Dr. I sliinger, Director of the Anatomics-purhological Institute of Munich, asserts that it is very rare to find a normal heart and normal kidneys in an acult resident of that eity. The reason for the kidney disease is he tax put upon these organs by the drinking of excessive amounts of beer, and the eard a hypertrophy and degeneration are secondary lesions for the most part. Formerly the population of the city was recruited by accessions from the country, but the abuse of beer has spread now to the rural communities, so that this source of healthy new blood is cut off.—Medical Record. A woman whistler regards a half hour's whistling after eating as an effeetive remedy for indigestion. Mrs. George W. Cable, the wife of the novelist, is one of the most beautiful women seen in literary circles in

A RISHOP'S EXPERIENCE.

DETECT OF ERRH ON HEART AND KIDNETS.

Young men who break away from God you will find bave taken their first step downward in the saloon. Now, I am an old man with a great deal of experience, and often my heart is sad to see young persons who have began so well, drop away from God, and naturally I had to study the cause, and I found it was in the saloon. Although a young man may be all right when he goes into a saloon, he soon comes to giory in the kind of company he finds there, and taking to their speech and labits, he becomes a drunkard like them, and a drunkard is a digrace to the community and on the highway to hell. Now, if we can only save the young to sobriety until they are twenty-one years of age, they are generally saved forever.—Bishop McQuaid.

"They that sow the wind shall reap the whirlwind" is being exemplified anew in wine-drinking France, where one of the problems most seriously discussed is the connection between crime and youth, back of whom ite generations of moderate wine-drinkers. The most daring, the most sanguinary and the most hardened criminals with whom France has of late years had to deal, have been with few exceptions mere youths, the great majority being under twenty years. M. Guillot, an investigating magistrate, says: "During my long career as judge d'instruction I have seen the lowest depth of human corruption, but it is only since I have had to de especially with young criminals that I have become acquainted with it."

"BRING IN THE CHOICEST LIQUOR." Some time ago eight or ten lumbermen went into a hotel in one of our Western cities

Some time age eight or ten lumbermen went into a hotel in one of our Western cities, and engaged a private parlor. They were jolly, well-to-de fellows, and met to settle up a year's business over a social glass, having had a successful speculation together. Summoning the gentlemanly clerk of the house, they ordered him to bring in the choleest liquor to be obtained—"nothing but the purest and finest article."

The table was spread, glasses brought out, and mirth and jollity prevailed. Presently in came the clerk with a silver pitcher of lee water, and, as he filled each goblet, with quiet dignity, he remarked. "Gentlemen, I have done the best I could to obey your order, and here is the purest article to be found in the United States."

All locked in dumb amazement, so unexpected and so ludierous was their position. But they were equal to the occasion. Not a word was said till each had his glass before him, filled with the sparking fluild. Almost simultaneously they all raised their glasses, and pledging each other's health, made the additional pledge not to drink anything stronger for the year to come. Nearly twelve months have passed, and they have been loyal to their vow. May we not hope that the pledge may be renewed for life.—Zion's Watchman.

ALCOHOL AND BRECHATISM.

One item in Dr. Richardson's report of his practice in the London Temperance Hospital refers to his treatment of rheumatism without Parisian women are, some of them, wearing hand-painted gowns. One in which a well-known leader of fashion

refers to his treatment of rheumatism without alcohol. He says:

"Out of seventy-one cases of acute or sut, acute rheumatism, the large majority acuta, and attended with temperatures moving up to 104 degrees Fahr, sixty-nine recovered, and two, although they were discharged without being put on the recovery list, were so far relieved that a few days change in country air seemed all that was required to induce full restoration. Comparing the experience of the treatment of acute rheumatic disease without alcohol with that which I have previously observed with alcohol, I can have no hesitation in declaring that it is of the greatest advantage to follow total abstinance absolutely in this disease. The pala and swelling of joints is more quickly relieved under abstinence, the fever falls more rapidly, there is less frequent relapse, and there is quicker recovery. In brief, the experience of treatment of rheumatic fever minus alcohol presents to me as much nevelty as it does pleasure, and I am convinced that if any candid member of the profession could have witnessed what I have witnessed in this matter, he would agree with me that alcohol in rhoumatic fever, however acute, is altogether out of place. I am also under the conviction, though I express it with great reserve, that in acute rheumatism, treated without alcohol, the cardiac complications, endocardial and pericardial, are much less frequently developed than where alcohol is supplied.

THE ENGINE WEST ON.

I once had a curious and instructive con versation with an engineer who had charge of a large stationary engine. It was a beautiful engine, and worked as true as steel could work. The man surprised me by telling me if had been at work ninety years, "and do you know," he added, "It has had eight masters. I am the eighth who has had the care of it. The others are all either dead or worn out, and yet it goes on as if it were as young as ever. Very strange, sir, but it, that an engine should live so much longer than a man, and it is not hard work for us either, or exposed work, for the room is always warm and comfortable, and the place is of course clean and light."

