BUCKWHEAT TO CLEAN LAND,

There are several reasons why the buckwheat crop is a good one to de-stroy weeds. It requires plowing and fitting the land at midsummer, when weeds are most easily killed by plow-ing. It grows so rapidly that it very quickly covers the surface soil, shadng it so that few weeds can start under its broad leaves. It is equally good to rid land of insect enemies. Wire and cut worms find its roots distasteful to them, and for land that is filled with the wire worm two crops of buckwheat will rid it of most of them. Yet for all this buckwheat is not a popular crop with neat farmers. Its habit of seeding the ground with buckwheat, which will appear in the next grain crop, makes it a trouble-

CAUSE AND CURE OF BLOODY MILE. This disease is due either to deangement of the action of the liver, or in some cows is the result of ab-normal action of the milk glands, ome cows suffer from it in consetimes the liver is so disordered by overfeeding of rich food that the blood is not sufficiently purified and in this case the impurity of the blood escapes through the milk, instead of, as at other times, through the kid-next when the discrete liver to be envised. We may yet attain the art of making malleable glass, and the art of making malleable glass, and tunder such protection acres may be devoted to the growth of vegetables and semi-tropical fruits for our local markets. Rapid transit and improved refrigerator cars will enlarge the territory to be envised. We may yet attain the art of making malleable glass, and the art of making malleable glass, and devoted to the growth of vegetables. neys, when the disease would appear as red water. At times this fault in and a heifer may always give so, thus being useless in the dairy. That this kind of milk is wholly ab. edity will be better understood and normal is shown by the fact that our domestic stock be greatly includes will not drink it. The treatment should be by laxative and cooling medicine, such as epsom salts, given in half-pound doses daily for a few days, after which the system will probably be relieved of the undue strain on the secretory organs, and the milk be all right.—New York Times.

THE FARMHOUSE AS A BOARDING HOUSE, I was reading an article not long since, said Mrs. H. A. Whitman before the Androscoggia (Me.) Pomona Grange, upon "Farmers should provide separate cottages for their hired men," which, I think, deserves more than a passing thought. The writer farm while he journeys on the hightheir clerks? Do manufacturers usu-ally impose upon their wives and daughters the necessity of furnishing daughters the necessity of furnishing meals and beds for their begrimed and its kindly aid the hitherto overworked its kindly aid the hitherto overworked meals and beds for their begrimed and swenty laborers from forge and loom, of serving them at table with their food and sharing their company at the fireside! Why should the wives and daughters of farmers be expected to do this? And so long as such a burden is littly and the hitherto overworked farmer may become largely a gentleman of leisure. Then we shall expect much of him. Then will he have liberty to assume that political importance to which he is justly entitled. The successful farmer should be the ies, tailors, speculators-anybody but their schoolmates? "The introduction of hired men

into the household destroys the family relation. The farmhouse becomes boarding house, in which the husband is steward, the wife cook and the workmen boarders. The employed becomes the served, and the employers servants. No well-bred woman can tolerate such a condition of things unless her ambition is crushed."

There is many a woman in the land who has cooked tons of food for "the hired men," who, while her husband has grown well-to-do and been elected Justice of the Peace and gone to the Legislature, has become thin and furrowed with drudgery, bent to a furious and never-ending rotation of hired men.

This wretched community system has prevailed long enough in America, to the amazement of foreigners and the disgust of our own people. It is high time that every farmer with a particle of personal sensibility or independence, or with any respect for the rights of his companion, should adopt a better way.

THE VALUE OF STRAW. The abundance and cheapness of straw do not justify its waste, for some good, profitable use may be found for all of it, writes J. M. Stahl. If fed in connection with cottonseed or linseed meal, malt sprouts, bran, etc., which are rich in the elements in which it is deficient, it has a fair feeding value. The potential feeding velue of out straw equals that of sixtyfive per cent. and wheat straw fiftyfive per cent. of its weight of average meadow hay. But to make the potential feeding value of straw near actual it must be cut, moistened and mixed with such feeds, rich in protein, as are enumerated above. Cattle fed on straw alone, or nearly so, cannot pay anything for the straw, for it is so de-ficient in the muscle formers that an is not a good plan, as the roots beanimal cannot digest enough straw come saturated and have a tendency to alone to grow any, or even to hold its rot. All water should be applied at own. However, if fed as just stated the surface. with such feeds as will make a wellbalanced ration, straw has an actual crop very well without extra fertiliz-

