DUNKLE,

#### HYPOCRITE OR IGNORAMUS.

#### He Who Preaches Free-Trade as a Remody Against Trusts.

The theory of the Democracy is that trusts are the creatures of Protection, and America are not protected, how can it be that they cannot exist under Free-Trade. It should be explained that this is the the creations of a tariff which has opened avowed theory of Democracy, rather than its honest belief ; a theory put forth for political effect, to be introduced into the next campaign somewhat as follows: Trusts are an unmitigated evil; they are created by the Protective Tariff ; therefore we should have a Free-Trade Tariff ; therefore the Democracy, with its pledge to take Protection out of the Tariff, should be put in power.

Now all this is the veriest pretence, There is no evidence that trusts owe their establishment and maintenance to the it possible that the syndicates of London Protective Tariff. Trusts are a business developement of the past few years, and they exist under all Tariff. An article in the May Forum states that 180 trusts were organized in Germany two years ago, that their number has greatly increased since then; that among them are a German coal trust, and an Austrian rolling mill trust; that there are French combinations controlling iron, petroleum, sugar, chemicals and numberless other products, and that Belgium is overrun with trusts. These countries have various kinds of tariffs.

Trusts are not the outgrowth of any special tariff system. They flourish or fail independently of tariffs, and are no more prevalent under protection than under free trade. So when a Democrat or Populist comes around saying that the American people, in order to kill the trusts, must slaughter their home industries by subjecting them to unrestricted foreign competition, it is safe to set him down as a hypocrite or an ignoramus. In either case he is intent only on making political capital by raising a false issue. He wants to advance the fortunes of his party, and he cares not whether the means be fair and truthful or foul and deceptive.

But the American people are not to be hoodwinked. . They have had some instructive object lessons in free trade and protection. They like the latter because of the prosperity it has brought, and they are not going to give it up at the behest of demagogues whose trbrications have not even a kernal of truth and whose motives are transparently selfish .- Rochester (N, Y.)
