Two Letters to Mrs. Pinkham.

Mrs. JOHN WILLIAMS, Englishtown, N. J., writes:

"DEAR MIS. PINKHAM:-I cannot begin to tell you how I suffered before taking your remedies. I was so weak that I could hardly walk across the floor without falling. I had womb trouble and such a bearing-down feeling; also suffered with my back and limbs, pain in womb, inflammation of the bladder, piles and indigestion. Before I had taken one bottle of Lydia E. Pinkham's Vegetable Compound I felt a great deal better, and after taking two and onehalf bottles and half a box of your Liver Pills I was cured. If more would take your medicine they would not have to suffer so much."

Mrs. JOSEPH PETERSON, 513 East St., Warren, Pa., writes:

"DEAR MRS. PINKHAM:-I have suffered with womb trouble over fifteen years. I had inflammation, enlargement and displacement of the womb. I had the backache constantly, also headache, and was so dizzy. I had heart trouble, it seemed as though my heart was in my throat at times choking me. I could not walk around and I could not lie down, for then my heart would beat so fast I would feel as though I was smothering. I had to sit up in bed nights in order to breathe. I was so weak I could not do anything.

"I have now taken several nottles of Lydia E. Pinkham's Vegetable Compound, and used three packages of Sanative Wash, and can say I am perfectly cured. I do not think I could have lived long if Mrs. Pink-

ham's medicine had not helped me."

"After I was induced to try CASCA-My liver was in a very bad shape, and my head achied and I had stomach trouble. Now, since takng Cascareta, I feel the. My wife has also used them with beneficial results for sour stomach." JOS. KREHLING, ECI Congress St. St. Louis, Mo.

CURE CONSTIPATION. ...

NO-TO-BAC Sold and guaranteed by all drug-

Maintaining Soil Fertility. Soil fertility can best be kept up by keeping enough animals at all times on the place to eat all products grown thereon and a judicious saving of the manure. In the very fitness of things the farm is a two-fold concern, a farm within a farm if at all large. A farm of forty or fifty acres or more must of necessity be so constituted. The farm within the farm will be the farm buildings, orchards, gardens and adjacent The large fields will be the other farm. Necessarily the orchard, garden and truck patches will get most of the manure made in the Then how keep up the fertility of the remainder? A rolation should be planned in which clover plays a conspicuous part and should be so arranged as to admit of pasturing with both cattle and hogs. Cattle and hogs pastured on clover and corn fed are very prolific fertilizers. And the beauty of it is you have not the manure to handle. Turn off in time for a crop of seed. If there are The first year there will be a response in no uncertain manner, and as the years go by it will become more and more emphatic. The response will most surely; try it and be convinced. I know from actual experience that it

Cattle, clover, corn and hogs will enrich any farm and consequently any farmer if the proper management is given, -A. N. Springer, in Agricultural

Growing Small Fruits on the Farm.

Paper by N. J. Shepherd, read at ticultural Society:

While it is an item to grow a supson it is advisable to plant in long rows, far enough apart to be able to mist. greater portion with a horse and cultivator. On the average farm sufficient land can easily be given for this purpose, and next to the flocks. garden and truck patch it can be made the most profitable part of the farm, when the living is taken into consid-

eration. There is no advantage in crowding; give the plants plenty of room. Strawberries may be set three and a half feet apart. Currants and gooseberries five feet. These should be planted hear a fence or row of trees where they

will be shaded at least a part of the ing. time; not too near, or best results will not be gained.

loamy soil, measurably rich and well quired fertility to the land. drained. No kind of small fruit usually grown on the farm will thrive with wet feet.

The second year after setting time to set out plants to take the from one another. place of the old ones and to secure the most and best fruits with the least trouble. A new bed should be set out every other year. With raspberries a new bed should be set out the fourth year after the fruit and one every five years after that. It will be less trouble than to attempt to keep an old bed in good bearing condition. Currants and gooseberries will last a long time if kept pruned, the old wood cut out and clean cultivation given. Strawberries should not be allowed to bear fruit the first year. If any blossoms appear cut them off. The object is to secure a thrifty, vigorous growth, as this growth largely determines next year's yield of fruit. Mulch strawberries as soon as the ground freezes sufficiently to bear

up a wagon. Bagasse from a sorghum mill or wheat straw makes a good mulch. Leave the mulch on until the plants are done fruiting, when it should be answer. removed and thorough cultivation given. Coal ashes make one of the best mulches for both currants and

weeds and keep the soil friable. With raspberries and blackberries a good plan of management is to cultiweather sets in mulch well. The object is to grow the most and best fruit with the least expenditure of time and labor, and to secure a good supply for the longest season. This can be best adapted to the soil and locality in which they are to be grown.

Crops For Soil Fertility.