If it is not possible to feed all the been destroyed by bad weather. Such straw to good advantage, it has a value land seeded to buckwheat right away for bedding and for shelters that will help the owner out of his diffimakes it unjustifiable to waste it. As culty and save him from the entire straw is a very poor conductor of loss of his crop.

heat, it is well adapted for these pur As litter it has the additional good quality of being an excellent absorbent. By using straw liberally for bedding one may reduce the discomfort of animals in poor shelters and avoid the waste of liquid excrement, while giving the animals a comfortable bed upon which to rest. Warm, comfortable shelters can be made out of straw; and, while they are not so durable and handsome as those made of wood, they are within the financial reach of many that cannot well build expensive shelters. Likely the most profitable use to which straw can be put is to form a comfortable shelter for farm animals that otherwise would be exposed to the severities of the winter. Finally, rotted straw has a fertilizer value that makes it highly profitable to save it carefully, -American Agriculturist.

Frank W. Hawley, one of the gen-tlemen interested in the Ningara Electric Power Company, and a scientific some weed, though as it is only an annual one year suffices to get rid of it.

—American Cultivator.

American Cultivator.

The new era for the farmer has just begun. In no domain of human activity lies greater scope for genius than in agriculture. No other calling is so conducive to health, longevity, and happiness. Science lays discoveries at the farmer's feet and implores quence of overfeeding, by which an inflammatory condition of the udder in his laboratory. For him the botis produced, thus exciting the action anist gleans the fields. For him the of the milk glands, which, on account inventor has simplified labor and en-of the udder being overcharged with blood, secrete some of this blood, which experts employed by the Government mixes with the milk. This blood would are ever at work at State and National otherwise be milk, for milk is a direct product of the blood, and if the udder lems of the soil. The broad-minded lems of the soil. The broad-minded were in a normal condition the blood agriculturist who avails himself of would be changed into milk by the healthful action of the glands. Some man to be envied. We may yet attain ritory to be supplied. The broad belts of the temperate zones extendthe secretory function is constitution- ing round the world will be explored in search of new varieties of grain, bloody milk, and may continue to do trees, flowers, and shrubs for our use. The laws of animal breeding and heredity will be better understood and proved. America will possess the finest cattle in the world, and the States fitted for cattle raising and dairying will vie with one another for the leadership.

The electric age will materially im-prove the condition of the agriculturist. I look for the day when each farmer will own an electric equipment to furnish power for his creamery, for grinding food, for pumping water, for lighting his house, and for heating his greenhouse and other buildings. Electric roads will pass his door, affording quick transit for himself and his produce to the nearest market town. His horses will labor on the farmers' sons rebel against their lot must look closely to his interests. It and seek the city, and farmers' daughties a notable fact that many of our best is a notab and ablest men have exhibited a strong predilection for rural life. Webster delighted to retire to Marshfield; the the name of Jefferson recalls Monticeflo; Jackson reminds us of Hermitage; Clay is associated with his beloved Ashland; Mount Vernon has been rendered classic ground as the abode of the Father of his Country. With the advance of this new era, from our rural homes, beautified by nature and adorned by art, saving induences will come in the future to guide and guard the future of the Re-

soil now and keeping the weeds down. The balky horse can often be cured of this trick by any simple device which may distract his attention for the moment, thereby causing him to forget his whim.

No large trees should be near the aplary. Have some small, smooth trees near-by for the bees to cluster on, but they should not be allowed to get over twelve feet high.

Once in the morning is often enough to water house plants, and let the water be about the temperature of the

Buckwheat can come after another feeding value far too great to justify ing. It is an excellent crop to sow on the waste of any of it.

#### TEMPERANCE.

A grain of com a handful grew;
A glass of rum the handful brewed;
A being in God's image drank it.
For reeding steps he had to thank it.
In rags he totured to his home;
The children shrieked to see him come;
The wife with pale face ope'd the door,
In struck her, felled her to the floor,
A felon, in a cell he lay,
And cursed himself, his natal day.
His children to the alushouse went,
When he by crime to don'th was sent.

Another grain a handful hore,
The farmur in his corn-erib stored:
Between the two stomes of the mill
Twas turned to food his mouth to fill.
He fed his children, served the land,
To God, the Giver, steriched his hand.
His gocally sons to boner grew;
His concely daughlers victue knew.
And thus the blessing God had given.
When used aright, made carth a heaven,
But when te polson drink 'twas turned,
it lighted fires of hell to burn.
—Youth's Temperance Banner.

