The Cuban insurgents will not accept any terms which include the continuance of Spanish sovereignty over the island. They have been fooled often enough with promised reforms, and are now determined to have independence.

It is estimated that New York city during business hours contains a population of 3,400,000, the railways and ferries alone bringing to it town over 300,000 passengers. The time is near when Manhattan Island will be the only nucleus of the city.

The Venezuelan Commission is proceeding in a very deliberate way, and will probably not be ready to make a report before next December; but meanwhile it will be observed, England is carefully pursuing a policy of inactivity in the case, and so there is no reason for haste on our part.

The Massachusetts Democratic platform places the responsibility for hard times on the last Republican Administration. This is not claiming much for Democratic ability. A party that can not take hold of bad times and restore prosperity will be bounced, and bounced hard, by the American people.

It is proposed to send 40,000 unmarried women from Eastern Canada to British Columbia for the purpose of supplying the demand for wives. The same thing was once done by France, it will be remembered for the benefit of the preponderant bachelors of Eastern Canada, and the results were entirely satisfactory.

The Democratic State convention, which met at Allentown last week, launched ex-Gov. Pattison's Presidential boom, nominated James Denton Hancock of Franklin, and Benj. C. Potts of Delaware county, for congress-at-large, and elected among the district delegates to the Chicago convention, Judge Charles H. Noyes, of this district.

While the Russian railway across Siberia will be comparatively free from snow, passengers in winter must expect to experience some pretty cold weather. The average January temperature along the west end of the route is only three degrees above zero, and occasionally the mercury goes to 50 degrees below. The general course of the road is several hundred miles north of that of the Canadian Pacific. In summer the temperature will range between 68 and 77. At Vladivostok water freezes 150 days of the year, but it is as good as settled that the eastern terminus of the road will be several hundred miles south of that city.

Flag Raising on Fleming Hill.

Friday, May 1st, having been appointed for raising the stars and stripes over the Fleming Hill school building, was a day of interest and pleasure not only to the young people of the vicinity, but to their elders, also. The weather was favorable, and the many, who, inspired with a feeling of patriotism assembled to witness the raising of "Old Glory," did credit to the surrounding country. The flag is of the best material, eight by fifteen feet, and floats from the top of a fifty foot pole. Soldiers, remembering days long past, and inspired with a feeling which none but they can know, because they realize to the fullest extent the price at which our country's flag was purchased, came from far and near. Besides the Neiltown and Fagudus veterans, we were pleased to see the Eli Berlin post well represented. The teacher, Miss Ellen Hull, opened the exercises by raising the flag to its proud height, while "Unfold the Starry Banner" was sung. This was followed by a salute and cheers by the G. A. R.

The interior of the building was tastefully decorated with evergreens and flags. The exercises in the school house were opened by prayer by Rev. Hillard. The program which was highly entertaining was as follows: Recitation, "One Flag," Master Maurice Brewster; Recitation, "The Starry Flag," Miss Pearl Green; Essay, "The Star Spangled Banner," Miss Elizabeth Hull; Recitation, "The American Flag," Miss Ellen McCarthy; Singing, "The Star Spangled Banner"; Recitation, "Our Country's Flag," Master Ernest

King; Song, "America." Comrade Albaugh now addressed the audience. His patriotism and love for the flag shone forth in every word. Comrades Higgins, Bogman and Peterson made pleasing remarks, followed by a jolly camp-fire song by Comrade Burns. The patriotic address delivered by Rev. Hillard was expressive of deep thought and sincerity. At the request of the soldiers Messrs. R. E. Scott and R. W. Pimm made a few well chosen remarks. Mr. Pimm spoke in behalf of the pupils of the school, assuring the veterans that the flag which is so dear to their hearts would be nobly defended by young America, should it please their country to call on them. "Patriots, Noble and True," was then sung by several young ladies. On returning to the open air the school gave three cheers for the veterans, to which the soldiers responded with cheers for the school, the teacher and the flag. Thus ended the ceremonies of raising the banner of the brave as a benediction of peace and light to all who tread beneath its bright folds.

Unfold the Starry Banner,
Let it wave o'er land and sea;
A beacon light to glory
And a guide to liberty.

An Ohio Trip.

Thinking that some few readers of the REPUBLICAN might be interested in a recital of a few pleasant adventures of a lumber peddling trip down the Ohio valley, we will here try to relate our experience.

