The Young People's Christian Endeavor movement has grown beyond all precedent and prophecy, says the New York Independent. It has come to be considered as necessary an arm of the Church as the Sunday school, and few denominations have hesitated to make use of it.

The number of passengers on the Jura Simplon Railway increased from 89,740 in January, 1896, to 848,000 for the first month of this year, while freight remained nearly stationary.

When Nosh blew his born, the camel numped himself to get aboard, and by a curious freak he stayed humped all his life. Lumbago or lame back humps a man's back simply because he cannot straighten himself on account of the stiffeess and soreness acon account of the stiffness and soreness accompanying the atiment. Nature helped the camel to his hump for a special nurpose. Nature will help a man to get rid of his hump right off if he uses St. Jacobs Gil, became the character of the trouble is such that it needs just such a remedy to warm, soften and straighten out the contracted muscles. From the time of Noah downsto the present time men have had lame backs, but only since the introduction of St. Jacobs Oil has the best cure for it been known. Lambago really disables, but St. Jacobs Oil embles one to attend to business without one to attend to business without

Action of Continuous Rails.

Continuous rails, made up of ordinary rail lengths, welded together electrically, are in use on many miles of electric street railways in the United States, and with excellent results, too, having shown themselves to constitute an ideal track. Whatever misgivings may have arisen at one time as to the serious pranks which expansion and contraction might play with such continuous tracks, have been effectively allayed, as experience has shown that the difficulties likely to grow from these causes are not extraordinary. It is interesting, however, to note that of the troubles from temperature variations in the track, that due to a temperature lower than the one at which the rails were welded is the only one requiring serious consideration. It is found in the tendency of the rail to shrink in a longitudinal direction and this must be counteracted by a pull on the ends of the rail sufficient to produce a corresponding amount of stretch. Temperatures above that at which the rails were welded, cause compression, and this has never been found to make trouble where the track was at all secured by the roadbed.

The Wonderful Kava-Kava Shrub. A New Botanical Discovery .- Of

Special Interest to Sufferers from to Humanity.

A Free Gift of Great Value to You. Our readers will be glad to know that the new botanical discovery, Alkavis, from the wonderful Kava-Kava shrub has proved an assured cure for all dis-

eases caused by Uric acid in the blood, or by disordered action of the Kidneys or urinary organs. The Kava-Kava Shrub, or as botanists call it, Piper Methysticum, grows on the ticum, grows on the banks of the Ganges river, East India, THEKAVA-KAVA SHIRUB and probably was (Piper Methysticum.) used for centuries by the natives before its extraordinary

properties became known to civilization through Christian missionaries. In this respect it resembles the discovery of quinine from the peruvian bark, steak. The platter s made known by the Indians to the early little melted butter. Jesuit missionaries in South America, and by them brought to civilized man. It is a wonderful discovery, with a record of 1200 hospital cures in 30 days. It acts directly upon the blood and kidneys, and is a true specific, just as quiniue is in malaria. We have the strongest testimony of many ministers of the gospel, well-known doctors and business men cured by Alkavis, when all other

est testimony of many ministers of the gospel, well-known doctors and business men cured by Alkavis, when all other remedies had falled.

In the New York Weekh Warld of Sept 10th, the testimony of Rev. W. B. Moore, D. D., of Washington, D. C. was given, describing his years of suffering from Kiduey disease and Rhesmattam, and his rapid cure by Alkavis. Rev. Thomas Smith, the Methodist minister at Cobden, Illinois, passed nearly one hundred gravel stones after two weeks use of Alkavis. Rev. John H. Watson, of Smalel Texas, a minister of the goapel of thirty years' service, was struck down at his boat of duly by Kidney disease. After hovering between life and death for two months, and sil his doctors having foiled, he took Alkavis, and was conspletely restored to health and strength, and is fulfilling fise duties as minister of the goapel. Mr. R. C. Wood, a prominent attorney of Lowell, Indians, was cured of Rheumatism, Kidney and Bladder disease of ten years standing, by Alkavis, Mr. Wood describes himself as being in constant misery, often compelled to rise ten times during the night on account of weakness of the bladder. He was treated by all his home physicians without the least benefit and finally completely cured in a few weeks by Alkavis. The testimony is undoubted and really wonderful. Mrs. James Young, of Kent, Ohlo, writes that she had tried aix doctors in vain, that she was about to give up in despair, when she found Alkavis and was proughtly cured of kidney disease and restored to health. Many other ladies also testify to the wonderful curative powers of Alkavis in the various disorders peculiar to womanbood.