THRE LUNCH IN SALCONS. "Free lunches!" exclaimed Chauncey M, Depew to a New York Sun reporter, "Well, I did say something about free innehes, didn't I? And if I'm not mistaken, I referred to I did say something about free lunches, didn't I? And if I'm not mistaken, I referred to them as ingenious preparations too. Well, they are. Now, seriously, although these poor people have twisted my remarks into all sorts of shapes. I meant all that I said about young men becoming slaves to drink. It's a terrible thing, and I think the free lunch is largely responsible for it. It's a most ingenious contrivance, and do you know that it's simply put in a place to make a manthirsty? Yes, sir, I tell you that the free lunch is composed of food of such a sharacter that it keeps a man thirsty, and forces him to buy liquor to keep himself comfortable. It is made up of pickled herring, corned beef, fish cakes, salted potatoes, pretoels, cheese, smoked beef, potate salad, and dozens of other dishes the main ingredient of which is salt. And as sure as a man eats free lunch, inst so sure will he be a drinking man, unless he is possessed of rare self-control. Why, I tell you the free lunch is more to blame for the number of drunkards around than anything else. A man takes a drink and a bite. The bite makes him thirsty, and the drink makes him hungry, and many a man who would leave a seloon after having imbibed one drink will sick all day as long as the free lunch is ther. It isn't the drink that keeps him, but the ingenious ranke-up of the free lunch, and that's why I say it's a blotch on civilization and should be wiped out.

"Perhaps you wonder how I know all this."

say it's a slotch on civilisation and should be wiped out.

"Perhaps you wonder how I know all this. I'll tell you. I travel a great deal, and wherever I go I always make it a point to talk with the man next to me. I ask him his business and make him tell me all about it. Now, among others, I have talked with many hotel men and liquor dealers, keepers of fashionntile cafes as well as German saloon keepers, and as the tree lunch is a sort of hobby of mine, I always make them tell me about what they sproad out for their customers in the eating lins. I used to wonder how they could afford to spread a free lunch, but all liquor dealers tell me that it's the most paying investment they make, and I believe it is."

WHAT THE DOCTORS SAY.

The National Temperance Hospital has festured a leadlet, entitled "Alcohol in Medicine; What Physicians Say," which contains some interesting information.

During the summer of 1894, a claim was made that alcohol was necessary as a solvent for medicines and to "prepare the field of operations in capital surgical cases." A letter was authorized by the Board of Trustees of the National Temperance Hospital, and addressed to a number of surgeons and physicians of high repute in the city of Chicago, asking whether they so considered it necessary, and what they used as antisepties. The following are culled from replies received:

Dr. S.—Prepares medicine without alcohol; does not use it as a preserving agent, having found it unnecessary.

Dr. E.—Is unalterably opposed to the use of alcohol; can cover the field pretty well without it.

Dr. B.—Sees no great need of alcohol in Surgery.

Dr. M.—"It over one any of the prepara-

Dr. M. -"I never use any of the prepara-

Dr. M.—"I never use any of the preparations of alcehol as an antiseptic; rarely ever
prescribe a fineture; the tablet form is much
more valuable and certain."

Dr. S.—Does not consider it indispensable.
Has found it possible to have medicine
properly compounded without it.

Dr. W. (Pharmacist)— "Should a physician choose to practice medicine without
alceholic preparations. I do not think the
task so very great if the question is given a
little study."

ittle study."

Dr. T.—Does not use alcohol, "The patient cannot possibly get any toxic or medicinal effect from alcohol."

Dr. Sarah Hackett Stevenson, President of the hospital staff says: "I do not think it necessary to use alcohol. Tablet triturates are better than tinetures."

