Amenities of War,

Archibald Forbes says that the abstract theory of the "amenities of war" is proposterous. You strain every effort to reduce your adversary to impotence; he falls wounded, whereupon, should he come into your hands, you promptly devote all your exertions to saving his life and restoring him to health and vigor, in order that he may go home and swell the ranks of your enemy. This is no doubt humanity, but it is supremely illogical.

Marbot recounts in his memoirs perhaps the most absurd application over made of the theory of the "ameni-tics." In the battle of Austerlitz a body of beaten Russians, about five tween. If, instead of doing this, he started in with a handful of scorethousand strong, strove to escape scross the ice on the Satschan Lake. Napoleon ordered his artillery to fire on the ice, which was shattered, and men and horses slowly settled down into the depths, only a few escaping by means of poles and ropes thrust out from shore by the French.

Next morning, Napoleon, riding round the positions, saw a wounded

KEEPING APPLES IN WINTER. purchasers would refuse to take such One method suggested for keeping

horse at any price spples during the winter is to pack In feeding wheat to horses this winter it should be remembered that them in perfectly dry oats, not permitting one apple to touch the other. If wrapped in paper before packing in this danger is always present. It may the oats the apples will keep all the better. They may be packed in boxes or that no real harm may follow, but as a rule it is the worst possible or barrels, and if put up in an attrac-tive manner will bring good prices. Apples have been higher in price than od for horses used on the road. It makes them lazy, slothful, fat and oranges for the past four or five years, overheated. The Caribon in Maine,

About the slopes of Mount Katahdin and ranging the bogs and woodlands of the country at its foot, great herds of caribou pasture in the fall upon twigs, bark and the marsh grass and moss, from which they have to scrape the snow with their forefeet, as their kindred, the Lapland and Siber-1au reindeer, do. They are migratory animals, covering wide regions in their travels, and appearing unexpectedly in localities which, after a period, they are apt to leave with equal suddenness. A single herd recently seen near Mount Kathadin was estimated caribou stands between the deer and the moose, and his appearance and habits are essentially those of the Arctic reindeer. The well-known Maine scientist; "Bill" Moriarty, who is a great hunter and woodsman, says that a caribon is "the hand-somest, most forlorn looking critter that travels on hoofs."—Lewiston (Me.) Journal.

Hypnotism for the Deat.

Principal Currier, of the New York Institution, has startled the scientific world by his theory that hypnotism may, in certain cases, be successfully applied with a view to give hearing to the deaf. The average individual knows little or nothing concerning the "cerie science," as some writers term it, but scientific and medical men have shown it be of value in mental diseases, and, we believe, in surgery. It would be folly to say that it is certsinly going to prove efficacious in re-moving deafness; still the theory ad-vanced and the arguments used are to number 200 caribou. In size the plausible enough to justify experiment. All the great inventions that are now being of so much service to mankind were ridiculed and denounced at the beginning, and Principal Currier will be exceptionally lucky if his theory is not maltreated and abused by unbelievers. Results will show whether his position is tenable or otherwise .--Deaf Mutes' Journal.

DANGER OF FEEDING WHEAT TO HORSES. Comfort Affected by Color of Clothing.

This winter a great many are advocating or considering the advisability of feeding wheat to horses on account of the cheapness of this feed, and a few have raised the alarm against such a practice. While this grain may prove of advantage to hogs and other animals, it is certainly unsuited to horses, except in the very smallest quantities, and then more as medicine than as food. It is much better for an old horse than for a young growing animal, and while it may be fed with impunity to a liorso twenty or thirty years old, it will, in nine cases out of ten, founder a young one. If some of the old horse breeders

and farmers can look back thirty or

forty years; they will remember when

wheat was fed quite liberally to horses,

and the term "grain founder," then became very generally known through

hard experience. This is the worst

founder known to horses, and efter a

groat number of horses suffered in this

way, it was found that grain was the

cause of the trouble, and the chief

grain was wheat. A young horse that has been liberally fed with wheat when

iderable to do with his comfort in summer or winter. When exposed to the sunlight white, it is said, receives 100 degrees Fahrenheit, pale straw color 102, dark yellow 140, light green 155, dark green 168, Turkey red 165, blue 193 and black 208. Assuming that this table is correct, the person

who dresses in light colors during the summer has about double the protection from the heat that the man or woman in black has .- Homeopathis Eavoy.

The Longest Words.

writing: Subconstitutionalist Incomprehensibility. Philoprogenitiveness. Honorificibilitudinity. Anthropophagenarian. Disproportionablencas, Velocipedestrianistical,

Transmostantiationsbleness, Proantitransublantiationist. -- The growing, even for only one winter, is Student.

Feed that will make a pound of beef | slices while hot. Mix with a fork, will make a pound of butter or two | beans, potatoes, two tablespoonfuls of over the top.

> Codfish Salad-Pall codfish into thin strips, soak twelve hours in cold water, then change to fresh and let lie half an hour. Remove the moisture with a soft towel, dip in melted butter, and broil. While warm shred finely and when cold add a very little vinegar. Place on the top of some finely shredded cabbage and serve with mayonnaise dressing.

Shrimp Salad-One can shrimps. Wash and cut in halves. Make a dressing of two eggs, whites beaten first, then yolks added, one tablespoonful salad cil added slowly, one tenspoonful each of salt and pepper, one-half cup of vinegar, a little made mustard. Stir all together ou stove until it thickens, and when cold pour over the shrimps, to which has been added celery or finely-cut lettuc.

Mayonnaise Dressing-Beat the yolks of two eggs with half a tea-spconful of salt and a teaspoonful of mustard. Beat in, a little at a time, sixteen tablespoonfuls of melted butter. When a smooth paste results, dilute with vinegar until it is the consistency of thick cream. This dreasing keeps well if closely corked.

Ham Salud-Chop remnants of cold-boiled ham, mix with a stalk or two of celery cat in bits, or season with celery seed and pour over bacon dressing.

Bacon Dressing-Heat two table spooniuls of bacon or pork fat, stir in tablespoonful of flour, add half s teacupful of water and let boil an once. Add i teacupful vinegar, two eggs beatsn with a teaspoonful of sugar, i teaspoonful of mustard and i teaspoontul of salt. Boil four min-utes, stirring constantly. Die when cold. This will keep several days if kept from the air. It is a nice dressing for cabbage salad.

Apple Salad-Mix' two-thirds tender sour apples sliced with one-third sliced celery.

Cold Cream Dressing-Stir to a eream the yolks of two eggs, a scant tescupful of thick cream, two table spoonfuls of white sugar, three of vinegar, a dash of salt and mustard .--American Agriculturist.

In 1783 the Dutch lost the vesse Antoinetts, an Indiaman, and with her sank \$3,500,000, besides jewel/ of great value.

Cat the remaining whites into rings and scatter over the top. Potato Salad—Pare or boil six or eight potatoes the size of an egg; slice thin while hot, and mix with the slices a tablespoonful of chopped onion, and four tablespoonfuls of ehopped boiled beets. Let stand two hours then mix in lightly a French dressing. French Dressing—Beat till well blended two tablespoonful of salt, haff a teaspoonful of pepper, and two tablespoonful of vinegar. Beat till light and foamy. Bean Salad—Drain a pint of lima beens which have been boiled in salted water till tender but not broken, cut a mellium-sized boiled potato in thin slices while hot. Mix with a fork, beans, potatoes, two tablespoonfuls of any cold chopped meat and a tea-spoonful of dry mustard. Place in a salad bowl and pour French dressing over the top.
