"Durability is Better Than Show."

The wealth of the multimillionaires is not equal to good health. Riches without health are a curse, and yet the rich, the middle classes and the poor alike have, in Hood's Sarsaparilla, a valuable assistant in getting and maintaining perfect health. It never disappoints.

Scrofula-"Three years ago our son, now eleven, had a serious case of scrofula and erysipelas with dreadful sores, discharging and itching constantly. He could not walk. Several physicians did not help for sixteen months. Three months' treatment with Hood's Sarsaparilla made him per-fectly well. We are glad to tell others of it." MRS. DAVID LAIRD, Ottawa, Kansas.

Nausca - "Vomiting spells, dizziness and prostration troubled me for years. Had neuralgia, grew weak and could not sleep. My age was against me, but Hood's Sarsaparilla cured me thoroughly. My weight increased from 125 to 143 pounds. I am the mother of nine children. Never felt so well and strong since I was married as I do now." MRS. M. A. WATERS, 1529 33d St., do now." MRs. M. Washington, D. C.

Eczema-"We had to tle the hands of our two year old son on account of eczema on face and limbs. No medicine even helped until we used Hood's Sarsaparlia, which soon cured." Mas. A. VAN WXCK, 123 Montgomery Street, Paterson, N. J.

Money-Making Elephants.

Three elephants earn \$10,000 a year. This is \$2000 more than the salary of a member of the President's cabinet and \$3000 less than the income of an Admiral in the navy, a rank done away with because Congress thought the salary too high. These elephants are are at the London Zoo, and they earn their money by carrying on their backs the patrons of the gardens. Every 'Arry takes his 'Arriet and hies him to the Zoo on bank holidays, and for five cents they can jog about the ring

on the back of one of the elephants. The elephants are stationed in different parts of the Zoo, and there seems to be a bit of professional jealousy between them. Apparently they are on very good terms between hours, innes is brick and the largest one is coining money, for he is the favorite, the other two try to lash him with their trunks as he passes. The larger elephant is a financial record breaker. He is the senior member of the firm, so to speak. On one holiday he carried 1600 persons.

Training Schools of Hell.

To the Editor: I have read with some interest the late discussion upon the saloon question. To say that I am "surprised" at the stand which some of our eminent clergymen have taken in favor of its pro-pagation as a workingman's club, and fos-tering it as a "necessity," is putting it mildly. To speak the truth, I am shocked completely. How in the face of modern progress in

Christianity and the advance in civilization these super-educated gentlemen can pub-licly state that the drinking saloon is a "necessity" is preposterous in the extreme. Yet they who have pledged themselves to the defence of Christ and His gospei have dared to sanction the continuance of these "training schools of hell." They are noth-

ing less. Here are trained, by the agents of Satan, Here are trained, by the agents of Satan, men to become murderers, thleves, assas-sins, burglars, llars, swindlers, suicides, wife-beaters, inhuman fathers and hus-bands and a host more which do not ap-pear in the regular category of criminals, but are just as vile as the more hardened ones. The list of professional and other oriminals directly traceable to the drink saloon is too extensive, and too well known to yourself as editor of a paper. These clergymen may as well teach the people that the "gambling and opium dens" are a necessity, the bookmaker or race course also a necessity in modern civilization. Yet St. Paul distinctly states in his epistles "no drunkard car enter the

In his epistles "no drunkard car enter the kingdom of God." Why then should these so-called ministers of God advocate the so-called ministers of God nuverate the continuance of the resorts which produce drunkards? On the face of it, they prove themselves not ministers of God, but of the evil one, for they are traitors to God's cause in advocating the saloon in any way

whatsoever. If the saloon be a necessity, then annul In the saloon be a necessary, then annul the laws punish tog the logical product of saloons, and let loose upon society a horde of oriminals of avery class. Saloons make criminals, and are responsible to society for overcrowded prisons, insame asylums, corbouses, etc., etc. Close the saloons ad society will be the better and more dignified; less paupers, less labor troubles, an improved condition generally in every branch of civilization. The nation, too, will become an example to other nations of a standard of morality never before at-tained in the world's history.

the murderer of the Empress of Austria, from death by law, it has been generally assumed abroad, even by editors, that "capital punishment" is no longer in force in Switzerland. The fact seems unknown or forgotten that the Swiss Cantons occupy toward the federation a position similar to that of our States toward the Union. In Switzerland there are still as many penal codes as there are Cantons and half Cantons-twenty-five, "Capital punishment" was, indeed, abolished throughout the republic by federal law, in 1874 I think; but a subsequent increase in the number of murders brought about a change in public opinion on the question, and the several Cautons were again invested with the right to take "life for life," so that now the laws of some Cantons impose death as the extreme penalty, while the lawmakers of the others decline to do so. I know of at least one murderer who was sentenced to death in the Canton of Schaffbansen last year. The commutation of his sentence to imprisonment for life was received with surprise and not at all favorably by the people of the said Cauton .- A Letter in the New York Sun.

Building a Battleship. The evolution of a battleship starts

in the mold loft, when the future vessel is laid off to her full size to enable those responsible for the work to test the accuracy of the drawings and guage with exactitude the quantities of various material which will be required. The laying off and coincident preparation of the framing occupy some considerable time, but after two or three months of preparation all is ready and the slipway on which the leviathan is to grow is prepared for the laying of the keel, an peration requiring the greatest possible care, inasmuch as the least deviation from the line shown in the drawings would materially interfere with the navigable quality of the completed ship.

The keel satifactorily laid, the next process consists of the building up of the great ribs destined to support the vessel's skin and armor, and to give her form and strength, and the framing and heavy steel deck beams, which have been prepared in the smith's shop, are brought alongside the slips and one by one attached to the keel and united by cross pieces which keep them in position .- New York News.
