WAGES OF WAITER GIRLS.

The girl waiters in a first-class lunch room are paid more than the average of women workers at other employments. They receive \$8 a week and their meals for working eight hours a day, \$4 for half time, five hours, and thirty-three cents for four hours of extra work. It is unskilled labor. No previous experience is required, and there is a great deal of competition for that reason. The "tip" is almost unknown to the lunchroom woman waiter.

"We have to work hard," said one girl, talking of her labors one day, but it is easy to learn how to do the work. I had never waited on a table before, and I began on full time. But you never did see anything like the way people act here when there's a crowd. They will not do a thing un less you say please. I come along with a lot of boiling hot coffee and call 'One right in the middle of the floor until I say 'One side, please.' We do not get 'tips' very often, although one of our young women got \$2.70 tion night. A gentleman gave me fifty cents once, and sometimes we get five cents or ten cents. A man gave one of the girls a penny once. She gone. Perhaps he thought it was a five-cent or 10-cent piece,"-New York

EMANCIPATION IN ICELAND.

How does it happen that the woman of Iceland has quietly possessed her-self of emancipation long before the women of Europe and America an effort as possible, are quite the dreamed of clamoring for it? From the earliest period the leelandic wom-dressing. an has enjoyed distinct individuality. The wife has always held the place of an equal with her husband in matters pertaining to the home, says the San Francisco Wave. In the old days she wore a bracelet, from which hung the insignia of office-her keys and purse. Now that she has laid aside the gold wristband, these significant household acconfrements are carried in the dress parish she has her vote, and, as the prestige than feather fans. church and State are combined, this is really a civic privilege.

Millions in Silver Coin.

The Imperial Russian Mint at St. Petersburg, and the ateliers of the Hotel des Monnaies, as the Paris Mint is called, are both busy just now with a huge task of turning gold and silver bullion into coins stamped with the effigy of the new Czar Nicholas II. The total value represented by this issue of coin will be over \$750,000,-000. The gold coins of this vast sum are being struck at St. Petersburg, but the contract for minting the great quantity of silver pieces of small denominations has fallen to France. This is the first commission of the sort that France has received from the Russian Government since 1862. The metal which serves for the fabrication of these new silver pieces comes from the United States.

The greatest number of coins struck

will be of the denomination of one ruble, of about eighty cents value. Upon its face is the profile of the Czar, surrounded by the words in Russian characters which mean "By the grace of God, Nicholas II., Emperor and Autocrat of all the Russians." Upon the reverse are stamped the imperial arms, the value, and year

The workshops of the Hotel des Monnaies, where there coins are being struck, are so finely equipped for their purpose that, aside from the money of France, they are kept busy continually executing orders from other countries Each of the six furnaces in which the silver is melted is capable of containing from 1500 to 2250 pounds of metal. The machines for stamping the coms are remarkably ingenious pieces' of mechanism, sixty pieces of money being struck by each of them per

A Portrait's Eyes.

Waliaston's curious discovery was that by adding to each pair of eyes a nose directed to the right or the left the eyes lose their front direction, and look to the right or left, according to the direction of the nose. By means of a flap representing the lower features in a different position, as Dr. Wallaston remarks, "a lost look of devout abstraction in an uplifted countenance may be exchanged for an appearance of inquisitive archness in the leer of a younger face turned downward and obliquely toward the opposite side.'

As by changing the direction of the lower features we change the direction of the eyes, so by changing our position the eyes of the portrait apparent-If a verticle line be drawn through the tip of the nose and haif way between the eyes there will be the same breadth of head, of cheek, of chin, and of neck on each side of this middle line, and each iris will be in the middle of the whole eye. If we now move to one side, the apparent horizontal breadth of every part of the head and face will be diminished, but the parts on each side of the middle line will be diminished equally, and at any position, however oblique, there will be the same breadth of face on each side of the middle line, and the iris will be in the center of the whole of the eveball, so that, being on a flat surface, the iris will be seen in front of the picture or obliquely. - Notes and Queries.

Burial Alive.

A commission of physicians is forming at Tarin in Italy for the purpose of investigating the subject of appar-ent death. Owing to the small delay necessary between death and burial in that country the subject is of great importance. The signs of apparent death have undoubtedly led to the in-

terment of many persons still living. Turin furnished a remarkable instance of the danger. A physician of that city, who had done admirable service all through the epidemic of 1884, fell at last a victim to the malady, was certified as dead, and was already laid out in his winding sheet, while his family, in an adjoining room, were awaiting the arrival of the undertaker. Suddenly they heard a faint sound at the door, which was then feebly opened and there they saw the physician himself, who half an hour later might have been hermetieally sealed in his coffin, supporting himself against the door post and upbraiding them in a voice scarcely au-dible for having neglected him so long. The panic stricken family had him at once replaced in bed, and, with the best aid that could be got, endeavored to resuscitate him, but in vain. He died shortly after from cardiac failure.

A Monster Pic.

Denby Dale has caten its big Corn Law Repeal pie. It contained 1120 pounds of beef, 180 pounds of veal, 112 of mutton and sixty of lamb; the erust was made of 1120 pounds of flour and 160 of lard. The dish was ten feet long by six and a half wide and one foot deep. Dish and pre weighed thirty-five hundred weight and cost \$1250. The pie was drawn in procession by sixteen horses from tha oven to the place where it was cut up. It was preceded by an eighty-year-old corn law agitator, who was accomdressed in rags carrying a banner with the words, "Flour four shillings a stone, 1856," the other in good clotues, bearing a banner inscribed, "Flour one shilling a stone, 1896."-New

HOUSEHOLD AFFAIRS,

CANNED CORN.

