A Woman Diver,

From Palm Beach, Fia., comes the story of a woman thirty-eight years of age, a native of Jamaica, who has for twonty years been ongaged as a submarine diver. Her husband, Pedro Gomez, came from a Spanish family of sponge divers. While at Funchal, Madeira, in the Canaries, he became acquainted with an English diver, who gave him some ideas as to submarine exploration under scientific anspices. He went to Central America, and met his love and his business partner of today at Colon, on the isthmus. She fell into his line of life easily, and for ten years has done the better part of the hazardous work which he, as a manager, contracts for. She carries less armor than he does, and has inwented a helmet with a system of airpipes that she and her husband alone hold the secret of. It is claimed that with this helmet, securing her breathing connection with the upper world, she can wander almost at will through a sunken wreck. In a recent inter-view with the editor of a Jacksonville newspaper she says that in the course of 1000 descents to the ocean's bed within the ten yours that she has been in the business she has never met a sea monster or any other fish that would not fly from the merest wave of her arm. -- New Orleans Picayune.

Henry VL's Shoes.

When the tomb of Henry VL, of Sicily, who died in 1187, was opened at Palermo, forty years ago, it was found that on the feet of the dead monarch were shoes whose uppers were of cloth, embroidered with gold and pearls, while the soles were of cork. -St. Louis Republic.

Sound Sleepers.

Some very hardy, warm blooded people forget that summer is gone and sleep soundunder light covoring, even while Jack Frost is painting word pictures on the prost is painting world pictures on the panes. But we all learn by experience, and they find themselves in the morning suffer-ing with stiffarts, soremes, lamoback, stiff-neck or muscular cramps. Still, experience teaches. Like everybody olse, they get a bottle of St. Jacobs Oil, rub well with it and are cured. Warmer clothing, and the frost shut out, they score again happity, while from the towers of winter storm clouds the mentry cries, "All's well."

The drop in the production of pe-troleum in this country has had the effeet of stimulating au almost extinct industry in Scotland, the distillation of oil from shale. Fifty years ago it was of great importance and was ever worked under royalties in the United States, where there were between fifty and sixty coal and shale distilleries While the producers were at the height of their prosperity, the natural oil fields were opened and the old business went to pieces, so that only two Scotch companies were left in the field. Like most manufacturing en-terprises in Scotland, it was the waste products which turnished the profits of the industry. The mineral distilled is a bituminous shale or hard clay, and the product of the distillition, of which 57,000,000 gallons were made last year, bears little resemblance to coal oil. The waste products which have contributed to the continued existence of the industry are paraffine wax and sulphate of ammonia. The value of the former has been affected seriously by the output of the distilleries in this country, but the ammonia is produced only from shale, and the fluctuations in its price have decided very largely the profits of the business. The crude shale oil has to be distilled like petroleum and the lamp oil refined. from it has a higher flash point and density than that made from petroleum. As the price of oil has fallen, the shale distilleries have improved the retorts and stills to an extent which has resulted in the reduction of the cost of the finished oil to a little over four cents a gallon, about onesixth of the cost thirty years ago. It is impossible not to admire the dog-ged determination and enterprise which, year after year, has caused the accounts of the Scotch companies still working to show a saving in working expenses that has practically neutral-

A Novel Headache Cure,

A Boston apostle of physical culture says that an excellent and never-failing cure for nervons beadache is the simple act of walking backward. Ten minutes are as long as is usually necessary to promenade. It sometimes, however, requires more than ten minutes to walk at all if one is very "ner-vous." But it is not understood that it is necessary to walk a chalk line. And kind of walking will do, provided it is backward. It is well to get in a long, narrow room, where the windows are high, and walk very slowly, placing the ball of the foot on the floor and then the heel. Besides curing headache, this exercise promotes a graceful carriage. A half-hour's walk backward every day will do wonders towards producing a graceful gait. This is something like faith cure, which will not be attempted by the advanced woman, who will take no steps back-ward.-New Orleans Picayune.

A PRIEST'S EXPERIENCE.

A PRIMET'S EXPERITNCE. In a recent letter to the New York Tri-bune, the Rev. Sylvester Malone, the vet-seran restor of St. Peter and Paul's Church, Brooklyn, said: "When, on account on poor bealth, I revisited my natives (and, in 1881, I gave as a constant advice, and preached ublicity, that no one should leave Ireland for America who believed that alcohol was a necessity. I told them that is America it was a poison; that our elimate forbade its use, that it sont thomands I frish people to an untimely grave. My experience here of nearly sixty years, with my reading on the subject, has led me to and conclusions."

IT SHORTENS LIFE.

It ensures tire. There is no doubt that intemperance shortens life. In a recent modical work on the directive organs and faculties, a noted physician says. "The duration of human life may be assertained by the pulsation of the body. Say, a man lives seventy years, his heart beating sixty to the minute, the pulsa-tions in that time foot up to two and a quar-ter billions. If, by intemperance or any other cause, he raises pulsations to seventy-five a minute, the same number of pulsa-tions would be finished in fifty-six years."

TEMPERANCE NEWS AND NOTES. When run was invented the devil felt that e could take a little rast.

The baby's mission, its work in life, is growth. To that little bundle of love. half trick, half dream, every added ounce of flesh means added happiness and comfort. Fat is the signal of

perfect health, comfort, good-nature, baby-beauty.

SCOTT'S EMULSION is the best fat-food baby can have, in the easiest form. It supplies what he cannot get in his ordinary food, and helps him over the weak places to perfect growth, For the growing child it is growth. For the fullgrown, new life.

Be sure you get foot?'s Enculden when you mant it and not a cheep enterilate.

Scott & Bowne, New York, All Druggists. soc. and \$1,
