Hawks and Grasshoppers.

During the past few weeks sportsmen in the vicinity of Clayton, New Mexico, have been enjoying a novel recreation. About a month ago grasshoppers made their appearance in the vegas, and soon became so thick as to threaten utter destruction of the grass. A few weeks ago, however, hawks of the common chicken hawk variety began coming in great flocks, and in a short time literally covered the country, living solely on grasshoppers, as a result of which the latter soon disappeared. Then the hawks became a nuisance, and turned their destructive talents to chickens, quail, etc. Hunting parties were organized and began killing hawks. Hawks were so numerous that the poorest marksman could easily kill several dozen in a few hours. After thousands of the hawks had been killed they abandoned the country more suddenly than they appeared .-Salt Lake Herald.

MRS. LUCY GOODWIN

Suffered four years with female troubles. She now writes to Mrs. Pinkham of her complete recovery. Read her

DEAR MRS. PINKHAM:-I wish you to publish what Lydia E. Pinkham's Vegetable Compound, Sanative Wash and Liver Pills have done for

I suffered for four years with womb trouble. My doctor said I had falling of the womb. I also suffered with nervous prostration, faint, all-gone feelings, palpita-

tion of the heart, bearing-down sensation and painful menstruation. I could not stand but a few minutes at a time.

When I commenced taking your medicine I could not sit up half a day, but before I had used half a bottle I was up and helped about my work.

I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and used one package of Sanative Wash, and am cured of all my troubles. I feel like a new woman. I can do all kinds of housework and feel stronger than I ever did in my life. I now weigh 13114 pounds. Before using your medicine I

weighed only 108 pounds. Surely it is the grandest medicine for weak woman that ever was, and my advice to all who are suffering from any female trouble is to try it at once and be well. Your medicine has proven a blessing to me, and I cannot praise it enough .- Mrs. Lucy Goodwin,

she has been taking CASCARETS and they have all disappeared. I had been troubled with constipation for some time, but after taking the first Cascaret I have had no trouble with this aiment. We cannot speak too highly of Cascarets." FHED WARTMAN.

NO-TO-BAC glats to CURE Tobacco Habit.

AGRICULTURAL TOPICS

Products of Wild Land. Aside from its crop of trees with which uncultivated land is mostly covered, it also produces nuts, berries and other fruits which are always in their season to be found in city markets. The whortleberry and its near relative, the huckleberry, are always grown wild, as they need just the dampness and shade that they find in forest and low, wild land. But the wild blackberries and raspberries still constitute a considerable portion of the fruit sold in city markets. In most cases this self-grown fruit is regarded as the property of whoever wishes to gather it. The huckleberry patches are, however, often reserved by owners of the land, and those wishing the fruit must pay for it, or, as is usually done, dividing it after it is

A Few Points to Know.

Charcoal is excellent for poultry; so is corn burned or charred on the ear. One way to get a yellow yolk is to take beets or carrots, cook them for the fowls, feed them, and in two days there will be a change; the yolks will be as yellow as desired. One of the most important things in feeding poultry, yet too often neglected, is a a supply of good, pure drinking water, and a fowl drinks every ten or fifteen minutes in warm weather. Impure water is one of the most fruitful sources of disease. Cholers, for instance, is in all probability, due often to the drinking of water that is not pure. Snow water will reduce flesh as rapidly as a sharp attack of diarrhœa. The best thing is to have a stream of running water. A few rusty nails in the water are good, or a few drops of tineture of iron every other day. The vessels must be kept clean, and water should be warmed in winter for fowls, or it will chill them, but in summer it should be cool.

Apples For Cooking. There are many sour apples that contain more saccharine matter than those that are called "sweet" only because they lack acidity. And there is some malic acid in the varieties that are called sweet. It is the combination of sweet with acidity that makes the richest and best flavored apples either for eating raw or for cooking. Commonly, only those that are very distinctly acid have a good flavor when cooked, and they should be said enough to require considerable sugar in cooking. Yet, when the country was new, sugar was much dearer than it is now, and to save sugar the sweet and sour apples were sometimes made into pies together. This was, however, a poor substitute for sugar, as the sweet apples would not cook through so quickly as the sour, and remained hard and nearly tasteless lumps in the pie. There were some kinds of native fruit apples that never were propagated in nurseries that were neither wholly sweet nor wholly sour, but such a combination of both that they would make very good pies without sweetening of any kind.

Honey Selling With Profit.