For years it has been thoroughly understood that almost any soil, except that of washed sand, contained all the elements of fertility, except nitrogen, but they are so locked up the development of agriculture in that where the chemist found plenty North Germany. According to the of potash and phosphoric acid the German Tageszeitung, Count Sigisfarmer found nothing for a crop. The mund Sparzewski has four camels at farmer talked and used lime and gyp- work tilling the fields of his estate at sum with success, but in time these Czernicjewoer, in the province of failed of results, and the scientist Posen. said fertility must be supplied; and | The experiment is said to have given so costly fertilizers came into use, and the most satisfactory results. The Aid the work. So long as the margin animals quickly become accustomed of profit was large the farmer could to the climate and work well at the afford to use them, but now profits plow. The strength of the camel is are too small to use them entirely to found equal to that of two horses, and

It is never a good plan to allow a what he needs of nitrogen from the freshly-laid egg to remain in the nest air. At first sight it may seem going to induce laying in the same place, against nature to expect any such re-A china nest egg can be cheaply pro- sults, but it is only quickening nacured and will last forever. A hen's ture, for nature in a very slow way egg is liable to break and teach the ground down the rocks for phosphoric bad habit of eating eggs. Even if the acid and potash, and trapped the nichina egg should be broken, its shells trogen. Plants of the legume family contain no lime and will not be eaten do this work -how well it sounds like more than so much glass. In the a fairy tale-for now, suffice it to say heated season the china nest egg the whole family has the power by should always be used. All the roos- means of what might be called root ters should be killed off before this. parasites, to fix the free nitrogen of The eggs not being fertile, will keep the air and make it available for better in hot weather, and may be plant food. The germ that does the sat on by the hen without spoiling work is absent from some soils, but it is easy to inoculate any soil by scattering a small quantity of soil from where the plant has been successful. Then the legumes have long roots that reach below the subsoil and utilize and bring to the surface stores of potash and phosphoric acid that no other plants can reach, and make them available for other crops. Prominent and well known among the legumes are cow peas and crimson clover, each occupying a place of its own-cow peas for summer, crimson clover a fall, winter and spring cropand so makes its growth without in terfering with many other crops. Sowed in corn, it does not hurt the corn and matures in time to turn under for a crop of corn or anything else. No wonder the plant took a strong hold of American farmers' fancy. It is said that another clover -the Egyptian-looks like crimson, seeds immensely, but will not stand the winter and is in every way worthless in America. Any one, then, who uses Egyptian when he intended to use crimson, forthwith says crimson any poor spots do not cut. Haul a clover is a fraud. Many report failloads of manure and put on there. Now, all seeds require moisture to germinate and grow. Clover seed loosely on top or nearly on top of the soil may receive enough moisture to cause a plethoric state of pocketbook germinate from dew, but when the sun is high it dies. On light soils the seed will find its way up through considerable depth of earth, but ordinarily it is not safe to plant deep. Sow preferably after a rain; firm the seed well so as to insure connection with the damp under-soil in which the little rootlet can find moisture for support. We are firm in believing that crimson clover and cow peas will work wonders without the use of any ferthe meeting of the Missouri State Hor- tilizer. We have actual practice and chemical analysis to confirm it. We also have actual practice and experiply of small fruits upon the farm, it ence of others to show that they can do more with aid of potash and phosnomically as possible. For this rea- phoric acid applied in some of the cheaper forms, -Agricultural Epito-

are in the soil and gain for nothing

Farm and Garden Notes. Serious consequences will result from not supplying grit to confined

Care of chickens means a naturally warm house in winter and plenty of

shade in the summer.

Clover is rich in nitrogen and lime. No poultryman can afford to stint his flocks in this feed, especially in winter. Green bone cutters, clover cutters and mills to crush oyster shells are indispensable to profitable poultry keep-

By judicious rotation of crops, in which clover enters largely, together Raspberries and blackberries should with liberal applications of barnyard be planted five feet apart. Select a manures, is the way to give the re-

Fowls in confinement if not kept busy with scattered small grains or a yard to scratch in, will soon neglect The second year after setting their food, especially if fed corn, and out a new bed of strawberries, is the get into the habit of pulling feathers

> The growth of a young animal is the main factor in the increase of its weight, and when the food is both nitrogenous and carbonaceous there is a greater gain when the food is mostly carbonacecus, as when corn alone is used.

The pumpkin contains a large proportion of water, but it is an excellent addition to the ration of hogs, according to experiments made, the pumpkins being cooked in winter and fed with shorts. The result was that the hogs made greater gain than on any other food.

Cabbages will thrive with frequent cultivation; in fact, they may be cultivated every day with advantage. The first cultivation should be deep, so as to permit the ground to absorb water from rains, after which the stirring of the top soil for an inch or two will

The Shamrock.

