The Rurden Bearer.
There is a big insulated wire in telegraphy which transmits the bulk of daily intelligence; there is a big insulated nerve in the human system which can bear the bur the human system which can bear the bur den of more pain than all the rest of the merves combined, and is known as the salatic nerve. Sometimes the wire is out to cut of its current; sometimes the surgeon's knife is used to cut the nerve to relieve exeruciating pain. But there is one thing which avoids this radical treatment; one cure which penetrates to the pain-spot, and setation has been cured almost without fail by the use of St. Jacoba Oft. It reaches misery's seat and dethrones it. Thus attacked and routed in its hidden ambuscade, pain seldom returns to aunoy. The great remedy does its work well.

TRANSPLANTING TURNIPS.

Rutabaga turnips are excellent to follow a crop of early peas, says the Massachusetts Ploughman. We have had the best success by transplanting a cultivator is run over the piece to with a moderate application of phosphate in the drill. The young plants on the soil about each plant after quick growth to a good size.

WHY BIG PORK IS BEST. Roast pig is generally from young animals that have barely passed the suckling age. It has a sweetness and tenderness that the animal never can furnish when killed at any later period of its life. But an immense deal depends on the way the hog is fed. Contrary to the general impression, the pig's digestion is not naturally strong. It is almost always, while being fattened, fed with too concentrated nutrition. This creates fever, and digestion becomes weaker, rather stronger. The meat from an animal that has been thus stunted in growth is always inferior to that of one that has had a thrifty growth from the first. We have known pork from well-fed, thrifty old hogs to be more tender and of better flavor than that from young pigs that have been stunted in their growth. The great practical point is to keep pigs always thriftily growing until their fattening two minutes and the feathers and down is completed. We can thus have sweet, well-flavored pork, and yet have it thick enough to not fry away for shipping be sure the meat is dry cooks away too much. There is reason in this objection. But there is no reason why, if properly fed, a hog 250 to 300 pounds may not be as sweet and well-flavored as one that is smaller. Its fat may not be quite so solid, for this solidity is sometimes due to the fever from over feeding, which makes the meat unhealthful. -Boston Cultivator.

WHEAT AS A PREDING GRAIN.

The reason why wheat has not here-tofore been the leading feeding grain has been its high market value and the cheapness of corn and oats. But now that it is the cheapest of all grains, inquiries are making into its value both as to its price and the nutriment and digestibility. It is true that all these three points are to be taken into account in estimating the feeding value of any food. Good feeding must necessarily be that which is conductive to health, for there can be no thrift give the word. otherwise. Hitherto no experiments have been made in feeding wheat except to a small extent with damaged grain. Lately, however, attention has green fodder. been turned to this matter, and as might be expected from our scientific the stable is very injurious to the knowledge of wheat, it has been eyes and lungs of the horses. shown, without exception, that it is now the cheapest grain food on the whole list.

In feeding poultry, it is especially profitable, and the experience of careshow that a barrel of wheat, worth about \$2.30, will make a barrel of leaf mold or rotted leaves. The leaves not less than \$9. This ought to be very satisfactory, seeing that corn is not a healthful food when given to fowls altogether and without a large addition of other foods. The result of feeding wheat to pigs has been precisely similar, and with respect to both profit and health. There have been many instances that have proved this grain to be excellent for cows, for the before attempting something else. bran and middlings have always been one of the most favored grain foods in plants is made of four materialsthe dairy. It has been found excellent for sheep, and, as highly-nitrogenous food is reasonably proper for a wool bearers, considering the large quantity of nitrogen in the fleece, this result should reasonably follow. For borses its equal value may be considered as doubtful, except as an addition to cut fodder when the grain is coarsely chopped. But as barley differs but little from wheat, practically, as a food grain, and as barley is well known to be one of the best foods for this animal, it may be taken as almost good treatment they will last for certain that, when fed judiciously, years, wheat will be at least better than corn. The writer of this note has been feed- feel is very much larger than is gen

CAKES FOR THE CHILDREN.

Plain Cup Cake-For two sheets of cake use one cupful of sugar, half a cupful of butter, one cupful of milk, two cupfuls and three-quarters of sifted flour, the rind and juice of one lemon, three eggs, one teaspoonful of soda and two of cream of tartar. Mix the flour, soda and cream of tartar and sift the mixture. Beat the butter to a cream. Gradually best in the sugar. Beat the eggs till light and beat them into the butter and sugar. Now add the milk, and lastly the flour. Beat vigorously for half a minute. Spread the mixture in two buttered shallow pans. Sprinkle with powdered sugar and cook for twenty-five minutes in a moderate oven,

Raisin Cake-Take two and one-half cups of sugar, one-half cup of butter, one-half cup of sour milk, two spoon fuls of cream, one cup of chopped raisins, one teaspoonful of soda, onehalf teaspoonful of cinnamon and a bit of nutmeg. Flour enough to knead. Roll out an inch thick. Cut into oblong pieces. Bake quickly.

