

WEDNESDAY, MAY16

The coming of Spring is associated in the minds of most people with house-cleaning and the general renovating that makes the immortal words of Payne-"There's no place like nome"-a hollow mockery and burlesque. True, there is no place like home, at such times, and we are very glad of it. But after order has come out of chaos and a man ceases to run the risk of death by lockjaw from coming in contact with the business end of a tack while hunting the colic bottle in the dead of a dark night, "There is no place like home" sgain means something to humanity and man decides that after all housecleaning pays.

It is wonderful what a lot of beauty can be gotten out of a few dollars' worth of paint and paper property ap plied. And it doesn't take many dollars' worth either, when one can buy paper as low as Cc cents a single bolt. Good paper, too. We have as good a line of paper as can be seen elsewhere in Tionesta, perhaps better, but we'll let you judge for yourself as to that.

A word about paint:-Unlike wall paper, low-priced paint isn't cheap. In wall paper you get good value for what you pay-little or much, but there is only one kind of paint that is cheap and that is the best that can be bought. John Lucas & Co. have been making paint for a great many years. It may not be the only good paint made but there is none better and you rre not taking chances when you buy it, as you are in purchasing paints made by comparatively new and obscure manufacturers. It is the only brand we keep. Color cards can be had for the asking.

Major's Celebrated Cement.

We are in receipt of a letter from Mr Major, the famous cement man, of New York, in which he sets forth some very interesting facts about Major's Cement. The multitudes who use this standard article know that it is many hundred per cent, better than other cements, for which similer claims are made, but a great ing her with four young children. Two many do not know why. The simple reason is that Mr. Major uses the best materials ever discovered and other manufacturers do not use them, because they are too expensive and do not allow ceding her to the grave. She was a daugh- large profits. Mr. Major tells us that one of the elements of his cement costs \$3.75 a pound, and another costs \$2.62 a gallon, while a large share of the so-called church and lived a consistent Christian cement and liquid glue upon the market for more than seventy years. At the are nothing more than sixteen-cent glue, time of her death she was a member of dissolved in water or citric acid, and, in Mt. Major's cement retails at mains were laid to rest by the side of her fifteen cents and twenty-five cents a bottle, and when a dealer tries to sell a substitute you can depend upon it that his only object is to make larger profit. The profit on Major's cement is as much as any dealer ought to make on any cement. And this is doubly true in view of a fact tha' each dealer gets his share ot the benefit of Mr. Major's advertising, which now amounts to over \$5000 a month

The fond parents had watched for months, hoping against hope, for a favorable turn in the little suefferer's condition, but all efforts were powerless to stay the ravages of the disease, and they could only administer

such comforts as would ease and relieve the child from too great suffering. Mr. and Mrs. Canfield have the sympathy of all our community in this affliction. Cut Prices on Job Printing.

We want to talk a little to our merch ants and others who consume printing. We have a few plain facts we want to present to them. It's not a case of "beef" or scold, but

simply a comparison. The cheap printing man has been

town in person and by sample. His prices are low(?) They are considerably lower than any of the local offices ask.

Can't we do it at the same price? But that's another story, and will be onsidered again.

You know it's easy to say to the printer: "Oh you are too high; we can get this work for so and so.

Observe this now :

The furniture man in the city advertiscs goods away down, and we go to the local dealer, and ask him about it. And he truly says: "Inferior article." The city dentist says he will make teeth at half the price charged here.

The local dentist truly says : ' Inferior work and material."

The city tailor says he will make a suit for a whole lot less than the local man. The local tailor truly says : "Not well made.'

The city druggist advertises medicines at cut rates.

The local druggist says: "Inferior and worthless drugs."

The city grocer, dry goods man, and others quote prices the local man don't touch, but the local truly remarks : "Not the same goods,"

The city doctor advertises to cure you for a small price, and the local physician quistly but very truthfully says: 'Quack."

With a daily paper before us just now we see things advertised, so we know offered away down. Oh no, not by

good bit. And now the moral:

No story is worth anything without a moral.

The moral is: "The local printer is not 'the only pebble on the beach, who don't compete with the cut-throat fakir." Mr. Business Man, you don't compete cessfully either; why do you expect your neighbor in the printery to do so

Try thinking about it. Try looking at the "cheap man" in your own line. It's a double action story.-Latrobe
