TROLLEY CAR DISASTER.

A Crowded Coach Plunges From a High Trestle.

Thirty-two People Killed and Eight Others Badly Injured. Several of Whom Will Die. The Road Was a New One and Had Just Been Opened to the Public—Details of the Horrible Disaster.

BRIDGEPORT, Conn., Aug. 7.—The most frightful catastrophe recorded in Connecticut in nearly half a century occurred shortly before 4 o'clock on the Stratford extension of the Shelton street railway company, when a loaded car went off the trestle over Peck's Mill pond, at Oronoque, about six miles north of Bridgeport and sunk in the flats 40 feet below.

Thus far 36 people are known to be dead and several more injured. Only two persons are known to have escaped unharmed. It is believed that there were 43 passengers on the car, but the indicator was removed by a conductor of another car and spirited away, so that at present it is impossible to state accurately the number aboard.

The scene of the accident is midway between Shelton and Bridgeport. The car was northbound, running toward Shelton. It was in charge of Conductor John Carro, of Bridgeport (who was among the killed), and Motorman Hamilton of Bridgeport. He escaped by jumping.

The trestle is 440 feet long, made of iron, with stone foundations and was not protected by any guard rails. South of the trestle is quite an incline on which the car ran down at a very fast rate of speed. After it ran on to the trestle for about 10 feet the trucks left the rails, and then the car continued on the ties for about 75 feet, when it went off the trestle and dropped into the pond below, overturning completely and up-ending.

When the car struck, the motor, which weighed four tons, and the heavy trucks crushed into it, instantly killing many of the passengers. Mrs. J. C. Lynch, R. W. Ivors and J. M. Johnson of Bridgeport, who were passengers on a car a short distance behind, were quickly on the scene and rendered all possible assistance to the injured. Word was quickly sent to Bridgeport and three ambulances and a police wagon were hurried to the scene and the injured were taken to the Bridgeport general hospital. A number of other conveyances were also pressed into service to convey persons to the hospital.

Medical Examiner Coggeswell of Stratford, unprovoked a morgue in the main room of the town hall at Stratford, and in a very short time 23 bodies were laid out, awaiting identification. The accident was witnessed by Miss Frances Peck, who resides about 400 feet from the bridge. She was up stairs at her home as the car was passing and claims that it was running at an unusually high rate of speed. Frank Cramer, who was bathing near the bridge, stated that the passengers were all singing and in the most joyful mood as they passed his vicinity.

The road which is practically controlled by the Bridgeport Traction company, was opened for traffic last Thursday. President Andrew Tadell was in Derby when he received news of the catastrophe, and immediately drove to the scene. He was completely prostrated when he saw the extent of the disaster.

One Trolley Car Crashes Into the Rear of Another One. NEW YORK, Aug. 8.—A car on the Flatbush avenue line, Brooklyn, bound for Bergen Beach, in charge of Motorman Albert Vogel, ran into the rear end of another car, injuring 13 persons, three of whom were taken to the hospital.

MAMMOTH COAL DEAL.

Two Contracts Closed at Uniontown Involving a Million Each.

UNIONTOWN, Pa., Aug. 4.—Two enormous coal deals were closed here, involving more than \$1,000,000 each. The Federal Steel company bought nearly 6,000 acres of coking coal in Germany, Manheim and Nicholson towns, shipped and optioned by John C. Neff, of Masontown and Herbert Dupuy and John H. Hillman of Pittsburgh. The deeds for 2,000 acres of the tract have been passed on and left for record, the consideration for that portion being \$1,000,000, and the deeds for the remaining tract are being prepared. The cost of the coal field will be nearly \$2,500,000.

The Federal Steel company has commenced to open the field. They have organized the Smithfield and Masontown Railroad company, with a capital stock of \$10,000, to build a railroad 11 miles long, to connect their field with the Baltimore and Ohio railroad at Smithfield. The Pennsylvania railroad has gone to the expense of reaching the plant from Brownsville, and from the Whip-Poor-Will road, from Upper Middletown. The Pittsburgh and Lake Erie will get a slice of this big trade by extending their road from Dickerson Run to Fayette City.