Ireland's national emblem, the shaurock, grows in many parts of the gooseberries, as they keep down the United States. It is identically the same as that which flourishes on the soil of Erin. A good many people confuse the shainrock with clover, which vate during the early part of the grow-ing season and then before hot dry shamrock can always be told from the other by its small, yellow blossoms, exactly like a strawberry bloom. This blossom puts forth five little yellow leaves. Now the blossom of the clover is either red or white, and it is larger done by a careful selection of varieties and shaped differently. The shamrock has three leaves, which, in most instances, are perfect in their heart shape, though not always so, and it grows luxuriantly in limestone re-

A TEMPERANCE COLUMN.

THE DRINK EVIL MADE MANIFEST IN MANY WAYS.

Happy Homes, a Dialogue-A Chief Executive of the "Land of Steady Habits" Gives His Reason For Being a Total Abstainer-The Force of Example.

(Dialogue for Two Girls.) First Girl. Oh, how happy is the homestead

Oh, how happy is the homestead
Where temperance fairy dwells!
All is peaceful and harmonious
As the chime of evening bells;
But where drink doth bind its victims,
In a cruel deadly chain,
There is a brawling, there is sorrow,
There is trouble, fear and pain.

Second Girl. There the little children tremble, And the tiny feet are bare; Every day there hangs the shadow Of an ever-present care, But the temperance home is giadsome As the days of golden spring, For abstaining means rejoicing, And the pledge doth blessing bring,

First Girl. When the wages at the tavern All for flery drops are spent, On the home there cometh darkness, Nought is known of sweet content Wife and little ones are starving,

Illness, weakness, need increase— While the hard-carned wage is wasted For the drink that endeth peace. Second Girl. But when all are pledged abstainers, Happy is the home and bright; Shadows fade away and vanish In the dawn of fairest light.

In the cupboard there is plenty, Flow'rets wreathe the garden gay, And the little ones are smiling, All is merry as the May! First Girl. Oh, that drink may never darken "Home, sweet home," we love so well. May the shining temperance fairy

In our midst forever dwell! Second Girl. May our homes be homes of temeprance,

Witnessing to one and all Blessings, beauty, joy and brightness— All good gifts to temperance fall. Drink we will refuse forever,

And wher'er our steps may roam, We'll resolve through all life's changes, Ours shall be a temperance home! One and all be firm abstainers, Keep the darksome cloud away; Let your homes be bright with temperance Free from harmful drink for aye!

Two grave, quiet-looking men stood on the steps of a big house in Washington some years ago. They were watching four bright children get into a cart and

-Temperance Record.

drive down the street, throwing back kisses and "good-bye" to papa and papa's friend, the General. The younger man, and the father, was General Phil Sheridan. "Fighting Phil," as he was called in those days. Another General, an old friend, said: "Phil, how

do you manage your little army of four?"
"Don't manage; they are mischievous soldiers, but what good comrades! All the good there is in me they bring out. Their little mother is a wonderful woman, and worth a regiment of officers, John, I often think what officials are to still a state of the still are the st think, what pitfalls are in waiting for my small, brave soldiers all through life. I

wish I could always help them over."
"Phil, if you could choose for your little son from all the temptations which will beset him the one most to be feared, what

would it be?" General Sheridan leaned his head against the doorway, and said soberly: "It would be the curse of strong drink. Boys are not saints. We are all self-willed, strongwilled, may be full of courage and thrift and push and kindness and charity, but woe be to the man or boy who becomes a little son die to-day than to see him carried in to his mother drunk! One of my brave soldier boys on the field said to me just before a battle, when he gave me his mes-sage to his mother, if he should be killed, 'Tell her I have kept my promise to her. Not one drink have I ever tasted.' The boy was killed. I carried the message my own lips to the mother. She 'General, that is more glory for my boy than if he had taken a city." - Presby-

Wise Words From a Good Man Governor Buckingham, the good, wise Governor of Connecticut years ago, gave his reasons for being a total abstainer in

'It is safer for me to abstain than to drink If I should indulge in drink, I am afraid I should not stop at the line which many call temperance, but should become a slave to the habit, and with others of stronger nerve and firmer purposes, go down to a drunk-ard's grave. If I indulge, I am not safe. We talk of the purity and dignity of human nature, and of relying upon our self-respect for security; but there is no degradation so low that a man will not sink into, and no crime so hellish that he will not commit, when he is drunk. There is nothing so base, so impure, so mean, so dishonest, so corrupt, that a man will not do when under the law of sin-of appetite. Safety is to be But if it could be proved conclusively to my own mind that I could drink and never be own mind that I could drink and never be injured, yet, with my views on the subject, it would be my duty to abstain. I could not be certain but others, seeing me drink, might be influenced to drink also, and, being unable to stop, pass on the path of the drunkard. My example would, in that case, be evil. But, I ask, am I my brother's keeper? Yes, I am responsible for my influence; and lest it shall be evil, I am under a high moral and religious obligation to deny myself that which may not injure me, but will injure him. If I neither taste, nor touch, nor handle, nor countenance, then my example will not lead others to become

