HARRISON'S capture of a charming second wife is to be considered a Republican gain, of course.

STRANGERS from the interior bring the information that Senator "Billy" Flinn, of Pittsburg, still scares at the sight of a Quay poster.—Phila. Press.

THE Republican plurality of 11,278 in Rhode Island breaks the record, with the exception of the year 1862, when a Republican war Governor was elected without opposition. The first straw of 1896 comes from a small state, but it is significant.

THE Hon William F. Harry, the cheerful Adonis of post-Jeffersonian Democracy has called the Democratic National Committee to assemble in Chicago. The momentous question in this connection is, What is he going to do with it when he gets it there?

WITH only one dissenting vote in the assembly, and by a vote of 36 to 4 in the Senate, the bicycle baggage bill has passed the New York legislature. The terms of the bill are as follows: "Bicycles are declared to be baggage and shall be transported as baggage for passengers by railroad corporations and subject to the same liabilities, and no passenger shall be required to crate, cover or otherwise protect any such bicycle; provided, however, that a railroad corporation shall not be required to transport, under the provisions of this act, more than one bicycle for a single person."

THE WIDE TIRE WAGONS.

The last legislature passed a bill to encourage the use of wide tires on road wagons. The bill offers, as a premium for the fidelity of farmers and others in this direction, a one-fourth rebate upon all taxes assessed for the maintenance of the highways. The question has come before the Attorney General whether or not the farmer must use the wide tire upon all his wagons, used to carry more than 2,000 pounds, and the Attorney General has given an affirmative answer. If Mr. Jones residing at Penfield has four wagons, three with the wide tire and one with the narrow tire, and uses all four in hauling bark to the Clearfield tannery, and all carry loads in excess of 2,000 pound, he forfeits his right to the rebate because of the use of one narrow tired wagon. All must be wide tire. But if Mr. Jones uses his three wide tired wagons for hauling bark, all carrying 2,000 pounds, and his fourth one for some lighter traffic, huckstering or for family purposes, loading it with traffic below the regulation weight he is entitled to the rebate.

This would be true of the farmer who has a wide tire wagon that he uses for heavy hauling, and a family carriage. He would not forfeit his right to the rebate by driving his narrow tire carriage to church, or otherwise, providing he hauled less than 2,000 pounds. The rule is very simple but of such a nature as to preclude the use of mixed wagons for purposes of general traffic when such wagons carry more than the weight prescribed by the Act of Assembly.—Clearfield Journal.

It appears that the single state of Georgia now has more manufactories than the whole South had in 1860. This is an illustration of the remarkable change that has been taking place in Southern industries during the past thirty years. That section is no longer giving all its attention to agriculture, but is reaching out for additional means of prosperity, in imitation of the North.

The S. S. Convention.

At the call of Rev. J. C. McDonald, of Oil City, District President of the State Sunday School Association, delegates from a number of the Sabbath Schools of Forest county met in Marienville M. E. church the evening of April 6th for the purpose of forming a county organization. The convention continued through the day and evening of the 7th, and judging by the attendance and interest, was a pronounced success. Two State officers, Dr. Kephart and Mrs. Barnes, were present and made many friends by their earnestness and zeal. Excellent addresses were made by Revs. Earseman, McAinech, McDonald, Stewart, P. M. Clark, Esq., Dr. S. S. Towler and others. The meetings were largely attended, which speaks well for the interest the people of Forest county and Marienville have in the Sunday School work.

A permanent county Sunday School Association was formed, which will hold annual meetings. The officers elected for the ensuing year are: President, Dr. S. S. Towler, Marienville; Vice President, F. X. Kreitler, Nebraska; Secretary and Treasurer, Mrs. Jennie Patterson, Marienville. The above officers, with Josiah Work of Redcliffe, Mrs. J. B. Hagerly, Miss Nannie Morrow and H. M. Foreman of Tionesta, constitute an executive committee and will fix the time and place of holding the next annual meeting, and look up constitution and by-laws and other matters of business for the Association.

Many points of interest were brought out by the exchange of ideas and suggestions made by this convention, and if the work there started is carefully followed out will certainly result in an increase in the Sabbath School work all over the county.—Marienville Express.

Mr. Thompson and Mrs. Whiteman, of Tionesta; Mr. Lowman and Mrs. Patterson, of Marienville; Mrs. Black of Fross, and Mr. Cosgrove of Clarington, were chosen as a committee on permanent organization and following is the report made by them:

First—We recommend that the convention adopt the constitution recommended by the State S. S. Association, subject to such changes as executive committee shall deem proper. Second—That we nominate the following officers: (Same as above mentioned.) Third—That the executive committee be requested to district the county, appoint district presidents, and, through them, arrange for holding district conventions and the thorough organization of each district.

School Directors' Convention.

To the School Directors of Forest County, GENTLEMEN: In pursuance of the forty-third section of the act of May 8, 1854, you are hereby notified to meet in convention, at the Court House in Tionesta, at 2 o'clock p. m., on the FIRST TUESDAY IN MAY, 1896, being the fifth day of the month, and select, viva voce, by a majority of the whole number of directors present, one person of literary and scientific requirements, and of skill and experience in the art of teaching, as County Superintendent, for the three succeeding years; and certify the result to the State Superintendent at Harrisburg, as required by the thirty-ninth and fortieth sections of said act. AGNES KEHR, County Supt. of Forest County. Tionesta, Pa., April 7, 1896.

OF INTEREST TO LUMBERMEN

The Outlook in the Market at Pittsburg and the Supply to Draw From.

