on a run of mine basis. The operators offered an advance of 9 cents per ton for mining, with the screens remaining the same as at present. A further condition in their proposition is that the state of Illinois, which is now on a run of mine basis, must come in under a double standard arrangement and return to using

screeps. President John Mitchell, of the mine workers, moved the adoption of the miners' scale. F. H. Robbins, c Pennsylvania operator, moved to am and the motion by adopting the scale of the operators. The matter was then opened for discussion.

The final outcome of the matter, as predicted by those who have attended other conferences, is that the operators will bay a few cents per ton more than their first offer of 9 cents advance, the miners will come to the screen agreement remaining as it is at present and the Illinois miners will come into the double standard agreement now in force in the three other states of the competitive field. In order to arrive at this settlement sufficient pressure will be necessary to bring the Illinois miners into a compact of this kind.

The miners of that state are making money and have a large sum available for a defense fund. These conditions do not exist in all of the other states, and the influence needed to make Illinois accept a return of the screens mutt come from the delegates representing the miners in Ohio, Indiana and Pennsylvania.

The miners, especially those from Itlinois, who outnumber the delegations from other states said they despaired of effecting an ugreement at this convention. They say that an advance of even 25 cents a ton and the re-enactment of the double standard of measurement would mean a reduction to them and that they would rather remain out of work an entire year than accept the double standard.