Leaving McCandless' landing, or better known to up-the-river men as Lory's landing, on Thursday, April 23, at 5 a. m., under the guardianship of Capt. W. H. Geer, we were successfully piloted through the 10 bridges to where the Ohio, well named by the old French settlers, LaBelle river, is born and begins its onward march to join the "Father of Waters" at Cairo, a thousand miles away. The first object to greet the eye was that magnificent hostility put up by the State of Pennsylvania for the entertainment of its wayward sons and daughters, the Western Penitentiary, a truly magnificent building, but a grim reminder that it pays one to be good, at least for the remainder of the trip. Owing to a few business matters we cast anchor at Jacks Run and remained there all day. Owing to the thickness of the fog next morning we were late in starting on our real journey; however, as soon as the dense white mist began to ascend, we were brought to our oars and once again we were in the deep and muddy waters. Next, the celebrated Davis Island dam came in view, built by the general government for the benefit of the Pittsburgh harbor and its coal interests. And now on our left we have Neville Island, the largest island on the upper Ohio, with its beautiful garden farms and homes, and on the right rising high above the river on its perch upon the cliffs, lovely Dixmont—the home of (in their minds) kings, queens, dukes, duchesses and potentates—the Insane Asylum. A little farther down, on the right, Sewickley, the beautiful suburban home of so many of Pittsburgh's wealthy business men. The next in line is Dead Man's Island, on our left. Years ago this island was much larger than it is to-day, and the reason of its being named "Dead Man," we learn from our friend, Capt. David Henderson, of Powhatan, Ohio, that when any one was drowned above he was sure to be found on the head of the island. It was at this same place that 30 coal barges loaded with coal for the lower markets were sunk last fall. One can see tracks of the wreck yet. Soon the twinkling lights tell us that we are passing the abiding place of that queer sect, the "Economites," who have answered to their satisfaction in the affirmative that question which has been agitating the minds of the world "Is marriage a failure." We find that the queer old colony has been fortunate in possessing several large oil wells, the production of which is very enchanting. The next place of importance is Rochester, Pa. This place is noted for its extensive glass works, such as bottles and tumblers; the largest works of this kind is situated here. Just below us the Beaver river joins the Ohio, and here it is that the government proposes to build a ship canal, uniting the limpid waters of Lake Erie with those of the LaBelle river. There is also a new river bridge in construction at this point that will cost a fabulous sum before being completed. We are continually passing interesting places which fill one with interest and wonder. After leaving Rochester we pass Vanport, Morrill, Industry, Shippenport, Georgetown, and then comes Lima Island, from which we passed into Ohio and West Va., leaving the dear old Keystone state in our wake until our return. Next comes East Liverpool, celebrated the world over for the extent of its pottery, having the largest manufacturing works in the world. Our next place is Wellsville, Ohio, where we land for the night, having covered a distance of 45 miles. Here we acted as deck hand and left a small portion of our wares, and leaving early in the morning we pass such places as Yellow Creek, New Cumberland, Toronto, Brown's Island, Steubenville and Mingo, landing for the day at Brilliant, O., opposite Wellburg on the West Va. side.

Our next stop is at Martins Ferry, where we disposed of considerable of our stock to Bridgeport parties. Early next morning we pass Wheeling, which stands second only to Pittsburgh in the number and extent of its manufacturing, and ranks at the head of all the American cities in the output of nails. Passing Reilaine our journey is continued and the beautiful panorama of the great bend and curve in the river unfolds to our delighted gaze seen more beautiful than the preceding one, until we loose sight of the last that we are traveling on a river and wonder if it is not some beautiful highland lake our raft is on. From Wheeling to Powhatan no grander scenery can be viewed from the deck of a raft in this country, the highlands of the Hudson not excepted. We do not expect to go much farther down on the river voyage, and if we find any little incidents worthy of mention we may add a note of it in our next letter.

I will now name the crew of the "floating Palace": First Captain, W. H. Geer; Second Captain, James J. Rogers; First Mate, A. L. Weller; Second Mate, Jack Stroup; Motorman, Harry B. Dettler; Steward, Harry R. Thompson; Foreman, Willie A. Collingswood; Shingle Packer, George Brewer; Boat Clerk, Joe Miller. During our spare moments, we are constantly yanking out the beautiful panorama of the great bend and curve in the river unfolds to our delighted gaze seen more beautiful than the preceding one, until we loose sight of the last that we are traveling on a river and wonder if it is not some beautiful highland lake our raft is on. From Wheeling to Powhatan no grander scenery can be viewed from the deck of a raft in this country, the highlands of the Hudson not excepted. We do not expect to go much farther down on the river voyage, and if we find any little incidents worthy of mention we may add a note of it in our next letter.

Did you ever think how readily the blood is poisoned by constipation? Bad blood means bad health and premature old age. DeWitt's Little Early Risers, the famous little liver pills, overcome obstinate constipation. Health & Killmer.

A. L. Wooster, a prominent citizen of Cossco, Mich., after suffering excruciatingly from piles for twenty years, was cured in a short time by using DeWitt's Witch Hazel Salve, an absolute cure for all skin diseases. More of this preparation is used than all others combined.

Young mothers dread the summer months on account of the great mortality among children caused by bowel troubles. Perfect safety may be assured those who keep on hand DeWitt's Colic & Cholera cure, and administer it promptly. For cramps, bilious colic, dysentery and diarrhoea, it affords instant relief.