The apiarist who has but little honey for sale will find it much more profitable to arrange with some live grocer in a neighboring town to handle his product on commission than to ship to commission men in large cities. It is preferable, however, to work up a retail trade of your own, which may be readily done by the use of small sample boxes. In the spring get some sections holding a quarter of a pound of honey and set them on the hives; when they are filled label them and distribute them among the best families of your nearest town. Follow this up a week later by taking orders, and if your samples were up to the mark you will have no trouble in getting advance orders for all the honey you will have for sale. It will be a comparatively easy matter to add to the trade another year, and you will soon find you have built up a pleasant and profitable business. The farmer who can successfully produce enough honey for the use of his own household is well fitted to go into the business on a much larger scale.

Why is Poultry Valuable to the Farmer? Professor Gilbert, of Ottawa, answers this question in the following manner and his conclusions caunot be questioned:

1. Because he ought by their means to convert a good deal of the waste of his farm into money in the shape of eggs and chickens for the market.

2. Because with intelligent management, they ought to be all year revenue producers, with the exception of perhaps two months, during the moulting period.

3. Because poultry will yield him a quicker return for his capital invested than any of the other departments of agriculture.

4. Because the manure from the poultry house will make a valuable compost for use in either vegetable garden or orchard. The birds them-selves, if allowed to run in plum or apple orchards, will destroy all injuri-

ous insect life. 5. Because while cereals and fruits can only be successfully grown in certain sections, poultry can be raised for table use or layers of eggs in all parts of the country.

6. Because poultry raising is an employment in which the farmer's wife and daughters can engage and leave him free to attend to other depart-

7. Because it will bring the best returns in the shape of new laid eggsduring the winter season-when the farmer has most time on his hands.

8. Because to start poultry raising on the farm requires little or no capi-Under any circumstances, with proper management poultry can be made, with little cost, a valuable adjunct to the farm.-Farmer and

Imported Toast.

Quite a quantity of toast packed in barrels, an article made of stale buns split through the centre and toasted, is imported by Canada from the United States. It is brought in solely by Norse people along the border in the Algoma district, who use it in soups Latterly the discovery has been made that the Finns have been smuggling tobacco packed among the toast.

Artificial limbs have been constructed in Germany in such a way that those who are obliged to use them can ride a bicycle.

A TEMPERANCE COLUMN

THE DRINK EVIL MADE MANIFEST IN MANY WAYS.

Rescue the Other Man-Suppling With the Devil in New York's Tenderloin-The Immense Amount of Liquors Con sumed There-The Inevitable End.

Twas eventide on the ocean, duller the cloudlets grew, And night was drawing a curtain over the gold and blue.
A good ship ploughed the waters peacefully, calm, serene.
When, lo! a spot in the distance—a raft of a wreck was seen.

'Ship ahoy!" like a sounding trumpet the the voice of the captain rolled, Though his call might be unheeded, and he knew that his time was gold;
He had caught disaster's warning, and
swiftly did rescue plan,
For he had the heart of a here to cherish

A wave-washed hulk was floating on the sulien, murmuring deep,
And lo! 'mid the broken rafters, lay a
crouching and huddled heap—
A shadow with human semblance, so frail
and so sad a wreck,
That the hands of a child could lift it and raise to the good ship's deck.

wan was each sharp, thin feature, how faint was the gasping breath! And tearfully watched his saviours in the struggle and fight 'gainst death; And the lips that were drawn and wasted moved as the moments sped,
As they stopped to catch his message,
"There's another man yet!" he said.

But, alas! for his hated comrades, victims

of want and storm.

Their ears were deaf to the voices that rang o'er each lifeless form.

Too late had the aid long prayed for, to their help and their rescue come—

Alas! for their waiting dear ones in each distant desolate homel

Friends safe on the good ship "Temper-ance," fair breezes our sails now fill. But while we are heading to harbor there are others in danger still. On you wreck lies a drink-cursed brother, rise up, and his safety plan; Nor rest till the "Temperance Lifeboat" has rescued "the other man."

"The Pace That Kills."

The terrible effects of the drink habit then practiced amid the glamour of city life is shown in a striking article on New York's greatest maelstrom of vice, the "Tenderloin," printed in the Herald.
"The pace that kills" leads through the Tenderloin, says the Herald. Here the average life of the gay woman is seven years. In these new days this haunt of crime has spread like the extending jaws of some arread worster.

of some dread monster.

The medical side of the Tenderloin is a warning that also fills one with terror. The finger of science points but to sin's black, inevitable end. Even to the hardened man this leap over heil's Niagara is appalling. Listen to the words of wisdom and sincerity. When asked by a Herald re-porter to talk on the pace that kills, Dr. George F. Shrady said:

"Generally speaking, the pace that kills is always associated with dissipation in one form or other. The usual start is made in the desire for diversion or re-creation, and the common ending is in an insanity of excess. It is the very opposite of healthful rest, which one needs for his

daily labor.

