

Tainted Blood

isoned my whole system, local troubles being the origin of my suffering. My limbs and arms swelled and sores broke out. My nervous system was shattered and I became helpless. Medical treatment availed nothing.

Hood's Sarsaparilla gave me vitality at once. I gained rapidiy and the sores disappeared. I gained strength and was finally restored to health." Mas. ELEMIDOR E. SMITH, P. O. address, West Granville, Mass. Get Hoop's.

Hood's Pills are tasteless, mild, offer

A Remarkable Family History. At the meeting in favor of Cuban freedom in Chicago the other day the Rev. Dr. Frank W. Gunsaulus, the well-known Presbyterian clergyman of Chicago, said : "I am a Spaniard. The name Gunsaulus is the name of the Smith family in Spain and Cubs, Those of us who did not get into the ministry went into the eigar business, But while I have Spanish blood in my veins, every drop of it tingles with the memory that one of my ancestors was sent to a jail in Holland, put into a dungeon and kept there by the rapacity of Spain until at last, inch by inch and day by day, the water of the river let into that dungeon almost silently rose to his hips, and as he died his prayer was that no descendant of his might forget the violence and the outrage of wrong-headed Spanish Government. He was sensible enough to marry the daughter of a Puritan. Her father helped to lay the foundations of this Government in the first town meeting at Plymouth, and that Puritan grandmother has complete control of this house to-night."-New York Tribune.

By act of Congress the enlisted strength of our army, in time of peace, is limited to 25,000 men.

Here Relow.

"Man wants but little here below, and wants that little long." and just as long as he can get it. The words of the old hymn anve a meaning, which, interpreted that as the absence of all pain is supreme happiit. A short cut to the attainment of this is o use St. Jacobs Oil. It is a little thing to ret, but the amount of good it does in the rure of pains is something enormous.

HOUSEHOLD AFFAIRS,

INCERTES

Kitchen brushes can be put to a vaiety of uses. For the washing of lishes with handles, the outside of iron kettles and other cooking utensils made of iron, they are especially serviceable. The smaller sizes are also excellent for cleaning cut glass ware ; in fact, any kind of ware with raised figures or corrugated surfaces. For cleaning a grater nothing is superior to one of these little brushes.

Such a brush is also most useful for washing celery or lettuce, as the un-even surfaces of the stalk and leaves make a thorough cleansing with the hands a difficult operation. Then if one uses a brush with handle, ice water, which adds to the crispness of the celery and lettuce, may be used for the cleaning, as there will be no necessity for putting the hands in the A small which broom is also water. valuable for the same purpose. Such vegetables as potatoes, tur-nips, etc., are best cleaned with a

brush. It makes work less disagreenble, as the hands need not be soiled; and in no other way can the cleaning he so well and thoroughly done .-Farm, Field and Fireside.

USES FOR CHRESECLOTH.

Cheesecloth is used for dishtowels, scrubeloths, breadeloths, dusters, strainers, coffee bags and even tea bags, when the ten ball is out of order, or has not yet put in an appearance among the family silver.

Little bags with a thread run in to draw up and wind around the neck are a substitute for the tea ball and make a cleanly method of making tes.

Sash curtains no less than longer drapery prove how a small expenditure may be put to good and durable DUTDOSC.

Very fine and smooth cheesecloth, without the familiar black speck, can be painted in water color», large flowers conventionalizel being easily accomplished by stretching the stuff over a frame without a back, and paint-

ing in air so to speak. Cabinetmakers use it entirely to oil furniture, providing three cloths in every set-one to rub on the oil, one to rub it off and a third for polishing purpose

For baby's face it is soft, and for towels and squares it is recommended especially. The capacity to hold water makes cheesecloth or cotton material less irritating to chafing skins thau linen.

HOMINY BREAD,

A noted New Orleans housekeeper with Woman's World and Work said she was quite interested in the query of a Natchitoches "Country Housekeeper," with reference to the making of cornmeal bread with sour milk and the receipt given. Continuing the talk of housekeeping receipts generally, this lady, whose table is known as one of the daintiest and most palatable in New Orleans. gave me one of her own excellent receipts for the making of corn or hominy bread, which I reproduce for the special benefit of not only "country housekeepers," but

of city readers also. Take three cups of boiled grits, one enp of corn meal, two eggs and two tenspoonfuls of yeast powder. Beat well together, bake and serve hot with country butter.