"What did the men die from?" I asked. "Well, three or four, I am alraid, died of drink, another of bad temper, another of worry, and so on, but the engine went on just the same." The fate of the engine, its long life and continued industry puzzled the man. He often in his lonely hours thought of it and wondered how many men would follow him before the engine began to break down. It did not puzzle me. That engine worked a great many hours a day truly, but it was equable in its work; it never ran loose, it was true in its vocation; it was stright as a new pin, clean in every point; it was served with best but aimniest fuel food; it had its I once had a curious and instructive cor

it was true in its vocation; it was bright as a new pin, clean in every point; it was served with best but simplest fuel food; it had its furnace tubes clear; it was saved friction by having its parts properly offed, and it drank nothing but water. So it lived on through nearly three generations, with a good chance of living through three more. It was allowed, in fact, to make the most of its physical life.

Its masters did not make the most of their lives. They might have been somewhat industrious, but they were not so orderly, so true, so steady, so dean as they made the engine. They had not learned so well how to find the best food and drink for their own labor as had been found for the engine. They did not make the most of their lives, and, therefore, they stopped, but the engine went, still merrily, on its way.—Sir B. W. Richardson, in Longman's Magasine.

TEMPERANCE NEWS AND NOTES. In St. Petersburg the names of habitual drunkards are displayed on posters in the leading thoroughfares. Barrooms are closed on Sunday in all of cotland, in all of Wates, and in all of Ire-

and, except five towns. The cost of liquor consumed throughout the United Kingdom last year was \$695,140, or \$17.17 per head of population.

The receipts of the German Government from tax on brandy and spirits during the fiscal year 1892-3 amounted to \$55,000,000.

A bill has passed the Alabama House prehibiting the sale of liquor anywhere throughout the State outside of incorporated towns.

The total destruction by lire in the United States during the last twenty years amounts to \$2,002,363,774—less than the direct and indirect expense of the liquor traffic for the single year 1894. the place of weaving lines by hand

The Temperance Chroniele of London says: "It must not be forgotten that the state of Sweden to-day, both as regards the consumption of theohol and the convictions for drunkenness, is worse than the state of Great Britain or Ireland."

According to medical records, the British Modical Association has investigated 4234 deaths, taken at random, with reference to the question of alcohol and longevity. They found the average age of temperate drinkers to be sixty-three years, caroless drinkers, fifty-sine years, intemperate drinkers, fifty-sine years, total abstainurs, fifty-one years, total abstainurs, fifty-one years,

ACUTE DYSPEPSIA. SYMPATHETIC HEART DISEASE OFTEN

The Modern Treatment Consists in Re-

moving the Cause. (From the Republican, Codar Rapids, Iona). Mrs. V. Curley, who has resided in Clarence, Iowa, for the past twenty-two years, tells an interesting story of what she considers rescue from premature death. Her narrative is as

"For ten years prior to 1894, I was a conhad all the manifold symptoms of acute dyspepsia, and at times other troubles were present in complication-I did not know what it was to enjoy a meal. No matter how careful I might be as to the quality, quantity and preparation of my food, distress always folowed eating. I was despondent and blue, Almost to the point of insanity at times, and would have been glad to die. Often and often I could not sleep. Sympathetic heart trouble set in and time and again I was obliged to call a doctor in the night to relieve sudden attacks of suffocation which would come on without a moment's warning.

"My troubles increased as time were on and I spent large sums in doctor bills, being compelled to have medical attendants almost constantly. During 1892 and 1893, it was impossible for me to retain food, and water erashes plagued me. I was reduced to a skeleton. A consultation of physicians was unable to determine just what did all me. The doctors gave us as their opinion that the probable trouble was ulceration of the coats of the stomach and held out no hope of recovery. One doctor said, 'All I can do to

relieve your suffering is by the use of optim."
"About this time a friend of mine, Mrs. Symantha Smith, of Glidden, Iowa, told me about the ease of Mrs. Thurston, of Oxford Junction, Iowa. This indy said she had been afflicted much the same as I had. She had consulted local physicians without relief, and had gone to Davenport for treatment. Giving

Dr. Williams' Pink Pills contain all the elements necessary to give new life and richnose to the blood and restore shattered nerves. They are for sale by all druggists, or may be had by mall from Dr. Williams' Medicine Lompany, Scheneotady, N. Y., for 50c. per box, or six boxes for \$2.50.

The Missouri Legislature has barred the use of the plea of hypnotism in the defense of criminals.

who suffers from headaches and biliousness needs a medicine to keep his stomach and liv-er in good working order. For such people Ripans Tabules fill the bilt. One tabule gives relief.

To cleanse the system in a gentle and truly beneficial manner, when the Springtime comes, use the true and perfect remedy, Syrup of Figs. One bottle will answer for all the family and costs only 30 cents: the large size \$1. Try it him if it were possible he could have and be pleased. Manufactured by the Califor-

The prime object of a patent system is to foster and promote the inventive faculties of a Nation. Beyond and above this is a utilitarian purpose. It is that after the inventor has been granted a monopoly of his invention for a limited period, during which he is supposed to take advantage of the opportunity to reward himself for his labors, the invention becomes public property and the people at large are thereby benefited.