So far the Church Kidney Cure Com-

pany, No. 424 Fourth, Avenue, New York, are the only importers of this new remedy, and they are so auxious to prove its value that for the sake of intro-duction they will send a free treatment of Alkavis prepaid by mail to every reader of this paper who is a Sufferer from any form of Kidney or Biadder disorder, Bright's Disease, Rheuma-tism, Dropsy, Gravel, Pain in Back, Female Complaints, or other affliction flue to improper action of the Kidneys or Urinary Organs. We advise all Suferers to send their names and address to the company, and receive the Alkavis free. It is sent to you entirely free, to prove its wonderful curative powers.

HOUSEHOLD AFFAIRS,

BRUBARB DESSERT.

Make a rich syrup by adding sugar to water in which long strips of orange peel have been boiled until tender, lav into it a single layer of pieces of rhubarb three inches long and stew gently until clear. When done, remove and cook another layer. This makes a handsome dessert dish by ornamenting with puff paste out in fancy

CHRYSANTHEMUM SALAD,

Not every one knows that chrysanthemums may be converted into a very dainty dish. Chopped very fine and served with pure, fresh cream, gorgeous Japanese blossom is said to make a most delicious salad. It tastes a little like cauliflower, but is more deliente. The people in some of the provinces of France make an extremely palatable salad of the white and pink clover blossoms, and every one cnows that nasturitum blooms taste very much like watercress. The nabobs of India esteem the blooms of the cassia tree as an especially dainty ood. They have a sweet, spicy flavor. -New York Tribune.

TEMPTING APPLE DESSERT. Mrs. Lemeke's formula for a tempting apple dessert is one dozen Spitzenberg apples pared and cored whole; these are put in a wide saucepan with sufficient water to cover them, the water being brought to the boil before the apples are added. Cook the apples till a straw will easily pierce them, then carefully take out and arrange in a large glass dish; boil the liquor down till it is reduced to a quart, add one cup of sugar and one onnce of gelatine soaked for fitteen minutes in a little cold water; boil the syrup with these for a few minutes, then set aside to cool slightly before pouring it over the apples, and putting the dish on ice to get firm. Serve with whipped cream. Almonds blanched and finely chopped, or grated cocoanut sprinkled over the jelly, improve both taste and appearance of this dish. Peaches, pears, and quinces may be prepared in the same way, the two latter needing somewhat longer cooking. - New York Post.

Take one pound of light brown sugar. The genuine rich brown sugar, which is the unrefined product of the cane, can no longer be found for sale in the market, though a small quantity of this sugar is still prepared on some Southern plantations, and occasionally a little is forwarded to Northern customers or to friends. This sugar makes the most delicious "pralines." The light sugar of our market, however, is a fairly good substitute for it. Add two-thirds of a cupful of boiling water and two even tablespoonfuls of sweet, saltless butter to a pound of the sugar. Stir it until it melts. Add a mere pinch of cream of tartar, and let the syrup boil without stirring again | until a drop of it will make a soft ball

when rolled between the fingers. Wet the fingers in ice water before testing the syrup. When the drop is still soft, but does not stick, the candy is ready. If it is hard, so that the drop cracks when bitten, it has boiled too long, and in that case add a tablespoonful of water and let the syrup boil an instant. Do not stir it, however, but merely test it again. When it has reached the "ball" or soft, creamy condition, remove it from the fire and pour in a cup of nice pecan kernals. Pour the caudy out into very thin sheets on buttered tins, and when it is partly cooled crease it with a knife into candles about two inches square. Break the sheet into separate andies when it is cold.

Another way is to take out the candy by the teaspoonful as soon as the syrup has cooled for about two minutes. Diseases of the Kidneys or Blad-der Rheumatism, etc.—A Blessing the buttered tin sheet on which it is Allow each spoonful room to spread on dropped .- New York Tribune.

HOUSEHOLD HINTS.

Scraped apple is said to disguise the taste of quinine.

When using dates for an after dinner sweet, after the pit has been removed, instead of filling with chopped nut meats, set in a row of peanut meats and call them "peas in the pod."

Sand baths, artificially heated, offer an excellent means of inducing perspiration, exciting the functions of the skin, etc. They are useful in rheuma-tism and have no bad effect upon heart or circulation.

