paid by us to foreign ships for ocean transportation."

Clement Scott, a famous London dramatic critic, says the English stage is the worst, because the English are the least artistic people in the world, and "more completely without the saving grace of humor than any other nation.'

. Gullible farmers, of Allen County, Ohio, have been buncoed by a swindler who went through the country exhibiting an enormous ear of corn, from which he sold choice kernels at choice prices for seed. The car was made from several smaller ears carefully out up and ingeniously glued together in the natural form of a big ear.

Says the New York Times: "The law of supply and demand applies to the Southern cotton industry as well as to anything else. If the acreage is too great and the production consequently greater than the mills require, low prices are inevitable. Planters will do better if they restrict their cotton acreage and substitute other crops on the rest of the land."

That there is an honesty rising superior to business avarice even in this sordid age appears from the experience of a Topeka sporting man. He wrote to a cigarette company that he had saved the pictures in 1200 packages of cigarettes which he had smoked, and asked what prize the company would offer for them. He received an answer saying that the company would give him a coffin if he would smoke as many more.

A writer in the New York Sun gives what he believes to be the true theory of the origin of Welsh rabbits. He says: "My notion is that melted cheese, properly seasoned and poured on toast, is called 'Welsh rabbit,' because in Wales, where the people have cheese in plenty and wild rabbits are rigidly protected under the game laws, the Welsh bon vivant substitutes his homely dish for the four-legged game animal. In like manner, you know, some of our New England friends facetiously call salt codfish and herring 'Cape Cod turkey.'" The writer "rejects with scorn" that "rabbit" used in this connection has been evolved gradually from "rare-bit."

A subject that would stand more discussion than it gets is free delivery by the Postoffice Department in rural districts, observes Harper's Weekly. It is not impracticable, and the chief questions about it are whether the farmers want it and whether it would be worth what it would cost. There would be some economics in it resulting from the diminution of fourth-class postoffices, and some gains in revenue from an increased postal business. In thousands of districts it would pay very well. The \$10,000,000 or so that might be saved by some wholesale amendments to the law which governs second-class mail matter would pay the deficit on a good deal of rural free delivery.

The report recently submitted to the Secretary of the Interior covering the transactions of the general land office for the past year contains some interesting figures. According to this report the vacant public lands of the Government aggregate at the present time the enormous amount of 591,348,-953 acres, scattered about over the States of Montana, Nevada, New Mexico, Arizona, Wyoming, Idaho, Utah, California, Colorado, Oregon, North Dakota and Washington. Each year the Government disposes of large tracts of land to private individuals and railway corporations, but on account of the vast area of territory covered by the Government's unoccupied domain, it will probably be many years before this area is exhausted. As the sterile and uninviting character of some of the land renders it unfit for He advised, even after she came of use or habitation, it is more than likely that purchasers will not be found to relieve the Government of this part of its domain. Still the progress which scientific research is making at the present time gives hope that even the most forbidding places may yet be reclaimed to fertility and cultivation. What is known as the reserved territory of the Government embraces 182,441,774 acres, and is not subject to purchase. It is reserved for military and naval purposes, reservoir sites, timber lauds and other needs which may arise hereafter in the exigencies | love for pretty Winnie Warre. of the Government.