Any attempt to thwart these fundamental principles, if successful, works harm not only in the special case in which it is made, but militates against the whole system by setting up an example which encourages other such attempts, -- Electrical Review.

The lighthouses of the world num-ber more than 7000. The United States has over 1300 houses and as The latter are simpler in construction and not very expensive, since they are maintained on shore. Our Government has been proceeding with the theory that the oast should be so sprinkled with lights that the rays meet and pass; that a vessel will meet the one in advance before the one in the rear is out of sight. The annual appropriation for their keeping is now nearly \$4,-000,000.

Kerosene oil is that which has been adopted by the Lighthouse Board as the luminant, though gas, and, to a limited extent, electricity, have been given a trial. Gas is being used only at Alexandria, Va., and Newburyport, Mass. Kerosene is considered the best and the cheapest. It is ever re-liable. Electricity will no doubt be adopted when Congress can be prevailed upon to appropriate money. -Scientific American.

Production of Sounds by Insects,

While the notes of insects are amonf the loudest, and popularly supposed to proceed from the mouth, they are, in fact, instrumental-in other words, are produced by various musical instruments with which nature has endowed them, and yet which, to some extent, correspond to the voice of other animals, the sounds and calls being answered by others of their kind. When the grasshopper "For ten years prior to 1894, I was a con-stant sufferer from acute stomach trouble. I wishes to hail some companion or talk had all the manifold symptoms of acute dysrubs its thigh against the forewings, or plays upon a veritable fiddle. the leg of the musician be examined under a microscope, a ridge of very fine teeth (the sound producers) will

The loudest players are the locusts. which often make the woods resound with their calls. Sometimes all are playing or chattering at once; again, there will be a lull in the conversation then one will begin, the note will be taken up by another, and finally a volume of sound will blend and fill the air.

In the former case we had a fiddler, but here the musician is a drummer, as we may ascertain by examining the locust. The base of the anterior wing is transparent, forming a regular drum, with which the males produce their calls; and as there are many different species, so there are many different calls, and some, it is said have certain calls for night and others for the daytime.

The cicada, by using a drum at the base of the abdomen, produces a re-markable sound, sufficient even to frighten off an enemy, yet a big wasp will sometimes carry off a big cicada

consulted local physicians without relief, and had geneto Davenport for treatment. Giving up all hope of recovery, she was persuaded by a triend to take Dr. Williams' Pink Pills. The result was almost magical.

"I was led to try them from her experience, and before many months I felt better than I had for a dozen years. I am now almost free from trouble, and if through some error of diet I feel badly, this splendid remedy sets me right again. I have regained my strength and am once more in my usual flesh. I sleep well and can eat without distress. I have no doubt that I owe my recovery to Dr. Williams' Pink Pills. I only wish that I had heard of them years ago, thereby saving myself ten years of suffering and much money." scrapes them against its hind ones. Even the butterfly makes a sound

> Electricity Generated in His Mouth, A curious case has just been re-

corded in which su electric current was found to be generated by a pair of artificial teeth. A patient consulted his doctor on account of a se-vere pain in his tongue. But the sufferer was assured that there was nothing the matter. He then paid a visit to his dentist, who informed him that his teeth were perfectly sound. Being, however, dissatisfied he called upon an electrician he knew and asked any electricity in his mouth. On ex-Mrs. Winslow's Scothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colle. 25c. a bottle to a composition plate. To these motal wires were then attached and metal wires were then attached and connected to a galvanometer. Then the teeth were replaced in the patient's mouth and the metals moist-A patent is a writing granted by a ened with saliva. No sooner was this

OMEN'S FACES

—like flowers, fade and wither with time; the bloom of the rose is only known to the health y woman's cheeks. The nervous strain caused by the ailments and pains peculiar to the sex, and the labor and worry of rearing a family, can often be traced by the lines in the woman's face. Dull eyes, the sallow or wrinkled face and those "feelings of weakness" have their tise in the derangements and irregularities peculiar to women. The functional derangements, painful disorders, and chronic weaknesses of women, can be cured with Dr. Pierce's Favorite Prescription. For the young girl just entering womanhood, for the mother and those about to become mothers, and later in "the change of life," the "Prescription" is just what they need; it aids nature in preparing the system for the change. It's a medicine prescribed for thirty years, in the diseases of women, by Dr. R. V. Pierce, chief consulting physician to the Invalida" Hotel and Surgical Institute, at Buffalo, N. Y. Dr. Pierce's Favorite Prescription will cure the chronic inflammation of the liming membranes which cause such exhausting drains upon the system. It cures nervous prostration, sleeplessness, faintness, nervous debility and all disorder arising from derangement of the female organs and functions.

crising from decangement of the female organs and functions.

Mrs. Junnie Williams, of Mohaust. Lane Co. Mrs. Janeau Willia Oregon, writes: "I was sick for over three years with bind dizey opells, palpitation of the heart pain in the back and head, and at times would have such a weak tired feel-ing when I first got ap in the morning, and at times nervous chills.