A nice flavor may be given to a broiled steak by cutting an onion in balves, and rubbing the cut edges over the heated platter intended for the steak. The platter should contain a

When the new rag carpet comes home from the weaver's, measure the length of the breadths. Then run four rows of machine stitching across each breadth. Cut between the rows, two on each side, and it will not ravel. In making up an ingrain carpet the same plan is advisable.

If you have cooked cornmeal mush, ustead of filling the kettle with water to soak after it is emptied, set it on the back of the stove, where it will keep pretty warm, and let dry. In a few hours the mush will have dried and is ready to poel off, leaving the kettle so that an ordinary washing will clean it.

A housewife suggests, as a method of preventing rich cookie dough from sticking to the moulding board to cover the board with thin unbleached muslin, put on without a wrinkle, dust it well with flour, then roll out the dough. We know a much less troublesome method than this, and it is very simple. Don't make rich cookies.

Then you'll have no trouble with them. An attractive way of preparing fried bread or croutous, as they are called, for serving with soups is to cut the slices of bread in small circles the size of a silver quarter; place them upon a tin with a little soup stock. Put the tin in the oven, and cook the bread until it is crisp and brown. While hot dip them in melted butter, and quickly roll in grated choese.

The following is a simple but effec-tive manner of cooling water: Take a bottle filled with water; wrap it in a piece of cloth very wet, and hang the covered bettle in a draught. It will be found that the liquid in the bottle will be reduced to a temperature much below that of the surrounding air, having given its heat to men would not drink whicky. the vapor formed by the evaporation of the water in the cloth.

TEMPERANCE

Long have we borne the tie that binds Our land beneath rum's diretul reigo, Bleet be the arm that quickly finds A way to reach this inteful chain.

Cursed be the hand that lends its aid, This monster evil to uphold. Blest be the man in strength arrayed, To smile the wrong with courage bold.

That shares the guilt for paltry gains. Blest be the worker, small or great, Whose ald the victory attains

Before the judge at last must stand The good approved, the Guilly dumb, ome or depart at his command, Cursol depart or blessed come. —Hey C. A. Buddock, in Ram's Horn.

The editor of The American Grover, Mr. F.

N. Barrett, has been in the habit of studying the Government statistics of the consumption of liquors, and his conclusions have been necepited with a great deal of confidence. He has just made a careful examination of the reports for the past year, and shows by a number of tables that the hard times have resulted in a diministed consumption of liquors. The total per capita consumption of spirits, wines and beer in 1802 was 17,04 gallous; in 1908 it was 16,42, showing a reduction of 10,62 gallons per capita in the five years. The most notable reduction was in the use of spirits, which diminished from 1,50 gallons hi 1892 to one gallon in 1896. There was a similar reduction in the use of wines and a very, slight reduction in the use of wines and a very, slight reduction in the use of wines and a very, slight reduction in the use of beer. The number of gallons of spirits consumed was in round numbers, 71,000,000, which is less than was, consumed the 1887, use years age. From 1887, 1909, there was a sealer forms 1887, 1909, the se THE NATIONAL DRINK BILL. gallons of spirits consumed was in round numbers, 71,000,000, which is less than was, consumed in 1887, ten years ago. From 1897 to 1893 there was a steady increase, the amount reaching in the last numed year over 101,000,000 gallons. Since then there has been a decline. Mr. Barrett estimates that about 11,000,000 gallons of spirits are used annually in the arts, manufactures and in medicine, leaving about 60,000,000 consumed as a beverage. He further estimates that barrooms retail a gallon in about sixty drinks, receiving therefor \$4.50. "thus making the Nation's whisky bill in 1890 as a beverage, \$270,000,000, while in 1892 and 1893 it averaged \$400,500,000." He says the importation of foreign spirits, while larger in 1896 than in the four preceding years, was lighter than in 1890 or 1891. The amount consumption of beer in the past twenty years has been very large. The amount consumed in 1897 was a little loss than 718,000,000. Wr. Barrett says that beer contests with coffee the claim to be our National leverage. The falling off in the consumption of wines is wonderful. In 1887 there were consumed 27,706,771 gallons of domestic and 4,618,200 gallons of foreign wines, while in 1893 the amounts consumed were 14,599,727 of domestic, and 4,101,649 of imported wines. He makes the total alcoholis drinking bill of the United States for 1896 \$861,603,832, or a per capita expenditure of \$14.31.