"Nature always believes in moderation.
The really healthful man takes life judiclously, evenly understandingly, and never over-excites himself. Stealing from the night to lengthen the day is fatal to all With a man the period is longer than

with a man the period is longer than with a woman, because of his greater re-sisting physical powers and his diversions in other and possibly more absorbing direc-tions. Sooner or later, however, he, too, is sure to become a physical wreck. "If seated disease does not overtake him or her, the drinking habit almost invariably

associated with every form of dissipation is sure to bring up the end. "You sup with the devil and you will have the one flery and damning sauce. With-out it his Satanic Majesty would only offer an empty spoon. The horse race could not go on, the cards could not be shuffled, the midnight dance would lose its charm, the coarse rout would have no stimulus, and the late supper would be without its ever present and insidious charm.

'I venture to say that there is more

liquor drunk to the square rod of space in the Tenderloin district than any other cor-responding density of population in any other part of the city. The physical wrecks, affoat with their burned and blackened spars, drift back to every home in the

'Men and women with ruined stomachs, amaged kidneys, crippled hearts, para-iyzed limbs and rotten bones mark the track of nature's relentless fury of balanc-ing retribution. These patients fill our hospitals and asylums, and furnish examples of almost every form of disease to which degenerated humanity is subject.

which degenerated unmainty is subject.

"Each life has only so much coal to ourn. The longer we keep on the 'blower' the sooner we get the ashes. Disease and death are always the penalties of every excess. In the category of causative influences of diseases, dissipation in its varied and comprehensive sense always takes a

"This is the pace which not only kills those that are but those that are to be. It is tainting the race along the line of de-scent with idiocy, heroditary crime, insan-ity and other forms of physical degener-acy. All this show that we must live moderately and decently and follow nature's unmistakable and reasonable man-

Brass Collars For Men.

The London Telegraph tells of how excessive drinking is checked in Manitoba. When a man has been twice or thrice con-victed of drunkenness in the police courts he is sentenced to wear a brass collar, which marks him out among his fellows as a person to whom no publican could with impunity serve liquor. The drastic meas-ure often proves a cure. On the authori-ties being satisfied that the branded indi-vidual has served a sufficiently long term of probation he is uncollared and set at

Notes of the Crusade.

It is the "first glass" that brings the murderer to the gallows. From drinking and swearing and every sin, You are safe and secure if you never begin.

President Hart, of the Chicago Baseball Club, selected Waycross, Ga., as the training ground for his team this year, giving his reason therefore that there was no

If John, at that time a clerk in a ware-house, had only said when invited to stop at a saloon and have a glass, "No, I thank you," he would not now be the inmate of an inebriate asylum. It is as practicable to run a canteen as a

temperance canteen, and sell only such de-sirable articles as soldiers need, as it is possible to carry on a family grocery or drug store without the sale of liquor. Last spring one of the saloonkeepers of

Meadville, Penn., sold intoxicating liquor to these students who were minors. With-in twenty-four hours the faculty of Alle-gheny College had him arrested, and in less than thirty days his license was revoked by the presiding judge of Crawford

upon doing; in other words, "stop before you begin," has saved many a boy from ruin.

The city of Brockton, Mass., has for nearly two months been enduring a reign of terror in incendiary fires. Circumstances led to the arrest of Joseph E. Stoddard, and, under pressure, he has confessed to having set twenty-one fires. He admits that the crimes were all committed after he had been drinking.

after he had been drinking.

A saloonkeeper in England advertised his beer as iquid bread. A member of the English Parliament bought a quart and paid a chemist \$15 to examine it. Two per cent., about a thimbieful, was really food. Five per cent. was alcohol, and the remaining ninety-three per cent. water. He was arrested under the food act.

The Major's Experience

One of the staunchest supporters of the leep-water way from the Great Lakes to the ocean is Major A. C. Bishop, of 715 Third Ave., Detroit, a civil engineer of wide experience and considerable prominence in als profession. He was assistant engineer on the Hudson River Railroad in 1850 and has since conducted large engineering operations. He has been located in Detroit since 1851, and has a large acquaintance among the business men and citizens of

this city.

Two years ago, for the first time, Major Bishop was in the hospital. For two months he had the best of medical attendance, but when he was discharged he was not like the Major Bishop of old. When asked regarding his health, he said: "When I had my last spell of sickness and came out of the hospital I was a sorry sight. I sould not gain my strength, and could not walk over a block for siveral weeks.