Soft Gingerbread-Stir two teaspoonfuls of soda and one of ginger into one cup of molasses. Add onethird of a cup of butter and one cup of warm water in which one teaspoonful of cream of tartar has been dissolved. Add three small cups of flour, mix together and bake.

Plain Spice Cake-Take one egg, two-thirds of a cupful of sugar, same quantity of molasses and of but-ter, a cupful of milk, two cupfuls and a half of flour measured generously, one teaspoonful of sods, one level teaspoonful of cream of tartar, one teaspoonful of vinegar or lemon juice, and one tablespoonful of mixed spice. Beat the egg well, and after adding to it the molasses, sugar, spice and but-ter—the latter being first melted beat again. Mix the soda with the milk and add to the other mixture the cream of tartar with the flour, and stir into the butter, and finally add the vinegar or lemon juice. Pour into two shallow paus and bake for twenty minutes in a moderate oven.

Cookies-Two cups of sugar and one cup of butter beaten together, two eggs, yolks and whites beaten separately; one-half cup of sweet milk, one-half teaspoonful of soda, nutmeg. Flour to roll.—New York World.

A Selt-Taught Florist,

James Warburton, the "Sage of Cressbrook Cottage," is a self-taught florist, and grows better and rarer roses than anybody in the Old Bay State. His rosebouses are perfect, and his greenhouses are planted in a garden which is a paradise of cultured growth. And yet, until he was fifty years old, "Jimmie" worked in a factory as a common spinner. - Chicago TEMPERANCE.

WHAT TOTAL ABSTINENCE DOES. Total abstinence kindles the home fire, fills t'e larier, replenshus the wardrobe, peoples the school houses, crowds the churches, empites the prisons, discharges the police, throngs the markets, employs labor, prospers everybody on earth, and blesses everybody in heaven.

AND WOMEN TOO

Dectar Breanan, one of the leading physical Mana of Montreal, read a paper a few days ago before the American Health Association and stated that from his medical experience he was in a position to say that in women the habit of tippling is far more prevalent and disestrous than is imagined. Within the last four months he had seen four women, each the mother of several children and moving in good society, die from the effects of chronic alcoholism. The drink habit takes held of a woman sconer, graps her more firmly, and lets go more rarely than it does in the case of a man, for she is of a more nervous organization, more easily affected by stimulants, has more chances of concealment and has fewer atta to recovery when once enslaved. The best plan for all women is to avoid intoxicating drinks.

BOY DRUNKARDS.

John Fiynn, aged six, of Amity street, Brooklyn, was arraigned in the Myrtle Avenue Court, Brooklyn, for being drunk. He and some other children stole half a doren bottles of whisky and drank it. The child was accompanied by Michael MacNamara, fourteen years old, of Congress sirest. When they were placed in front of the desk in the clerk's room, Flynn said:

"Say, Mickey, don't say nut'n,' will ?"?"

Then he told the wholestory. MacNamara was sont to the Trunat Home, and Flynn was taken in charge by his father. Ten-year-old Jimmie Brown, eleven-year-old Michael O'Connolly, and seven-year-old Thomas Abearn have not yet recovered from the effects of imbibling the stimulants.—New York Witness.

ONLY POR DEVIL'S POOD,

An address was delivered recently in Washington, before the Temperance Scolety of the Auffir Presbyterian Church, by Dr. A. W. W. Godding, Superintendent of the Goyernment Hospital for the Insune. He many Ostrong plea for the establishment is this city of on linebrinte asylun, and spoke of the efforts he had made to induce Congress to take some action. He said that one of the burning questions of the day was the proper treatment of the inebriate. He referred to the mistake made by so many young men in supposing that alcohol is a food. When the evil that alcohol has wrought in the world is considered, said the lecturer, the conclusion is that if it is a nutriment then it is fit only for devil's food. Referring to drunkenness as a disease, he said that if is a disease of which sin may have laid the foundation, but the pathological changes in the brain, the lecturer said, lies outside of the plane of moral accountability, and are in the nature of the wages of sin, rather than the sin itself. of the wages of sin, rather than the sin itself

FOUR QUALITIES OF DRUNKENNESS. When Adam first planted the vine Satan rame and killed a peaceek over it, and the sine drank its blood. When the vine grew and put forth its leaves Satan came again

and put forth its leaves Satan came again and killed an ape over it, and the vine drank the blood of the apeniso. When grapes first formed on the vine he killed a lion over it, and the vine drank up the blood of the lion. Went the fruit was tally ripe Satan came once more and killed a pig over it, and the vine drank up that blood also.

Hence, he who drinks of the fruit of the vine imbibes these four qualities. When he first tastes the wine, and it begins to crawl in his limbs, the color blooms in his lace, and he becomes gay as a peacock. When the first signs of drunkenness come upon him he plays, claps hands, and dances like an ape. When the wine grows stronger within him he grows violent like the lion, and challenges every one else. At last he wallows like a pig in the mire, desiring only to sleep, and his strength is gone.—Translated from the Arabic. the Arabic.