NOT ALWAYS THE BEST. Charles Folien Palmer, in his recently ublished work on inebriety, under the ending "An Unselfish Wife Not Always the

Best," says:

"A good woman is not necessarily a good wife. On the contrary, she may be, without meaning it and in spite of her conscientious efforts to be otherwise, a very bad wife to her husband, and that in spite of her gentleness, decility, piety and excessive love for him; and it is possible that he might not be in the position he occupies to-day if, instead of possessing these qualities, she had developed stronger or even more selfish traits or possessing these quanties, she had developed stronger or even more selfish traits of character. The continued exercise of the spirit of unselfishness on the wife's part has helped in no small degree to restrain the husband from denying himself in a hundred ways; and all innocently, but not the less fatally, has fanned the flames of self-indulgence until his power of resistance. Indulgence until his power of resistance, in-sidiously encroached upon by loving hands, has finally succumbed to her persistency, and his great preservative against any strong tempration to which he may be constitutiontemptation to which he may be constitutionally inclined has become so weakened that he is mable to cope with the strong desire for drink when it manifestaitself. . . Before either of then is aware of it the husband's strong mainstay and security against sudden and powerful temptation are gradually but surely undermined and when the circumstances of life, sure to be favorable at certain junctures, invite the presence of an underlying vice, the man goes down before it and, in spite of his manifold struggles and heroic resolves and efforts, fails utterly to redeem himself."

LET'S DOWN THE SALOON. Nearly all the crime committed in this country is in some way connected with whisky and the saloon. Not only do we have the crime itself, but we have the rained characters of the criminals, the suffering of characters of the criminals, the suffering of their innocent parents, wives and children, the cost of the courts and the prosecuting officers, of the jails and deputy sheriffs, and all other costs connected with the searching for and punishing those who commit crimes. And then we must remember, that for payfor the license fees—we authorize a lot of saloon-keepers to breed all this crime and misery. By thus licensing them we throw the protection of the law over them, and, in fact, go late partnership with them and share their ill gotten gain. How long are we going to be willing to be partners in this wretched, low-down business? We ought to be ashamed of ourselves,—Michigaa Independent. pendent.

A CONTRAST.

In Denmark the police take a drunken nan to the station and place him under the care of a surgeon. When he recovers they take him home in a cab, and then present their bill to the person in whose house the victim had taken his last refresher.

In Tarkey a drunken man is bastinadeed for the first, escend and third offence, after which he is considered "privileged." A privileged drunkard is led home and is furnished with an account which he must settle forthwith.

nished with an account which to forthwith.

In the United States a man may drink hom-self to death, and there is no inquisition for blood; or he may forfeit his liberty and his wife and children suffer, and ratenayers pay the cost of his beard in prison. The "trade" escapes, and not a scratch is made on the back of the lisense!

THE OUTLOOK.

THE GUTLOOK.

The Washington Post, while admitting that the consumption of beer and domestic wines is increasing, is hopeful for the temperance outlook, holding that the statistics show a decreased consumption of distilled liquors of all kinds, and that habitual draukenness is on the decline. The Post thinks that the greatest agency in temperanse work is the strong, healthy, public sentiment condemnatory of drunkenness. "Public opinion is foreing men to be temperate, by shutting the intemperate out of public offices and responsible private stations." While the real cure for intemperance is the gosped, and plenty of it, it is a fact that the gasped works out many of its purposes through various subsidiary means, one of these being an improved public opinion.—Independent.

Dr. Newman Hall, who has just completed his eightieth year, was asked how he accounted for his spientist physical condition, and he answered: "Soler habits, attention to the laws and habits of health, going to bed in decent time, and not working hard late at night. I have never been a dincrout, or indulged in heavy suppers. I take a cold bath all the year round, and have alway; been a walker; I can now do ten miles at a stretch without futures. My sight and hearing are perfect. Testotalism has had a great deal to do with my good health. My father and mother were total abstainers, and I have been one for sixty years." TEEFOTALISM AND LONGEVITY, I have been one for sixty years."

Young men, have confidence in yourselves, and in the capacities God has given you. Shun intoxicating liquor; keep away from the gambling table; seek for friends such men and women as you would not be aslamed your Christian mother should see you with, and having chosen with care the life business to which you are best adapted, pursue it without failoring, and never fear but you will wring success out of destiny.—Sacred Heart Roview. AN APPEAL TO YOUNG MEN.

TEMPERANCE NEWS AND MOTER. Wine in the home and club house helps the wine room. If some women did not drink wine, some Railways in Ceylon.

Railway building has been carried on with vigor of late in the Island of Ceylon, and the traffic has increased correspondingly. In 1887, with 180 miles of railway, 1,966,280 passengers were carried, and in 1895, for 300 miles of road, there were 4,821,867 passengers.

