "I saw a striking illustration of this characteristic while on a hunting expedition up in Minnesota last fall, day I shot and wounded a young sand hill crane, which with several others, was resting on the prairie. At the report of my gun all the birds took flight with the exception of the wounded one and one other, which was almost certainly its parent. The injured bird made several attempts to fly, and finally seconded in rising some ten or fifteen feet in the air, but as it could not sustain itself it fell again to the ground. laugh over it. She had been after the goodness to remain quite still for It tried again, however, and the parent water-lilies, she said. She paints em a few moments while I ascertain the bird, seeing the trouble the young one was in, placed herself underneath it. allowing it to rest its feet on her back, both birds continuing all the while to flap their wings. In this way, much bearing it off to a place of safety."-St. Louis Globe-Democrat.

INSTRUCTIVE BULLETINS BY THE AGRICULTURAL DEPARTMENT.

Great Waste in Buying and Cooking Food-The Nutrition in Various Kinds of Food-Man's Need.

OW will the coming man be

fed? The Department of Agricalture has become interested in this question newly, and before long will publish a series of bulleting on the subject. They will be prepared by such well-known experts in this branch of research as Professor W. O. Water and Dr. Edward Atkinson. The former gentleman has been engaged to conduct certain investigations and experiments of an original and highly scientific character. At the bottom of the whole inquiry lies the fact that the people of this country do not know how to choose the foods they eat or how to cook them afterwards. This burden of ignorance falls most heavily upon the wage-workers, who, taking an average among them, us one-half of their money to buy food with, this estimate not including the cost of cooking. The poor man wastes in purchasing provender; his wife

wastes in preparing it for the table. Most educated people have queer notions about foods. It is generally imagined that an egg contains as much nutriment as a pound of lean beefsteak. As a matter of fact it has forty per cent. less of nutriment, pound for pound. Beef sirloin is only seventyfive per cent, as nutritious as beaus and peas. Chicken and turkey are ahead of peas and beans in this respect, being the most nutritious food known. Shad and mackeral are as sirloin steak. Lean beef is nearly three-fourths water.

Dealers say that the demand for fish is actually increased to a considerable extent by the popular belief that it is good brain food. The reason for this is supposed to be that fish contains a great deal of phosphorus, an element that is more abundant in the brain and nerves than in other parts of the human body. But the fact is that there is no special abundance of phos-phorus in fish. If there were, it would be of no importance. The widely circulated phrase, "Without phosphorous there is no thought," was originated by a German half in jest.

On one occasion the elder Agassiz delivered a lecture on the importance of fish culture-it was in Boston-and remarked in a joking way that fish was an excellent brain food. From this saying and from the oft-quoted phrase of the German scientist above referred to has been derived the acrepted idea on this subject. In truth, there is no cause whatever for believing that the eating of fish promises rerebral activity. But, speaking of the relative value of foods, it is interesting to know that a pound of lean beef and a quart of milk as it comes from the cow contains about the same amount of nutritive material. Howvaluable for ordinary use. Professor Atwater has invented a new contrivance for measuring the energy produced by various foods. The food selected for trial -- a definite quantity of it-is burned in a vessel surrounded by water. A thermometer of extraordinary delicacy registers the rise in the temperature of the water, the quantity of which is known. Then an equal amount of the same food is burned in the human body, Of course, all food digested undergoes a process

of chemical combustion. It is a self-evident proposition that the cheapest food to buy is that which contains the greatest amount of nutriment for a given price. With a small equipment of knowledge on this subject the poor man could select his articles of diet in the market with a vastly greater economy. In other words, he could live much better for less money. He ought to be taught to select such foods as wheat flour, corn meal, beans, milk and the cheaper outs of meats. To start with, it is not easy for him to realize that highpriced foods are in general uneco The maxim that the best is nomical.

cheapest does not apply to foods. Dumb Animals. The average man, leading a moderately active life, requires fifty-nine ounces of food per diem. He consumes thirty-seven ounces of water and absorbs in breathing thirty onuces of oxygen from the air. His total bodily income, therefore, is about eight pounds daily. What he needs for his support each day is four and onefifth ounces of flesh-forming albumen, two ounces of fat-enough to make a fair-sized candle—seventeen and a half ounces of sugar and starch, four-fifths of an ounce of mineral matters-such as common salt, potassium, etc.-two quarts of water and 159 gallons of oxygen. So much water is contained in solid foods that we may be said to oat as much water as we drink. In order to supply the substances above mentioned, a man should cat daily twenty onnees of bread, eight onnees of beefsteak, thirty ounces of potatoes and one ounce of butter, with one quart of water-or the equivalent. human being is composed mostly of water. The body of a man weighing 154 pounds contains ninety-six pounds or forty-six quarts of water. To complete his makeup must be added thirteen pounds of albumen, ten pounds of gelatine, twenty-three pon fat, eight and a half pounds of phosphate of lime, one pound of cabonate of lime, three ounces of sugar and starch, seven ounces of fluoride calcium, six ounces of phosphate of magnesia, a trifle of chloride of po-tassium and a little ordinary table salt. - Washington Star.