THE BEST OF TESTIMONY. Judge Noah Davis says that his experience for a score of years on the bench is that eighty per centum of all the crimes that came before him would not have come had it not been for the traffic in alcoholic liquor. Dootor Willard Parker, one of the ablest physicians New York has ever had, in his preface to the lectures of Doctor R. W. Richardson, said that the liquor traffic is responsible for thirty-five per centum of lidory, forty-five per centum of lanacy, eighty per centum of crime, ninety per centum of pauperism, and ten per centum of all deaths. Apply that to New York City and it means that last year the liquor traffic is responsible for the birth of scores of idiots, 40) functics, the sending of 76,000 men and women to jail, the pauperizing of 10,000 families, and for 4000 deaths.—Rev. Dr. I. K. Punk. Judge Noah Davis says that his experi

TRUE IN ALL COMMUNITIES. When temperance advocates want facts and figures to use in their warfare they do not need to go far to flad them. The argunot need to go far to fluid them. The arguments against the many-sided traffic are only too abundant. The Ohio State Board of Pardons has lately recommended that abstinence from the use of intextenting liquors be a condition of pardon. The Board has learned that "in nearly every case of crims against the person the offender was either under the influence of liquor, or became involved in an affair by reason of being in a place where intexicating liquor was sold."

What is true of criminals in Ohio is true of criminals in all liquor communities.

According to the New York Evening World Brooklyn saloon side-doors are open on Sundays, and its jail is overcrowded. New York's saloens are closed on Sundays, and the New York Daily News says: 'The number of prisoners at Jefferson Market has been reduced from 129, the average, to eighteer with no woman prisoners in the penitentiary. Believue Hespital prison ward for the first time in its history has been two days' vacant." SUNDAY IN TWO CITIES,

THE WAY TO THE FOODBOUSE. John Resve, the or cedian, was once accessed in the Kensingron road by an elderly female with a small bottle of gin in her hand. 'Pray, sir, I ber year pardon, is this the way to the poorhouse?' John gave her a look of elerical dignity, and pointing to the bottle, gravely said: "No, ma'am; but that in,"—Charleston Messenger.

TEMPERANCE NEWS AND NOTES. A W. C. T. U. pump in Blenhoim, Ont., is said to be the most appreciated institution in that lively town.

When drinking leads a man to commit crime it is a serious question whether drink-ing itself be not a crime. The saloon destroys the happiness of the individual, the succeiness of the home and the peace of the community.

A carloal of watchy got on fire the other day at Peorle, and when they threw water on it a terrifle explosion to lowed. The authorities at Aliania have refused to grant the saloon keepers the privilege of keeping their saloons open after ten o'clock at night.

The Government of Canada has prohibite I the sale of intoxicants among the Indians of Hudson Bay territory, and punishes severely any violation of this law. "If it were not for drunkenness there would be no crime in Ireland at all. As it is there is no crime which does not arise out of that evil," says Archbisho; Croke of that country.

Seeds assistance it may be best to render it promptly, but one should remember to use even the most perfect remedies only when needed. The best and most simple and gentle remedy is the Syrup of Figs manufactured by the California Fly Syrup Co.

Brotherly Feeling of Anis.

A naturalist who has studied the ways of ants, writes Olive Thorne Miller, found that some of them feel friendship and pity for suffering, and he tells it thus: "One day, watching a small column of these ants, I placed a small stone on one of them to secure it. The next that approached, as

soon as it discovered its situation, ran backward in an agitated manner, and soon communicated the intelligence to the others. They rushed to the rescue. Some bit at the stone and tried to move it. Others seized the prisoner by the legs, and tugged with such force that I thought the legs would be pulled off; but they persevered until they got the captive free. I next covered one up with a piece of clay, leaving only the ends of its antennae projecting. It was soon discovered by its fellows, which set to work immediately, and by biting off pieces of the clay soon liber-The excitement and ardor with which they carried on their unflagging exertions for the rescue of their comrade could not have been greater if they had been human beings."

Moths.

Moths are not generally valued. Yet there are a few people who really spend time and money to collect them. The moth hunter goes out with net and bottle of chloroform. Moths are very fond of sugar, and are sometimes caught by what the professionals call

'sugaring."
Sugar is dissolved in beer and apolied to the trunks of trees, and when a light is thrown on the tree the moth will drop into the net beneath. The eggs of the moth are gathered by many and carefully guarded through all stages until the moth is developed. Some moths lay only one egg, othes two or three on the plant they love best. Some moths lay hundreds of eggs on one leaf.—New York Mercury.

Wedding and Funeral Together.

John A. Chittenden, of Ashley, Mich., on his death bed, requested that his sister, Louise, and her be-trothed, Charles A. Holmden, be married over his coffin. The wedding originally was to have taken place some weeks hence, but the date was changed to comply with the wish of the dying man, and while he lay in his coffin his sister and her sweetheart joined hands over the coffin while the Rev. John Glase performed the marriage ceremony. Then he delivered the funeral oration, and the newly married couple occupied the first carriage behind the hearse. - Cleveland

A NEW LEASE OF LIFE.