Miss Varden (at grand concert) -"Don't you admire Pagginski's execu-tion, Mr. Rush?" Mr. Rush—"I should like to hear of it."—Standard.

Infayette's Visit to America,

"It is difficult to understand, at this late day, what a furore of excitement passed over this country when Lafayette arrived once more in America. The visit is a historic event to be remembered while memory endures. During President Monroo's second administration the United States extended its invitation to Lafayette. He arrived at Staten Island on August 15 (Sunday), 1824, accompanied by his son, George Washington Lafayette, and also by his son-in-law. A formal reception took place on the following day-the first fruits of the most abundant harvest of welcome which Lafayette was to receive during his year of travel through the United States.

"Lafavette was sixty.seven years old when he visited America as the Nation's guest, and carried his years lightly. His head was shaped like that of Burns. He had a high forehead, long, squiline nose and a rather His hair was sandy and quite plentiful. His eyes were dark gray, restless and twinkling; his eyebrows, light in color, but heavily marked. His mouth was firm, and his lips smiled courteously at the holiday crowd assembled to do him honor The general was not very tall, but well made. His face was distinctly pleasant, and its expression was an odd mixture of shrewdness, decision and gay good humor. His costume was a swallow tailed coat and trousers of dark brown, with a great display of white waistcoat and neckcloth. bunch of seals hung from a broad Over his black ribbon at his waist. shoulders hung a cloth riding cloak, greenish blue in color and lined with red."-Ladies' Home Journal.

Catarrh Cannot be Cured
With local applications, as they cannot reach
the seat of the disease. Catarrh is a blood or
constitutional disease, and in order to cure
it you must take internal remedies. Hall's
Cutarrh Cure is taken internally, and acts directly on the blood and nucous surface. Hall's
Catarrh Cure is not a quack medicine. It was
prescribed by one of the best physicians in this
country for years, and in a regular prescription.
It is composed of the best tonics known, combined with the best blood purifiers, acting diructly on the inneous surfaces. The perfect
combination of the two ingredients is what
produces such wonderful results in curing
catarrh. Send for testimonials, free.

Brick Street Pavement,

Brick street pavement, laid in Indianapolis in 1891, is so badly worn, says the Engineering News, that property-owners may be called upon to pay for new payement before they have finished paying for the old one. Ottawa bricks were used, and the pavement is worn down several inches in places, and the surface is uneven and full of ridges. The contractor's guarantee deposit of twenty cents a yard has been practically consumed in repairs; but the contractor contends that he did not guarantee against or-dinary wear, and he is suing for the return of his money, as the guarantee on parts of the pavement has expired, Brick pavement laid later in the same city is in much better condition, as the specifications were more strict and the bricks used were better.

Weather and Crime,

Professor Willis L. Moore, in a recent lecture, cited statistics to show what a great effect the weather conditions have on crime. There is a larger proportion of crime in the hot months than in the very cold ones, although there is much inducament for crime in the winter. From the records compiled by a Weather Bureau official a few years ago, it was found that, while there were 1600 suicides and 2500 murders during the three warmest months of the year, there were only 1200 suicides and 1700 murders during the three coldest months.

A Loyal Servant,

In spite of the inherent capacity for reachery and deceit we are accustomed to associate with the natives of India, one comes across wonderful and touching evidences of loyalty and devotion. Witness the devotion and faithfulness of our Goorka regiments during the terrible mutiny, and the thrilling stories of wonderful escapes entirely due to the loyalty of personal servants.

The following true incident hap pened lately in Madras: An Indian colonel had a "boy" for eighteen years. Having to go home on a fur-lough, he pensioned him and let him return to his family, to do nothing for the rest of his life. Returning to Madras, he was informed by a brother officer that his "boy" was as fit as ever, and only too anxious to return to duty. Almost before it seemed that a letter could have time to reach him, the "boy" was back in his accustomed

place. For two years he waited on his master as of yore, though his hair was silvered and his back bent. One day the colonel returned from parade, and had his wants supplied as usual. His servants, on leaving him, salaamed low, remarking, "Should the sahib want anything more and call, his faithful slave will hear. He berry tired-sleep." When the "sahib" called there was no answer. found him curied on his mat. He had lain down—"tired." He would never be "tired" again. Uncomplainingly he had followed his sahib. marches, want of tood, sickness and privation had never aroused a com-When death came he lay plaint. down without a murmur.-The Gentiewoman.
