"Mate" is Onits Scarce.

"Mate?" repeated a tea dealer a while ago. "Never heard of it. What

"A tea grown in South America, and it is drank more than Chinese tea by those people," was the answer of the man who had asked for the article.

This conversation was repeated in a dozen offices, till at last, concluding that the tea trade knew nothing of it, the man betook himself to the Uruguay Consulate. A man was found there who for years had resided in the Parana region, and who, when told of the quest, laughed, and pulling a little bag from under a table said: "I am not surprised. I guess this bag represents the sum total of mate in this part of the city. There is no trade in it, for only a few people who have lived in South America and have become attached to the tea, buy small quantities for their own use.

He opened the bag. It contained perhaps twenty pounds of leaves, ground coarse, of a dead green color, having no perceptible smell and of a slightly bitter taste. ."I got this," he went on "partly for myself and partly to send to the Atlanta Exposition. , we cannot infuse the tea as we do Chinese; it must be drunk boiling hot-not allowed to standelse it becomes insipid. So we have these cups and tubes," and he took from his desk a wood shell cup like a gourd, holding a scant half pint, and a tube about a foot long. Mate costs about two cents a pound down in Paragusy."—New York Press.

How the Earth Loses Time,

The explanation of Lord Kelvin's estimate that the "set back" of the earth in its daily rotation round its axis amounts to twenty-two seconds per century is reported to be that such retardation is owing to the friction caused by the tides, the latter acting as a brake, and such action is calculated, according to the same authority, to be equal in weight to some 400,000 tons applied on the equator. Other causes, he says, have also to be taken into account, as, for example, the increase in the size of the earth, due to the falling on it of meteoric dust, which, if deposited at the rate of one footin 4000 years, would produce the observed retardation by itself. Furgrowth and melting of snow and ice at got used to it, then take a little sip the poles, by abstracting water from the other parts of the ocean, introduces irregularities into the problem. the abstraction accelerating the earth's motion, and the melting, by restoring the water, retarding it. - Boston Journal of Commerce.

The phosphate will this broad land down to the ocean need to be liberally supplemented with may all be impounded and made to sandy soil, and some of the potash should always be used on heavy soils, as what they contain is often not in available form to be used as plant food. -Boston Cultivator.

TREATMENT OF FROZEN PLANTS.

"When the days begin to lengthen, the cold begins to strengthen," is an old weatherwise saying which is so true that often the window plants which have come through December unscathed will be frozen in January, writes "S. C." When one rises in the morning to find them in such plight making up the fire and warming the room as soon as possible will be fatal to all but the most hardy. On the other hand, if they are removed to a closet or the cellar and allowed to thaw gradually in the dark, many of them will be injured very little. I have frequently had geraniums come through the ordeal none the worse for it. Many persons cut the plants down at once, when they have been frosted, but this is not necessary with geraniums or shrubby plants, as they will usually put forth new leaves in a short

Begonias thrive better than most plants in the warm air of the sitting room, and hence are favorite plants for the window garden, but they are very susceptible to frost. A few va-rieties, the Vernon and Weltoniensis among them, will sprout up from the roots after being frozen down, but my experience with other kinds has be that it is useless to try to save them in such a case.

bloom frozen one very cold night.

The hyacinth before it flowers will bear considerable freezing, but it seemed scarcely possible to save the waxen bells of the flower spike. However, they want into the property possible to save the waxen bells of the flower spike. However, they want into the property pasteurized there is no cooked flavor present such as is noted in sterilized milk.

In manipulating butter, never allow the hands to come in contact with it ever, they went into the woodbox as soon as its contents had been emptied into the stove. A covering thick enough to exclude the light, and also the air for some time, was thrown over it. After some hours I peeped in. They had thawed, but the spikes were drooping sadly. They were allowed to remain in the dark all day, and by the next morning scarcely showed the effects of the cold. As a precaution against freezing it is well to water sparingly in very cold weather. The much in winter that it is always a pity to lose them. - New York Tribune.

CARE OF THE COWS.

on a bitter cold day sneak clowly up to the water trough where you have When packi broken the ice and stick her tongue is ther, such a phenomenon as the annual | the cold water several times until she and a little more until she could stand no more of it. Then she will walk slowly over the frozen ground until she gets in the shelter of an old wagon, and there with her back humped up she will stand for two or three hours shivering until what feed she has eaten has had time to warm that water up to a living temperature?

