

The Springs of Florida.

A short distance down the peninsula and below Jasper is Suwannee Spring. It forms one of the principal feeders of the river, and is a well-known favorite winter resort. It is some distance from the railroad station, and tourists are taken thither in an ancient "kinky" street car, and their baggage on a flat open car linked behind.

Suwannee Spring, like many of the other large bodies of so-called springs in Florida, is nothing more or less than the coming to the surface of a considerable sized underground river, and, like many of these springs, that at Suwannee is supposed to possess valuable medicinal qualities, particularly for diseases which affect the kidneys and bladder.

The large springs of Florida are among its greatest curiosities, and many of them are wonderful for their beauty and varied features. Almost invariably they are clear as crystal and very deep, some as much as eighty feet. Many, like Suwannee and Green Cove springs, are heavily charged with sulphur, and others, like those at Homassassa, with sulphur, iron and magnesia. The waters are almost invariably warm.

Besides the Suwannee Spring there are others in the near vicinity, one a few miles below called High Springs, and still a third close beside the railroad tracks at Juliette. This one is quite large and of such remarkable limpidity that from the railroad tracks, more than a hundred feet away, fish may be plainly seen swimming about in its depths.—Florida Letter in Philadelphia Ledger.

Knowledge is Power.
First Successful Business Man—"I had a common school education, but I found it sufficient. You, I believe, were a college graduate?"
Second Successful Business Man—"Yes; graduated with high honors, too."
First S. B. M.—"Now, tell me truly. Did you ever find any practical use for what you learned at college?"
Second S. B. M.—"Um—yes. One night, when burglars got into my house, I scared them off with a college yell."—New York Weekly.

St. Peter's, Rome, is one of the most colossal buildings in the world. Forty-three popes reigned while it was being built.

Never Too Sure.
Against the probability or possibility of mischance or accident we can never be too sure. But if we should stop to consider how great is the chance of sudden death, we would be made too timid and unhappy. Caution is needed not to be foolhardy, and precaution to know what is best to do when an accident happens. One day this winter the men were walking on the street near Dr. H. H. Kline, L.L.D., 301 Arch St., Phila., Pa.
"We're too timid in treading on slippery places. I tread firmly and never think about them, and so escape a fall." "Never be too sure," said the other, "is that that throws you off and makes the fall the harder." Just then they came upon a place covered with thin snow, where kids had been sliding. The first speaker's kid came down with his foot turned and badly sprained his ankle. He was a cripple on crutches until a short time ago, having used many things without benefit. Up to that time he had not used St. Jacobs Oil, which, when used, cured him completely, so that he walks as usual. There is a probability that for the rest of the season he will walk comfortably, with the precaution of having this great remedy ready for use.

Fewer French ships pass through the Suez Canal than Germany, Italy or even Dutch.

Fits permanently cured. No fits or nervousness after first day's use. Dr. Kline's Great Nerve Restorer. Sufferers should treat free Dr. H. H. Kline, L.L.D., 301 Arch St., Phila., Pa.

Bergen, Norway, boasts of a paper church large enough to seat 1000 persons.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, etc., a bottle.

Dutch omnibuses are fitted with letter boxes.

CONSULTING A WOMAN.

Mrs. Pinkham's Advice Inspires Confidence and Hope.
Examination by a male physician is a hard trial to a delicately organized woman.
She puts it off as long as she dare, and is only driven to it by fear of cancer, polypus, or some dreadful ailment.
Most frequently such a woman leaves a physician's office where she has undergone a critical examination with an impression more or less of discouragement.
This condition of the mind destroys the effect of advice; and she grows worse rather than better. In consulting Mrs. Pinkham no hesitation need be felt, the story is told to a woman and is wholly confidential. Mrs. Pinkham's address is Lynn, Mass., she offers sick women her advice without charge.
Her intimate knowledge of women's troubles makes her letter of advice a wellspring of hope, and her wise experience and skill point the way to health. I suffered for two or three years with ovarian trouble for seven years, and no doctor knew what was the matter with me. I had spells which would last for two days or more. I thought I would try Lydia E. Pinkham's Vegetable Compound. I have taken seven bottles of it, and am entirely cured.—Mrs. J. FOREMAN, 26 N. Woodberry Ave., Baltimore, Md.
The above letter from Mrs. Foreman is only one of thousands.

Try Grain-O!