With the advent of spring comes the annual production of lumber from the Allegheny and its tributaries, the Clarion, Red Bank and the Mahoning. This season the output which will find its way to the Pittsburg market with the spring freshets will exceed in quality that of last year, but will be much less in the aggregate number of feet. On account of the low water there is now less than 250,000 cubic feet of square timber here, but a large amount to be distributed along the various streams as follows:

On Tionesta creek, or the upper Allegheny, Dickey, Collins & Co. have 125,000 of square pine and from 50 to 100 barges. Collins & Siggins have about the same amount of square timber; this is all pine.

From the Clarion comes the largest supply. Truman, Henderson & Co. have 500,000 feet of pine. This lot is said to be the finest timber floated on the Allegheny tract in Jefferson county, was hauled six miles, cut, rafted and to be delivered by Harsh & Vashinder. Hall, Gardner & Co. have less than 200,000 of hemlock; Taylor & Moore, 150,000 hemlock; W. D. & S. H. Shields, 140,000 hemlock; Dickey, Moore & Kelso, 80,000 square and 400,000 feet sawed hemlock, also 20 pairs of boats; Vashinder & Hunter, 400,000 hemlock; Vashinder, A'Harsh & Eason, 35,000 pine and hemlock; Vashinder & A'Harsh, 50,000 pine and oak; James A'Harsh, 80,000 hemlock; Barrett & Crossman, 100,000 hemlock; W. A. Crossman, 140,000 hemlock; Truman & Rogers, 100,000 pine and oak; Braden & Catts, 50,000 hemlock; Cook & Co., 150,000 pine.

The Red Bank is far behind the usual supply, and will send little over 300,000 square feet. Ab Neal has 100,000 pine; Benjamin Snyder, 25,000; Charles Corbett, 100,000, and Carrier, Hall & Co., 50,000. On the Mahoning the supply is about exhausted, and only a few odd rafts will come from there.

The run of boats will be extremely light, not over 400 pair being put in on all the streams. The low price governing last year's sales scared the up-river people and they limited the supply.

The outlook for fair prices is very good, although no timber has yet been sold. First class barge pine will bring 20 cents, hemlock 8 cents, oak from 10 to 14 cents, sawed hemlock, \$9.

Of the lumbermen, C. R. Vashinder, S. H. Shields, S. A. Hunter and Doverspike are in town ready to sell. With the next rise most of the timber will get in, as those controlling it are encouraged over the outlook and will rush things when the water comes. At the present rate of cutting, 10 years hence will see the last of the timber business on the Allegheny, and those who have been following it so many years must retire to get into something else.

The outlook for a brisk trade in lumber among the local dealers is not so encouraging as would be expected. J. P. Walters of the well known lumber firm of J. P. Walters & Co., in a conversation yesterday said he did not look for a very big boom in the demand for lumber of any kind at present. As to building lumber, the backward spring and the unsettled condition of the weather no doubt had much to do with the dullness of trade. The sales of yellow pine are larger this year than last, but the territory covered is also larger. Prices of hemlock are little better than last year, and the demand is about the same. The price of yellow pine are better because the whole output is controlled by the Southern Lumber association and they are strong enough to keep the price up. In white pine there is little or no improvement either in demand or price. One noticeable fact in the white pine trade is the crowding out of the Michigan pine by the Wisconsin product, which is of better quality and sells at a lower figure. Mr. Walters gave as his reason for this peculiar fact that overproduction in Wisconsin forced the manufacturers to undersell their Michigan competitors in order to get their money for immediate use. Besides, the Southern lumber is gradually crowding the Northern product out of the markets everywhere. It is claimed that all grades of lumber can be manufactured in the South much cheaper than elsewhere, consequently the trade will go where the price and quality are most advantageous. Oak is about up to last year's mark in the general market, although the railroads are buying much more than heretofore, which seems to be a very good sign.

The demand for hard woods is greater than last year and shows much good building is contemplated. This condition of the trade, Mr. Walters claimed, was not only true of Pittsburg, but of Ohio, New York, New Jersey, Massachusetts and Connecticut, as they had close relations with the trade in all those States. Speaking further of the hemlock trade, he said there was no good reason why the demand and price of hemlock should not improve, as the output last year was less than 70 per cent. of the 1894 production. The Pennsylvania mills have but little stock on hand and the hemlock yards throughout the country were, comparatively speaking, about empty, so if there is a demand the price ought to be good.

To-day the Pennsylvania lumbermen who manufacture and ship East by rail and the Susquehanna, and west by rail and the Allegheny wonder how it is that, notwithstanding the fact that prime lumber is annually getting scarcer in Pennsylvania, that a few years will see the last of the splendid pine of the Mahoning and the West Branch, the prices are really lower than twenty years ago, when the supply was considered inexhaustible. They overlook the fact that the South has a vast supply of pine and that Southern manufacturer can get as good freight rates from Alabama and Tennessee as can the Pennsylvania manufacturer from Elk, Clarifield and Tionesta. This seems strange, but is nevertheless true. It is but a few years since there was not a foot of Southern lumber sold in Pittsburg, and a few years before that nothing west of Michigan found a market here, but now the sawmill from as far west as the Mississippi as well as those near the Gulf of Mexico send their products to Pittsburg, and the latter two have the best of the contest, as they have an unlimited supply to select from. The manufacture of lumber in Pennsylvania is fast coming to an end, but the people will not suffer for lumber, as there is enough in sight for the next 200 years at least.—John F. Short in Pittsburg Times.