GOOD HEALTH AT SEVENTY, THREE YEARS OF AGE.

Miss Cornwall's Wonderful Recovery of Health-Became Well in Two Months Atter an Illness of

Six Years. From the Register, New Haven, Conn. In this rapid age of ours when so many en and women are old at fifty, one whe has lived three-quarters of a century, and then, after debility and suffering, regains health and vigor, must be regarded with a feeling akin to wender. A New England lady has been found who has had this re-

markable experience. In the family of Clarence Williams, a Chashire farmer on the Meriden road, Cheshire, Ct., lives Miss Cornelia Cornwall, a lady Ct., lives Miss Cornella Cornwall, a lady seventy-three years of age. For several years Miss Cornwall's health has been declining very rapidly, caused by a general debility. Her friends feared that the respected lady ind not long to live; but a kind Providence directed the aged lady, and in a newspaper advertisement Miss Cornwall read about Dr. Williams' Pink Pills—a few boxes of which she procured at once, and with the result that is best told in her own words. "About six years age." Miss Cornwall be-

of which she procured at once, and with the result that is best told in her own words.

"About six years ago," Miss Cornwall began, "my health commenced to fail. I suffered from loss of appetite and pains in different parts of my body. My condition gradually grew worse until my limbs were apparently unable to bear my weight, and I could no longer go up stairs without the assistance of some one.
"It consulted physicians who prescribed medicines for my blood. These I continued to take for several months, but without any effect. The sense of feeling in my lower limbs seemed to be leaving me, and I began to fear that it was hopeless to look for a cure. I was still suffering terribly from the pains through my body, when I chanced to read the story of a cure that had been effected with the use of Dr. Williams' Pink Pills for Pa'e People. I discovered that the town druggist here had none on sale, so I sent immediately to the headquarters in Scheneetady, N. Y., and secured two of the boxes of the pills.
"Lear December I commenced using the

"Last December I commenced using the pills regularly, and a month after I had been taking them. I felt greatly benefited by their vsc. The feeling in my limbs came back again, and in two mouths I was able to go about the house as I had been accustomed to a year before. Now, as you can see, I am enjoying good health. The pallor in my face was removed by the pills. A number of my friends in the neighborhood were complaining of symptoms somewhat similar to my own, and I recommended that they take Dr. Williams Pink Pills. They did so, and they tell me that they have been very much benefited by their use. I still continue to take the pills, though there is not so much necessity for them at present. As a purifier of the blood, I consider the Dr. Williams' Pink Pills are sold by all dealers, or will be sent post paid on receipt of price, (50 cents a box or six boxes for \$2.50—they are never sold in bulk, or by the 100) by addressing Dr. Williams' Medicine Co., Schenectady, N. Y. Last December I commenced using the

Seasonable Bargains

like overcoats or household goods, but this time 'tis Guns, Pistols, Revolvers, Bicycles, &c. Johnny gets his gun about this time of year, and to know just what to get and WHERE TO GET IT, is why the Lovell Arms Co. put out their New Mammoth Catalogue. It will tell you lots of things you knew before-lots that you didn't know. It's a sure money saver for a bargain hunter. It says nothing about a few Second-hand Bicycles, but they are bargains too and should be applied for at once.

JOHN P. LOVELL ARMS CO., BOSTON, MASS. Sole U. S. Agent for "STAR" AUTOMATIC PAPER PASTENER and WILLIAMS TYPE WRITER. Agents wanted in every city and town for the Lovell Diamond and Excel line of bicycles.

## SAPOLIO germ-life

The doctors tell us, now-a-days, that disease germs are everywhere; in the air, in the water, in our food, clothes, money; that they get into our hodies, live there, thrive and grow, if they find anything to thrive on.

Consumption is the destruction of lung-tissue by germs where the lung is too weak to conquer them. The remedy is strength—vital force.

Scott's Emulsion, with hypophosphites, means the adjustment of lung strength to overcome germ-life. It is fighting the germ with the odds in our favor. These tiny little drops of fat-food make their way into the system and re-fresh and re-invigorate it. Whether you succeed with it or not depends on how good a start the germs had, and how carefully you can live. The shortest way to health is the patient one. The gain is often slow.