Ask you Grocer to-day to show you a package of GRAIN-O, the new food drink that takes the place of coffee.
The children may drink it without injury as well as the adult. All who try it, like it. GRAIN-O has that rich brown of Mocha or Java, but it is made from pure grains, and the most delicate stomach receives it without distress. At the price of coffee. 15 cents and 25 cents per package.
Sold by all grocers.

An Overworked Brain.

Determined to rise in his chosen profession as an educator, Ernest Kemper, of Pineroot, Ind., overtaxed himself mentally and physically. He was ambitious, his mind was always on his work. From early morning until late at night he continually poured over his books.
Few persons, even with the strongest constitutions, can keep up under such a strain.

In addition to his studies, Mr. Kemper was teaching a school some three miles from his home. Finally, his excessive study and the exposure of going to and from school in all kinds of weather undermined his health.
He was taken to his bed with pneumonia and his overworked brain almost collapsed. For several weeks he was seriously ill. Catarrh had taken root in his system and his mind was in a delicate condition. He was sent to Colorado where he spent three months without receiving any benefit.

Then a noted specialist from Cleveland treated him without avail, and then a hospital in Chicago was tried, but all absolutely without result. Finally his physician recommended Dr. Williams' Pink Pills for Pale People, and from the first box he began to improve. When he had taken nine boxes he was completely cured. This famous blood and nerve medicine had accomplished what all his former expensive treatment failed to accomplish. Mr. Kemper says his catarrh has entirely left him; he is strong again and weighs nine pounds more than he ever did. He gives the pills the entire credit. He is starting teaching again and feels abundantly able to continue the work. To prove that the above is true in every respect, Mr. Kemper made an affidavit as follows:

Subscribed and sworn to before me this 19th day of September, 1897.
B. P. WARR, Notary Public.

We doubt if these pills have an equal in all the range of medicine, for building up a run down and debilitated system.

History of the National Capitol.

The cornerstone of the original Capitol building, at Washington, was laid September 18, 1793, by President Washington, with Masonic ceremonies. The north wing was finished in 1800 and the south wing in 1811. A wooden passageway connected them. August 24, 1814, the interior of both wings was destroyed by fire, set by the British. In 1815 the central portion of the building was commenced and was finally completed in 1827. The cost of the Capitol up to 1827, including the grading of grounds, alterations, etc., was \$2,433,844.13. The cornerstone of the extensions was laid on the Fourth of July, 1851, by President Fillmore, Daniel Webster officiating as orator. This work was completed in 1865. These extensions were that occupied for legislative purposes January 4, 1859. The old dome was torn down and work commenced on the new one in 1855. The present structure, which is of cast iron, was completed in 1865. The entire weight of iron used is 8,900,200 pounds. The statue which crowns the dome was put in position December 2, 1864. It is of bronze, and its correct designation of Freedom. The height of the statue is nineteen feet six inches, and it weighs 14,985 pounds. There is now a bill before Congress to cover it with gold leaf.—William E. Curtis.

Health is Capital.

Health is capital as truly as money is, and the man who so regards it will be as careful in its expenditure, as cautious in its investment, as prudent in handling its resources, as the financier in the management of the principal from which he derives his income. Many persons have no other capital than health; the strength they use in their daily business may secure a comfortable living so long as it remains unimpaired, but once let the health springs be exhausted by carelessness, imprudence or too lavish expenditure, there is but one way to replenish them—right living and rest. Wealth accumulates by saving, and just in the same way health comes from saving strength, not wasting it upon trifles, not exhausting it in too severe and prolonged efforts; by recuperating in rest and sleep; by taking such exercise and food that will invigorate instead of depleting the physical powers. It is never wise to work to the extreme limit of one's ability. When weary, rest; when exhausted, sleep. The whole man will be recreated by it. It is by spending less than his income by turning honest pennies over and over, reinvesting as they accumulate, that a person builds up his fortune.—The Ledger.

Can't Tell Their Husbands Apart.

"Jim Hisey, aged forty-eight, is a prosperous grain dealer in Yale. He has a wife, two sons and a daughter. Will Hisey, aged forty-eight, is his brother, lives at Sparta. He is also married. The two men are twins, and all through life have been living duplicates of each other. So near alike are they that even their wives cannot tell them apart. They dress alike, their voices are alike and their hair and mustaches have the same color and curls. When boys they had to be tagged so that their parents and teachers would know the difference. When Jim gets a crick in the back Will is liable to have the same complaint, and when Will gets the rheumatism Jim also gets it precisely in the same place. They were formerly both engaged in the milling business and had served an apprenticeship under the same man. They were born in western Ontario, their parents being Jacob and Betsy Hisey. Jim's wife has only one way in which she can tell her husband from his brother. He has a slight curve in one of his fingers, which has to be held up in full view. Then he must give a password before he is received into full fellowship of the home circle. Many amusing instances of mistaken identity are told of the two.—Detroit Tribune.

