Riding Without a Horse,

An ingenious man has invented a saddle machine for the acquirement of a perfect seat and self-confidence as an equestrienne within one's own home. It is said that many ladies are overcoming timidity by means of this home practice as a prelude "to learning how to ride" the veritable equine back.

By a skillful mechanical arrangement the movements of a horse in walking, trotting, cautering or gal-loping are imparted to a saddle, upon which a lady or gentlemen may sit with perfect comfort and safety, blandly confident that, although they are enjoying to the full all the pleasure and health-giving motion of riding on horseback, there is no fear of their mount rearing, or bolting, or kicking, or jibbing or behaving like the famous trick horse from the circus.

The motion obtained from the saildle, as in setual horse riding, is vertical, and produced by the rider rising on the stirrups or footboards as if seated upon a horse, and under all the conditions, whether the motion be gentle or that of a trot or gallop, the rider is perfectly secure in his or her seat, so that all the advantages of real horse exercise can be enjoyed with none of its inevitable risks.—Chicago

#### The Biggest Goose,

I heard the other day an amusing tale of of a certain well-known English nobleman, who had imported two omus with the hope of breeding from them, and on leaving his estate for town left also strict injunctions that the greatest care should be taken of the lady emu, if she produced the desired egg or eggs. The egg arrived course, but, as artists have found before now, the lady declined to

"sit." The steward, however, how-ever, was an ingenious man, and thought of a substitute, but his powers of composition were by no means on a par with his inventiveness, and he announced the interesting event to his master in the following terms: "The emu has laid an egg, but we

were in a great difficulty, as she would not sit on it. I did what I thought was best, and in your Lordship's absence I have placed the egg under the biggest goose on the estate."—Pall Mall Gazette.

# A Bank Failure.

# AN INVESTIGATION DEMANDED.

A general banking business is done by the luman system, because the blood deposits in its vaults whatever wealth we may gain from day to day. This wealth is laid up against "a rainy day" as a reserve fund—we're in a condition of healthy prosperity if we have laid away sufficient capital to draw upon in the hour of our greatest need. There is danger in getting thin, because it's a sign of letting down in health. To gain in blood is nearly always to gain in whole some flesh. The odds are in favor of the germs of consumption, grip, or pneumonia, if our liver be inactive and our blood impure, or if our flesh be reduced below a healthy standard. What is required is an increase in our germ sighting strength. Dr. Pierce's Golden Medical Discovery enriches the blood and makes it wholesome, stops the waste of tissue and at the same time builds up the strength. A medicine which will rid the blood of its poisous, cleanse and invigorate the great organs of the body, vitalize the system, thrill the whole being with new energy and make permanent work of it, is surely a remedy of great value. But with new energy and make permanent work of it, is surely a remedy of great value. But when we make a positive statement that 98 when we make a positive statement that 98 per cent. of all cases of consumption can, if taken in the early stages of the disease, be CURED with the "Discovery," it seems like a bold assertion. All Dr. Pierce asks is that you make a thorough investigation and satisfy yourself of the truth of his assertion. By sending to the World's Dispensary Medical Association, Buffalo, N. Y., you can get a free book with the names, addresses and photographs of a large number of those cured of throst, bronchial and long diseases, as well as of skin and scrofulous affections by the "Golden Medical Discovery." They by the "Golden Medical Discovery." They also publish a book of 160 pages, being a medical treatise on consumption, bronchitis, asthma, catarrh, which will be mailed on receipt of address and six cents in stamps.

trays, the smaller the better. These are used for every purpose, but par-ticularly on the toilet table.

Among the conspicuous novelties are the long silver chains. Many of them are punctured here and there with turquoise and pearl ornaments. In the country districts Japanese women work in the fields like those of

continental Europe. This goes far to account for their strength and good Several towns in Russia have elected women for Mayors, on the ground that they were best fitted to be in-

trusted with the interests of the community. The Girton team, of Cambridge, England, played a match of hockey

with Alexander College, the woman's college of Dublin University, and the game was a draw. A cooking school teacher says that there is no better manieure than

kneading bread. It develops, whitens and strengthens the hands, and goes far toward beautifying them. Among the novelties recently imare ready made accordionpleated China silk skirts, with gradu-

ated pleats arranged so as to give very little fullness over the tips, Black lace over white moire or satin, white lace over black, or white over white, are favorite trimmings for black gowns, but rarely it is that there is seen lace trimming upon a white cos-

During the past year Lady Henry Somerset attended 115 meetings and twenty-seven conferences; she traveled upward of 8000 miles, and spoke in twenty different countries to about 200,000 people.

In the Pioneer, a woman's club in London, members are addressed by their numbers, and this is thought to be a wise way of obliterating social distinctions. It generally has that effect among convicts.