How They Do It in Manitoba. "They have a very effective way of put-ting the brakes on inebriates up in Maui-toba," writes a correspondent. "When a toba," writes a correspondent. "When a man has been convicted twice or thrice of druckenness in the local police courts, he is sentenced to wenr a brass collar, which is a plain tip to saloon-keepers that he is a person to whom it is forbidden to sell any intoxicating beverages. No man with this badge of disgrace can get a drink anywhere, for the law is strictly respected. The result is that in many cases an entire our is effected in the individual. Whenever the authorities think that the collar penalty

has been endured long enough the collar comes off, and the citizen is at liberty to get a drink."—Scottish Reformer. Shafts Aimed at the Rum Evil. If a man will only think he is less likely to drink.

It is in the distillery that the devil finds his best artillery. A man should have too much respect for himself and family to be seen in a grog

How many drunkards would there be today if there had never been moderate The wine drinker of to-day is in great danger of becoming the whisky drinker of

happiness of a single family. It is wise, therefore, never to drink liquor. One of our contemporaries rises to re-mark that the beer-barrol is far more deadly to our redders than the rifle-

Liquor drinking never added to the true

As a matter of fact, respectability has little to do in palliating an evil like the liquor traffic. On the contrary, the more iniquity is white-washed the more dangerous it becomes.

It is beyond dispute that always and everywhere those who drink most of liquors in any shape, beer, brandy, whisky or rum, soonest give out, soonest get sick, and are Go to any hospital, ask of the many young and old that you will find there the

cause of their illness, and you will discover that in very many cases it can be traced to

In a local school an extensively signed letter was sent to the head master praying that the scholars might be allowed leave of absence for the Barnum & Bailey procession. No notice was taken of this, but imagine the chagrin of the controller of the birch when he received a second epistle, after the boys had gone, thanking him for giving the leave desired, as they "understood his silence to mean consent." Out of some 200 loys only thirty were in class. - Newcastle (England) Daily Leader.

Animal Sense and Brain Power. In individuals of the same species extremes in size do bear some relation to mental power, usually as coincident with deficiency. Very large dogs, such as the Great Dane, the St. Bernard (of the show bench), and the mastiff, are seldom as intelligent as those of medium size, even when constantly in their owners' company. It is possible that the "Landseer" Newfoundland is as intelligent as it is courageous in aquatic feats, but recorded instances are wanting. So also "dwarfed" dogs, the little creatures bred to be carried in muffs, or as fancy pets, are often stunted in mind as well as in body. But this does not apply to some of the naturally small breeds; the Blenheim spaniels being, ss might be expected from their cranial development and expression, among the most intelligent of dogs-far brighter, for instance, than the heavy Clumber spaniels, which weigh seventy pounds.

A little Jersey or Kerry cow has often twice the wits of a large Shorthorn or Hereford. But this is doubt less because both the Jerseys and Kerries have been in more intimate relations with men, and have been kept as pets and family friends for very many generations-for how many any one may indge who buys the annual reports and pedigree lists contained in "The Jersey Herd Book." In the same way, ponies are commonly said to be "cleverer" than horses. This is mainly because, owing to their smaller size, they are in daily use in petty domestic work, and so are in constant contact with human beings, -The London Spectator.

England's Opinion of Us.

The admiration and interest manifested in the destruction of Admiral Cervera's fleet are indescribable. Our naval officers look upon it as a splendid achievement, reflecting inexpressible credit on the officers and men of the blockading squadron. Such is the crushing disparity between the naval capacity of the two nations that it is believed that if the Spanish fleet had been manned and fought by American officers and crews, and Admiral Sampson's squadron led by Admiral Cervera and his officers and men, the loss of life on the American side might perhaps have been greater, but the result would have been the same. If proof were needed it is supplied by the gallant action of the Gloucester, commanded by Lieutenant Wainwright. Wainwright's failure to observe his Admiral's signal is Nelsonie. The opinion of the professional experts coincides with that of hard-worked lieutenants of the Channel squadron. It is that the American n wy, both as regards personnel and material, is now as near perfection as skill, courage, practice and discipline can attain, and is quite as good as the best in the world .-London Letter to Harper's Weekly.

A new kind of cloth is being made in Lyons, France, from the down of hens, ducks and geese. Seven hundred and fifty grains of feathers make rather more than a square yard of light, water-proof cloth.