"And by the way," continued this interesting housekeeper, "I always have made my own yeast powder for the past twenty years, and will give you my home recipe, which is unfail-ing in the proportions I have given for hominy bread. Take one pound of soda and two of cream of tartar and sift them thoroughly together three times. In using flour, the proportions are two teaspoonfuls to a pint of flour. -New Orleans Picayune.

THE W. C. T. U. AS A FACTOR IN THE WORLD'S **PROOBESS**

Remington's experiments in tone

THE W. C. T. U. AS A FACTOR IN THE WORLD'S FROORESS. The Worman's Christian Temperance Union is a mighty organization, wheel within wheel, yet simple in mechanism, compact, jeweled, self perpetuating. The component park of this society are found wherever the Gospel of Christ has gone. Our own National W. C. T. U., with its auxiliaries in every State and Territory, the Dominion W. C. T. U., of Canada, the British Woman's Temperance Association, together with those of some fifty other coun-tries, form the spokes of a great Salt Cath-erice wheel whose whole is the World's W. C. T. U., and whose creaties and foliations are the local anions. Our own National organization was the mother and mater of the World's W. C. T. U., which stands to-day as a many hued, brilliant, revolving wheel window, blasing upon the facade of the uneteenth century. Upon itstracery throb, not the dismembered body of a Saint Catherine, but the hearts of near hait a million of Caristian women, set there in a saccament of sacrifice for "God and Home and Every Land." The W. C. T. U. is but in its beginning. If all the spokes in this great St. Catherine wheel window become strong and perfect and its foliations and iraceries be wrought with love and reversuad.

important results. - Invention

with love and reversues by those who carve for sternity, and its colors shine slear and strong like those of the prism, the sun of righteousness will shine through it more and more, making it soft with love, bright with hope and clear as crystal with truth: and it will continue to the foredoct the will continue to burn upon the facade of the centuries irradiated with the light of Chris

HOW IT WORKS.

HOW IT WORKS. A mechanic who had been in the habit of dropping into a beer saloon twice a day, and spending five cents each time for a giass of beer, was captivated one day by a beek thought. "I am poor," he said to himself, "my family need every cent I can earn, it is spowing more and more expensive every year; soon I shail want to educate my chil-dre. Ten cents a week for beer! Let my see; that is sixty cents a week. That is thirty-one dollars and twenty cents a year. And it does me no good; it may do me harm. Let me see..." And here he took a piece of chalk and solved the problem on a board, "dean bay two barrels of floar, one hun-dred pounds of sugar. five pounds tea and it possesion of himself, he pounds of sugar. I've pounds tea and idea to take fall possession of himself, he other cent." He nover has, and he is toay a prosent workment warrent.

Converting Light Into Sound,

One of the marvels of modern cience is the conversion of a beam of days ago to do some work around the light into sound. The light ray is thrown through a lens on a glass ves-sel containing lamp black, colored an assistant. In a counte of hours the sel containing lamp black, colored an assistant. In a couple of hours the silk, worsted, or other substances. A foreman walked up to the Colosel's silk, worsted, or other substances. A foreman walked up to the Colone', 1 office and remarked : "Say, Colone', 1 is made to revolve swiftly in this want anndder man." "Why, what's beam of light so as to ent it up, making alternate flashes of light and with work?" input of the Colone! shadow. On putting the car to the glass vessel, strange sounds are heard upon it. Another phase of this remarkable discovery is still more interesting. A beam of sunlight is

passed through a prism. The disc is turned and the colored light of the solar spectrum is made to break through it. If the ear be placed to the vessel containing the silk, wool or other material, as the colored lights fall upon it, sounds will be given by different parts of the spectrum, and there will be silence in some other parts. To illustrate, if the vessel contains red worsted and the green light flashes upon it, loud sounds will be heard if the red and blue rays fall upon it, and other colors make no sound at all. Green silk gives sound best in red light. It is by no means improbable that this discovery fore-shadows a new law of harmonics, and

color may possibly, by this new ap-

plication of sight and sound, result in

some practical theory which will give

ns an entirely new scheme of music.

The thing is but in its infancy, but

the mere fact that such a discovery

has been made cannot but forecast

with you?" inquired the Colouel. "Oh, he fall down de shaft 'bout half an hour ago, an' he don't come up. so long as the flashing beam is falling tink he jumped his yob."-New York Tribune. No Witches Ever Burned at Salem. The same old blunder is always turning up. Here is the Ohio State Journal with an account of Salem. which is described as the town "where they burned witches in ye olden time." Salem never burned a witch either in olden or modern times .--

RECIPTE.