The fashion of doing away with bonnet and hat strings, brought about by the high chokers the women wear, renders two hat pins necessary. On these there is no limit to the richness of material and workmanship.

One of the most noteworthy contractors of Boston is Mrs. D. Henry Cram. She is Boston born and bred and is a young woman of charming personality. She is a member of the Professional Woman's League of that city.

Ribbed, striped, heather-mixed, and fancy checked woolens will be shown in greater variety than ever next season, and the color-scheme will bring out new shades in petunia, pinkish fawns, rosy violets, grays, greens and browns.

A bracelet "wool holder" in gold or silver is among the latest novelties. It consists of a chain attached to the bracelet, on the other end of which is a hook through which a ball of wool is thrust, thereby preventing its rolling away.

No fabric is so popular as crepon, and this, fortunately, is within reach of the many at moderate prices in very good quality. It is combined with velvets and silks and often used entirely for bodices, with accentuations of silk and velvet.

An accomplished woman whose stories are popular finds comfort in the fact that if it were necessary for her to earn her own living, she could do so either as a stenographer, type-writer, a photographer, or, best of all, she says, as a cook.

Wellesley girls may add lacrosse to their list of outdoor sports. Miss Hills, the director of physical culture at the college, favors the idea, and has invited the manager of the Harvard lacrosse team to confer with her on the advisability of the innovation.

Black satin, silk or moire gowns are fashionably trimmed with ruches that are lined with white, amber, tan, fawn, rose or other colored satin or silk. One or three ruches may edge a skirt, and a similar ornamentation may be applied upon the waist and sleeves.

Mary N. Murfree, whose pen name is Charles Egbert Craddock, is a native of Tennessee, where the scenes of her stories of mountain life have been laid, and has always been a cripple. Her first story, "The Dancin' Party at Harrison's Cove," appeared in 1878.

The very latest feather boa is much shorter than those that have been worn, reaching only to the waist. It is attached to a collar formed of little ostrich tips graduated in size and turning outward from the throat, where they are attached to an invisible ribbon

A novel way of carning a living is affor led a certain number of young girls in one or two places of business in the east end of London. Their sole duty is to test eggs by holding them between the eye and the light. From skill and experience they are able in stantly to determine their conditions in this way,

So far as can be judged the indice tions are for quiet, rather neutral tints for round hats, toques and bonnets, leaving the milliner plenty of scope to use the brilliant trimmings of flowers, ribbons, spangled garni-tures, lace and feathers which are already adorning the windows and shelves of leading importing houses,

# TEMPERANCE.

Charles Lamb, one of the brightest splitis over extinguished by drink, wrote mournally, looking back upon his childhood. Could the youth to whom the flavor of the irst glass was delictions look into my desolation, and be made to understand what a leeary thing it is when a man feels himself roing down a precipies with open eyes and assive will; to see his destruction, and not have the power of will to stop it, and yet to see it all the way emanating from himself, to porceive all goodness emptied out of him, and yet not be able to forget the time when t was otherwise, how he would avoid the list temptation to drink." ANOTHER DOCTOR TESTIFIES.

Dr. Benjamin Ward Richardson is acknowledged to be one of the best medical authorities in England on the nature and effects of alcoholics, and he says: "A man may be considered by his friends and neighbors, as well as by himself, to be a sober and temperate man; he may truthfully say that he never was tipsy in the whole course of his life; and yet it is quite possible that such a man may die of disease caused by the alcohol he has taken and by no other cause whatever. This is one of the most dreadful evils of alcohol, that it kills insidiously, as if it were doing no harm, or as if it were doing good while it was destroying life."

#### HEREDITARY APPRITTE.

In answer to a New York reporter Mr. hauncy M. Depew illustrates hereditary in-emperance by referring to the best lawyer

he over knew.

The lawyer came from a family where the men had many generation died drunkards at an early age.

This young lawyer had enjoyed peculiar educational advantages. He had planned to make a change in the family record.

His process was to give his days and nights to the meet exhausting labor in the prosecution of his study.

When forty-flyo, he enjoyed the highest respect and henor of his profession. Not a case within two hundred udles of his home was had without him.

as had without him.

was had without him.

A supreme judgeship was to be his at the first vacancy. He had an interesting family. His friends thought he had outlived the disease of his family but before the age of forty-seven he gave up the long struggle and became a drunkard. His clients deserted him and he deserted his wife and children. He died in two years.

#### SAVED BY KINDNESS.

The following recital was recently made by "I had been a drinking man for twenty ears, had ruined my chances in life and add my family wretched. I did not believe a God or humanity. A whisky soaked brain a not adapted to any noble form of faith ther for this world or that which is to come. One day about seventeen years ago, when I returned from the shop to my little home, which was bare of almost every comfort, to say nothing of luxuries, my wife told me that a lady had been to see us and left an orange apiece for the three children and some pretty cards, with a 'Merry Christmas' for us all.

for us all.