The Odd Fellows of Mississippi have decided to build a home for the help less ones of that Order.

A scheme has been proposed to reduce the friction of salt water against the sides of a steamer, which, it is claimed, will increase the speed fifty per cent. It is to force air through the vessel's plates and thereby form a narrow space between the iron and

Dr. J. A. Gilbert, of the Yale psychylogical laboratory, who some time ago completed a series of tests regarding the mental and physical develop-ments of the pupils of the New Haven (Conn.) public schools, discovered that boys are more sensitive to weight discrimination than are girls, and that girls can tell the difference in color shades better than boys.

# Water Your Horses Often.

a horse principally grain and driving it five hours with out water is like giving a man salt mackeral for dinner and not allowing him to drink before supper timevery unsatifactory for the man. If you know anything about the care of horses and have any sympathy for them, water them as often as they want to drink-once an hour if possi ble. By doing this you will not only be merciful to your animals, but you will be a benefactor to yourself, as they will do more work, look better, and live longer. If you are a skeptic and know more about horses than any one else, you are positive that the fore going is wrong, because you have had horses die with watering them too much, and boldly say that the agitators of frequent watering are fools in your estimation, and you would not do such a thing. Just reason for a moment and figure out whether the animal would have overdrunk and overchilled his stomach if it had not been allowed to become overthirsty. A driver who sits in his wagon and lashes his worn-out, half-carried, halffood, and half-watered team deserves to be punished as a criminal. -Our

## A Goose Plantin Fall Bloom,

The "goose" plant in Washington Park Conservatory is now at its best,

says the Chicago Inter-Ocean. One of the biggest geese is over a yard long, and broad in proportion. The plant is one of the most unique, rare and valuable known to scientists, The correct name is aristolochia giga-Sturtevantii, and it was at the World's Fair. When there it bore only one or two flowers, owing to its being too young to bear more. It is a native of South America, and even there is considered a marvelous production. In one of the green houses next to the "goose" house at Washington Park is a collection of caladiums of the most varied shapes and colors. Mr. Kanst. the head gardener, says the collection has no duplicate. Many of the plants have leaves as delicately traced as tho finest Valenciennes laces. A newspaper may be read if covered with one of these transparent leaves. The col-ors are all shades of red, pink, maroon, crimson and yellow.

## Some Remarkable Cases.

Here are some remarkable cases: The other day a wagon maker, who had been dumb for years, picked up a hub and spoke; and a blind carpenter reached out for h's plane and saw; and a deaf sheep ranchman went out with his dog and herd; and a nose less fisherman caught a barrel of herring and smelt; and a forty-ton elephant inserted his trunk into a grate and flue. - Victoria (British Columbia) Home Journal.

"How did Officer Dulan get the

silver medal he wears?" "What did he do?" bravery." Walked by three fruit stands without taking anything."-Chicago Inter-"What does Dr. Slimpurse say produced this case of appendicitis?" "Lack of work." "What! Why, the

man never has an idle day. no; but Slimpurse has,"-Chicago Inter-Ocean. Mrs. Nucook-"Isn't it funny, dear, we are never troubled with tramps? Why is it, I wonder?" Mr. Nucook-Probably because you always give

them something to eat, darling. Chicago Inter-Ocean. "Carry any life insurance?" "Yes, \$10,000 in favor of my wife." "Should think you'd be ashamed to look her in "Wha-what for?" "For the face. living. What excuse do you give her?'

-Indianapolis Sentinel. Dick-"Cholly's down with nervous prostration. He read a cablegram in the paper that it was raining in London and couldn't turn up his trousers. Harry-"Why not?" Dick-"He had on knee breeches."-New York Herald.

How odd it is that it seems never to have occurred to the street-car people that by taking all the seats out of their cars they could get a great deal more room than they have now for folks to stand up. - Somerville Jour-

Cumso-"Say, old man, why don't you try electricity for your baldness?" Caraway-"Electricity? What good could that possibly do me? Does it nake the hair grow?" Cumso-"Best thing you could use—sure to give you a shock."—Harvard Lampoon.

"My dear," he said to his wife upon returning home after the vigilance committee were through with him, I have remembered at last to get the tar to paint the roof with; and I have brought you home some feathers to fill those cushions that you have been making."-Truth.

## King of Crabs.

A noft shell crab weighing twentyfour ounces and measuring twenty-one and a half inches from tip to tip of the extended claws, was received in Baltimore a few days ago from Deal's Island, Md. New York