"I noticed some articles in the

articles in the newspapers regarding Dr. Williams' Pink Pills for Pale People, which convinced me that they were worth trying and worth trying and bought two boxes. I did not take them for my complexion but for strength. After using them I felt better, and know they did me worlds of good, I am pleased to recommend them to invalids who need a tonic or to build

The Japanese, it is said, now publish here times as many books as the Italians.

A New Orleans jeweler tells a rather whimsical little story at the expense of a gentleman of this city who plumes himself on his freedom from superstiion. "Back in the '80's some time," said the jeweler, "he bought an opal ring while on a visit to El Paso, Texas. The setting was supposed to come from the Mexican mines and was remarkably handsome and full of fire. It was mounted with ten small brillants and made really a very striking ornament; but, as usual, the friends of its owner were continually predicting that it would bring him bad luck. He laughed at their alarm and finally look a good deal of pride in vaunting iis superiority to popular supersti-ion. About a month ago he lost one of the brilliants and brought the ring tere for repairs. T've worn this opal for over ten years,' he said, 'and I've get to discover that it was responsible or any misfortune. Plague take such silly notions, anyhow.' When I repaired the mount I examined the seting carefully and was greatly amused to discover that it wasn't an opal at all, but merely a piece of colored glass. Opals, by the way, are easily mitated, the current belief to the contrary notwithstanding. When I told the gentleman about it it made him so mad that he gave the ring to his ne-gro porter."—New Orleans Times-

Democrat. Small Vegetables in Fashion.

While California is trying to grow pigger and bigger fruits and vegetables, epicures here in the East are developing a taste for miniature specimens of the earth's products. supply the demand in the larger cities for young vegetables, such as the French consider the most delicate and appetizing, the truck farmers bring to market tiny potatoes, turnips, carrots, cauliflower, and even heads of cabbage the size of a base-

Such vegetables are, it is said, more easily digested, their fiber being tender and succulent, instead of tough and often a woody nature, as the growth arrives at maturity. Some of the flavor is undoubtedly lost, but lovers of these undeveloped vegetables claim that this loss is counterbalanced by their daintiness and delicacy.—New York Evening Post

New Zealand Birds.

As for birds, I have never hearmore beautiful melodies than are poured downward from the boughs of New Zealand trees. One could almost believe from the notes which come flooding down from yonder golden songster that Siegfried's bird had come here to dwell when his mission was ended near the Drachenfels. His song ends with the setting of the sun, and we, weary of the outer world, find it pleasant to return to our comfortable inn, and, sitting by a roaring fire, gaze into its glowing depths, or out through open windows, upon the silent majesty of these eternal snows,-Islands of the Southern Seas, by M. M. Shoe-

In Scotland the town drummer was an important personage and performed many duties. When beggars or suspicious characters could not give a satisfactory account of themselves on being brought before the bailies, and were ordered to be placed in the pillory or in the jougs, they were afterward drummed out of the town, The drummer would also make known, after beating his drum to attract attention, notices relating to town affairs, roupings under judicial authority, etc.-Notes and Queries.

In a contribution by Dr. T. M. Prudden to Harper's Magazine, on the origin of the canons of the Colorado. the opinion is expressed that at first, the Colorado and its tributaries, sweeping over the slowly rising surfaces, planed them down in the most relentless manner, as it were, and then began wearing out broad, shallow stream beds. Then the country rose more rapidly, and the water had to cut deeper channels in the rocks in order to flow out and away to sea.

Owing in part to the wear of the water itself, but more to the ceaseless action of the suspended sand which it bore from the up-country, or gathered up as it went along, and to the force of pebbles and boulders which it swept on in flood time, the river kept cutting down as the strata rose.

Finally, when what was left of our inland sea bottom got thrust up so that, towering far above its former rocky shores, it had to be called a plateau, the Colorado and its tributaries or auxiliaries found themselves at the bottom of a series of colossal canons and gorges, where they are to-

Sleeping With Head to North. The idea that human beings should sleep with their heads to the north is believed by the French to have for its foundation a scientific fact. They affirm that each human system is in itself an electric battery, the head being one of the electrodes, the feet the other. Their proof was discovered from experiments which the Academy of Science was allowed to make on the body of a man who was guillotined. This was taken the instant it fell and placed upon a pivot free to move as it might. The head part after a little vacillation turned to the north and the body then remained stationary. It was turned half way round by one of the professors, and again the head end of the trunk moved slowly to the cardinal point due north, the same result being observed until the final arrestation of organic movement.

There are approximately, though the number is steadily on the decline, 14,000,000 horses in the United States, and there are about 2,000, 000 mules, principally in the South