Potatoes-Cook small potatoes in the jackets. Heat a lump of butter in a skillet, peel potatoes and throw in the butter; cover and shake till the potatoes look mealy.

Frizzled Beef-Shred beef, pour over it cold water and let come to a boil (must not boil, as it toughens), pour off this water, add milk, a little pepper, butter, a well-beaten egg and thicken with smooth paste of flour.

Floating Island-One quart milk set in sauce pan, let almost boil; beat yolks of four eggs, one cup sugar, one tablespoonful cornstarch together. Pour in the milk and let boil until it thickens. Flavor when cold. Beat the whites very light with a little powdered sugar, lay by the spoonful upon boiling water for two or three minutes, and then place on custard, drop-ping a little jelly on each.

Celery Salad-Line a salad bowl with tender lettuce leaves. Cut a bunch of celery in small pieces and pour over all a mayonnaise dressing as follows: Beat the yolk of an egg with a saltspoon of salt until light, add one-half teaspoonful of dry mustard and beat again (always with a wooden or plated fork), add olive oil, drop by drop, until it is thickening, then a few drops of vinegar and same of lemon juice ; continue until the egg has absorbed a little more than a gill of oil. If liked add a little cayenne pepper,

Cornstarch Pudding-Boil one pint milk with two heaping tablespoons of sugar and some salt. When boiling stir in two tablespoons of cornstarch mixed with some water; stir till well ccoked and thick. Remove from fire and stir slowly into it two well-beaten eggs; put on fire till eggs are cooked, flavor with vanilla and cool. Serve with preserves or gravy made in the following way: Boiling water one gill, good sweet jelly one-half enp, teaspoon cornstarca mixed with cold water, juice of half a lemon and the yellow rind of one lemon, grated.

A Picnic on the Alps.

A picnie 10,500 feet above the sen level was recently given on the top of the Languard, in Southern Switzerland, by Sir Seymour and Lady King. The women were carried up on chaises a porteur, used for the first time on the mountain, by Italian bearers, the Swiss mountaineers having refused to undertake the risk. - New York Sun.

A recent funeral procession in a Wisconsin village was largely made up of men and women on bicycles, the de-coased having been a member of the bicycle olub.

SOBER WORKMEN WANTED

An examination of the Metal Workers "wasted" advertising columns reveals the following: "Must be compotent, reliable, total ab-

"Must be sober and industrious." "Want a man who is sober and capable," "Must be temperate." "Must be sober."

"Must be sober." "Strictly temperate." "Must he practical and sober." "No drunkard need apply." "Steady job to sober, reliable men." "Strictly temperate and industrious." "Drinking men need not apply."

A JUDGE'S TESTIMONY.

A JUDGE'S TESTINOSY. The famous indge, Sir Matthew Hale, said in his day. "The places of adjudicature I have long held in this kingdom have given me an opportunity to observe the original cause of most of the enormities that have been committed for the space of twenty years, and by due observation I have found that if the murders and maskaughters, the burglaries and robberies, the riots and tu-mults and other enormities that have hap-pened in that time were divided into five parts, four of them would have been the is-sue and product of excessive drinking—of tavern and ale-house drinking."

MORE WATER, LESS RUM.

MORE WATER, LESS RUM. The National Tribune, a leading G. A. R. paper, makes this significant statement of the comp at Louisville: "Two things great-ly asonished the Louisvillians. One was that the superintendent of the city water works reported that the consumption of water during the National Encampment in-creased one million five hundred thousand gallons a day. The other was that every-body who wont into extra arrangements for selling enormous quantities of beer and other liquors lost money."

HAD TO STOP AT LAST.

HAD TO STOF AT LAST. For many years Bismarck, the man of blood and iron constitutionally, was dited as the most notable example to refute the theory that even excessive and long-con-tinued indulgence in alcoholic beverages was projudicial to basht. His endurances was certainly remarkable, but Bismarck suc-summed at last to the all-conquering enemy and, acting upon positive orders of his phy-icidans, has not tasted a drop of liquor in any form for more than three years.

NOT A TEMPEBANCE FAD.

"It is not a temperance fad," says the London Times, "nor a more philanthropic coun-cil of perfection. It is the sober decision of unromantic men of business, from one end of Africa to the other, that an essential pre-liminary to successful administration is to prevent the sale or supply of spirits to the partners."