Select corn that is full in the milk, out not hard. With a sharp knife score the kernels by cutting through the center of every row, then cut from the cob and with the back of the knife scrape all the milk off the cob. Put about a teacupful into a quart jar and sound it down with a small wooden man', made like a potato masher ; keep adding corn and pounding it down un-til the jar is filled to within half an nch of the top. There must be no air spaces between the kernels and the milk must fill every space. Put the rubber on and the cover about halfway, set the jar into a kettle of cold water, having placed a piece of board between bottom of jar and kettle; let it boil three hours, then screw the cover on as tightly as possible - then boil one hour longer. As soon as the jar is cold, wrap in brown paper and put on its side in the coolest part of the cellar. By using a wash boiler to boil them in, four jars may be canned at a time. - New England Homestead.

THE MODEL LINEN CLOSET, Every housewife knows the comfort of having a cupboard set aside for the sole use of the house linen. It should be her pride to see that everything contained in this cupboard is neatly arranged on the shelves, and where, at any moment, she will be able to lay her hands on any separate article. To attain this she must herself arrange the linen on the shelves, and must not allow any one else, who is likely to disarrange it, to go to the cupboard. Let me, then, show you which is the best method of arranging the linen cupboard. I will take an imaginary cupboard, which has four shelves. On best method of arranging the linen cupboard. I will take an imaginary cupboard, which has four shelves. On the first shelf should be placed all the bed linen, sheets, pillow cases, etc., of Sayony.

regiment in the town of Ischatz, in Saxony. In France, twelve properties that the properties of Sayony.

On the second shelf all the bed furniture, curtains, etc. ; on the third shelf all the table linen, together with any toilet mats, doylies, otc., and lastly, on the fourth shelf, should be placed towels, kitchen linen and the various oddments which are a necessary adjunct to make up complete set of house linen. Like all cupboards, the linen chest requires frequent overhauling, for the tiresome serviettes, toa cloths, etc., will wear out and want replenishing. In most cases it is a wise plan to replace each | For sale by all responsible druggists, article as it wears, and in this way you will always have the full set of linen and will not suddenly find that you have not sufficient table napkins to go round. - New York Advertiser.

TO GARNISH COLD DISHES,

Plain every day dishes at the home table may be made more appetizing if the young housekeeper will instruct her maid of all work to pay a little more attention to them, or if she will devote a few moments before each meal to seeing that the dish is prettily

Cold roast lamb is good; but who wants to have it placed before him in a whole leg or shoulder, without a sprig of green, on a hot day? A simple and effective way to serve cold lamb is: Select a large loin and have your butcher cut each chop up to the joint; crack the joints, but do not separate them, and remove the meat an inch from the end of each chop bone. Now draw the two ends of the loin together and tie, spreading the small ends so they form a circle, and roast as you would any piece of meat, only remembering that the chops be-ing separated, the meat will cook more

This lamb may be served hot or cold, but, if it is cold, ornament the end of each chop bone with a fringed and curled paper cap, stick a bouquet of mint or parsley in the top, and the platter between each pair of chops put a spoonful of cold boiled string beans or peas, and on the green bed a small red ball cut from boiled beets Serve a French dressing in a separate dish for the vegetables.

This is but one of many ways. If the housekeeper shows interest in having the home dishes prettily garnished the maid soon will be and will find she, too, has a brain and can surprise you with some ingenious device. - American Cultivator.

HOUSEHOLD HINTS. Try molasses for grass stains. Throw flour on kerosene flames. Rips tomatoes will remove ink stains.

Remember, slamming the door of the oven makes cake fall. A few drops of lemon juice makes

cake frosting very white. A hot shovel held over varnished furniture will take out white spots.

Try sprinkling powdered cloves about the places infested by red ants. To prevent the salt from caking in damp weather, mix a little cornstarch

A little flour dredged over the top of a cake will prevent the icing from

By mixing two teaspoonfuls of gly-cerine with one tablespoonful of lime water and one teacpoonful of paregoric, you have an excellent gargle for a sore thront. It is said if camphor gum is put in

the drawers in which silver is kept that is but seldom used the camphor will prevent the silver from becoming A heavy flatiron, weighing seven or eight pounds, will do better work if it is passed over the clothes once with a firm, steady pressure than a lighter iron hurredly passed over the clothes

two or three times. If a lamp burner is occasionally boiled in vinegar it will cleanse every part of it, and it is said that if the wicks are soaked in vinegar before they are used at all and then thoroughly dried they will draw well and will

not smoke. A half-cupful of milk added to dishpan half full of hot water will be found very beneficial in washing dishes. It gives the dishes a clean, polished look, softens the hardest water, preserves the hands from chapping, and also prevents a greasy scum from appearing on the top of the water.

When swansdown becomes soiled it can be washed in the following way: Baste the strips on a piece of muchin and wash in warm water with whise castile soap; then riuse and hang in the wind to dry. Rip the pieces from the muslin and rub them carefully between the fingers to soften the skin.

The Blue and the Gray.

90000000000000000

Both men and women are apt to feel a little blue, when the gray hairs begin to show. It's a very natural feeling. In the normal condition of things gray hairs belong to advanced age. They have no business whitening the head of man or woman, who has not begun to go down the slope of life. As a matter of fact, the hair turns gray regardless of age, or of life's seasons; sometimes it is whitened by sickness, but more often from lack of care, When the hair fades or turns gray there's no need to resort to hair dyes. The normal color of the hair is restored and retained by the use of