How long ought it to take a sensible man to find out where all of his feed is going, no matter whether it is a milk cow or a dry one. Nearly every pound she eats is needed to warm that water, and little is left to repair the body, much less to make milk or fat of. The heat the water for a small herd twice during the winter in food it will save able injury. and the milk it will allow the cows to make, and it will do the same in add- trees shows that there is an excess of

-Home and Farm,

IURIDATION OF GARDENS The importance of irrigation of garmakes the potash caustic. The caus- dens and farm lands is a matter of tic potash is very acrid, and cats the rapidly increasing interest to those lime in the bones and so softens them concerned. Irrigation has been somethat they may be crumbled with ease what of a bugbear to farmers always, after a month's exposure to the mixed the idea being that it required costly ashes and lime in a pit; so that with- works and much labor to accomplish out the ashes it is not possible to it, and it has always been associated soften the bones; the wood ashes are with the utmost aridity of climate and indispensible. When bones are burned toilsome cultivation of the soil. But the gelatine-which has fifteen per if there are in existence any districts of nitrogen in it-is destroyed, where more than in others the profits and thus the greater part of the ferti- of the farm are greater, and the ease lizing value of the bones is lost. - New of cultivation greater, too, with the certainty of maximum crops also greater, they are the irrigated districts of the far East. Indeed, some Potash rather than phosphate would of the causes of the depression in Eastern farming is due to the less cost of growing crops under irrigation, and the ability of the farmers to sell the ing a little phosphate in each hill, not | products of their farms at a low price, such as other farmers cannot afford to take. In fact, the time has come when soil the application of superphosphate irrigation must be made a practice wherever the water is available for it. always contains an excess of sulphuric For it is one of the laws of vegetable seid which sets on the soil and fits its growth that this is in proportion to

But it is in the growth of grass that the application of water to the land effective in preventing scab than any rivers and streams that flow through potash for potato crops grown on work for the farmer without cost, except for the permanent works required; and some of these need only be of the simplest kind. Here low banks thrown up by the plow, or otherwise by the horse scraper, will retain the water of a stream when it is high, while it deposits its load of disolved or suspended matters to add to the bulk of the low lands along its banks, and to increase the stock plant food in it. The water thus flows n at the higher end of the embanknent and, slowly moving down to the lower part of the stream, gives up its load to the greedy soil, and hastens on to the next farm, where it takes with it its newly gathered spoils, leaving them behind as it goes on and on

toward its final goal, the great ocean. Lands thus embanked are quite common all over Europe, and are so productive of grass and the related crops-all used for feeding-as to pay the interest on a value of \$1000 or \$2000 an acre. If the irrigated lands of the great West have lowered the value of the Eastern farms, why should not these take the same method of cheapening their products, while the nantity is increased, and so restore the old values to them? Irrigation, wherever it is possible, is one way to offeet this improvement. - New York

PARM AND GARDEN NOTES.

TEMPERANCE.

A WOMAN'S WORDS.

Mrs. Lake, the third Vice-President of the G. T. & U. of America, is at present speaking in New England in behalf of the total abstinence cause. Her views on the temperance question may be estimated from the extract from one of her recent addresses:

"The cause of temperance has been so often and well advocated," said she, to one of her audiences, in Connecticut, "that I will try to avoid the old-time beaten paths and put the matter before you in another light. I believe we have outgrown the idea that the rumseller must be abused. There is a channel through which we may control the traffic and that is through men's conscience. In this way we appeal to the better self, and that is the way I believe we should meet the question. We should deal with the subject as in the line of the man's duty to his God and his neighbor.

"The existence of the licensed saloon as it exists to-day is due to the careleseness of mea. Those who issue the license recognize a dauger in it and so restrict it so many feet from a church or school house door. If there is danger, then, why not keep it away from the home door? Restrict its use and prevent the poverty that now is the result of the use of strong drink. What will you say to the neglect of the children? This is one of the great questions in the whole subject—the rights of the little ones. My heart goes out to them and also to the drankard who is weak by nature and unable to withstand temptation. But he can have a chance to reform and much praise and good words can be given to the work and the works of the Keeley institution. It is the moderate drinker that is the greatest stumbling block to the temperance cause.