Conductor Assaulted by Soldiers. PHILADELPHIA, Aug. 6.—Conductor J. M. Climonson of the Seashore express, on the main line of the Pennsylvania railroad, was fatally injured in a struggle with five intoxicated soldiers, said to be members of the new Twenty-eighth regiment of volunteers, now recruiting at Camp Meade. The soldiers boarded the train at Harrisburg and went to the rear platform of one of the cars. At Leaman Place, about 40 miles east of Camp Meade, Climonson ordered them to get inside, but they refused and when he seized one of them by the arm the soldiers attacked him.

Died in the Pulpit. HANOVER, Pa., Aug. 5.—"We all of us ought seriously to consider the certainty of this life and shape our course so as to be sure of enjoying the future life," said the venerable Rev. Samuel R. Meyers, pastor of the Hanover Mennonite church in an address delivered last evening at the dedication of the new church of that faith here. Then the clergyman, who is 78 years old, sank in his chair on the rostrum and died.

Conductor Badly Injured. OIL CITY, Pa., Aug. 7.—A wreck occurred on the Allegheny Valley railroad near West Monterey. The train was a freight drawn by two engines. The latter left the track and two cars behind them added to the disaster. Conductor Harry Kent of Pittsburgh, was hurt so badly that it is feared that he will die, and the dead body of a stranger was found in the wreck, supposed to have been a tramp.

Killed His Children and Himself. STISQUEHANNA, Pa., Aug. 7.—Charles Yager, 40 years old, of Brandt, a small manufacturing village, five miles south of here, killed his three small children by cutting their throats and then committed suicide by the same means. There seems to be no doubt that the father had gone insane, brooding over the recent death of his wife.

An Officer Reckless in Shooting. NEW CASTLE, Pa., Aug. 5.—The coroner's jury returned a verdict in the case of Thomas Costello of the Seventeenth ward, Pittsburgh, who was mortally wounded by Officer Beard here last Friday. Costello died from the wound and the coroner's jury decided that the officer was reckless in shooting although they did not think he intended to kill.

Colliery to Resume. SHAMOKIN, Pa., Aug. 7.—N. C. Taylor of New York, representing New York and Boston capitalists, has arranged with a local iron manufacturer to have the breaker machinery of the Natalie colliery overhauled at once. He said the colliery would resume operations in 10 days. It has been idle since July, 1897. Work will be given to 1,200 men and boys.

Sharon, Pa., Aug. 4.—Miles Johnson, aged 42 years, was probably fatally injured at Burg Hill. He was cutting wheat when he fell into the machine and was badly cut about the head and face. He is single, and came from Allegheny a few weeks ago to work for his brother.

GRASSHOPPERS RUI.

Great Ravages by the Insects In Colorado, Kansas and Nebraska.

DENVER, Aug. 4.—Eastern Colorado, western Nebraska and Kansas are just now in the throes of a grasshopper plague, the worst on record for 15 years. Crops are being devastated and the farmers are driven to distraction by the inroads of the pest, according to reports received at the state horticultural department. In fact, the grasshoppers are doing so much damage that the entomologists of the three states have decided to hold a meeting to devise a plan to combat them. Professor L. Bruner, state entomologist of Nebraska, arrived in Denver from the affected district, and, after a consultation with Mrs. Shute, secretary of the horticultural board left for Fort Collins, where he will consult with Professor C. P. Gillette, the Colorado entomologist, and S. N. Hunter, the Kansas authority on bugs, on some method of getting rid of the pest that is now making life a burden in the rain-belt country.

"I have seen the grasshoppers thicker in that section, but not often," remarked Professor Bruner. "They are as numerous now as the farmers can stand, and unless something is done at once to check them the loss to crops will be tremendous." "I have seen the grasshoppers thicker in that section, but not often," remarked Professor Bruner. The lord advocate also said he had no knowledge of the facts of the case except that he saw in the newspaper that Mr. Carnegie had been appointed a deputy lieutenant. FERRY DOCKS GO DOWN.

Two Hundred People Precipitated Into the Water.

