DEWEY'S LAST LANDING. The Olympia Will Start From Gibraltar

REVIEW OF TRADE. fradstreet's Weekly Report on the Con

NEW YORK, Sept. 2.-Bradstreets says: With an exceptionally heavy business already booked for the latter portion of the year the mercantile community faces the trade situation with confidence, testified to by very generally firm prices and with quotations in a number of lines showing further marked advances. The most conspicuous exception to this is found in cereals, which are weak and declining. Lower prices for wheat, corn and oats point to speculative liquidation of tired holders, who, with confidence in the future of prices, have weakened under unsatisfactory foreign demand, larger receipts and the near approach of expected heavier crop movements. Corn crop prospects, though less rosy, still point to a full yield. Cotton, too, has weakened slightly, chiefly because of advices of rains at the South, though Texas crop advices are still

unsatisfactory, and stories of permanent damage are forthcoming. With these exceptions, most staples are either firmly held or evince decided progress upward, notable in this latter respect being iron and steel of all kinds, but particularly pig iron, which now is the center of trade interest, owing to heavy demand, particularly for foundry grades, at advancing prices. Trade reports would seem to indicate that a good part of the productive capacity of the country is already engaged for the first half of

August witnessed a general gain in the prices of cotton and woolen goods, evidently the outcome of active demand, judging from reports from leading

Scarcity of material and backward deliveries of same are reported by clothing manufacturers at many points north, west and south. Discussion of River mill interests has been less marked this week, but there is confidence in some circles that something of the sort will ultimately transpire. Among other textiles strength is specially notable in hemp in sympathy with London, whence come reports that Philippine shipments will shortly

cease.
Increased strength has been imparted to hides and leather this week by the launching of the new upper leather combination. Boot and shoe manufacturers are actively employed, but the margin of profit is reported to be exceedingly small, owing to keen competition, and this, among other reasons, may be responsible for the rumors of a great combination of shoe manufacturers, projected. Lumber retains all its old activity

and in some lines manifests new strength as regards prices. The refined sugar war apparently still continues, one result being the

stimulation of consumption to a notable extent. Busines fallures for the last week

are the smallest report for a long time, numbering only 131 as compared with 154 last week, 164 in this week a year ago, 198 in 1897, 336 in 1896 and 184

LONDON. Sept. 4.-The Johannes-

Should Dreyfus Be Convicted American Jews Will Show Resentment, CHICAGO, Ill., Sept. 4.-Should Cap-

tain Dreyfue be convicted by the court martial at Rennes, France, prominent Jews of Chicago will call a massmeeting to take action intended to show the resentment of American Jews at the manner in which the artillery officer has been treated. Some of the leaders in the project say it may lead to the boycotting by American Jews of the Paris exposition of 1900 and of French goods imported to this country,

Trips to France will also be excluded from the European Itinerary of Jewish families that go abroad in the event that Dreyfus is convicted, so say those who are acting in the agitation.