TEMPERANCE BEFORM IN BUSSIA.

A Temperance Reformer writes: "Tectotaliers in this country are continually devising methods for the suppression of drunkenness among all classes of society, which turn out one after the other signal failures. Could not they induce Sir Edwin Bradford, our Commissioner of Police for the Metropolis, to adopt the new tactics which General Wahl, the Governor of St. Petersburg, has devised to shame the tipplers of the Bussian capital into sobriety?

capital into aobristy?

"There is a good deal of drunkenness goes on among high and low, who consume enormous quantities of richly-sugared champagne, cognae, vodka or kvass, and afterward experience much difficulty in finding

ward experience much difficulty in finding their way home. In order to encourage the spread of temperance General Wahl has issued a peremtory notice that the names and address of all people found in the streats in a disorderly or intoxicated condition shall be printed on large posters and publicly displayed at certain points of the city and also printed in the official journal.

"This rule is to be without exception. No prayers, no entreaties by the guilty—even though from a fair lady whose temporary aberration of jurigment has been punished with terrible headaches—can obtain mitigation of sentence. The General is inexorable. The name must go on the board. Already much perturbation has been caused by this singular drink-cure, especially as the names much perturbation has been caused by this singular drink-cure, especially as the names of many ladies and goutlemen whom one would not expect to find in such a position have aiready been 'posted.' The ordinary moujik, of course, does not care a pin about the new punishment, but other classes 's society think differently, and are already either joining temperance societies or privately abjuring vodka.—London Telegraph.

How to Walk.

The chief muscles concerned in walking are those in the calf and back of the leg, which, by pulling up the heel, also pull up the bones of the miration rather than the love of his oot connected with it, and then the followers. whole body, the weight of which is passed on through the bones of the leg. When walking, the trunk is thrown duction of twenty-five per cent to forward so that it would fall down members of the Cyclists' Touring prostrate were not the right foot Club, which now number 20,000 mem planted in time to support it. The bers, calf muscles are helped in this action by those on the front of the trunk and legs, which contract and pull the body forward, and, the trunk slanting forward when the heel is raised by the calf muscles, the whole body will be raised and pushed forward and up ward. This advancement of each leg is effected partly by muscular action, the muscles used being (1) those on the front of the thigh, bending it forward on the pelvis; (2) the hamstring muscles, which slightly bend the leg on the thigh; (3) the muscles on the front af the leg, which raise the front of the foot and toes, preventing the latter, in swinging forward, from hitching in the ground. When one foot has reached the ground the ne tion of the other has not ceased There is another point in walking. The body is constantly supported and balanced on each log alternately, and, therefore, on only one at once. Hence there must be some means for throwing the centre of gravity over the line of support formed by the bones of each leg, as it supports the weight of the body. This is done in various the body. This is done in various ways, and hence the difference in the walk of different people.—New York Telegram.

A Ticking Tombstone.

There is a tradition that a tombstone in the graveyard of an old and uncompromising little stone church in Louden, Penn., gives forth a ticking sound, and it has long been locally famous as the ticking tombstone. The noise is not loud enough for the stone to be located by a stranger, and if the ticking is really ever heard, it comes doubtless from the trickling of water through the limestone formation not unusual in the region. The old church dates back to about the middle of the last century, and is surrounded by gravestones, some of them considerably older. - Detroit Free Press.

of all cases of consumption can, if taken in of all cases of consumption can, if taken in the earlier stages of the disease, be cured. This may seem like a bold assertion to those familiar only with the means generally in use for its treatment; as, nasty codliver oil and its fithy emulsions, extract of malt, whiskey, different preparations of hypophosphites and such like palliatives. Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every case, but a large percentage of cases, and we believe, fully of per cent. are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaclation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by "Golden Medical Discovery" were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best

ical Discovery "were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often atrongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty codliver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly falled to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain. The photographs of a large number of those cured of consumption, bronchitis, lingering coughs, asthma, chronic masal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be malled to you, on receipt of address for Book, World's Dispensary Marinear Association. Buffillo N. V.

Hecause, we are the largest manufacturers us his grade of those in the world, and guarantee their sine by stamping the name and price on the ottom, which protect you against high prices and he middleman's profits. Our shoes equal custom rock in style, easy fitting and wearing qualities. Ve have them sold everywhere at lower prices for evaile giving than any other make. Take no sub-limite. If your dealer tempot supply you, we can.

Success

in washing and

cleaning is Pearl. ine. By doing away with the rubbing, it opens the way to easy work; with Pearline, a weekly wash can be done by a

weakly woman. It shuts out possible harm and danger; all things washed with Pearline last longer than if washed with soap. Everything is done better with it. These form but a small

-Why women use millions upon millions part of the of packages of Pearline every year. Let Pearline do its best and there is no fear of "dirt doing its worst." on the peddlers and grocers who tell you "this is as good as," or the Key "the same as" Pearline. IT'S FALSE; besides, Pearline is never peddled.

"Thoughtiess Folks Have the Hardest Work, But Quick Witted People Use