Acting as a Sub.

Miles—"Why, hello, Giles, old boy, how are you?" Gracious, how you have changed! I didn't recognize you at first."
Giles—"In what way had I changed?"
Miles—"In your general appearance. Quite a dude at one time, you seem to have grown careless."
Giles—"Oh, is that it? Well, I'm married now, and have quit the dude business."
Miles—"I see. Not a dude any more; merely a subdue."—Chicago News.

HOUSEHOLD AFFAIRS.

Roasting a Joint.
First see that a good clear fire is burning and sweep up all ashes that there will be no need to make a dust while the meat is before the fire. Allow quarter of an hour to each pound of meat and half an hour extra to each eight pound joint. It is necessary to cook choice meats, such as pork and veal, rather longer. Place the meat first close to the fire for about seven minutes, then draw it further away. The object of the fast cooking to start with is to close up the pores of the meat and keep in the gravy. To roast properly meat must be constantly basted and be carefully watched that it does not burn. Turn the joint from time to time so that it is equally done all over.

Coloring For Soups.

Essence of spinach is used for coloring soups, dressings, creams, puddings, etc. It is prepared as follows: Wash thoroughly in cold water a half peck of spinach. After washing it let it soak a couple of hours in cold water, then drain it quite dry. Put it in a big wooden bowl, chop it up a little, then pound it with a potato masher until it is a pulp. After this put it in a cheese cloth bag and dip the bag with the spinach in a saucepan containing a very little cold water. Press all the juice of the spinach and stand it over the fire. When it reaches boiling heat take it from the stove and strain it through a hair sieve, add two tablespoonfuls of fine sugar and stir it till the sugar melts. When cold bottle it or put it in a glass jar, stand it in a cold place and it will keep for some time.

Cements and Pasts.

Knife Handle Cement—Resin, four parts; beeswax, one part; plaster of Paris or brick dust, one part. Have all finely powdered and mix well. Fill handle, heat the end of the blade, and press it in.

Cement for Glazed Surfaces—Two ounces of granulated gum arabic dissolved in a half pint of water; dissolve one-half ounce of starch in cold water; add with one-half ounce of granulated sugar to the gum solution, and boil all until clear. A little oil of cloves may be added to keep it.

Cement for Glass and Earthenware—Dilute white of egg with its bulk of water. Mix to a thin paste with powdered quinine. Must be used immediately; will not keep.

Cement for Fastening Tops on Oil Lamps—Three parts resin, one part caustic soda, five parts water. Mix with half its weight of plaster of Paris. It sets in about forty-five minutes; is of great adhesive power.

Strong Cement for Mending Broken Crockery—Mix together equal parts of glycerine and litharge to the consistency of soft putty. If articles are allowed to stand until cement is thoroughly hardened they will resist acids and hot water.

To Fasten Paper to Tin—Break clear glue in small pieces, soak over night in clear water. Squeeze and drain, put in a wide-mouthed bottle, add sufficient glacial acetic acid to cover, and stand bottle in warm water until melted.

Scouring Paste—One part oxalic acid, fifteen parts peroxide of iron, twenty parts powdered rotten stone, sixty parts palm oil, four parts petrolatum. Pulverize the acid, add iron and rotten stone, sift well, gradually incorporate the oil and petrolatum. Perfume with oil of lavender.—New York Times.

Recipes.

Baroness Pudding—Cream two ounces of butter with six of sugar; add half a pound of stale bread crumbs, six ounces of suet, shredded and chopped fine, and eight ounces of seeded raisins. Mix with a pint of milk and boil four hours in a mold or cloth.

Apple Plum Pudding—One cup sugar, one-half cup butter, two eggs, five large apples chopped, one cup milk, one cup flour, one teaspoon baking powder, one-half teaspoon salt, one cup raisins. Bake slowly one hour. Serve with whipped cream.

Cream Fritters—Beat the yolks of three eggs with a gill of cream or good new milk, add a pinch of salt, one ounce of sugar, half lemon rind grated, and three crumbled macaroons. Whip the white of one egg to a stiff froth, and stir it lightly into the ingredients; fry like pancakes, drain, sift sugar over and serve hot, with jam sauce.

