PHILADELPHIA, Sept. 3.-Thirteen persons killed and over 40 others in jured is the appalling record of a rear end collision between an excursion train and a milk train on the Bethle hem branch of the Philadelphia and Reading rallway vesterday morning a

The wrecked train consisted of 10 day coaches, and was the first section of large excursion made up of people fron Bethlehem. Allentown and surrounding towns to Atlantic City. This section carried only those persons who lived in Bethlehem and Allentown and left the Union depot in Bethlehem at 6:05 a. m. exactly 35 minutes behind the milk train. The latter train consisted of two milk cars and two passenger coaches the road from Bethlehem en route to Philadelphia.

The locomotive was a mass of bent and broken fron and firmly held the bodies of its engineer and fireman beneath its great weight Behind the engine, six of the 10 cars were also a mass of wreckage. Groves, train dispatcher at Philadelphia; B. Beidler, operator at Souderton 2 1-2 miles from Hatfield, and John Davis, engineer of the colliding excur-

sion train, who is dying in a hospital at Bethlehem. According to James Benner, flagman at Souderton station, the milk train passed that station on time and following the rule of the company which requires any train coming after another within five minutes to be stopped, he placed a red flag between the tracks. In three minutes the excursion came thundering along making 40 miles an hour. Davis made no effort to stop and waved Benner to one side. The latter had only time to secure his flag and spring out of danger as the train ewent by Looking unward he saw that Beidler had a clear signal set. Beidler when questioned said he had received no orders to stop the train. Graves is supposed to have sent such orders. Besides according to General Superintendent Sweigard, all agents must stop