"Nobody ever came to our house those days, and I was surprised, for this lady was the wife of one of the trustees in the great university, a business man who stood very high, and she had plenty of money, postion, education and occupation. Indeed she had everything that we had not. So I sat myself down to try to reason out some bad motive for her coming, as it was my custom then to look for bad motives in people rather than good ones.

"But as her husband was not in politics and could not desire my vote, and as he was not in any business where I could by any means be of service to him, and as neither means be of service to him, and as neither he nor she could gain anything from us, although I racked my brain to find something that they could gain, I was obliged to say to myself: 'It must have been what Christians call the "love of God," and when I had come to this conclusion my heart melted a little, and I said to myself: 'If it is true that there is such a thing as the love of God, I shall reform,' and from that day I have never tasted intoxicating liquors."—Union Signal.

STRONG PLEA FOR TOTAL ABSTINENCE. What difficulties lie in the way of total abstinence? None others than the pleasure of palate, and the exhilaration of animal spirits which the alcoholic potion produces. These, we repeat, and none others. Strange weakness of men—I speak particularly of men to whom position and responsibilities counsel total abstinence—strange weakness, where so little is to be lost, and so much to be gained! The most skilled medical science affirms that alcoholic drink is by no means required by man's physical organism, that, affirms that alcoholic drink is by no means required by man's physical organism, that, indeed, alcoholic drink beyond lightest doses is injurious to it. The so-called moderate drinking of social customs does a harm to mind and body—a harm which is none the less real because a strong constitution overcomes it, or years are needed to bring it to an observable degree. The momentary excitement from alcohol is an appeal to the body's reserved forces, and the penalty exists in the reaction which is sure to follow. The most untiring soldier, General Wolseley testifies, is the total abstainer. The total abstainer. Sir John Ross writes, best endures the cold of the frigid zone. Life insurince companies more readily issue policies on the lives of total abstainers than on those of moderate drinkers.

surance companies more readily issue policies on the lives of total abstainers than on those of moderate drinkers.

How much money is spent in the purchase of alcoholic beverages: It is so much money thrown away; so much money employed to purchase for one's self-weakness and hurt of body and soul. This money would bring comfort to loved ones at home; it would be a safeguard against the days of sickness and old age; poured into channels of beneficence it would call down upon the giver blossings from men and from God.

How far will total abstinence, preached as I preach it, be serviceable in removing from humanity the terrible drink-plague? I am not an unreasoning optimist. I do not account total abstinence the sole method which is to be preached, nor do I expect from it, however much it may be preached, a millennium of sobriety. I know men's passions and prejudices. But I am certain that in practicing total abstinence I am myself safe, and that I bring others to be safe; and I chesefully practice it. I recommend it to others for the motives upon which I base my own predilication for it. The number of those practicing it is large, and it is daily increasing. The total abstiners exercise a own predilection for it. The number of these practicing it is large, and it is daily increasing. The total abstainers exercise a salutary influence beyond their own ranks, by forming public opinion in favor of temperance, and reducing even among the drinkers the indulgence in drink. The more extended and the continued growth of total abstinence depends in the largest measure upon the conquest to its reign of men of position and social influence, and especially of the ministers of religion. History, it is objected, does not show the practice of total abstinence to have been a normal condition in the life of peoples. I do not discuss its history. I stand to-day in presence of a dreadful evil, before whose pestilential breath multitudes of men and women are going down to ruin and sin. That the power of total abstinence is wagning war against the evil is undoubted, and I invoke at once

of total abstinance is waging war against the evil is undoubted, and I invoke at once its aid."—Archbishop Ireland. TEMPERANCE NEWS AND NOTES. A movement has been inaugurated in Michigan University against the liquor habit among the students.

George Piesro, of Shamokin, Penn., drank a quart of whisky on a \$50 wager, fell into a stuper and died.

Twenty-two thousand men, or one-third of the entire number of British troops in India, belong to the Army Temperance Society.

Hon. John M. Thurston, the new United States Senator from Nebrasks, recently declined an invitation to a banquet in his honor at Lincoln unless wine and figuors were banished from the tables. They were accordingly banished.

The Chief of Police of Battimore made a startling statement when he said be "Nover found boys in the salonis until lager beer was introduced and games prepared to en-tice them in."

## The Coldest Winter.

tensity. anese sailors were frozen to death while training their guns on the Chinese forts and fleet at Wei-Hai-Wei, and even in Northern Africa snow fell for the first time in so long a period that grown men gazed at it with won-

What does it all mean? Scientists have been at work for years to figure ont a law of climatic and weather changes, and their conclusion is that it takes between thirty and thirty-five to the extreme of cold. Just why this is so they can not tell, but their delying into the old records convinces a cent. Mortified and abashed, her them that there is some natural law at work and that sooner or later it will be discovered.