Pain's Perdue—Cut thin slices of sweet homemade bread into pieces two inches wide and five inches long. Spread with thick sweet cream and peach and apricot jam; roll up and fasten with tiny skewers if the pieces will not stay rolled; dip in beaten egg and fry a delicate brown in deep hot fat. Serve with hot melted jelly poured around them.

Crabapple Glace—Boil one quart of cranberries, one pint of water and one cupful of sugar until the berries are perfectly soft; strain them through a sieve and add three ounces of gelatine which has soaked in cold water enough to cover for thirty minutes; allow them to come to a boil and pour into molds. Set in icebox to stiffen, and serve with whipped cream.

Chops a la Maintenon—Melt over the fire one tablespoonful of butter and flour, add one-half teaspoonful of salt, half that amount of pepper, a teaspoonful of chopped parsley, four tablespoonfuls of finely chopped canned mushrooms and one-third cupful of stock; stir and cook for two minutes, and set aside. French six rib chops cut an inch thick; make two-inch cut in the side of each, running the knife down to the bone to form a pocket. Put a portion of the mixture in each chop, press the edges together and broil over a clear fire.

How They Catch Rogues in Paris.
A year ago policemen stationed at the crossings of the principal boulevards of Paris were provided with handsome white enamel "billies" and helmets. The patrols are now armed with a weapon new to the history of police annals. It is a piece of chalk. When surrounded by a crowd of hostile rogues, who bustle the guardian of the peace, the patrolman deftly puts chalk marks on the clothing of his assailants, who are thus arrested and identified when reinforcements arrive.

A TEMPERANCE COLUMN.

THE DRINK EVIL MADE MANIFEST IN MANY WAYS.

Our Heroes—The Perseus and Destructively American Habit of "Treating" is the Cause of Much Human Suffering.—The Man Who Saw Himself.
Here's a hand to the boy who has courage
To do what he knows to be right;
When he falls in the way of temptation,
He has a hard battle to fight.
Who stands firm for his comrades
Will find a most powerful foe;
All honor to him if he conquers!
A cheer for the boy who says "No!"

There's many a battle fought daily
The world knows nothing about,
There's many a brave little soldier
Whose strength puts a legion to rout.
And he who fights sin single-handed
Is more of a hero,
Than he who leads soldiers to battle
And conquers by arms in the fray.

Be steadfast, my boy, when you're tempted,
And do what you know to be right.
Stand firm by the colors of manhood,
And you will overcome in the fight.
"The right" be your battle-eyever
In waging the warfare of life.
And you who are the heroes,
Will give you the strength for the strife.
—Phoebe Cary.

Teating.

One habit that with profit to himself can be left off by the resolute young man, says the Catholic Universe, is the pernicious and destructively American custom of "treating," which prevails among all classes in this country. This habit has nothing whatever to recommend it. Sometimes it is foolishly regarded by those addicted to it as a manifestation of generosity and good fellowship. It is invariably the offspring of shallow and thoughtless egotism. It is a source of great deal of dissatisfaction that exists in all grades of society, and its consequences is the awful train of misery and sorrow that follows in the train of intemperance.

Many, if not all, hopeless human wrecks from excessive use of intoxicants can trace their destruction to this vicious custom of the Catholic Universe, is the pernicious and destructively American custom of "treating," which prevails among all classes in this country. It is invariably the offspring of shallow and thoughtless egotism. It is a source of great deal of dissatisfaction that exists in all grades of society, and its consequences is the awful train of misery and sorrow that follows in the train of intemperance.

The price of game in France is alleged to depend principally upon the state of the moon. When the moon is dark, and poachers cannot see to set their snares at night, game is scarce; when the moon is full there is plenty of light, and the poachers get lots of game.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one drugged addict that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CURET & CO., Toledo, O.

Oh, What Splendid Coffee.

Mr. Goodman, Williams Co., Ill., writes: "From one package Salzer's German Coffee Berry costing 15¢ I grew 300 lbs. of better coffee than I can buy in stores at 30 cents a lb."
A package of this coffee and big seed corn plant catalogue is sent you by John A. Salzer Seed Co., La Crosse, Wis., upon receipt of 15 cents stamps and this notice.

To Cure a Cold in One Day.

Take Laxative Brown Quinine Tablets. All Druggists refund money if it fails to cure. 35c.
There are almost 400 mineral springs in the United States.