Twenty Persons Drowned Before They Could Be Rescued—It Was One of the Worst Disasters That Ever Occurred in the State of Maine—The Victims Excursionists Going to Bar Harbor.

BAR HARBOR, Me., Aug. 7.—With the lightest of hearts, amid laughter and exchange of merry comment for so many of them were known to each other, nearly a score of excursionists ran to their death at Mount Desert ferry. The catastrophe was frightful in the extreme for it came while scores of persons, young and old, were penned into a trap, to escape from which they fought with desperation against great odds.

It was the worst accident remembered in the history of the state and especially in the career of the Maine Central road under whose auspices so many excursionists had been brought there. Two hundred of them, or about that number rushing from the train to the boat which was to carry them to Bar Harbor were without warning plunged into the water through a fatal trap.

Penned in on three sides by the piling of the wharf and on the fourth by the boat, they fought for a few minutes while a hundred or more excursionists, stupefied, and falling at first to realize the enormity of the tragedy, they were witnessing, looked down from the wharf above.

The Maine Central railroad ran excursionists to Bar Harbor from all sections of its line in Maine, the attraction being the warships which were expected. All the forenoon long trains, packed with excursionists, were rushing to Bar Harbor. The train which left Bangor at 8:25 consisted of 12 cars jammed with people. At Mount Desert ferry, the terminus of the line, the train is left for the boat, for an eight mile sail to Bar Harbor. The train runs out onto the wharf and it is but a step from the train to the boat. The wharf is owned by the Maine Central railroad and the boat is a part of its system. From the wharf a slip or gang plank 100 feet long and 10 feet wide, led up to the boat. The slip was hinged at the inner end, the outer end being supported by chains by which it was raised or lowered to suit the tide. The wharf extends on both sides flush with the end of the gangplank. The plank was of wood. Five timbers, four by twelve inches, set vertically, ran the length of the plank and these were crossed by 2-inch planking. It is said that there was no support for the plank between the hinges at the outer end.

When the excursion train from Bangor arrived at the ferry there was a rush for the steamer Sappho. The first few passengers had crossed the gang plank safely and it is said that 200 people were massed upon the plank. Suddenly they felt the plank give and unconsciously they were revolved with difficulty. Doctors were summoned from all directions, but it was half an hour before the first arrived. The freight house at the ferry was turned into a morgue, the bodies being taken there for identification as fast as recovered. By noon it had been recovered. Three other persons were taken on board the Sappho and died on the way to Bar Harbor.

The exact number of dead will not be known for some time as a strong tide sweeps under the pier, and some bodies may have been carried away by it. A diver who was set at work without delay was engaged in the search, but only 17 bodies were found.

CONSUMPTION REMEDY. French Physician Discovers a Treatment That is Successful. WASHINGTON, Aug. 5.—A new remedy for tuberculosis, developed in France, has been reported to the state department by United States Commercial Agent Atwood at Roubaix. It is a treatment called the attention of the academy of medicine by Dr. Mendel, and consists in the daily injection into the bronchial tubes of essence of eucalyptus, thyme and cinnamon, held in solution in olive oil. The oil in descending slowly comes into contact with the walls of the tube and upper lungs. The gas set free saturates the air in the lungs and acts on the mucous membrane. In 16 cases treated after one or two weeks there was in all a lessening or complete cessation of the cough or expectoration, as well as a return of sleep, appetite and strength.

Cleveland Strike About Ended. CLEVELAND, Aug. 7.—It is announced that all the military will soon be withdrawn from Cleveland. Violence has ceased entirely and there is no apprehension of a fresh outbreak. The action of the merchants in declaring their purpose to resist the boycott has already had its effect. The cars were well patronized on the Euclid and Cedar lines and there was a noticeable increase in the number of passengers carried on other lines. Extent of a French Railroad Disaster. PARIS, Aug. 7.—The official investigation into the collision at Juvisy, a suburb of Paris, on the southern side, between the Orleans lines Paris and Nantes train and the Paris and Lyons Mediterranean train, shows that 17 persons were killed and 73 injured.