Five years ago a Swiss professor, Brueckner by name, published a book called "Climatic Oscillations Since 1700," and, strangely enough, his calbe followed by gradually increasing end of the first quarter of the next century.
While we think of our sufferings,

we may, therefore, turn for consola-tion to 1925 or 30, and revel in the anticipation of the mildest winter that we can secure in this latitude.— in turn, used to purchase cotton ma-New York News. in turn, used to purchase cotton ma-terial, out of which were made several

#### To Clean Clothes.

According to the American Analyst the proper way of restoring old clothes is as follows: Take, for instance, a shiny old coat, vest or pair of trousers of broadcloth, cassimere or diagonal. The scourer makes a strong, warm soapsuds, and plunges the garment into it, souses it up and down, rubs the dirty places, and if necessary, puts it through a second time; then rinses it through several waters and hangs it old cotton cloth is laid on the outside that until the wrinkles are out; but acquaintance entered. the iron is removed before the steam "Glad to find you ceases to rise from the goods, else they would be shiny. Wrinkles that communication to make to you, which are obstinate are removed by laying a no one else must hear.' wet cloth over them and passing the iron over that. If any shiny places other, checking him. And then he are seen, they are treated as the called out: wrinkles are-the iron is lifted while the full cloud of steam rises and brings the nap with it. Cloths should always have a suds made specially for them, as in that which has been used for white cotton or woolen cloths lint will be left in the water and will cling to the cloth. In this manner we have known the same coat and trousers to be renewed time and time again, and have all the look and feel of new garments. Good breadcloth and its fellow cloths will bear many washings, and look better every time because of

A Dog Who Was Not to Be Dared, A dog story has come to the writer's ears, which, though not within his personal knowledge, is vouched for to him in an entirely trustworthy way. him in an entirely trustworthy way.

A certain dog, which was growing old, was in a barn one day with his master.

The two were up on a haymow from which a sloping ladder led down to the barn floor. The master walked down the ladder, but the down to the ladder, but the down to conquers, quickly, surely. down the ladder, but the dog went around by another way. When the dog reached the barn floor his master began to say to him somewhat tauntingly, "Poor old fellow! Daren't walk down the ladder any more! Daren't walk down the ladder!" Whereupon the dog, with a quick glance at his master, walked clear up the ladder to the top, and then turned around and walked down it again. The proceeding looked very much like a deliberate demonstration on the dog's part, to his master, that he was still capable of walking up and down a slanting ladder. Did the dog understand the taunt, or did he merely catch the words "down the ladder," and take the utterance for a command, which he dutifu'ly proceeded to obey? No one will ever know, probably, since the dog himself can give no account of the matter .-- Boston Transcript.

Ingenious Thieves. Thieves of Upper India are generally very smart when it comes to the squeeze of capture, and the care which native burglars take in the way of precantion against surprise is phenomena<sup>1</sup>, writes a cerrespondent of a contemporary. They are usually most painstaking, and a friend of mine one morning awoke to find that he had been "looted," and at given intervals the places of exit had been laid out with broken bits of bottle so that smartly.

generally bring the enemy up with adroitly. - Bombay Gazette. 

#### What Can Be Done With a Cent.

The most notable thing about the spell of cold weather through which of a small Maryland town was in want we have passed is its widespread in- of an alms basin. The congregation All Europe has been in the was for the most part poor, and few grasp of the ice king, and his antics in numbers. The minister in charge are more talked about than those of appointed a young girl a committee of any other monarch. In far Asia Jap- one to collect subscriptions. The amount needed was \$5, for an alms basin costing that much had been heard of for sale by a more prosperous parish, that had outgrown the one with which it started in life.

The young woman's first call was at the store of a well-to-do merchant. Asking something from him for her fund, she received the following roply, spoken in a very gruff voice: can give you nothing;" but as she turned to leave, he added: "There, years to get from the extreme of heat you may have that if it will do you any good," and suiting the action to first impulse was to leave it where he thrown it, but better judgment prevailing she picked it up, thanked him and left.

Without going further she returned home and told her mother that she would not ask for anything more and culations made it appear that one of the culminating periods of extreme cold would come around about this time—perhaps in this very year—to what you can do with it." She followed this advice and bought a small warmer weather, which is scheduled china doll, and, dressing it in some to reach its highest point about the scraps which she had, sold it to a friend for her little daughter. Having increased her capital 400 per cent., she invested it in a spool of crochet-ing cotton, with which she worked several small articles, and the sale of these brought her in \$1.20. This was, dresses for small children, that netted, when sold, the desired \$5, when the

alms basin was duly bought.

This story was told to a lady of ocialiatic views, who was constantly complaining that she was not rich, and saying she could lay so little by it was not worth while to save; the answer was: "Yes, she got her \$5, but what a lot of work she had to do." Kate Field's Washington.