After physicians had given me up, I was saved by Pin's Cure. RALPH ENRIK, Williamsport, Pa., Nov. 22, 1893.

The total number of Gypsies in Hungary is estimated at 185,000.

Cheer Star Tobacco—The Best. Snake Shield Cigarettes.

The national debt is now \$13.41 for each individual. In 1867 it was \$69.26.

SYRUP OF FIGS

The families of drunkards can never condone the crime of drinking. It is not from their standpoint that Christians must view the vice. The palliation of this crime is too common; we are sick of hearing these drunkards speak of as having "weakness" for drink—"It is the poor fellow's only fault;" "he is just a little too convivial." The dire result is that the vice of drunkenness, gross sin as it is against one's self, is a foul crime against one's family, and the plainer the words used to characterize it the better. It always hangs like a lowering cloud over the wretch's home, drags his family cannot rid themselves of the misery that it always brings, nor of the dread of the terrible calamities which are too often its further results.

Drink and Crime.

The latest evidence of the relation of drink and crime is afforded by Justice Riddie, who, in his charge to the Grand Jury at the Liverpool Assizes, said the calendar contained the names of 131 prisoners, the longest that had been placed before that Grand Jury in any city or county. He remarked upon the large proportion of cases of wounding and other crimes of violence, and said that in nearly all these instances drink was the cause of the crime. Again, at the Munster Winter Assizes, Judge O'Brien commented on the number of outrages in County Clare, and remarked that there had been a large increase of intemperance which indicated there was no want of means in the community.

Friend to the Temperance Cause.

An observing woman has noticed that the bicycle is a friend of the temperance cause, and quotes rows of figures to prove it. There has been much less intemperance during the cycling years than at any time for many years, she says, and while the last year's temperance living has increased with the sale of bicycles. "Is not this argument as strong as any of the silly objections raised against cycling?" she triumphantly asks in conclusion.

Temperance News and Notes.

Like the bright beacon-light to the storm-tossed mariner, so is temperance to the victims of drink. It is a symbol of hope and home and happiness.

America's Greatest Medicine

The following is a characteristic Hood's Sarsaparilla testimonial. Facts like these have made Hood's Sarsaparilla America's Greatest Medicine and endeared it to thousands of homes scattered all over this broad land.

very sick and for several days it seemed as if he would never be any better. After a while he began to improve and in a few weeks was able to go out, although weak and miserable. Then, gradually

All Strength in His Limbs
gave out. The physicians told us it was paralysis, which sometimes follows an attack of diphtheria. We did everything for him, but he grew worse until he was in a pitiful condition. He suffered terribly at night and complained continually of his head, and in what little sleep he was able to get, moaned unceasingly. He lost all control of the muscles of his body and limbs. He had no appetite and complained of feeling sick at his stomach all the time. After we had tried many different remedies and had about given up all hope we commenced giving him Hood's Sarsaparilla. In a short time he ceased to complain, his appetite improved and at the end of three months he was able to attend school part of the time. Now he is well and quite a strong and rugged boy. You are at liberty to use this testimonial if you desire, as we feel we cannot say too much in praise of Hood's Sarsaparilla as a blood purifier and building up medicine." Mrs. R. E. ANDERSON, Cumberland, Maine.

Economy is also a characteristic of Hood's Sarsaparilla. Every bottle contains 100 Doses, and hence there is a solid fact conclusively stated in the familiar line, 100 Doses One Dollar.

Hood's Sarsaparilla

Is America's Greatest Medicine because it accomplishes wonderful cures when all other medicines fail. Sold by all druggists. \$1, six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass.

An Exposition Novelty.

An interesting novelty at the Paris Exposition will be the Mareorama, which will give visitors the illusion of a voyage by steamer from Marseilles to Constantinople, with calls at Tangier, Algiers, Naples, Venice, Alexandria and Smyrna. They will be standing on the steamer, which will appear to be in the sea, even to the rolling of the vessel and the salt breeze. The unrolling of the canvases will make them think the ship is moving, the principle being the same as that which makes railway passengers feel in a standing train that they are in motion when another train passes. The voyage of the steamer will be diversified by various scenes, such as meeting a fleet of war vessels, a tempest, with thunder and lightning, a sunrise, etc., besides other curious incidents. Thus, at Naples, for instance, natives will climb on board and perform the dances of the country.

The Sultan of Turkey spends more for his table than any other human being of modern or ancient times—\$5000 daily.