"Because one man can drink a little other young man think that they can do likewise

drinker that is the greatest stumbling block to the temperanes easise.

"Because one man can drink a little other young men think that they can do likewise and drink or not as they please. The best way is to join a total abstinence society and protect yourself and be a beacon for others. It would be a good thing if when the iteense question was voted on the voters had two ballot boxes tastead of one. Then I think we would have a difference in the result, The wealthy brower, the ward politician and The wealthy brewer, the ward politician and the barroom frequenter would vote in one hox, but the better class of cfilms would not want to be in that line and so would vote

E. P. DROWN'S APHORISMS. Elijah P. Brown, editor of the Ram's Horn, apressed the following thoughts on tomper-

waving at the edge of the bottomless pit. It is a warning; not a decree of vengounce.

There is as much of God's ove in a warning as there is an a precoming. g as there is in a promise.

The man who begins by drinking some me, may end by having to drink all the

Bev. J. W. Horsley, M. A., an eminent English elergyman and reform leader, on being asked resently, "Which produces more crime, do you thiny—drink or gambling?" replied: "Drink, undoubtedly. Gambling is an increasing plague among men, and also among women. But it is not a noticeable cause of crime among women, though I believe it will be. At present crimes through gambling are chiefly confined to certain classes—such as elerks and postoffice men. But drink counts for every form of crime—suicide, stealing, murder. In England and Wales fifty per cent, indirectly, attributed to intemperance, which is alightly decreasing among men, but largely increasing among men, but largely increasing among DRINE AND CRIME. intemperance, which is slightly decreasing among men, but largely increasing among women of all classes. Other chief causes of crime are the absence of direct moral teaching in schools, Sabbath-schools, and from the pulpit; the love of luxury and finory and the absence of a cumulative or progressive system of punishment for the same offeness. Poverty is to a very small extent the cause of crime."

THE MOTHER OF VICE.

It is a significant fact that the following denunciation of the liquor traffic should come from the "greatest newspaper in the world"—the London Times:

"It would be impossible to find anything which stands for so much loss to soul, body and earned as the public house. Even if we secept the best case that can be made for it in principle, the fact is it is still a huge nuisance and misory, there is not a vice or discase or a disorder or a satamity of any kind that has not its frequent rise in the public house. The public house degrades, ruins and brutalizes a large proportion of the British people."

IT BROKE HER BEART.

The following pitiful story of the ruin wrought by the rum demon, is reported:

A wretched mother dropoed dead about four weeks ago at the feet of the son who had been a burden and a sorrow to her. This son, who was thirty years old, instead of helping his mother, spent his wages for whisky. At last the mother concluded that committing him as an habitual drunkard might lead to his reformation. She was called to the witness stand to swear to the complaint, but the strain was too great for her, and she fell dead with the words on her lips, "It's breaking my heart,"

THE NATION'S BEER BILL

The total consumption of beer in the United States for the present fiscal year—figured up to July 1—was \$4,468,661 barrels, an increase over the consumption of a year ago of 191,000 barrels. This year's figures, while in excess of those of last year, are less than the total consumption of 1883, which was \$4,822,857 barrels. A barrel of beer in brewer's measure is about \$11\% gallons. The consumption of inger beer is the United States this year is, therefore, in excess of 1,000,000,000 gallons.—Constitution.

The Canadian Pacific Railroad for years past has refused to sell its land immediately adjoining its stations except upon conditions which preclude the sale of liquor thereon. A clause in each deed provides that the title shall become invalia and the property revert to the company in the event of its being used as a place for the sale of liquors.

TEMPERANCE NEWS AND NOTES. Gambling in large downtown saloons is again being carried on in Chicago. Rum outwits alike the teacher, the man of assiness, the patriot and the legislator,-

I consider the temperance cause the oundation of all social and political reform. James A. Garfield.

Judge Hughes, author of "Tom Brown's School Days," recently said that not a month passes that he does not commit at least 100 persons to prison for offences in which the direct influence of liquor is traceable. At a recent conference in London of many influential members of leading churches, the british Government was settlioned to ap-point a Parliamentary Committee to inquire into the extent and influence of the Equor

The drunken father brings his wife and children to poverty, he disgraces thom, he index his children from attending church and school; in a word, pauperism, ignorance and vice are the results of drunkenness in the father of a family. A NEW WITNESS.

HEAPING UP THE EVIDENCE .-

A West Troy Man's Testimony Added to that of Thousands of Others in Favor of the Wonderful Efficacy of Dr. Williams' Pink Pills for Pale Prople.

From the Times, Troy, N. Y. The effectiveness of Dr. Williams' Pink Pills has been recognised in thousands of instances in recent years and testimonials have been received from every quarter of the globe, praising in the highest terms this wonderful remedy, which has been of such incalculable benefit to mankind.

On a recent morning an instance in which he pilts had accomplished an admirable work was brought to the attention of a Times reporter, who started at once to ascortain the authenticity of the report.

It was in the village of West Troy, New York, that the object of the search resided

and seen after crossing the pretty Hudson the reporter was auccessful in locating his man, Lowis Forguson. Mr. Ferguson was found at his work in the

Mr. Ferguson was found at his work in the large box shop of Harrington & Co., where he is engaged as foreman. He greeted the scribe pleasantly and in conversation Dr. Williams Pink Pills were spoken of, whereupon Mr. Ferguson's face brightened and he began to tell of the good the pills had done for him.

Mr. Ferguson said: "About two years ago I had an attack of facial paralysis and my left side was affected. I heard of the merits of Dr. Williams' Pink Pills and decided to try them. I think that perhaps I used half a dozen boxes. The pills accomplished wonderful improvement in my condition, and I am now practically free from the effects of the paralytic stroke. I think the pills will do all that is claimed for them.

"I will vouch for the pills at any time," confinued Mr. Ferguson, "and I am perfectly willing that you should publish anything I have said."

The speaker, who talked with such carre-

I have said."

The speaker, who talked with such earnestness concerning Dr. Williams' remedy, is well-known in West Troy, where for twenty-eight years he has been connected with the

eight years he has been connected with the inmber business.

The sale of the pills in this vicinity has been very large, and their properties of having all the elements essential to give new life and rebiness to the blood and restore impaired serve, have been the subject of more than frequent comment.

Dr. Williams Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shaft red nerves. They are an unfailing specific for such diseases as locomotor staxia, partial paralysis, St. Vitus dance. tailing specific for such diseases as locomo-tor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, the after effect of la grippe, pal-pitation of the heart, pale and sallow com-plexion, all forms of weakness either in male or female. THE AERMOTOR CG goes man on soft.dissinding the cost so wind power to 1.5 what it was. It has reduced the cost so wind power to 1.5 what it was. It has many branch fecuses, and supplies its goods and regality to the cost of the cost o OPIUM Merphine Habit Cared in 10 to 10 days. No pay till cared. DR. J. STEPHENS, Lebanon, Ohio.

shake

The general belief among doctors is that consumption itself is very rarely inherited. But the belief is becoming stronger that the tendency to consumption is very generally transmitted from parent to child. If there has been consumption in the family, each member should take special care to prepare the system against it. Live out doors; keep the body well nourished; and treat the first indication of failing health.

Scotts Emulsion.

of Cod-liver Oil, with

Hypophosphites, is a fatproducing food and nervetonic. Its use is followed by improved nutrition. richer blood, stronger nerves and a more healthy action of all the organs. It strengthens the power of the body to resist disease. If you have inherited a tendency to weak lungs, shake it off.

JUST AS GOOD IS NOT SCOTT'S EMULSION. *****************************

Mr. R. L. Johns, of Selma, Ala., is in the habit of buying Ripans Tabules at White's Pharmacy at Selma. When interviewed at the time of a recent purchase, Mr. Johns said: "Ever since I was in the army, where I contracted indigestion and dyspensia from eating "hard tack and sow belly," I have suffered much from those and kindred ailments. A son of mine who clerks for J. N. Harter in a drug store at Winfield, Kansas, told me while home on a visit, over year ago, to get a box of Ripans Tabules and take them. I did, and in a very short time I was benefited, and by the time they were half gone I was well, and since then I have felt better, are more and relished it betterthan at any time since the war. and am doing more work now than I ever expected to do again. I tell you, they are the greatest medicine for a fellow's stomach I ever saw. This box is for a neighbor of mine out by me in the country. We always have them at home, and I never besitate to recommend them. when a fellow complains about his stomach hurting him. (Signed), R. L. Jouns,"
